This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of section 552b of Title 5; United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endownment for the Arts, Washington, D.C. 20506, or call (202) 634–6070.

Dated: August 5, 1980.

John H. Clark,

Director, Office of Council and Panel Operations, National Endownment for the Arts.

BILLING CODE 7537-01-M

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Information Science and Technology; Notice of Meeting

In accordance with the Federal Advisory Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Information Science and Technology.

Date and Time: September 4 and 5, 1980, 9 a.m. to 4 p.m each day.

Place: Room 540, National Science Foundation, 1800 G Street, NW, Washington, DC 20550.

Type of Meeting: Part Open—Open 9/4–9:00 a.m. to 12:00 p.m.—Closed 9/4–1:00 p.m. to 4:00 p.m.—Closed 9/5–9:00 a.m. to 12:00 p.m. Part Open—Open 9/5–1:00 p.m. to 4:00 p.m.

Contact Person: Mrs. Darcey Higgins, Room 1250, National Science Foundation, Washington, DC 20550. Telephone: 202/357–9572. Persons planning to attend should notify Mrs. Higgins by August 28, 1980.

Summary Minutes: May be obtained from the Contact Person, at the above stated address.

Purpose of Committee: To provide advice, recommendations, and oversight concerning support for activities related to the Foundation's program in information science and technology.

Agenda: Open—Septemer 4, 1980

9:00 a.m.–12:00 p.m.

Welcome and Introductory Remarks.
Review of the Division of Information Science and Technology Activities for FY 1980.
Working Group on Information Technology: Discussion of Meeting and Report.
Miscellanea.

Closed—September 4, 1980

1:00 p.m.–4:00 p.m.

Review and comparison of declined proposals (and supporting documentation) with the successful awards under the Division of Information Science and Technology, including review of peer review materials and other privileged material.

Closed—September 5, 1980

9:00 a.m.–12:00 p.m.

Continuation of review and comparison of declined proposals (and supporting documentation) with the successful awards under the Division of Information Science and Technology, including review of peer review materials and other privileged material.
Report to the Director.

Open—September 5, 1980

1:00 p.m.–4:00 p.m.

Organizational Locus of IST.
Public Participation.

Reason for Closing

The meeting will deal with a review of grants and declinations in which the Committee will review materials containing the names of applicant institutions and principal investigators and privileged information contained in declined proposals. This meeting will also include a review of peer review documentation pertaining to applicants. Any non-exempt material that may be discussed at this meeting (proposals that have been awarded) will be inextricably intertwined with the discussion of exempt materials and no further separation is practical.

These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c) the Government in the Sunshine Act.

Authority to Close Meeting

This determination was made by the Committee Management Oficer pursuant to provisions of Section 10(d) of P.L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

Note: This notice is being amended primarily to change the times of the open and closed sessions. The agenda is basically the same as that published in the **Federal Register** on Friday, August 15, 1980.

Dated: August 14, 1980.

M. Rebecca Winkler,

Committee Management Coordinator.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Reactor Fuel; Meeting

The ACRS Subcommittee on Reactor Fuel will hold a meeting on September 3, 1980 in Room 1046, 1717 H St., NW, Washington, DC., to complete its review of NUREG–0630, "Cladding Swelling and Rupture Models for LOCA Analysis." Notice of this meeting was published July 25, 1980.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1979 (44 FR 56408), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows:

Wednesday, September 3, 1980, 1:00 p.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information about topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Paul Boehnert (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m., EDT.

Dated: August 13, 1980.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 80-24984 Filed 8-18-80; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on Safety Philosophy and Criteria; Meeting

The ACRS Subcommittee on Safety Philosophy and Criteria will hold a meeting on September 3, 1980 in room 1046, 1717 H St., NW, Washington, DC to review the NRC Staff's general approach to developing licensing requirements in a number of areas, including Near-Term Construction Permit (NTCP) requirements, the effect of nonsafety systems on plant safety functions, and the requirements for future LWRs. The Subcommittee also plans to begin a review of the nuclear accident cascades issue.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1979, (44 FR 56408), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows:

Wednesday, September 3, 1980, 9:00 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff,

their consultants, and other interested persons regarding this review.

Further information about topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Dr. Richard Savio (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m., EDT.

Dated: August 13, 1980.

John C. Hoyle,

Advisory Committee Management Officer.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 21677; (70–6117)]

Alabama Power Co.; Post-Effective Amendment Relating To Issuance and Sale of Short-Term Notes to Banks and Dealers in Commercial Paper; Exception From Competitive Bidding

August 11, 1980.

Notice is hereby given that Alabama Power Company ("Alabama"), P.O. Box 2641, Birmingham, Alabama 35291, an electric utility subsidiary of The Southern Company ("Southern"), a registered holding company, has filed post-effective amendments to the application-declaration in this proceeding, pursuant to Sections 6, 7 and 12 of the Public Utility Holding Company Act of 1935 ("Act"), and Rules 45 and 50(a)(5) promulgated thereunder, as applicable to the proposed transactions. All interested persons are referred to the amended application-declaration, which is summarized below, for a complete statement of the proposed transactions.

Alabama currently is negotiating to extend its Revolving Credit Agreement with a group of banks for a period of one year so that the expiration date thereof will be September 30, 1981, rather than September 30, 1980. The Revolving Credit Agreement provides a $500,000,000 line of credit. Alabama has additional lines of credit from other banks, principally in the State of Alabama, aggregating approximately $75,000,000 and issues commercial paper. Alabama now requests that its short-term borrowing authorization be extended through September 30, 1981 and be increased to permit a maximum aggregate principal amount outstanding at any one time of $575,000,000.

In general, borrowings are in the form of unsecured promissory notes, of a maturity of nine months or less. Except for commercial paper, issued for much shorter periods, such notes are prepayable without penalty. The credit agreements give Alabama the right to refund maturing obligations, within the limits specified in those agreements. The base interest rate on the first $250,000,000 of borrowing under the Revolving Credit Agreement is the higher of 108% of the base rate of Citibank, or ½ of 1% above a defined commercial paper rate. The base rate will apply only if Alabama's bond rating is upgraded to a single A category. An additional ¼ of 1% is added, as long as the bond rating is lower. Borrowings above the $250,000,000 level cost 110% of the applicable rate.

A two part commitment fee is charged, consisting of 7½% of the variable interest rate which is or would be applicable to the first $250,000,000 of borrowings and 10% of the rate applicable to the second $250,000,000, plus ½ of 1% on the unborrowed portion. No compensating balance is required. The local bank credit agreements generally require compensating balances of up to 20% of the amounts borrowed, and bear interest at the lenders' prime rates.

Based on the current Citibank rate of 10% per annum, Alabama's current bond ratings and the approximate balance of $286 million as of July 31, 1980, the effective interest rate under the Revolving Credit Agreement is 14.21% per annum. The effective interest rate on the local bank borrowings, based on an 11% prime rate, is approximately 13.75% per annum.

The Revolving Credit Agreement was entered into as of March 31, 1978, pursuant to an order entered in this proceeding on March 24, 1978 (HCAR No. 20469), which reserved jurisdiction over $250,000,000 of the authorized borrowings thereunder. Further orders on March 23, 1979 (HCAR No. 20970), and August 16, 1979 (HCAR No. 21188) were entered, the last reserving jurisdiction over the final $100,000,000.

The capitalization of Alabama, at December 31, 1979 and March 31, 1980 consisted of:

[Dollars in millions]

	Dec. 31, 1979		Mar. 31, 1980	
	Amount	Percent	Amount	Percent
Long-term debt	$1,884	51.4	$1,883	50.4
Interim obligation	353	9.6	394	10.5
Current maturities	24	0.6	29	0.8
Subtotal	2,261	61.6	2,306	61.7
Preferred stock	384	10.5	382	10.2
Common equity	1,023	27.9	1,050	28.1
Total	3,668	100.0	3,739	100.0

Prolonged rate litigation had precluded long-term financing, except for common equity supplied by Southern and compelled a sharp curtailment of Alabama's previously planned expenditures. Relief obtained in 1979 has permitted Alabama to develop a financial plan, based on bond and stock financing, which contemplates the payment of the accumulated borrowings in 1980 and a return to a normal level and cycle of short term borrowings and security sales. The first $100,000,000 of new bonds were sold pursuant to the order of June 3, 1980 (HCAR No. 21605) and an application-declaration for sale of the next series, of the same size, is pending. Alabama's gross capital addition budget is about $425 million for 1980, of which about $130 million had been expended as of April 11, 1980, and its budget for the first three quarters of 1981 is about $370 million.

The timing of the full financing program is subject to market conditions and other variable factors. Alabama states that the extension of the Revolving Credit Agreement and the borrowing authorization requested is necessary to permit it to cope with possible delays and contingencies.

The Alabama Public Service Commission has authorized the proposed transactions. No other state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions. A statement of the fees, commissions and expenses to be incurred in connection with the proposed transaction will be filed by amendment.

Notice is further given that any interested persons may, not later than September 4, 1980, request in writing that a hearing be held on such matter stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said post-effective amendment, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-delcarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as now amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof, or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

Shirley F. Hollis,

Assistant Secretary.

[FR Doc. 80-25229 Filed 8-18-80; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. 11299; (811–502)]

Bondstock Corp.; Filing of Application Pursuant to Section 8(f) of the Act for Order Declaring That Applicant Has Ceased To Be an Investment Company.

August 11, 1980

Notice is hereby given that Bondstock Corporation ("Applicant") 1100 One Washington Plaza, Tacoma, Washington 98402, registered under the Investment Company Act of 1940 ("Act") as a diversified, open-end, management investment company, filed an application on May 19, 1980, for an order of the Commission, pursuant to Section 8(f) of the Act, declaring that Applicant has ceased to be an investment company as defined by the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is a corporation organized and existing under the laws of the State of Delaware and that on December 1, 1948, it registered under the Act. Its initial registration statement filed pursuant to the Securities Act of 1933 ("1933 Act"), covering 288,500 shares of common stock, became effective on December 20, 1949. According to the application, in December, 1954, Applicant became an open-end investment company and commenced a continuous offering of its shares. Applicant represents that it maintained the continuous offering of its shares until January 23, 1980, when the sale of such shares was permanently discontinued.

According to the application, the Board of Directors approved, originally on February 21, 1979, and subsequently on May 18, 1979, August 24, 1979, and January 22, 1980, an Agreement and Plan of Reorganization ("Plan") whereby substantially all the property, assets and goodwill of Applicant would be transferred to Security Equity Fund, Inc. ("Equity"), a company registered under the Act as an open-end, diversified, management investment company, in exchange for shares of voting capital stock of Equity. The plan was approved by Applicant's shareholders on January 23, 1980.

Applicant states that prior to the exchange of shares pursuant to the Plan, it paid, in cash or through dividend reinvestment, a final dividend of $0.11 per share to shareholders of record on January 22, 1980. Applicant further states that as of January 23, 1980, the effective date of the reorganization, it had 2,463,973.622 shares of common stock, par value of $1.00, outstanding, with a per share net asset value of $6.25, resulting in an aggregate net asset value of $15,405,330 for Applicant, and that the net asset value per share of Equity as of that date was $5.91.

Applicant states that pursuant to the Plan: (1) all of its assets, including portfolio securities, were transferred to Equity in exchange solely for shares of capital stock of Equity, and (2) the number of shares of Equity received by Applicant was determined on the basis of relative net asset values, using Equity's valuation procedures to value Applicant's assets. Applicant further states that immediately following the closing, it distributed pro rata to its shareholders of record as of the close of business on January 23, 1980, the shares of Equity it received, which resulted in Applicant's shareholders receiving 1.058 shares of Equity for each share of Applicant.

Applicant represents that $61,417 of expenses were incurred in connection with the reorganization and that such expenses were allocated between Applicant and Frank Russell Co., Inc. ("Russell"), its investment adviser, with Russell paying $20,000 and Applicant bearing the remaining $41,417. Applicant estimates that approximately $7,000 of these expenses would have been incurred in the normal course of operations. Applicant states that at this time it has no security holders; it is not a party to any litigation or administrative proceedings; and it is not now engaged and does not propose to engage in any business activities other than those necessary for the winding up of its affairs.

On February 12, 1980, Applicant filed Articles of Dissolution with the Secretary of the State of Delaware. Applicant states that as of April 30, 1980, it had retained assets of $110.85 to cover miscellaneous expenses connected with its dissolution and that as of March 30, 1980, there was a remaining balance of $3,017.73 in a corporate checking account representing thirty dividend checks not yet presented

to the bank for payment, which constitutes the only known liability of Applicant which remains outstanding. Applicant represents that it has made extensive efforts to locate the shareholders entitled to those dividend checks and that Security Management Company (investment adviser of Equity) will continue the efforts to locate such shareholders. In addition, Applicant states that such monies will be held by Russell in a separate bank account until shortly before the end of 1980, at which time the monies will be distributed under applicable escheat laws.

Section 8(f) of the Act provides, in part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and, upon the taking effect of such order, the registration of such company under the Act shall cease to be in effect.

Notice is further given that any interested person may, not later than September 8, 1980, at 5:30 p.m., submit to the Commission in writing a request for a hearing on this matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley F. Hollis,

Assistant Secretary

[FR Doc. 80-25228 Filed 8-18-80; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. 11294; (812-4649)]

Chase Fund of Boston, et al.; Filing of an Application for an Order of the Commission Exempting Certain Proposed Exchanges From Section 22(c) of the Act and Rule 22c-1 Thereunder Pursuant to Section 6(c) of the Act and Exempting Such Proposed Exchanges From Section 17(a) of the Act Pursuant to Section 17(b) of the Act

August 8, 1980.

In the matter of The Chase Fund of Boston, Shareholders' Trust of Boston, Chase Special Fund of Boston, Inc., Chase Frontier Capital Fund of Boston, Inc., Phoenix Investment Counsel of Boston, Inc., 535 Boylston Street, Boston, Massachusetts 02116; Phoenix Fund, Inc., Phoenix Capital Fund, Inc., Phoenix Equity Planning Corporation, Phoenix Mutual Life Insurance Company, One American Row, Hartford, Connecticut 06115.

Notice is Hereby Given that Shareholders' Trust of Boston ("Shareholders"), Chase Special Fund of Boston, Inc. ("Special"), Chase Frontier Capital Fund of Boston, Inc. ("Frontier"), Phoenix Fund, Inc. ("Phoenix Fund"), Phoenix Capital Fund, Inc. ("Phoenix Capital") (hereinafter collectively referred to as "the Funds"), and The Chase Fund of Boston ("Chase"), all registered under the Investment Company Act of 1940 ("Act") as open-end, diversified, management investment companies, and Phoenix Investment Counsel of Boston, Inc. ("Phoenix of Boston") and Phoenix Equity Planning Corporation ("PEPCO"), both registered under the Investment Advisers Act of 1940 ("Advisers Act") and Phoenix Mutual Life Insurance Company ("Phoenix Mutual") (the Funds, Chase, Phoenix of Boston, PEPCO and Phoenix Mutual hereinafter referred to as "Applicants"), filed an application on February 1, 1980 and an amendment thereto on June 17, 1980, in connection with the proposed acquisition by Chase, after the recapitalization of Chase as a series fund, of the assets of the Funds ("Proposed Exchanges"). The application requests an order of the Commission (1) pursuant to Section 6(c) of the Act exempting the Proposed Exchanges from the provisions of Section 22(c) of the Act and Rule 22c-1 thereunder, to permit the issuance of shares of the series fund at net asset value, but at a price other than the price next determined after receipt of a purchase order; and (2) pursuant to Section 17(b) of the Act exempting the Proposed Exchanges from the provisions of Section 17(a) of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Chase was organized as a Massachusetts business trust on April 7, 1958. As of October 31, 1979, Chase had net assets of approximately $25.5 million beneficially owned by approximately 8,000 shareholders. The primary investment objective of Chase is capital appreciation.

Shareholders was organized as a Massachusetts business trust on March 13, 1948. As of October 31, 1979, Shareholders had net assets of approximately $38 million beneficially owned by approximately 5,800 shareholders. The investment objectives of Shareholders are: (a) the conservation of principal; (b) the production of a reasonable amount of current income; and (c) the possible enhancement of principal income.

Special was organized as a corporation under the laws of the Commonwealth of Massachusetts on February 24, 1969. As of October 31, 1979, Special had net assets of approximately $10.8 million beneficially owned by approximately 4,900 shareholders. The investment objective of Special is capital appreciation. Special may from time to time employ "leverage" by borrowing from banks at fixed amounts of interest and investing the borrowed funds to increase its ownership of securities holdings above the amounts otherwise possible.

Frontier was organized as a corporation under the laws of the Commonwealth of Massachusetts on January 26, 1968, and has qualified as a diversified, open-end investment company since December 1, 1971. As of October 31, 1979, Frontier had net assets of approximately $12.6 million beneficially owned by approximately 6,700 shareholders. Frontier's investment objective is appreciation of investors' capital. Frontier may from time to time employ "leverage" by borrowing from banks at fixed amounts of interest and investing the borrowed funds to increase its ownership of securities holdings above the amounts otherwise possible.

Phoenix Fund was incorporated under the laws of the State of Maryland on January 2, 1970. As of October 31, 1979, Phoenix Fund had net assets of approximately $16.9 million beneficially owned by approximately 2,200 shareholders. Phoenix Mutual owned outright 5.4 percent of the outstanding voting securities of Phoenix Fund as of October 31, 1979. The investment objective of Phoenix Fund is to produce

current income with due regard for both capital enhancement and the need to protect capital values.

Phoenix Capital was incorporated under the laws of the State of Maryland on December 4, 1979. On October 31, 1979, the net assets of Phoemix Capital were approximately $8.9 milliom beneficially owned by approximately 1,700 shreholders. Phoenix Mutual owned by approximately 1,700 shareholders. Phoenix Mutual owned outright 7.6 percent of the outstanding voting securities of Phoenix Capital as of October 31, 1979. Phoenix Capital's investment objective in th seek long-term growth of capital.

Phoenix of Boston is the investment adviser for Chase, Shareholders, Special and Frontier. Phoenix of Boston will be the investment adviser of the series fund following the proposed transactions. All of the outstanding stock of Phoenix of Boston is owned by PEPCO, a wholly owned subsidiary of Phoenix Mutual.

PEPCO is the investment adviser to Phoenix Fund and Phoenix Capital and is the national distributor for Chase and the Funds and will continue to be the national distributor for the series fund following the proposed transactions. PEPCO also performs bookkeeping and pricing services for Chase and the Funds and will perform those services for the series fund. PEPCO also performs bookkeeping and pricing services for Chase and the Funds and will perform those services for the series fund. PEPCO is registered as a broker dealer in approximately 40 states. PEPCO was organized in 1968 and acquired Phoenix of Boston (then known as John P. Chase, Inc.) in 1975.

Phoenix Mutual is a mutual life insurance company formed under the laws of Connecticut. It is in the business of writing ordinary and group life and health insurance and annuities.

Pursuant to a Plan of Recapitalization, Chase proposes to amend its Declaration of Trust to change its name to Phoenix-Chase Series Fund ("Series Fund") and to provide its trustees with the authority from time to time to divide the class of shares into two or more series of shares ("Recapitalization"). The amendment to the Declaration of Trust would establish and designate the following series of shares: Phoenix-Chase Growth Fund, Phoenix-Chase Stock Fund, Phoenix-Chase Balanced Fund, Phoenix-Chase Money Market Fund, and Phoenix-Chase High Yield Fund. Under the amendment to the Declaration of Trust, shares of Chase outstanding as of the effective date of the amendment would become shares of the Growth Fund series. The conversion ratio would be share for share, and all assets and liabilities of Chase would be assets and liabilities of the Growth Fund series. Simultaneously, the registration statement of Chase on Form N-1 would be amended to provide for the public offering of shares of the Growth Fund series, the High Yield Fund series, and the Money Market Fund series. Applicants further state that Phoenix Mutual has made an initial investment of $4,500,000 in shares of the High Yield Fund series and $2,200,000 in shares of the Money Market Funds series, as a result of which it owns over five percent of the shares in the Series Fund.

Applicants further propose that following such Recapitalization and pursuant to the terms of Agreements and Plans of Reorganization ("Plans"), each of the Funds will, on a Closing Date to be determined separately for each of the Funds, transfer substantially all of its assets to one of the series (hereinafter referred to as "the applicable series") of the Series Fund in exchange for shares of beneficial interest in such applicable series ("Proposed Exchanges"). The applicable series for each of the Funds is as follows:

Fund	Phoenix-chase series
Shareholders	Balanced Fund
Phoenix Fund	Balanced Fund
Special	Stock Fund
Frontier	Stock Fund
Phoenix Capital	Growth Fund

Applicants state that it is expected although not required by the Plans that all the Proposed Exchanges will occur simultaneously and that the value of the assets of each of the Funds, for purposes of the Proposed Exchanges, will be net asset value computed as of the Effective Date for each of the Funds. The Effective Date of the Proposed Exchanges will be as of the close of business on the day preceeding the Closing Date. The net asset value of each of the Funds will be computed on the basis of the valuation procedures customarily used by the respective Funds, adjusted for the payment of amounts for expenses, liabilities for dividends or distributions, appraisal rights and any Federal or state income or other taxes arising out of the Proposed Exchanges and dissolution of the Funds. Applicants state that the Money Market Funds series and the High Yield series will not be involved in the Proposed Exchanges.

According to the Plans, the number of shares of the applicable series to be issued will be determined by dividing the aggregate value of the net assets to be transferred by each of the Funds by the net asset value per share of the applicable series on the Effective Date of the Proposed Exchanges. The net asset value per share of the applicable series as of the Effective Date will be determined to the nearest one-hundredth of as full-cent as follows:

a. In the case of any series which has assets prior to the Closing Date, by using the same valuation procedures used by it in respect to the public sale of its shares as set forth in its then current prospectus, or

b. In the case of any other series, by dividing the value of the net assets (determined as set forth above) of the Fund (or, if closings are held with more than one fund on the same day involving the same series, then whichever such fund has the greater number of shareholders) by the aggregate number of its full and fractional shares outstanding as of the Effective Date.

Applications further represent that no adjustment will be made in the number of shares of the Series Fund issued based on unrealized appreciation or depreciation or capital loss carryovers as the boards of directors or trustees of Chase and the Funds have each determined that the benefit or detriment, if any, to their shareholders from such amounts would be too speculative or theoretical to justify such action.

Pursuant to the Plans, each of the Fund will approve a Plan of complete Liquidation and Dissolution pursuant to which the shares of the applicable series received on the Closing Date will be distrubuted by such Fund ratably to its shareholders in exchange for and complete cancellation and retirement of all its issued and outstanding shares and in complete liquidation of such Fund, followed by its dissolution.

According to the application, as supplemented by a letter of August 4, 1980, the amendment of the Declaration of Trust for Chase was approved by Chase's shareholders on July 12, 1980, and such amendment became effective on July 28, 1980. The letter further states that the relevant Plans are expected to be submitted for the approval of the respective shareholders of each Fund prior to October 31, 1980.

The obligations of Chase and each of the Funds in the Proposed Exchanges are conditional upon: the approval of the requisite number of shareholders of Chase and the Funds, respectively, of the amendment to the Declaration of Trust of Chase and of the Plans; the registration with the Commission of the shares of beneficial interest of the Series Fund to be issued; the receipt of a favorable ruling from the Internal Revenue Service or a written opinion of counsel, satisfactory to the parties, as to

the qualification of the Proposed Exchanges as tax-free reorganizations under the Internal Revenue Code; comparable rulings or opinions concerning the tax consequences under Massachusetts law; the issuance of an order from the commission providing an exemption from the applicable provisions of sections 17 and 22 of the Act as amended, or such other orders as such parties' counsel may deem advisable; and certain standard conditions relating to compliance with the terms of the Plans.

Applicants state that it has been agreed that all expenses directly related to the Recapitalization and Proposed Exchanges, over and above the normal annual meeting expenses of Chase and the Funds, will be borne by Phoenix of Boston, the investment adviser of Chase, Shareholders, Special, Frontier and the Series Fund (following the recapitalization of Chase). Applicants further state, however, that each Fund may choose to pay some portion of the reorganization expenses if it is found to be consistent with its representations in the Plans, more particularly, the representation of each party to the Proposed Exchanges that such amounts will be limited as nearly as possible to the amount necessary to preserve its status as a regulated investment company under Subchapter M of the Internal Revenue Code.

Applicants further state that the terms of the proposed investment advisory contract between the Series Fund and Phoenix of Boston provide for an adviser's fee of 0.5 percent of the first $500 million, 0.45 percent of the next $500 million and 0.40 percent of the excess over $1 billion of the average net asset value of the Series Fund for the fiscal year. The advisory fee applicable to the growth Fund series will be 0.45 percent until the total net assets of the Series Fund exceed $100,000,000. According to the application, such amounts will be prorated among the series in proportion to their respective aggregate average of daily net asset values. Applicants further state that a proposed financial agent agreement with PEPCC provides that PEPCO will prepare tax returns and bookkeeping schedules required by the Series Fund's auditors and the at PEPCO will provide essentially the same services relating to the registration and qualification of the Series Fund and its shares with the Commission and the states in which such shares are offered as are now provided in the existing investment advisory agreements of Chase and the funds.

Section 22(c) of the Act, and Rule 22c–1 thereunder together provide, in part, that a registered investment company may not issue its redeemable securities except at a price based on the current net asset value of such security which is next computed as of the close of trading on the New York Stock Exchange next following receipt of an order to purchase such security.

The Plans provide that the assets of each of the Funds and the net asset value of the applicable series will be valued as of the time of the close of trading on the New York Stock Exchange on the last business day preceding the Closng Date of the Proposed Exchanges. Thus, the "forward pricing" requirement of Section 22(c) of the Act and Rule 22c–1 thereunder will not be met.

Applicants assert that, as a practical matter, valuation of the assets of the Funds and the shares of the applicable series as of the last full business day preceding the Closing Date of the Proposed Exchanges is required in order to determine the number of shares of such applicable series to be issued on the Closing Date. Applicants further represent that, since the Closing Date for each of the Proposed Exchanges will be agreed upon by the respective parties of such Proposed Exchange prior to the time of valuation of the respective assets and shares, and since the net asset values of both the applicable series (if it has assets) and the assets of all the Funds to be acquired on the Closing Date for each Proposed Exchange would be valued at the same time, the proposed valuation procedure will be fair to the shareholders of Chase and the Funds, and will not present any of the potential for abuse that Rule 22c–1 is intended to prevent. Moreover, Applicants state that an investor purchasing or redeeming Fund shares on the Closing Date would not be adversely affected by the proposed valuation procedure since his shares would be valued (as shares of the combined series) in the normal fashion at the price determined as of the close of business on the Closing Date.

Section 69(c) of the Act provides, in part, that the commission, by order upon application, may conditionally or unconditionally exempt any person or transaction from any provision of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants represent that an order exempting Applicants from the provisions of Section 22(c) and Rule 22c–1 thereunder to the extent necessary to enable valuations as of the time set forth above is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the Act.

Section 17(a) of the Act provides, in part, that it shall be unlawfull for any affiliated person of a registered investment company, or any affiliated person of such a person, acting as principal, knowingly to sell to or purchase from such registered investment company any security or other property except securities of which the investment company is the issuer.

Applicants state that no person owns beneficially 25 percent or more of the voting securities of Chase or any of the Funds and, therefore, that Chase and the Funds are not "affiliated persons" or "affiliated persons of affiliated persons" of each other on the basis of presumptive control within the meaning of Section 2(a)(9) of the Act. However, Phoenix of Boston, a wholly-owned subsidiary of PEPCO, is the investment adviser of Chase and all the Funds except Phoenix Fund and Phoenix Capital. PEPCO, which in turn is a wholly-owned subsidiary of Phoenix Mutual, serves as the investment adviser of Phoenix Fund and Phoenix Capital. In addition, the boards of directors and officers of Phoenix Fund and Phoenix Capital are identical, and Phoenix Fund and Phoenix Capital have four officers (but no directors) in common with Chase and the other Funds, and one common director with Frontier. Moreover, Phoenix Mutual shares common directors or officers with all the other Applicants. Accordingly, the Applicants might be deemed to be "affiliated persons" of each other by virtue of being under common control within the meaning of Section 2(a)(3) of the Act and therefore the Proposed Exchanges might be deemed to be prohibited by Section 17(a) of the Act. The application states that, while the Applicants do not necessarily agree with such an interpretation, they have deemed it advisable to resolve any uncertainty by requesting the Commission to exercise its exemptive authority under Section 17(b) of the Act.

Accordingly to the application, it is also possible that Phoenix Fund, Phoenix Capital and the Series Fund might be deemed to be "affiliated persons of an affiliated person" of each other by virtue of Phoenix Mututal's ownership of 5% or more of the stock of Phoenix Fund and Phoenix Capital, and the initial investment by Phoenix Mututal in the shares of the High Yield Fund series and Money Market Fund series, as a result of which Phoenix Mutual is the owner of over 5% of the shares of the Series Fund. Thus, the Proposed Exchange of the assets of Phoenix Fund and Phoenix Capital for the shares of the Series Fund would be prohibited by Section 17(a) of the Act absent an exemption under Section 17(b). Similarly, Phoenix Mutual's status as an "affiliated person" of the Series Fund would also prohibit Phoenix Mutual from exhanging its shares of Phoenix Fund and Phoenix Capital for shares of the Series Fund without an exemption under Section 17(b) of the Act.

Section 17(b) of the Act provides that the Commission, upon application, may exempt a proposed transaction from the provisions of Section 17(a) of the Act if the evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are fair and reasonable and do not involve overreaching on the part of any person concerned and that the proposed transactions are consistent with the policy of each registered investment company concerned and with the general purposes of the Act.

Applicant state that the terms of the Proposed Exchanges are reasonable and fair and do not involve overreaching by any of the Applicants and that the Proposed Exchanges are consistent with the investment policies of each applicant and with the general purposes of the Act. In this regard, Applicant represent that the Proposed Exchanges are expected to result in certain economies to the shareholders of Chase and the Funds attributable to a consolidation of audit, legal and transfer agent fees, printing costs and lower state tax liability. Accordingly to the application, these expense savings are expected to exceed any additional costs due to greater advisory fees (for shareholders of Chase), the allocation of Blue Sky fees to the Series Fund (currently paid by the national distributor in the case of Chase and Shareholders), and less extensive expense reimbursement provisions (compared to the present contracts of Special, Frontier, Phoenix Fund and Phoenix Capital). Furthermore, Applicants assert that the proposed transactions will provide benefits in terms of the ease with which shareholders can manage their investments to best meet their changing investment and financial needs without ceasing to be shareholders of the Series Fund. Therefore, Applicants asserts that the Proposed Exchanges are expected to benefit Chase and the Funds and their respective shareholders by providing better investment services and opportunities at lower cost. The terms of the Plans as stated in the application provide for the acquisition of the Funds by the Series Fund on the basis of the net asset values of each of the Funds as of the Closing Date for the relevent Proposed Exchange. Thus, the shareholders of all the Funds will receive shares of the applicable series having an aggregate net asset value equal to the net asset value of the shares that such shareholders held prior to the Proposed Exchange.

Applicants assert that the payment of expenses by Phoenix of Boston is consistent with the provisions, policies, and purposes of the Act, that it is to the benefit of the shareholders of Chase and each of the Funds, and that it is fair and proper on the basis of the benefits to Phoenix of Boston as a result of the proposed transactions and the fact that Phoenix of Boston and PEPCO initiated the proposed transactions and submitted them to Chase and the Funds on the basis that they would bear such expenses. Applicants further believe that the provision of the Plans by which Chase and each of the Funds may choose to pay a portion of such expenses, limited as nearly as possible to the amount necessary to assure that such Fund will preserve its status under Subchapter M, gives each party the flexibility to achieve the most beneficial result from all points of view.

Applicants state that the respective Directors and Trustees of each of the Funds and Chase have concluded that there would be no dilution of any shareholder's interest as a result of the Proposed Exchanges, based on the payment of expenses by Phoenix of Boston to the extent stated above, the fact that no undue costs will be incurred in liquidating a portion of any Fund's assets, and because the proposed exchange of assets for shares will be based on relative net asset values. In this regard, Applicants further represent that Phoenix of Boston is currently involved in a class action suit brought by certain former clients of a wholly-owned inactive subsidiary of Phoenix of Boston, Chase Investment Services of Boston, Inc. ("CIS"), which alleges, among other things, violations of the anti-fraud provisions of the Advisers Act and the Securities Exchange Act of 1934. Phoenix of Boston states that, although it considers that this litigation would not currently impair its ability to perform its obligations to the Series Fund, an adverse decision could result in a materially adverse impact on Phoenix of Boston and its operations. Applicants further state, however, that neither Chase nor any of the Funds is a party to this litigation or a member of any class which might be benefited thereby and that, accordingly, the respective Trustees and Directors of Chase and the Funds have concluded that shareholders of neither Chase nor the Funds would suffer any potential dilution in connection with the litigation as a result of the Proposed Exchanges.

Applicants assert that the Proposed Exchanges are consistent with the investment objectives and policies of each of the Funds and Chase. The assets of each of the Funds will be transferred to the applicable series having investment objectives and policies similar to those of the original Fund. The investment objective of the Growth Fund series, into which Chase and Phoenix Capital will be transferred, is to seek long-term growth of capital. The Stock Fund series, into which the assets of Frontier and Special will be transferred, has an investment objective of aggressively seeking capital appreciation. To achieve this objective, the Stock Fund series may employ "leverage" by borrowing money and using such proceeds to increase its investments in securities above the amounts otherwise possible. The Balanced Fund series, into which the assets of Shareholders and Phoenix Fund will be transferred, has the investment objective of providing reasonable income, long-term capital growth, and conservation of capital. Thus, according to the application, the objectives of each of the Funds are virtually identical to the investment objectives of the applicable series. Applicants further state that any significant sales of portfolio securities which occur in connection with the Proposed Exchanges will occur prior to the transfer of such Fund's assets. Moreover, since it has been determined that the portfolios of the various Funds comprising each series are consistent with the investment objectives of that series, Applicants represent that no undue brokerage commissions or other costs will be incurred in liquidating a portion of any Fund's assets.

With respect to the claims of dissenting shareholders of Chase and the Funds under the Plans, Applicants represent that, to the extent that the state law remedy conflicts with that prescribed by the Act, such claims will be processed in accordance with the Act and the rules of the Commission, and that the shareholders of Chase and the Funds will be advised that the state

(b) by eliminating the 3:00 p.m.

remedy might therefore be unavailable. Applicants further represent that Phoenix Mutual will participate in the Proposed Exchanges as a shareholder of Phoenix Fund and Phoenix Capital on the same basis as all other shareholders of Chase and the Funds.

Notice if further given, That any interested person may, not later than September 2, 1980, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the addresses stated above. Proof of such service (by affadavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley F. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34–17054; File No. SR–CBOE–1980–20]

Chicago Board Options Exchange, Inc.; Proposed Rule Change; Self-Regulatory Organizations

Pursant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on July 31, 1980, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission proposed rule change as follows:

Text of Substance of the Proposed Rule Change

"Brackets indicate deletions; italics indicate new material"

Trading Rotations

Rule 6.2. No change.

. . . Interpretations and Policies:

.01 No change.

.02 [A trading rotation in any class of option contracts may be completed even though completion of the rotation will result in the effecting of transactions on the Exchange after 3:10 p.m. (Chicago time) provided that either (i) trading in the underlying security opens or reopens after 2:45 p.m. (Chicago time) and promptly thereafter but before 3:10 p.m. (Chicago time) the Exchange commences an opening or reopening rotation in the corresponding options class; or (ii) such rotation is initiated due to the declaration of a "fast market" pursuant to Rule 6.6 and notice of the rotation is publicly disseminated prior to its initiation and not later than 3:00 p.m. (Chicago time).]

Transactions may be effected in a class of options after 3:10 p.m. (Chicago time) if they occur during a trading rotation. Such a trading rotation may be employed in connection with the opening or reopening of trading in the underlying security after 2:30 p.m. (Chicago time), or due to the declaration of a "fast market" pursuant to Rule 6.6. The decision to employ a trading rotation after 2:30 p.m. shall be publicly announced on the trading floor and over the CBOE newswire prior to the commencement of such rotation. No more than one trading rotation may be conducted after 3:10 p.m. Any trading rotation conducted after 3:10 p.m. may not begin until ten minutes after news of such rotation is disseminated. If a trading rotation is in progress and Floor Officials determine that a final trading rotation is needed to assure a fair and orderly close, the rotation in progress shall be halted and a final rotation begun as promptly as possible after 3:10 p.m.

Exchange's Statement of Basis and Purpose

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of the proposed rule change is to simplify and to make more realistic the procedures concerning the effecting of transactions after 3:10 p.m. in the following manner:

(a) by providing that the CBOE shall announce to the trading floor and shall disseminate over its newswire the use of any trading rotation commencing after 2:30 p.m.,

(b) by eliminating the 3:00 p.m. deadline for the decision to employ a trading rotation,

(c) by directing that a rotation in progress be halted and a new rotation begun as soon as possible after 3:10 p.m. if a final rotation is required, and

(d) by limiting to one the number of rotations that may be employed after 3:10 p.m. in a class of options and by requiring 10 minutes notice before the start of a rotation after 3:10 p.m. in order to inform the public.

The present restrictions concerning trading rotations that result in the effecting of transactions after 3:10 p.m. have proven unworkable and impractical. At times they have prevented Floor Officials from employing such rotations when conditions warranted them. After 3:00 p.m. Floor Officials are precluded from authorizing a trading rotation to end the day's trading, no matter how chaotic trading may be or how great the benefits a rotation might provide by facilitating an orderly close. Just before 3:00 p.m. Floor Officials face the difficult task of anticipating trading conditions during the next several minutes, so that the use of a trading rotation can be announced by 3:00 p.m. Under such circumstances the Exchange may be committed to conduct trading rotations when market conditions cease to warrant them. For example, on October 10, 1979, a day of record volume on the New York Stock Exchange, CBOE Floor Officials, electing what they believed to be the most prudent course of action, prepared for a continuation of heavy activity after 3:00 p.m. by announcing the use of final trading rotations in options of four underlying securities. After 3:00 p.m., order flows slowed significantly and in none of the classes would a final rotation have been required to ensure an orderly close.

In addition, the rule change provides an opportunity for the execution of orders that arrive on the floor before the close but miss their turn in an opening or reopening rotation that begins after 2:45 p.m. (Chicago time). The following is an example of this problem. XYZ has reopened on the NYSE at 2:50 p.m. An order for Jan 40 XYZ calls arrives on the floor at 2:52 p.m. but misses the Jan 40 XYZ series in the rotation because it is a near-term, in-the-money option that opens first. The reopening rotation is completed after 3:10 p.m., and the order which had been placed 18 minutes before the normal CBOE close has not had an opportunity to be executed. The proposed change would allow the reopening rotation to be halted and a final rotation to be commenced. The delay in trading an option series if the rotation is halted is meaningless, since stock trading is halted and the final stock price will be the operative one after 3:00 p.m.

The basis under the act for the proposed rule change is section 6(b)(5), the promotion of just and equitable principles of trade.

No comments on this proposed rule change have been solicited or received from members.

The Exchange does not believe that the proposed change will impose any burden on competition.

On or before September 23, 1980, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, Securities and Exchange Commission, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 9, 1980.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

August 8, 1980.

BILLING CODE 8010-01-M

[Release No. 34–17060; File No. SR–CSE–80–4]

Cincinnati Stock Exchange; Proposed Rule Change; Self-Regulatory Organizations

Pursuant to Section 19(b)(1) of the Securities Exhange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on July 31, 1980, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows: The Cincinnati Stock Exchange's Statement of the Terms of Substance of the Proposed Rule Change.

Rule 11.1 (a) of the Rules of the Exchange is proposed to be amended. Set forth below is the current text of Section 11.1 (a) with brackets used to indicate words to be deleted and itlaics used to indicate words to be added by the amendment: 11.1 (a) Except as provided below, the hours of trading on the Exchange shall be from 10:00 a.m. to [4:15 p.m.] *4:05 p.m.* local Cincinnati time during normal business days.

The Cincinnati Stock EXchange's Statement of Basis and Purpose.

The proposed change in trading hours was approved by the Board of Trustees of The Cincinnati Stock Exchange on July 23, 1980.

The Basis for the proposed rule change is Sec. 6(b)(5) of the Securities Exchange Act in that the principal purpose of the proposed rule change is to facilitate transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system.

No comments were solicited from Members nor were any received.

The proposed Rule change imposes no burden on competition.

The foregoing Rule change has become effective, pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Washington, D.C. 20549 Copies of the filing with respect to the foregoing and all written submissions will be available for inspection and copying in the Public Reference Room, 100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the prinicipal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 9, 1980. For the Commission by the Division of Market Regulation, pursuant to delegated authority.

August 13, 1980.

Shirley F. Hollis,

Assistant Secretary.

[FR Doc. 80-25219 Filed 8-18-80; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34–17055; File No. SR–DTC–80–4]

Proposed Rule Change; Self Regulatory Organizations; Depository Trust Co.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s (b)(1), as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on August 4, 1980, the above mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Text of Proposed Rule Change

(a) Surcharges for services in securities issues which carry transfer agent fees:

[Deposits..... $1.60 per deposit.
Withdrawals..... $4.30 per withdrawal by Transfer-Transfer Control Form (W/T-TCF).
$5.10 per Urgent Withdrawal Request (COD)].

Transfer agent fee	Deposit surcharge	Withdrawal-by-transfer (WT) surcharge	Urgent certificate-on-demand (COD) surcharge
$3.50 or less per certificate	$1.25	$4.25	$6.10
More than $3.50 per certificate	$3.10	$8.60	$11.20

Statement of Basis and Purpose

The basis and purpose of the foregoing proposed rule change are as follows:

The purpose of the proposed rule change is to pass along to Participants with activity in securities issues which carry transfer agent fees the costs incurred by The Depository Trust Company (DTC) because of such fees. The transfer agent fees are not imposed by DTC for services rendered to Participants and therefore such fees are

not contained in the Fee Schedule for Major Services.

The proposed rule change relates to DTC's carrying out the purposes of Section 17A of the Securities Exchange Act of 1934 (the Act) by equitably allocating charges other than dues or fees among DTC Participants.

Comments were not and are not to be solicited from Participants. All Participants have been notified of proposed surcharges by a DTC Important Notice (Exhibit 2 to DTC's filing on Form 19b–4A, SR–DTC–80–4).

DTC perceives no burden on competition by reason of the proposed rule change.

The foregoing rule change has become effective, pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the public reference room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 9, 1980.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

August 8, 1980.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 80–25222 Filed 8–18–80; 8:45 am]

BILLING CODE 8010–01–M

[File No. 500–1]

Electro-Heat Resources Corp; Order of Suspension of Trading

August 7, 1980

It appearing to the Securities and Exchange Commission that there has been recent unusual and unexplained market acivity in the securities of Electro-Heat Resources Corp. and questions have been raised concerning the adequacy and accuracy of publicly disseminated information about orders which Electro-Heat Resources Corp. has received, contracts it has entered into, and negotiations in which it is or was participating, the Commission is of the opinion that the public interest and the protection of investors require a summary suspension of trading in the securities of Electro-Heat Resources Corp.

Therefore, it is ordered, pursuant to section 12(k) of the Securities Exchange Act of 1934, that trading in such securities on a national securities exchange or otherwise is suspended, for the period from 11:00 a.m. on August 7, 1980 and terminating on August 16, 1980 at midnight.

By the Commission.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

[Rel. No. 17057; (SR–MCC–80–1)]

Midwest Clearing Corp. ("MCC"); Order Approving Proposed Rule Change

August 11, 1980

On June 24, 1980, MCC 120 South LaSalle Street, Chicago, Illinois 60603 filed with the Commission, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and Rule 19b–4 thereunder, copies of a proposed rule change that would permit the chairman of the board of directors to set the salary of the president of the corporation and would designate the chairman as the chief executive officer of the corporation.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 34–16944, June 30, 1980) and by publication in the **Federal Register** (45 FR 45992, July 8, 1980). No written comments were received by the Commission.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to clearing agencies and, in particular, the requirements of Section 17A and the rules and regulations thereunder.

It is Therefore Ordered, pursuant to Section 19(b)(2) of the Act, that the above mentioned rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 80–25225 Filed 8–18–80; 8:45 am]

BILLING CODE 8010–01–M

[Rel. No. 11298; (812–4669)]

O.N. Market Yield Fund, Inc.; filing of Application for Order Pursuant to Section 6(c) of the Act Granting Exemptions From the Provisions of Section 2(a) (41) of the Act and Rules 2a–4 and 22c–1 Thereunder

August 11, 1980

Notice is Hereby Given that O.N. Market Yield Fund, Inc. ("Applicant") P.O. Box 237 Cincinnati, Ohio 45201, registered under the Investment Company Act of 1940 ("Act") as an open-end, non-diversified, management investment company, filed an application on April 22, 1980, and amendments thereto on June 23, 1980, and July 11, 1980, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a–4 and 22c–1 thereunder, to the extent necessary to permit Applicant's assets to be valued at amortized cost. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is a "money market" fund organized as a Maryland corporation; that O.N. Investment Management Company, a wholly owned subsidiary of the O.N. Equity Sales Company ("Equity Sales"), serves as its investment adviser. Equity Sales is a wholly owned subidiary of The Ohio National Life Insurance Company ("Ohio National"). Applicant further states that although a registration statement relating to its securities has been filed under the Securities Act of 1933, such securities will not be offered or sold directly to the public. Sales will be restricted to Ohio National, its affiliated companies and separate accounts, and pension and profit sharing plans of such companies. According to the application, Applicant's investment objective is to provide investors with maximum current income consistent with liquidity and preservation of capital. Applicant states that it will seek to achieve this objective by investing in a variety of high quality money market instruments.

As here pertinent, Section 2(a)(41) of the Act defines value to mean: (i) with respect to securities for which market quotations are readily available, the market value of such securities, and (ii) with respect to other securities and assets, fair value as determined in good faith by the board of directors. Rule 22c–1 adopted under the Act provides, in part, that no registered investment company or principal underwriter therefor issuing any redeemable security shall sell, redeem or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security for redemption or of an order to purchase or to sell such security. Rule 2a–4 adopted under the Act provides, as here relevant, that the "current net asset value" of a redeemable security issued by a registered investment company used in computing its price for the purpose of distribution and redemption shall be an amount which reflects calculations made substantially in accordance with the provisions of that rule, with estimates used where necessary or appropriate. Rule 2a–4 further states that portfolio securities with respect to which market quotations are readily available shall be valued at current market value, and that other securities and assets shall be valued at fair value as determined in good faith by the board of directors of the registered company. Prior to the filing of this application, the Commission expressed its view that, among other things, (1) Rule 2a–4 under the Act requires that portfolio instruments of "money market" funds be valued with reference to market factors, and (2) it would be inconsistent, generally, with the provisions of Rule 2a–4 for a "money market" fund to value its portfolio instruments on an amortized cost basis (Investment Company Act Release No. 9786, May 31, 1977).

Applicant states that purchasers of annuity contracts to be funded by its shares, including sophisticated individual, institutional and professional investors, seek stability of principal and a steady flow of predictable and competitive investment income. Applicant submits that the amortized cost method of valuation will enable it to achieve these investment objectives. it asserts that by maintaining a portfolio of high quality money market instruments with a dollar weighted average portfolio maturity of 120 days or less, it will avoid the possiblity of significant volatility in the value of portfolio securities and will be able to offer its shareholders the stability they desire and yield commensurate with yields available in the general money market. Applicant further asserts that by restricting its portfolio to securities with a relatively short maturity, it will avoid the problems of overvaluation and undervaluation with which the Commission was concerned in Investment Company Act Release No. 9786.

Applicant represents that for the foregoing reasons, its Board of Directors has determined in good faith that, in light of Applicant's characteristics, the amortized cost method of valuation, absent unusual circumstances, is appropriate and preferable to the use of a market based valuation method, and reflects the fair value of portfolio securities. Applicant further represents that it will continually monitor valuations indicated by methods other than amortized cost in order to effect any changes in the valuation method necessary to assure that portfolio securities are valued in a fair manner in view of all pertinent factors. Accordingly, Applicant requests exemptions from the provision of Section 2(a)(41) of the Act and Rules 2a–4 and 22c–1 thereunder, to the extent necessary to permit its assets to be valued as set forth in the application, as described above, whether or not market quotations are available.

Section 6(c) of the Act provides, in part, that the Commission may, upon application, conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act or the rules thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicant submits that the granting of the requested exemptions would be consistent with these standards.

Applicant consents to the imposition of the following conditions in an order granting the relief it requests:

1. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar denominated instruments which its Board of Directors determines present minimal credit risks, and which are of "high quality" as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by the Board of Directors.

2. Applicant will maintain a dollar weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value of $10.00 per share; provided, however, that Applicant will neither (a) purchase any instrument with a remaining maturity of greater than one year, nor (b) maintain a dollar weighted average portfolio maturity in excess of 120 days.[1]

3. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, the Board of Directors undertakes—as a particular responsibility within the overall duty of care owed to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objective, to stabilize Applicant's net asset value per share, as computed for the purpose of distribution, redemption and repurchase, at $10.00 per share.

4. Included within the procedures to be adopted by Applicant's Board of Directors shall be the following:

(a) Review by the Board of Directors, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from Applicant's $10.00 amortized cost price per share, and the maintenance of records of such review.

(b) In the event such deviation from the $10.00 amortized cost price exceeds ½ of 1 percent, a requirement that the Board of Directors will promptly consider what action, if any, should be initiated.

(c) Where the Board of Directors believes the extent of any deviation from Applicant's $10.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which action may include: redemption of shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses, or to shorten Applicant's average portfolio maturity; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

5. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the

[1] In fulfilling this condition, if the disposition of a portfolio instrument results in a dollar weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce its dollar weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

capital. The trusts which comprise the

V. 45 A. G. 1980 UMI

procedures (and any modifications thereto) described in paragraph 3 above, and Applicant will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the Board of Director's considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the Board of Directors' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as if such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

6. Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement as to whether any action pursuant to paragraph 4(c) above was taken during the preceding fiscal quarter and, if any such action was taken, will describe the nature and circumstances of such action.

Notice is Further Given that any interested person may, not later than September 8, 1980, at 5:30 p.m., submit to the Commission in writing, a request for a hearing on this matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delgated authority.

Shirley F. Hollis,
Assistant Secretary.

BILLING CODE 8010-01-M

[Rel. No. 11301; (812–4626)]

Paine, Webber Municipal Bond Fund First Series, et al.; Filing of Application for an Order Pursuant to Section 11 of the Act Permitting Certain Exchange Transactions and Pursuant to Section 6(c) of the Act Exempting Such Exchange Transactions From the Provisions of Section 22(d) of the Act

August 12, 1980

In the matter of Paine, Webber Municipal Bond Fund First Series, Paine, Webber Municipal Bond Fund Second Series, Paine, Webber Municipal Bond Fund Third Series, The Municipal Bond Fund, Series One through Series Forty-Three, The Municipal Bond Trust, Series Forty-Four and subsequent series, The Municipal Bond Trust, Multi-State Program Series One and subsequent series, The Corporate Bond Trust, Series One and subsequent series, The Municipal Bond Trust, Puerto Rico Series One and subsequent series, The Municipal Bond Trust, Multiple Maturity Series One and subsequent series, and Paine Webber, Jackson & Curtis Incorporated 1221 Avenue of the Americas, New York, New York 10023.

Notice is Hereby Given that Paine, Webber Municipal Bond Fund First Series; Paine, Webber Municipal Bond Fund Second Series, Paine, Webber Municipal Bond Fund Third Series (the "Paine Webber Series"); The Municipal Bond Fund, Series One through Series Forty-Three, The Municipal Bond Trust, Series Forty-Four and subsequent series (the "National Series"); The Municipal Bond Trust, Multi-State Program Series One and subsequent series (the "Multi-State Series"); The Corporate Bond Trust, Series One and subsequent series (the "Corporate Series"); The Municipal Bond Trust, Puerto Rico Series One and subsequent series (the Puerto Rico Series); The Municipal Bond Trust, Multiple Maturity Series One and subsequent series (the "Multiple Maturity Series") (collectively referred to as the "Trusts"); and Paine, Webber, Jackson & Curtis Incorporated (the "Sponsor") (the Trusts and the Sponsor collectively referred to as "Applicants") filed an application on March 12, 1980, and an amendment thereto on July 14, 1980, for an order of the Commission (1) pursuant to Section 11 of the Act permitting the exchange of units of certain series of the Trusts for units of other series of the Trusts, pursuant to an exchange option, at net asset value plus a sales charge of $15 per unit, and (2) pursuant to Section 6(c) of the Act exempting such exchange transactions from the provisions of section 22(d) of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The Paine Webber Series and the National Series consist of separate unit investment trusts created under the laws of the State of New York by separate trust indentures and agreements among the Sponsor, United States Trust Company of New York as trustee (the "Trustee") and Standard & Poor's Corporation as evaluator (the "Evaluator"). The investment objectives of the trusts comprising the Paine Webber Series and the National Series are federally tax exempt income, and conservation of capital through investment in a fixed portfolio of interest-bearing municipal bonds: The Multi-State Series consists of separate unit investment trusts created under the laws of the State of New York by separate trust agreements among the Sponsor, the Trustee and the Evaluator. The portfolios of the trusts comprising the Multi-State Series contain interest-bearing municipal bonds issued by governmental entities located within the state for which each trust is named and the investment objective of each trust is conservation of capital, and interest income that is exempt from federal, state and local income taxation for residents of the state for which such trust is named. The Corporate Series consists of separate unit investment trusts created under the laws of the State of Massachusetts by separate trust agreements among the Sponsor, the Trustee and Interactive Data Corporation as evaluator. The portfolio of each trust comprising the Corporate Series contains primarily bonds, debentures, notes and other debt securities issued by corporations. A limited portion of the portfolios of the Corporate Series may, under certain circumstances, contain long-term obligations issued or guaranteed by the United States or agencies or instrumentalities thereof, or corporate obligations which have been privately placed. The investment objective of each trust comprising the Corporate Series is to provide interest income consistent with the preservation of

capital. The trusts which comprise the Paine Webber Series, the National Series, the Multi-State Series and the Corporate Series are each registered separately under the Act as unit investment trusts.

The trusts which will comprise the Puerto Rico Series and the Multiple Maturity Series are not currently in existence. Applicants represent, however, that they anticipate those trusts will be organized and will register under the Act. Applicants state that the portfolio of each trust comprising the Puerto Rico Series is expected to consist solely of interest-bearing municipal obligations issued by governmental entities located within the Commonwealth of Puerto Rico and that the investment objective of the trusts in the Puerto Rico Series will be conservation of capital, and interest income which is exempt from federal, state and local income taxation. Applicants also represent that the Multiple Maturity Series will consist of one unit investment trust with a portfolio which will contain interest-bearing municipal obligations with long-term maturities of not less than fifteen years, and another separate trust with a portfolio which will contain municipal obligations with intermediate-term maturities of not more than fifteen years.

Applicants state that, although the Sponsor is not obligated to do so, the Sponsor intends to maintain a market for units of each Trust and continuously offer to purchase any such unit at a price based on the aggregate offering price of the underlying securities in the portfolio of the Trust plus accrued interest. Applicants also state that the Sponsor may discontinue such purchases at any time. In that event, the Sponsor may nonetheless purchase units of the trusts at a price based on the current redemption price of those units. However, if the Sponsor repurchases units of a Trust in the secondary market at prices below the offering prices of the underlying bonds in the portfolio of such Trust, it will not resell those units in the secondary market.

Applicants state that the Sponsor proposes to allow purchasers of units of any of the Trusts ("Certificateholders") to exchange the units which they hold for units of other series of the same Trust or for units of other Trusts that the Sponsor has repurchased in the secondary market and has not tendered to the Trustee for redemption (collectively, the "Exchange Trusts"). The Sponsor proposes to permit such exchanges at net asset value plus a sales charge per unit exchanged (the "Exchange Option"). Applicants represent that the Exchange Option would be available only with respect to units of various series of the Exchange Trusts for which a secondary market is being maintained. A Certificateholder wishing to dispose of such units would be able to exchange them for units of another series of the same Trust or for units of any series of any other Exchange Trust. Applicants state that although it is not presently contemplated that Certificateholders will be permitted to exchange their units either for units of other series of the same Trust or for units of any series of the Exchange Trusts that are available on original issue, the Sponsor may, at some future date, permit such exchanges. Applicants state that while the Sponsor intends to hold the Exchange Option open under most circumstances, the Sponsor will reserve the right to modify, suspend or terminate the Exchange Option at any time without further notice to Certificateholders.

Applicants represent that an exchange effected pursuant to the Exchange Option would operate in a manner essentially identical to any secondary market transaction, except that the Sponsor proposes to impose a reduced sales charge on each exchange transaction. When a Certificateholder notifies the Sponsor of his desire to exercise the Exchange Option, he will receive a current prospectus for one or more series of the Exchange Trusts in which the Certificateholder has indicated an interest and for which the Sponsor has units, acquired in the secondary market, available to offer to the Certificateholder. Applicants state that, under the Exchange Option, a Certificateholder would not be permitted to make up any difference between the amount representing the units being submitted for exchange and the units being acquired, and would be permitted to acquire only whole units of the Exchange Trust. Applicants state that any excess amounts representing the sales price of units submitted for exchange would be resubmitted to the Certificateholder.

Units of any series of the Trusts repurchased by the Sponsor in the secondary market are normally resold to the public at a public offering price based on the offering side evaluation of the underlying portfolio securities in the portfolio of the Trust plus a sales charge of 3.846% of the public offering price. The Sponsor proposes to sell units of the Exchange Trusts pursuant to the Exchange Option at a price equal to the offering side evaluation of the underlying portfolio securities of the Exchange Trust divided by the number of units outstanding (the "Unit Offering Price"), plus a charge of $15 per unit. Applicants maintain that such $15 charge can be expected to approximate about 1½% of the Unit Offering Price. The Sponsor reserves the right to increase or decrease such charge from time to time in the event of fluctuations in the costs of professional assistance and operational expenses in connection with its exchange transactions. Applicants state that a Certificateholder who has purchased units of a series and paid a per unit sales charge which was less than the per unit sales charge of the series of the Exchange Trust for which such Certificateholder desires to exchange would be permitted to exercise the Exchange Option at the Unit Offering Price plus the sales charge of $15 per unit, provided that such Certificateholder has held his units for a period of at least eight months. Any Certificateholder who has not held the units to be exchanged for an eight month period would be permitted to exchange such units for units of an Exchange Trust only at the Unit Offering Price plus a sales charge based on the greater of $15 per unit or an amount which, together with the initial sales charge paid in connection with the acquisition of the units being exchanged, equals the sales charge of the series of the Exchange Trust for which such Certificateholder desires to exchange, determined as of the date of the exchange.

Section 11(c) of the Act provides, in pertinent part, that exchange offers involving registered unit investment trusts are subject to the provisions of Section 11(a) of the Act irrespective of the basis of exchange. Section 11(a) of the Act provides that it shall be unlawful for any registered open-end company or any principal underwriter for such a company to make, or cause to be made, an offer to the holder of a security of such company or any other open-end investment company to exchange his security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged, unless the terms of the offer have first been submitted to and approved by the Commission. Applicants request an order, pursuant to Section 11 of the Act, approving the terms of the Exchange Option.

Section 22(d) of the Act provides, in pertinent part, that no registered investment company or principal underwriter thereof shall sell any redeemable security isued by such

company to any person except at a

for a Certificateholder to acquire units

Persons who request a hearing, or

application finds that a registered

1935 ("Act") designating Section 6 of the

$8 million each with The First National

company to any person except at a current offering price described in the prospectus. The sales charge described in the prospectus of each of the Trusts for effecting regular secondary market transactions is greater than the charge which would be applicable to transactions under the Exchange Option. Rule 22d–1 under the Act permits certain variations in sales charges, none of which, it is alleged by Applicants, will be applicable to transactions under the Exchange Option.

Section 6 (c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities or transactions from any provision of the Act or any rule or regulation under the Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants request an order, pursuant to Section 6(c) of the Act, exempting exchanges of units of the Trusts made pursuant to the Exchange Option from the provisions of Section 22(d) of the Act.

Applicants submit that a person desiring to dispose of units of one series and acquire units of another series of the Exchange Trusts may wish to do so for a number of reasons, such as a change in his or her particular investment goals or requirements, or in order to take advantage of possible tax benefits flowing from the exchange. Applicants state that the purpose of the Exchange Option is to permit the Sponsor to pass on to the Certificateholder the cost savings resulting from reductions in time and expense related to advice, financial planning and operational expense required for the Exchange Option. Accordingly, Applicants maintain that the proposed reduction in sales charge would be beneficial to all Certificateholders.

Applicants assert that requiring Certificateholders, who hold units of a series of a Trust which were acquired at a lower sales charge than the sales charge with respect to the units of the Exchange Trust to be acquired under the Exchange Option, to pay an adjusted sales charge for such exchange during the first eight months in which they have held the units to be exchanged maintains equitable treatment of various Certificateholders. For example, Applicants maintain that it may be possible, under certain circumstances, for a Certificateholder to acquire units of a series of a Trust with a lower sales charge and immediately to convert such units into other units of the same Trust or into units of a series of another Exchange Trust and to pay a lower total sales charge than a Certificateholder purchasing units of such Trust directly. Applicants state that, under normal circumstances, this situation is unlikely, since the initial sales charge on direct purchases of units of series with a lower sales charge (currently 3.846% of the public offering price) plus the conversion sales charge ($15 per unit, or approximately 1½% of the public offering price) usually will exceed the sales charge related to direct purchases of units of series of that Trust. However, if the price of the units of a series of an Exchange Trust were to increase sharply, the $15 sales charge on an exchange could represent less than the difference between the lower sales charge and the higher sales charge. Thus, Applicants argue that an exchanging Certificateholder could obtain an unfair advantage when compared to investors making direct purchases of units of a series of such Trust. Applicants submit that, after a Certificateholder of a series with a lower sales charge has held units for a period of eight months, the discriminatory nature of permitting that person to effect an exchange transaction at a reduced sales charge is not as compelling, and thus the possible abuse outlined above is no longer material.

Notice is Further Given that any interested person may, not later than September 8, 1980, at 5:30 p.m., submit to the Commission in writing, a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As aprovided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion.

Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley F. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

[Rel. No. 11296; (811–2596)]

Trinwall Bond Fund, Inc.; Application Pursuant to Section 8(f) of the Act for an Order Declaring That Applicant has Ceased To Be an Investment Company

August 8, 1980.

Notice is hereby given that Trinwall Bond Fund, Inc. ("Applicant") 61 Broadway, New York, New York 10006, an open-end, diversified, management company registered under the Investment Company Act of 1940 ("Act"), filed an application on June 17, 1980, pursuant to Section 8(f) of the Act and Rule 8f–1 thereunder, for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant, a Maryland corporation, states that it filed a registration statement under Section 8(b) of the Act on or about September 29, 1975. Applicant states that on February 11, 1980, pursuant to an agreement approved by Applicant's shareholders on February 8, 1980, The Putnam Income Fund, Inc. ("Putnam") acquired substantially all of Applicant's assets in exchange for Putnam common stock, and Applicant mailed a confirmation to each shareholder reflecting his pro rata number of such shares.

Applicant submits that it has no assets, nor any debts or other liabilities outstanding. Applicant also submits that it is not a party to any litigation or administrative proceedings. Applicant states that it is not now engaged, and does not propose to engage, in any business activities other than those necessary for the winding up of its affairs. According to the application, it is contemplated that articles of dissolution will be filed in Maryland in the near future.

Section 8(f) of the Act provides, in part, that when the Commission upon application finds that a registered investment company has ceased to be an investment company, it shall so declare by order and, upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 2, 1980, at 5:30 p.m., submit to the Commission in writing, a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley F. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

[Rel. No. 21678; (70–6475)]

Vermont Yankee Nuclear Power Corp.; Proposal To Issue and Sell Short-Term Promissory Notes; Order Authorizing Solicitation of Proxies

August 12, 1980.

Notice is hereby given that Vermont Yankee Nuclear Power Corporation ("Vermont Yankee"), 77 Grove Street, Rutland, Vermont 05701, a subsidiary of New England Electric System and Northeast Utilities, both registered holding companies, has filed a declaration and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating Section 6 of the Act and Rules 62 and 65 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the amended declaration, which is summarized below, for a complete statement of the proposed transactions.

Vermont Yankee's Articles of Association currently provide that, without the vote of a majority of the outstanding cumulative preferred stock, Vermont Yankee shall not issue or incur unsecured indebtedness if, immediately thereafter, (i) the aggregate principal amount of all unsecured indebtedness would exceed 20% of the total principal amount and par value of the other securities of Vermont Yankee or (ii) the aggregate principal amount of all short-term unsecured indebtedness of Vermont Yankee would exceed 10% of such total. As of April 30, 1980, the total principal amount and par value of the other securities of the Company equaled $15,866,802.

Vermont Yankee projects that its cash needs in connection with the acquisition of an inventory of uranium, the fabrication of nuclear fuel and the installation in its plant of capital improvements necessary to meet requirements of the Nuclear Regulatory Commission will amount to $27,400,000 for the balance of 1980, and $32,200,000 and $28,300,000 for 1981 and 1982, respectively. While Vermont Yankee intends ultimately to finance these needs through appropriate fuel financing and other long-term arrangements, the present state of the capital markets and general economy make the timing of such financings important. Therefore Vermont Yankee desires to obtain the necessary vote of its preferred stock to permit it to increase its unsecured indebtedness so that initially some of these needs may be met by such borrowings, thereby giving Vermont Yankee more flexibility in the timing of the placement of its long-term financings.

Vermont Yankee intends to call a special meeting of its preferred stockholders and to solicit proxies by mailing to each holder a letter, solicitation statement and proxy. Such mailing will be followed by oral solicitations of certain stockholders and brokers by officers and other regular employees of Vermont Yankee. In addition, Vermont Yankee will retain the services of Georgeson & Co., New York, New York, to act as Vermont Yankee's agent in soliciting proxies from preferred stockholders by oral follow-up soliciations.

Vermont Yankee currently maintains lines of credit in the principal amount of $8 million each with The First National Bank of Boston and Chase Manhattan Bank ("Banks"). As of April 30, 1980, Vermont Yankee had $4.2 million in loans outstanding under those lines. As of that date, 5% of the principal amount and par value of the other securities of the Company equaled $7,082,000.

As described above, Vermont Yankee will have substantial capital needs during 1980 and beyond. If it is successful in obtaining the necessary preferred stockholder vote, Vermont Yankee intends to seek from the Banks (and possibly other banks also) increased lines of credit until lines aggregating a maximum of $32 million have been obtained and will also investigate the possibility of borrowing from its sponsor companies pursuant to the Capital Funds Agreements. Borrowings under the lines of credit would be made during a period not to exceed three years and would be evidenced by Vermont Yankee's promissory notes, maturing up to three months after their date of issue and bearing interest at the lenders' prime rate. The Banks presently require Vermont Yankee to maintain compensatory balances equal to 7.5% of the lines and 7.5% of any borrowings thereunder. Assuming full borrowings under the lines and a prime rate of 12% per annum, the effective costs of borrowings would be 14.1%. Borrowings from sponsors under the Capital Funds Agreements would be at a rate not less than 1½% above the prime rate.

The fees, commissions and expenses to be incurred in connection with the proposed transaction are estimated at $10,000, including legal fees of $3,000 and soliciting agents fee of $3,500. The Vermont Yankee Public Service Board has jurisdiction over the issuance of short-term debt in excess of 12% of Vermont Yankee's total assets. It is stated that no other state or federal regulatory authority, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than September 5, 1980, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated

address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

It appearing to the Commission that the declaration, insofar as it proposes the solicitation of proxies of Vermont Yankee's preferred shareholders, should be permitted to become effective forthwith pursuant to Rule 62:

It is ordered that the declaration regarding the proposed solicitation of proxies of Vermont Yankee's preferred stockholders be, and it hereby is, permitted to become effective forthwith pursuant to Rule 62 and subject to the terms and conditions prescribed in Rule 24 under the Act.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

Shirley F. Hollis,

Assistant Secretary.

DEPARTMENT OF STATE

[Public Notice CM-8/311]

Advisory Committee on International Investment, Technology, and Development; Meeting

The Department of State will hold a meeting on September 3 of the Working Group on International Data Flows of the Advisory Committee on International Investment, Technology, and Development. The Working Group will meet from 2:00–5:00 p.m. The meeting will be held in Room 1105 of the State Department, 2201 C Street, N.W., Washington, D.C. 20520. The meeting will be open to the public.

The purpose of the meeting will be to discuss, first, a report of the U.S. delegation to the Intergovernmental Bureau of Informatics meeting in Rome June 23–27 and, second, the preparations of the U.S. delegation to the OECD Working Group on Information, Computers and Communication Policy (ICCP) meeting to be held September 9–11 in Paris.

Requests for further information on the meeting should be directed to Jack Orlando, Department of State, Office of Investment Affairs, Bureau of Economic and Business Affairs, Washington, D.C. 20520. He may be reached by telephone on (area code 202) 632–1717.

Members of the public wishing to attend the meeting must contact Mr. Orlando's office in order to arrange entrance to the State Department building.

The Chairman of the working group will, as time permits, entertain oral comments from members of the public attending the meeting.

Dated: August 8, 1980.

R. M. Roberts,

Acting Executive Secretary.

Part II

Federal Emergency Management Agency

Procurement; Policies and Procedures

FEDERAL EMERGENCY MANAGEMENT AGENCY

41 CFR Chapter 44

[Docket No. FEMA-MISC-41-44]

Procurement

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This part provides policies and procedures for the acquisition of personal property and nonpersonal services (including construction) by the Federal Emergency Management Agency (FEMA). They implement the Federal Procurement Regulations in accordance with 41 CFR 1–1.008.

DATE: This rule is effective August 14, 1980.

FOR FURTHER INFORMATION CONTACT: Steve Goodman, Acquisition Management Division, Federal Emergency Management Agency, Washington, D.C. 20472. Telephone (202) 653–7270.

SUPPLEMENTARY INFORMATION: FEMA published interim rules dealing with procurement in the **Federal Register** on December 6, 1979 (44 FR 70424). This established Chapter 44 of Title 41 of the Code of Federal Regulations.

No substantial public comments were received in response to the interim rule.

Several minor typographical errors have been corrected.

Subparts 1.600 Debarred, Suspended and Ineligible Bidders and 4.900—Unsolicited Proposals have been added to meet the implementation requirements of 41 CFR 1–1.606(a) and 1–4.903 respectively. Subpart 1.5000—Criteria for use of Procurement Contracts Versus Assistance Instruments has been added to aid in the selection of the appropriate instrument as required by Public Law 95–224 "The Federal Grants and Cooperative Agreement Act of 1977". Subsections 7.5002–7, 7.5002–8 and 7.5002–11 have been deleted to avoid duplication of like or similar provisions of 41 CFR 1–7. Subsection 7.5002–1 "Rights in Data" has been replaced with 7.5002–1 "Rights in Technical Data and Computer Software". In addition, Subsections 7.5002–13 "Cost Accounting Standard Withdrawal" and 7.5002–14 "Rights in Technical Data Specific Acquisition" have been added.

These changes deal with public contracts and publication of the modifications as a proposal for public comments is not required by 5 U.S.C. 553. The new material is needed immediately to carry out FEMA business.

Accordingly, Chapter 44 of Title 41 is amended by replacing those rules published December 6, 1979 at 44 FR 70424 with the following:

CHAPTER 44—FEDERAL EMERGENCY MANAGEMENT AGENCY

Part
44–1 General.
44–2 Procurement by formal advertising.
44–3 Procurement by negotiation.
44–4 Special types and methods of procurement.
44–7 Contract clauses.

44–1.5000 Scope of subpart.
44–1.5001 Procurement contracts.
44–1.5001–1 Definition.
44–1.5001–2 Examples of procurement contracts.
44–1.5002 Assistance.
44–1.5002–1 Grants.
44–1.5002–2 Cooperative agreements.
44–1.5002–3 Examples of involvement that is not substantial.
44–1.5002–4 Examples of substantial involvement.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

§ 44–1.000 Scope of part.

This part sets forth policies and procedures concerning: The Federal Emergency Management Agency Procurement Regulation System; definition of terms used throughout this chapter; general policies of procurement; small business concerns; labor surplus area concerns; publicizing procurement actions; and the use of contracts versus assistance documents.

Subpart 1.0—Regulation System

§ 44–1.001 Scope of subpart.

This subpart sets forth introductory information pertaining to the Federal Emergency Management Agency Procurement Regulation System; its purpose, authority, applicability, issuance, arrangement, implementation, supplementation and deviation procedure.

§ 44–1.002 Purpose.

This subpart establishes the Federal Emergency Management Agency Procurement Regulations (FEMAPR) for the codification and publication of uniform policies and procedures applicable to the Federal Emergency Management Agency (FEMA) in the procurement of personal property and nonpersonal services (including construction).

§ 44–1.003 Authority.

41 CFR 1–1.008 requires that as portions of Federal Procurement Regulation (FPR) material are prescribed, agencies shall publish in the **Federal Register** implementing regulations deemed necessary for business concerns, and others properly interested, to understand basic and significant agency procurement policies and procedures which implement, supplement, and deviate from the FPR. In compliance with this requirement, the FEMAPR are herein prescribed.

§ 44–1.004 Applicability.

The FEMAPR apply to all procurements within FEMA but do not apply to the placement or administration of cooperative agreements or grants.

§ 44–1.004–50 Relationship to the FPR.

Material published in the FEMAPR will not repeat, paraphrase or otherwise restate material in the FPR except to the extent necessary to implement, supplement or deviate therefrom.

§ 44–1.005 Exclusions.

Certain FEMA policies and procedures which come within the scope of the FEMAPR nevertheless may be excluded from the FEMAPR. These exclusions include the following categories:

(a) Policy or procedure for subject matter which bears a security classification.

(b) Policy or procedure which is expected to be effective for a period of six months or less.

(c) Policy or procedure which is being instituted on an experimental basis for a reasonable period.

(d) Policy or procedure of an internal nature which shall be issued as either a FEMA Handbook or Standard Operating Procedure or a revision to either of the above.

§ 44–1.006 Issuance.

§ 44–1.006–1 Code arrangement.

The FEMAPR are issued in the Code of Federal Regulations as Chapter 44 of Title 41, Public Contracts and Property Management.

§ 44–1.006–2 Publication.

The FEMAPR, as deemed necessary by the Director, Office of Finance and Administration, for information to the general public, are published initially in the daily issue of the **Federal Register** and in final cumulated form in title 41 of the Code of Federal Regulations. The above regulations are printed in separate loose-leaf volume form for distribution to appropriate FEMA organizational elements.

§ 44–1.006–3 Copies.

Copies of the FEMAPR in **Federal Register** and Code of Federal Regulations form may be purchased at nominal cost from the Superintendent of Documents, Government Printing Office, Washington, DC 20402. Upon request, copies of the FEMAPR loose-leaf volume and amendments and additions thereto will be distributed to agency procuring offices and other appropriate agency organizational units by the Policy and Support Branch Acquisition Management Division.

§ 44–1.006–4 Coordination.

In the development of FEMAPR issuances, the views of interested agency procuring offices, and, where appropriate and feasible, the views of interested business and professional organizations, will be considered.

§ 44–1.007 Arrangement.

§ 44–1.007–1 General plan.

The general plan, numbering system, and nomenclature used in the FEMAPR conform with those of the Federal Procurement Regulation (FPR) and **Federal Register** Standards approval for the FPR.

§ 44–1.007–2 Numbering and titling.

(a) Where the FEMAPR implements or deviates from a part, subpart, section or subsection of the FPR, the FEMAPR part, subpart, section or subsection will be numbered and titled to correspond to the part, subpart, section or subsection of the FPR.

(b) Where the subject matter contained in a part, subpart, section or subsection of the FPR requires no further implementation, the FEMAPR will contain no corresponding part, subpart, section or subsection number and the subject matter as published in the FPR governs.

(c) Material published in the FEMAPR which supplements the FPR will be assigned numbers from the number 50 onward to denote the new part, subpart, section or subsection being added. For example, § 44–50.100 (new part), § 44–1.5000 (new subpart), § 44–1.150 (new section), § 44–1.102–50 (new subsection).

§ 44–1.007–3 Citation.

FEMAPR will be cited in accordance with **Federal Register** Standards approved for the FPR. Thus this section, when referred to in divisions of the FEMAPR, should be cited as "§ 44–1.007–3" of this chapter. When this section is referred to formally in official documents, such as legal briefs, it should be cited as "41 CFR 44–1.007–3". Any section of the FEMAPR may be informally identified as "FEMAPR" followed by the section number, such as FEMAPR 44–1.007–3.

requisitioning office shall prepare a

training and education the following

Subpart 1.6—Debarred, Suspended,

§ 44-1.009 Deviation.

§ 44-1.009-1 Description.

As used in the FEMAPR, the term "deviation" includes any of the actions set forth in 41 CFR 1-1.009-1 for either the FEMAPR or the FPR.

§ 44-1.009-2 Procedure.

In the interest of establishing and maintaining uniformity to the greatest extent feasible, deviations from the FPR and the FEMAPR shall be kept to a minimum and controlled as follows:

(a) Deviations in both individual cases and classes of cases must be authorized in advance by the Director, Acquisition Management Division. Requests for such authorization shall:

(1) Cite the specific parts of the FPR or FEMAPR from which it is desired to deviate.

(2) Provide a full description of the deviation.

(3) Indicate the circumstances which will require use of the deviation.

(4) Give detailed reasons supporting the actions requested; and

(5) Give reasons why the action is in the best interest of the Government.

(b) Where the deviation applies to a class of cases, review and approval shall be accomplished in accordance with 41 CFR 1-1.009-2(c) for deviations to either the FPR or the FEMAPR.

(c) The contract file(s) of the requesting office shall include a copy of the request and the approval. Class deviations will be issued as a part of the FEMAPR, if they are of a continuing nature and publication is deemed appropriate by the Director, Office of Finance and Administration.

Subpart 1.2—Definition of Terms

§ 44-1.201 Definitions.

For the purposes of the FEMAPR, the following terms have the meaning set forth in this subpart unless otherwise indicated.

§ 44-1.202 Agency.

"Agency" means the Federal Emergency Management Agency or as it is referred to throughout the FEMAPR, "FEMA".

§ 44-1.204 Director.

"Director" means the Director of the Federal Emergency Management Agency. In the FPR, the term "Secretary", where it pertains to a procuring agency, shall be construed to mean "Director".

§ 44-1.205 Procuring office.

"Procuring offices" means those offices which have delegated or redelegated authority to purchase or contract for supplies, services and/or construction.

§ 44-1.206 Head of the procuring activity.

"Head of the Procuring Activity" means the Director, Acquisition Management Division.

§ 44-1.250 Contractor.

"Contractor" means any person, firm, association, or corporation entering into a contract with the Government.

§ 44-1.251 Subcontractor.

"Subcontractor" means any person, firm, association or corporation entering into a subcontract with a contractor or higher-tier subcontractor.

§ 44-1.252 Supplies and property.

"Supplies and property" means materials and goods to be delivered to the Agency under contracts or purchase orders.

§ 44-1.253 Personal services.

"Personal services" means those services rendered by an officially appointed or employed individual engaged in the performance of authorized Federal functions who is compensated on either a time or contract basis and is under the direct supervision of a Federal officer thereby establishing an employer-employee relationship.

§ 44-1.254 Nonpersonal services.

"Nonpersonal services" means those services rendered by non-Government firms, institutions or persons through contract or agreement with FEMA wherein no employer-employee relationship exists.

§ 44-1.255 Program office.

"Program office" means any of various offices within the Agency which generate requests for procurement action.

§ 44-1.256 Project officer.

"Project officer" means the representative of a program office cognizant over the technical aspects of a given procurement action.

§ 44-1.257 Interagency agreement.

"Interagency agreement" means an agreement between two or more agencies, bureaus, or departments of the Federal Government by which supplies, services or property are provided to, or obtained from, one or more agencies, bureaus or departments of the Federal Government. Funds are transferred between the parties as consideration for the supplies, services or property.

§ 44-1.258 Memorandum of understanding.

"Memorandum of Understanding" means an agreement between two or more agencies, bureaus or departments of the Federal Government. Funds are not transferred between parties in a "Memorandum of Understanding."

Subpart 1.3—General Policies

§ 44-1.302 Procurement sources.

§ 44-1.302-1 General.

Supplies and services may be obtained from the following sources:

(a) *Government Program Sources.* Procuring offices shall endeavor to obtain required supplies or services from the following sources prior to initiating purchases from other sources. These sources shall be utilized to the maximum extent practicable in accordance with applicable laws and regulations and shall be solicited in the order in which they appear below:

(1) Agency inventories.

(2) Excess and surplus stocks in the possession of other Government agency.

(3) Federal Prison Industries, Inc.

(4) Committee for Purchase from the Blind and other Severely Handicapped.

(5) GSA Stock Program.

(6) Mandatory Federal Supply Schedule.

(7) Optional use Federal Supply Schedule.

(b) *Sources outside the Government.* If the required supplies and/or services cannot be obtained from any of the sources listed in paragraph (a) of this section, procuring offices shall endeavor to obtain them from commercial or other non-Government sources (including State and local Governments) to the maximum extent practicable.

(c) *Other Federal Agencies.* If supplies and/or services are available from another Federal agency, and the circumstances of the requirement meet the criteria set forth in OMB Circular A-76, procuring offices may obtain the supplies or services from that Federal agency.

§ 44-1.302-3 Contracts between the Government and Government employees or business concerns substantially owned or controlled by Government employees.

When a requisitioning office becomes aware that a suggested procurement source is either a Government employee, or a business or organization substantially owned by a Government employee, or the spouse or immediate family of a Government employee, the appropriate procurement office shall be immediately notified and shall seek alternative sources. If no alternative sources can be located, the requisitioning office shall prepare a written justification to clearly support a Contracting Officer decision to procure from the Government employee source and to provide for actions where possible, to prevent future related procurements from employee sources. Approval shall be obtained from the Head of the Program Office and the Director, Office of Finance and Administration prior to any procurement award to a Government employee source.

§ 44-1.305 Specifications.

§ 44-1.305-6 Military and departmental specifications.

If no Federal Specification is available, Interim Federal, Military and Departmental Specification shall be considered, in the order of precedence indicated herein, prior to using or developing other specifications.

§ 44-1.317 Noncollusive bids and proposals.

The authority to make the determination described in paragraph (d) of the certification set forth in 41 CFR 1-1.317(a) shall vest in the Head of the Procuring activity without authority to redelegate.

Subpart 1.4—Procurement Responsibility and Authority

§ 44-1.400 Scope of subpart.

This subpart deals with the placement of procurement authority and responsibility within the Agency, the selection and designation of Contracting Officers, and the authority of procuring offices.

§ 44-1.401 Responsibility of the head of the procuring activity.

The Head of the Procuring Activity shall be responsible for the establishment of policy throughout the Agency, monitor in the overall effectiveness and efficiency of the Agency's procuring offices, the establishment of adequate controls to assure compliance with applicable laws, regulations and procedures, and shall be responsible for delegating or redelegating Contracting Officer authority, which has been delegated the Head of the Procuring Activity.

§ 44-1.404 Selection, designation and termination of designation of contracting officers.

§ 44-1.404-1 Selection.

In selecting Contracting Officers, the appointing authorities shall consider experience, training, education, business acumen, judgment, character, reputation and ethics. In the areas of experience, training and education the following shall be required unless contracting authority is limited to simplified purchase procedures. Waiver of any of the criteria set out below shall be in writing with specific justification therefor:

(a) Experience of an individual Contracting Officer or appointment of an individual to a position having contracting officer authority shall consist of a minimum of two years experience performing contracting, procurement or purchasing operations in a Government or commercial procurement office. Additionally where appointment of a Contracting Officer involves a specialized procurement field, experience in the field shall be considered as a criterion for the appointment.

(b) Educational requirements of an individual Contracting Officer or appointment of an individual to a position having contracting officer authority shall require as a minimum the equivalent of a bachelor's degree from an accredited college or institution with major studies in business administration, law, accounting or related fields. This educational requirement may be waived by the appointing official when it is determined that a potential appointee is otherwise qualified by virtue of extensive contract-related experience, training, business acumen, judgment, character, reputation and ethics.

(c) Training requirements of an individual Contracting Officer or appointment of an individual to a position having contracting authority as a minimum shall require that the individual has successfully completed training courses in Government basic procurement, of not less than 80 class hours, and Government contract administration, not less than 80 class hours. Incumbents not meeting the special training requirements shall be given 24 months to meet the minimum qualification standards.

§ 44-1.404-2 Designation.

Except for disaster-related activities and unusual circumstances as determined by the Head of the Procuring Activity, it is the policy of the Agency to delegate Contracting Officer authority to individuals rather than to positions. Except in those instances where the redelegation of authority specifically includes the authority for further redelegation to subordinate no other delegations or redelegations may be made. Delegations of Contracting Officer authority shall include clear statement of such authority, its responsibilities and limitations.

Subpart 1.6—Debarred, Suspended, and Ineligible Bidders

§ 44-1.600 Scope of subpart.

This subpart prescribes the FEMA policy and procedures for establishment, use, maintenance and distribution of a debarred, suspended, and ineligible bidders list for debarring or suspending bidders for cause.

§ 44-1.602 Establishment, maintenance and distribution of a list of concerns or individuals debarred, suspended, or declared ineligible.

(a) The Director, Acquisition Management Division, is responsible for establishment and maintenance of a master list or file of firms and individuals who are administratively or legally debarred or suspended from FEMA contracting and subcontracting and from whom bids and proposals will not be solicited as provided in 41 CFR 1-1.603. This list will be known as the FEMA Debarred, Suspended and Ineligible Bidders List.

(b) The list shall as a minimum contain that information set forth in 41 CFR 1-1.602 (b).

(c) The Director, Acquisition Management Division, will effect distribution of the list to authorized personnel. The lists shall not be disclosed to the public.

§ 44-1.602-1 Basis for entry on the debarred, suspended, and ineligible bidders list.

(a) The list shall be comprised of those firms debarred, suspended or declared ineligible in accordance with 41 CFR 1-1.602-1 (a), (b), (c), and (e).

(b) The list shall also be comprised of those firms which the Director, Office of Finance and Administration, declares to be debarred, suspended or ineligible in accordance with 41 CFR 1-1.602-1 (d), (f), and (g).

§ 44-1.603 Treatment to be accorded firms and individuals in debarred, suspended or ineligible status.

The Director, Office of Finance and Administration, shall make the determinations required by 41 CFR 1-1.603 (a).

§ 44-1.604 Causes and conditions applicable to determination of debarment.

Determination to debar or take other action concerning a firm or individual for a cause listed in 41 CFR 1-1.604 shall be made by the Director, Office of Finance and Administration. Whenever cause for debarment becomes known to any Contracting Officer, the matter shall be submitted, with recommendations of the Director, Acquisition Management Division, to the Director, Office of

procurement not awarded to a small

program as part of the performance of

a labor surplus area specialist in each

Finance and Administration for appropriate action. The documented file of the case will be included in the submission.

§ 44–1.604–1 Procedural requirements relating to the imposition of debarment.

(a) Hearings requested in connection with debarment proceedings shall be conducted before the Director, Office of Finance and Administration, or his designee. An opportunity shall be afforded to the firm or individual to appear with witnesses and counsel, to present facts or circumstances showing cause why such firm or individual should not be debarred. If the firm or individual elects not to appear, or if the firm or individual does not respond within 30 days from receipt of the written notice, the reviewing authority will make the decision based on the facts on record and such additional evidence as may be furnished by the parties involved. After consideration of the facts, the reviewing authority shall notify the firm or individual of the final decision.

(b) Appeals may be taken within 30 days after receipt by the firm or individual of a decision to debar. Appeals shall be filed with Director, FEMA, who shall make a decision based on the record. The Director's decision shall be final.

§ 44–1.605 Suspension of bidders.

§ 44–1.605–1 Causes and conditions under which FEMA may suspend contractors.

Any Contracting Officer may recommend suspension of bidders for the causes and conditions set forth in 41 CFR 1–1.605–1. These recommendations shall be accompanied by the documented file in the case and be submitted through the Director, Acquisition Management Division, to the Director, Office of Finance and Administration. The Director, Office of Finance and Administration, shall issue the Notice of Suspension required by 41 CFR 1–1.605–2.

§ 44–1.606 Agency procedures.

The Director, Acquisition Management Division, is responsible for complying with the provisions of 41 CFR 1–1.606.

Subpart 1.7—Small Business Concerns

§ 44–1.700 General.

This subpart implements and supplements general policies and procedures set forth in 41 CFR Subpart 1–1.7.

§ 44–1.704 FEMA direction and operation.

FEMA shall implement the policies and procedures set forth in 41 CFR 1–1.7 through its small business advisor and its small business specialists.

§ 44–1.704–1 Small business advisor.

The Director, Acquisition Management Division, is hereby designated as FEMA's small business advisor for all procurement matters. The small business advisor is responsible for the establishment, implementation and execution of the small business procurement program. He is the central point of contact for inquiries concerning the program from industry, the Small Business Administration, the Congress, the Office of the Director and others. His duties include developing a plan of operation that will insure that an equitable share of contracts will be awarded to small businesses by the Agency. He will be assisted on a daily basis by the small business specialists.

§ 44–1.704–2 Small business specialists.

The small business advisor shall designate, by name and in writing, a small business specialist in each procuring office of FEMA, as appropriate, who shall be responsible for maintaining the program in that procuring office in accordance with the requirements of the FPR, the FEMAPR, and any further directives from the small business advisor. The small business specialist, for the Division of Acquistion Management at FEMA Headquarters, in addition to the above duties, shall act as coordinator for the small business activities in the other procuring offices and provide liaison between the other small business specialists and the small business advisor.

§ 44–1.705 Cooperation with the Small Business Administration.

§ 44–1.705–3 Screening of procurements.

FEMA has no SBA representative assigned to it on a full or part-time basis except to the extent that a representative of SBA regularly monitors the small business program within the Agency. Therefore, for all practical purposes, the small business specialists perform the duties of on-site SBA representatives. Accordingly, all proposed procurements estimated to exceed $10,000 will be reviewed by the small business specialists to identify those procurements which should be set aside in whole or in part for small business, unless the Head of the Procuring Activity determines in accordance with 41 CFR 1–1.705–3(a) that such review would unduly delay the procurement process. The small business specialist initiates recommendations to the Contracting Officer for small business set-asides for those individual procurements or classes of procurements, or portions thereof.

§ 44–1.706 Procurement set-asides for small business.

§ 44–1.706–2 Review of set-aside recommendatons initiated by small business specialist(s).

When the small business specialist recommends that all, or a portion, of an individual procurement or class of procurements be set aside for small business, the Contracting Officer shall promptly either (a) concur in the recommendation or (b) disapprove the recommendation, stating in writing his reasons for disapproval. If the Contracting Officer disapproves the recommendation of a small business specialist, the small business specialist may appeal to the Head of the Procuring Activity whose decision shall be final.

§ 44–1.706–3 Withdrawal or modification of set-asides.

A withdrawal or modification of an individual or class set aside which was originally established upon the recommendation of the small business specialist may be proposed by the Contracting Officer by giving notice, containing the reason for the proposed withdrawal or modification, to the small business specialist. If the small business specialist does not agree to a withdrawal or modification, the Contracting Officer may appeal to the Head of the Procuring Activity whose decision shall be final.

§ 44–1.706–5 Small business class set-asides.

(a) A class set-aside is hereby made for each proposed procurement for construction which is not expected to exceed $1,000,000 in amount. Accordingly, Contracting Officers shall set aside for small business each such proposed procurement. If a Contracting Officer determines that any individual procurement falling within the class set-aside requirements of this section is unsuitable for such a set-aside in part or in total, the set-aside may be withdrawn or modified in accordance with FEMAPR 44–1.706–3. Proposed procurements for construction which exceed an estimate of $1,000,000 shall be considered for set-aside on a case-by-case basis.

(b) A class set-aside is hereby made for each proposed procurement which is not expected to exceed $10,000. A written determination must be made by the Contracting Officer for each such

procurement not awarded to a small business detailing the reasons therefor.

§ 44–1.706–50 Review of class set-aside programs.

Each procuring office shall forward a semi-annual report on class set-aside withdrawals to the Director, Acquisition Management Division. The Director, Acquisition Management Division, acting as the small business advisor, shall direct actions to be taken to improve small business participation under the class set-asides in FEMAPR 44–1.706–5.

§ 44–1.713 FEMA contracts with the Small Business Administration.

It is the policy of FEMA to increase small business participation in procurement programs by awarding procurement contracts, whenever feasible to the SBA as authorized by Section 8(a) of the Small Business Act (15 USC 637(a)) and the FPR.

§ 44–1.750 FEMA responsibilities and functions pursuant to Section 8(a) of the Small Business Act.

(a) 8(a) program responsibilities. The FEMA Director for Small and Disadvantaged Business Utilization shall be responsible for the development and review of goals to be achieved under the 8(a) program and shall coordinate with the Director, the program offices, and the regional directors in establishing the level of FEMA's participation in the 8(a) program and the level of coordination with the small business advisor appropriate and necessary to definitize FEMA's plan for implementation of the 8(a) established goals.

In conjunction with this responsibility for establishing 8(a) goals, the Director for Small and Disadvantaged Business Utilization shall make available to the small business advisor 8(a) program guides for use by the small business specialists and Contracting Officers in making determinations on individual procurements that should be processed as an 8(a) contract to be awarded to SBA.

(b) 8(a) procurement responsibility. The procurement and contracting aspects of this program shall be the responsibility of the small business advisor who shall assure that 8(a) procurement requirements are implemented through the small business specialists in each of their appropriate areas of assignment.

(c) 8(a) functions of the small business specialist. The small business specialist(s) acting on behalf of the small business advisor, shall screen proposed solicitations to determine the feasibility of placement under the 8(a) program as part of the performance of those duties set forth under FEMAPR 44–1.704–1. The small business specialists, after consideration of the goals and guidance established pursuant to paragraph (a) of this section, shall make recommendations for 8(a) procurement to the Contracting Officer, who may, in his discretion, contract with the Small Business Administration in accordance with 41 CFR 1–1.705–7 and 1–1.713.

(d) 8(a) reporting requirements. The small business advisor shall report to the Director for Small and Disadvantaged Business Utilization on a quarterly basis covering the activities of the 8(a) program which report shall include the following:

(1) A narrative statement regarding the operation of the program during the three month period; and

(2) The number and dollar amount of awards made to small business under the 8(a) program.

Subpart 1.8—Labor Surplus Area Concerns

§ 44–1.800 Scope of subpart.

This subpart sets forth policies and procedures governing aid to sections classified as having concentrated unemployment or underemployment and areas of persistent or substantial labor surplus hereinafter referred to as labor surplus areas.

§ 44–1.803 FEMA direction and operation.

FEMA shall implement the policies and procedures set forth in 41 CFR 1–1.8 through its labor surplus area advisor and its labor surplus area specialists.

§ 44–1.803–1 Labor surplus area advisor.

The Director, Acquisition Management Division, is hereby designated as FEMA's labor surplus area advisor for all procurement matters. The labor surplus area advisor is responsible for the establishment, implementation and execution of the labor surplus area program within FEMA. He is the point of contact for inquiries concerning the program from industry, the Departments of Labor and Commerce, the Small Business Administration, the Congress, the Office of the Director and others. His duties include developing a plan of operation to increase the share of contracts awarded to labor surplus area concerns by FEMA. He will be assisted on a daily basis by the labor surplus area specialists.

§ 44–1.803–2 Labor surplus area specialists.

(a) The labor surplus area advisor shall designate, by name and in writing, a labor surplus area specialist in each procuring office of FEMA who shall be responsible for maintaining the program in those procuring offices in accordance with the requirements of the FPR, the FEMAPR and any further directives from the labor surplus area advisor.

(b) The labor surplus area specialist for the Acquisition Management Division at FEMA headquarters, in addition to the above, shall also act as coordinator for the labor surplus area activities in the other procuring offices and provide liaison between the other labor surplus area specialists and the labor surplus area advisor.

§ 44–1.803–3 Screening of procurements.

All proposed procurements estimated to exceed $10,000 shall be reviewed by the labor surplus area specialist to identify those procurements which should be set aside in whole or in part for labor surplus area concerns in accordance with 41 CFR 1–1.804–1 and to identify possible subcontracting opportunities for labor surplus area concerns. The labor surplus area specialist shall initiate recommendations to the Contracting Officer based upon these reviews for labor surplus area set-asides for those individual procurements or classes of procurements or portions thereof identified.

§ 44–1.803–4 Review of set-aside recommendations initiated by labor surplus area specialists.

When the labor surplus area specialist recommends that all, or a portion, of an individual procurement or class of procurements be set aside for labor surplus area concerns, the Contracting Officer shall promptly either (a) concur in the recommendation or (b) disapprove the recommendation, stating in writing his reasons for disapproval. If the Contracting Officer disapproves the recommendation, the labor surplus area specialist may appeal to the Head of the Procuring Activity whose decision shall be final.

§ 44–1.804 Partial set-asides for labor surplus area concerns.

§ 44–1.804–4 Withdrawal of set-asides.

A withdrawal of an individual or class set-aside which was originally established upon the recommendation of the labor surplus area specialist may be proposed by the Contracting Officer by giving written notice, containing the reason for the proposed withdrawal to the labor surplus area specialist. If the labor surplus area specialist does not agree to a withdrawal, the Contracting Officer may appeal to the Head of the

protection and provision for the

Sec.

Procuring Activity whose decision shall be final.

§ 44–1.804–50 Modifications of set-asides.

Modifications of set-asides shall be handled in the same manner as withdrawals of set-asides.

Subpart 1.10—Publicizing Procurement Actions

§ 44–1.1003–2 General requirements.

(a) Except in the instances described in 41 CFR 1–1.1003–2(a) (1) through (10) every proposed modification to, or exercise of an option on existing contracts, when new funds are obligated for additional supplies and services which may result in an award of $5,000 or more, shall be published promptly in the Commerce Business Daily.

(b) Synopses prepared in accordance with paragraph (a) above on procurements negotiated on a noncompetive basis, shall indicate that the procurement is being synopsized to show that the agency believes only one source to exist. Descriptions of noncompetitive procurements contained in such synopses shall be in such detail that a firm can clearly understand the requirement and thus decide on the basis of adequate information whether it has the ability to compete in performing the work.

§ 44–1.1003–4 Synopsis of subcontract opportunities.

In addition to the requirements of 41 CFR 1–1.1003–4, the Contracting Officer shall, unless not in the Government's best interest, make the source list on a solicitation available to those firms requesting such list for the purpose of seeking subcontracting opportunities on procurements exceeding $10,000.

Subpart 1.13—Small Business Concerns Owned and Controlled by One or More Socially and Economically Disadvantaged Individuals

§ 44–1.1300 Scope of subpart.

This subpart contains policies and procedures applicable to the participation in FEMA procurement of small business concerns owned and controlled by one or more socially and economically disadvantaged individuals.

§ 44–1.1302 Policy.

It is the policy of FEMA to foster and promote the participation of small business concerns owned and controlled by one or more socially and economically disadvantaged individuals in the Agency's procurement program and to offer guidance to such firms to the maximum extent practicable in order to enhance their ability to compete for the placement of FEMA procurement contracts.

§ 44–1.1303 Solicitation representation.

As with procurements over $10,000, it is desirable that a representation as a small business concern owned and controlled by one or more socially economically disadvantaged individuals be obtained from all bidders, offerors, and contractors for procurement under $10,000. Accordingly, procuring offices shall request, whether in a solicitation or otherwise, that all bidders, offerors and contractors, complete and return on a voluntary basis, the certificate set forth in 41 CFR 1–1.1303, indicating also the applicable solicitation number or purchase order number. Completion of the certificate shall not be regarded as a condition for award.

Subpart 1.50—Criteria for Use of Procurement Contracts Versus Assistance Instruments

§ 44–1.5000 Scope of subpart.

This subpart sets forth definitions for procurement contracts, grants and cooperative agreements and provides examples of each to allow for uniform selection of the proper instrument within FEMA.

§ 44–1.5001 Procurement Contracts.

§ 44–1.5001–1 Definition.

Procurement contracts are to be used whenever the principal purpose of the instrument is the acquisition by purchase, lease or barter of property or services for the direct benefit or use of the Federal Government.

§ 44–1.5001–2 Examples of procurement contracts.

Procurement contracts will normally be used when the principal purposes of the relationship is:

(a) Evaluation (including research of an evaluative character) of the performance of Government program, projects or grantee activity initiated by FEMA.

(b) Projects funded by administrative funds.

(c) Technical assistance rendered on behalf of the Government to any third party, including those receiving grants or cooperative agreements.

(d) Surveys, studies and research which provide specific information desired by the Government for its direct activities or for dissemination to the public.

(e) Consulting or professional services of all kinds if provided to the Government or, on behalf of the Government, to any third party.

(f) Planning for Government use.

(g) Conferences conducted in behalf of the Government.

(h) Production of publications or audiovisual materials required primarily for the conduct of the direct operations of the Government.

(i) Design or development of items for Government use or pursuant to agency definition or specifications.

(j) The generation of management information or other data for Government use.

§ 44–1.5002 Assistance.

Assistance may take the form of either grants or cooperative agreements and include:

(a) General financial assistance (stimulation or support) to eligible recipients under specific legislation authorizing such assistance.

(b) Financial assistance (stimulation or support) to a specific program activity eligible for such assistance under specific legislation authorizing such assistance.

§ 44–1.5002–1 Grants.

Grants are to be used whenever the principal purpose of the relationship is the transfer of money, property, services or anything of value to a recipient to accomplish a public purpose of support or stimulation authorized by Federal statute and substantial involvement is not anticipated.

§ 44–1.5002–2 Cooperative agreements.

Cooperative agreements are to be used whenever the principal purpose of the relationship is the transfer of money, property, service or anything of value to recipients to accomplish a public purpose of support or stimulation authorized by Federal statute and substantial involvement is anticipated.

§ 44–1.5002–3 Examples of involvement that is not substantial.

Involvement is not substantial and therefore a grant is the proper instrument if the following types of involvement are planned:

(a) Approval of recipient plans prior to award.

(b) Normal Federal stewardship such as site visits, performance reporting, financial reporting and audits to insure that objectives, terms and conditions of the grants are met.

(c) Unanticipated involvement to correct deficiencies in project or financial performance from the terms of the grants.

(d) General statutory requirements understood in advance of the award such as civil rights, environmental protection and provision for the handicapped.

(e) Review of performance after completion.

(f) General administrative requirements, such as those included in OMB Circulars A–21, A–95, A–110 and A–102.

§ 44–1.5002–4 Examples of substantial involvement.

Involvement is substantial and a cooperative agreement is the proper instrument when the following types of involvement are planned.

(a) Agency review and approval of one stage before work can begin on a subsequent stage during the period covered by the cooperative agreement.

(b) Agency and recipient collaboration or joint participation in the performance of the assisted activities.

(c) Highly prescriptive agency requirements prior to award limiting recipient discretion with respect to scope of services offered, organizational structure, staffing, mode of operation, and other management processes, coupled with close agency monitoring or operational involvement during performance over and above the normal exercise of Federal stewardship responsibilities to ensure compliance with these requirements.

(d) General administrative requirements beyond those included in OMB Circulars A–102 and A–110.

PART 44–2—PROCUREMENT BY FORMAL ADVERTISING

Sec.
44–2.000 Scope of part.

Subpart 2.1—Use of Formal Advertising

44–2.106 Procurement management reviews.

Subpart 2.2—Solicitation of Bids

44–2.201 Preparation of invitation for bids.
44–2.202 Miscellaneous rules for solicitation of bids.
44–2.202–1 Bidding time.
44–2.202–2 Telegraphic bids.
44–2.202–3 Place and method of delivery of supplies.
44–2.202–4 Bid samples.
44–2.202–50 Extension of time for bid opening.
44–2.202–51 Pre-bid conferences.
44–2.202–52 Bid envelopes.
44–2.205 Bidders mailing lists.
44–2.205–1 Establishment of lists.
44–2.250 Small business concerns owned and controlled by one or more socially and economically disadvantaged individuals and labor surplus area concerns.

Subpart 2.3—Submission of Bids

44–2.301 Responsiveness of bids.
44–2.303 Late bids.
44–2.303–6 Notification to late bidders.
44–2.303–7 Disposition of late bids.

Subpart 2.4—Opening of Bids and Award of Contract

44–2.401 Receipt and safeguarding of bids.
44–2.402 Opening of bids.
44–2.402–50 Time of acceptance and withdrawal of bids.
44–2.406 Mistakes in bid.
44–2.406–3 Other mistakes disclosed before award.
44–2.407 Award.
44–2.407–8 Protests against award.

Subpart 2.5—Two-Step Formal Advertising

44–2.502 Conditions for use.

Authority: Sec: 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

§ 44–2.000 Scope of part.

This part implements and supplements the basic requirements for procurement of personal property and non-personal services (including construction) by formal advertising, and establishes policies with respect to solicitation of bids, submission of bids, opening and evaluation of bids and the awarding of contracts as set forth in 41 CFR Part 1–2.

Subpart 2.1—Use of Formal Advertising

§ 44–2.106 Procurement management reviews.

The Policy and Support Branch of the Acquisition Management Division shall be responsible for meeting the requirements of 41 CFR 1–2.106.

Subpart 2.2—Solicitation of Bids

§ 44–2.201 Preparation of invitation for bids.

Forms used in the preparation of invitations for bids are prescribed in 41 CFR Subparts 1–16.1 and 1–16.4 and Part 16 of the FEMAPR.

§ 44–2.202 Miscellaneous rules for solicitation of bids.

§ 44–2.202–1 Bidding time.

In the procurement of supplies and services, the following shall be observed:

(a) Procurement action which does not provide for the minimum bidding time required by 41 CFR 1–2.202–1(c) shall be justified by the Contracting Officer prior to releasing the invitation for bids. This justification shall take the form of a finding of fact which establishes the Contracting Officer's basis for the exception to the minimum bidding time.

(b) The minimum bidding time stipulated in 41 CFR 1–2.202–1(c) shall not be construed as a maximum. Each prospective procurement shall be examined on its own merits to determine the bidding time that will facilitate competition on reasonable and equal terms. As a general rule, procurement of a less complicated nature for which no extensive bid preparation by the prospective bidder is required in development of his bid may contain a bidding time of 20 calendar days. Where the specification may require prospective bidders to develop drawings or samples, or to do extensive preparation in developing a meaningful bid, 30 calendar days or more of bidding time may be required.

§ 44–2.202–2 Telegraphic bids.

Telegraphic bids will be authorized only by the Contracting Officer who shall document the official procurement file as to the necessity of telegraphic bids. Conditions under which telegraphic bids may be authorized are set forth in 41 CFR 1–2.202–2. When telegraphic bids are authorized by the Contracting Officer, a clause shall be incorporated in the invitation for bids, authorizing such bids and providing instructions on their submission in accordance with 41 CFR 1–2.202–2(a).

§ 44–2.202–3 Place and method of delivery of supplies.

To the maximum extent practical, invitations for bids issued by FEMA shall stipulate "f.o.b. destination." Only where the Contracting Officer determines in writing that it is in the Government's best interest may he deviate from this policy.

§ 44–2.202–4 Bid samples.

Bid samples submitted by bidders as required by an invitation for bids or as unsolicited samples, if not returned in accordance with 41 CFR 1–2.202–4(h), shall be disposed of by the contracting officer who shall document the contract file as to the method of disposition.

§ 44–2.202–50 Extension of time for bid opening.

Whenever such action is determined by the Contracting Officer to be in the best interest of the Government, bid openings may be rescheduled for a later date by issuance and distribution of an amendment (See 41 CFR 1–2.207) to the invitation for bids. Notices of change in bid opening date shall specify the exact time and date for the new opening and will be issued by mail or telegram as soon as possible, but, in any event, prior to the time specified for the opening of bids.

§ 44–2.202–51 Pre-bid conferences.

Whenever a pre-bid conference is proposed for a formally advertised procurement the following will be applicable:

(a) *General.* One of the essential elements of formal advertising is that all bidders are afforded an equal opportunity to compete. For this reason, discussions with prospective bidders will only be conducted by or with the knowledge and approval of the Contracting Officer. It is incumbent upon the Contracting Officer to avail all prospective bidders of the same information so as not to give one an advantage over the others. The need for pre-bid conferences in advertised procurements should be infrequent and such conferences shall not be used as a substitute for formally amending defective or ambiguous solitations or to disseminate additional specification requirements. A pre-bid conference is only authorized when it is deemed by the Contracting Officer to be in the best interest of the Government and approved by the Head of the Procuring Activity or when written internal program policy requires it under certain specified circumstances.

(b). *Purpose.* A pre-bid conference is held to accomplish these primary objectives:

(1) To provide discussion of unusual aspects of complex procurements.

(2) To impart information that removes areas of performance uncertainties which, unless removed, result in higher price to the Government, i.e., inclusion in the bid of an amount for the uncertainty or contingency.

(3) To avoid post-award performance problems which firms could have been made aware of at the time of bid preparation.

(c) *Format.* The typical format of a pre-bid conference is a formal presentation by the Contracting Officer or his representative followed by a question and answer period. All prospective bidders and their subcontractors shall be invited to the meeting in a manner deemed appropriate by the Contracting Officer. When held, a pre-bid conference shall be scheduled sufficiently in advance of the date set for bid opening to permit prospective bidders to use the information. A written record of the pre-bid conference shall be made and maintained in the procurement file as the office record of what was presented at the conference.

(d) *Conclusion.* As a result of the pre-bid conference, it may become necessary to change or substantially clarify the invitation for bid. This action shall be transmitted to all those receiving invitation for bids in the form of an official amendment to the solicitation, taking into consideration any extension of the closing date for the receipt of bids.

§ 44-2.202-52 Bid envelopes.

Mailing labels, or envelopes, bearing "Postage and Fees Paid" indicia shall not be distributed with the invitation for bids or otherwise supplied to prospective bidders. To provide for ready identification and proper handling of bids, the Optional Form 17, "Sealed Bid Label" may be furnished with each bid set to inform the bidder as to what will be required on the bid envelope. 41 CFR 1-16.902-OF17 illustrates the referenced form and copies of same can be obtained from the General Services Administration.

§ 44-2.205 Bidders mailing lists.

§ 44-2.205-1 Establishment of lists.

New prospective suppliers that have been added to the bidders mailing list shall be notified by the procuring office by a letter so indicating.

§ 44-2.250 Small business concerns owned and controlled by one or more socially and economally disadvantaged individuals and labor surplus area concerns.

It is the policy of FEMA to send pre-invitation notices to all small business concerns owned and controlled by one or more socially and economically disadvantaged individuals and labor surplus area concerns that are on the bidder's mailing list for each procurement expected to result in an award in excess of $10,000, subject to the provisions of § 44-1.1302.

Subpart 2.3—Submission of Bids

§ 44-2.301 Responsiveness of bids.

Any bid which is not signed by the bidder or his authorized representative shall be disregarded, except when it is accompanied by other evidence which demonstrates the bidder's intention to be bound by the unsigned bid document. An example of such evidence is a bid guarantee or a letter (which does not qualify or otherwise render the bid non-responsive) signed by the bidder referring to, and clearly identifying the bid itself. In such a case, the Contracting Officer may waive the deficiency as a minor informality or irregularity (see 41 CFR 1-2.405) and shall document the file to so indicate.

§ 44-2.303 Late bids.

§ 44-2.303-6 Notification to late bidders.

In setting the date to be inserted in the notice to late bidders contained in 41 CFR 1-2.303-6, consideration should be given to the time required by the bidder to develop and prepare the required evidence in relation to the acceptance period specified by the otherwise apparent low bidder, avoidance of undue delay in the procurement cycle, and other pertinent factors. As a general rule, the bidder should be allowed a minimum of three (3) working days in addition to a time allowance for transmitting the notice to, and receipt of the evidence by, the Contracting Officer. The bidder shall be notified immediately in writing if his bid cannot be considered for award because of lateness.

§ 44-2.303-7 Disposition of late bids.

The return of a late bid which cannot be considered for award shall be accompanied by a statement from the Contracting Officer that the bid was not considered because of its late receipt. If the late bid had to be opened for identification purposes or was opened by mistake, this fact shall be included in the statement from the Contracting Officer accompanying the returned bid. In all cases where a late bid is not considered and returned to the bidder, the file shall be documented with all information relating to the determination of late receipt which shall include a copy of the late bid envelope.

Subpart 2.4—Opening of Bids and Award of Contract

§ 44-2.401 Receipt and safeguarding of bids.

(a) Envelopes or other outer coverings containing identified bids shall be stamped or otherwise marked to show the office of receipt, the time of day received and the date. The individual receiving the bids shall then place his initials under the above marking.

(b) The Contracting Officer shall, in addition to the requirements of 41 CFR 1-2.401(b), retain in the file a copy of the envelope, wrapper or other container bearing the required documentation of a bid which was opened by mistake or for purposes of identification.

§ 44-2.402 Opening of bids.

(a) The Contracting Officer, or his duly authorized representative, shall be designated as the bid opening officer. At the bid opening, the relative merits of any bids shall not be discussed by any person from the procuring office. No statement shall be made at the bid opening by any person from the procuring office regarding the award, the possibility of a readvertisement, mistakes in bids, the responsiveness of any bid or responsibility of any bidder, etc.

(b) Inquiries or protest received during the bid opening regarding award of the contract shall be referred to the Contracting Officer for resolution after the completion of the bid opening.

Bidders are cautioned that information obtained at the bid opening from persons other then the Contracting Officer may only be relied upon by the bidder at the bidder's own risk. After all bids have been opened, read aloud and recorded, the bid opening officer shall state that opening of bids has been completed.

§ 44-2.402-50 Timing of acceptance and withdrawal of bids.

Bidders may not withdraw their bids after bid opening unless the notice of withdrawal was mailed prior the time set for bid opening and handled in accordance with 41 CFR 1-2.305.

§ 44-2.406 Mistakes in bid.

§ 44-2.406-3 Other mistakes disclosed before award.

The Director, Acquisition Management Division, is delegated the authority to make the determinations required by 41 CFR 1-2.406-3 concerning mistakes in bid other than obvious clerical errors discovered prior to award. Each such determination shall be approved by the Office of General Counsel prior to notification of the bidder.

§ 44-2.407 Award.

§ 44-2.407-8 Protests against award.

(a) *General.* (1) Resolution of protests to the contracting activity shall be pursued initially by the Contracting Officer. If the protest cannot be resolved, or if the protest has been filed with GAO, the Contracting Officer shall forward a report to the HPA. The report shall consist of the documents set forth in 41 CFR 1-2.407-8(a)(2). The HPA shall either recommend a course of action to the Contracting Officer or forward the Contracting Officer's report to the Office of General Counsel. The Office of General Counsel is the FEMA liaison with GAO. All communication with GAO concerning a protest shall be coordinated through the HPA and the Office of General Counsel.

(2) A protestor shall be notified of the final decision of his protest to the Contracting Officer within thirty (30) working days after receipt of his protest. A formal report to GAO shall be submitted to GAO within twenty-five (25) working days after receipt of the request. In order to assure compliance with these dates, the contracting office shall submit his report to the HPA within ten (10) working days of receipt of the protest or request for comments from GAO. If the GAO has requested comments, the Contracting Officer's submission to the HPA shall include the names and addresses of interested parties along with copies of the report for GAO and each interested party.

(b) *Protests before award.* Where the Contracting Officer makes a determination to award a contract notwithstanding a protest, approval shall be obtained from the HPA prior to making the award. The Contracting Officer shall forward a written determination, made in accordance with 41 CFR 1-2.407-8(b)(4), to the HPA along with the request for approval to make award. The HPA shall notify the Office of General Counsel prior to authorizing award of a contract when the protest has been filed with GAO.

(c) *Protests after award.* In addition to the requirements of 41 CFR 1-2.407-8(a)(2), the Contracting Officer's report shall contain the following:

(1) Current status of the contract, indicating whether performance has commenced, shipment or delivery has been made or a stop work order has been issued, and

(2) Copies of any mutual agreement with the contractor, if applicable, to suspend performance.

(d) *Timeliness.* Protest filed with the Contracting Officer shall be filed to be received at the procuring office not later than five (5) working days after the basis for protest is known or reasonably should have been known, whichever is earlier.

(e) *Records.* The HPA shall maintain records relating to all protests received. The records shall contain adequate data to show the number and nature of formal protests received (whether filed directly with FEMA or with GAO), their disposition and the time for resolutions. These records will be reviewed annually in order to update protest procedures.

Subpart 2.5—Two-Step Formal Advertising

§ 44-2.502 Conditions for use.

Pursuant to 41 CFR 1-2.502, approval must be obtained from the Head of the Procuring Activity before the two-step formal advertising method of procurement may be used.

PART 44-3—PROCUREMENT BY NEGOTIATION

Sec.

44-3.000 Scope of part.

Subpart 3.1—Use of Negotiation

44-3.100 Scope of subpart.
44-3.101-50 Noncompetitive procurement.
44-3.101-51 Preference for local contractors in Presidentially declared major disasters or emergencies.
44-3.103 Dissemination of procurement information.
44-3.103-50 Preproposal conferences.
44-3.150 Treatment of proposal information.
44-3.150-1 General.
44-3.150-2 Disposition of unsuccessful proposals.
44-3.150-3 Use of successful proposals.

Subpart 3.4—Types of Contracts

44-3.400 Scope of subpart.
44-3.405-3 Cost-sharing contract.
44-3.406 Letter contract.

Subpart 3.7—Negotiated Overhead Rates

44-3.700 Scope of subpart.
44-3.702 General.
44-3.707 Overhead ceilings.

Subpart 3.8—Price Negotiation Policies and Techniques

44-3.800 Scope of subpart.
44-3.801-2 Responsibility for determination of final price.
44-3.802 Preparation for negotiation.
44-3.802-2 Alternate procedures for consideration of late proposals.
44-3.805 Selection of offerors for negotiation and award.
44-3.805-50 Source selection procedures.

Subpart 3.51—Protests Against Award

44-3.5101 Negotiated procurement protests.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

§ 44-3.000 Scope of part.

This part prescribes policies and procedures which shall be observed by FEMA procuring offices in connection with procurement by negotiation.

Subpart 3.1—Use of Negotiation

§ 44-3.100 Scope of subpart.

This subpart sets forth policies and procedures concerning exceptions to normal negotiation procedures and the dissemination of procurement information.

§ 44-3.101-50 Noncompetitive procurement.

(a) *General.* FEMA procurement shall be accomplished on a competitive basis to the maximum extent practicable. Procurement without competition shall be limited to those circumstances in which only one firm, organization or individual can provide the required supplies or services.

(b) *Justification for noncompetitive procurement.* In order for procurement on a noncompetitive basis to be approved, the justification must demonstrate that one of the following criteria has been met:

(1) The recommended source possesses a unique characteristic or capability that serves to make that source the only one able to provide the required product or service and all other sources unable to provide the product or service.

(2) The proposed procurement is for replacement of components for

competitive range, shall provide prompt

(i) Confidential business information.

§ 44-3.150 Treatment of proposal

equipment specially designed by a manufacturer and available data is not adequate to assure that replacement parts or components, if provided by a source other than the manufacturer of the equipment, would be compatible with, or perform the same function as, the parts or components being replaced.

(c) *Exclusions.* The provisions of FEMAPR 44–3.101–50(a) do not apply to the following:

(1) Procurement of $500 or less.

(2) Procurement from or through other Government Agencies.

(3) Procurements of architect-engineer services.

(4) Procurements of utility services where the services are available from only one source.

(5) Procurements with the Small Business Administration.

(6) Purchases from mandatory Federal Supply Schedule contracts which list only one source.

(d) *Approvals.* Program offices are responsible for submitting to the procuring office a detailed recommendation of the factual circumstances justifying noncompetitive procurement. The Contracting Officer shall execute a written justification either approving or disapproving the non-competitive procurement. The justification shall state that the circumstances set forth in the justification do or do not meet the noncompetitive procurement criteria set forth in FEMAPR 3.101–50(b): It shall also set forth the reasons why these circumstances do or do not meet these criteria. The Contracting Officer shall then forward the justification, along with the contract file, to the following approval levels prior to issuance of a solicitation:

(1) Procurements over $500 but not over $10,000—Contracting Officer.

(2) Procurements over $10,000 but not over $100,000—level higher than the Contracting Officer.

(3) Procurements over $100,000 but not over $500,000—the Head of the Procuring Activity.

(4) Procurements over $500,000—the Director, Office of Finance and Administration.

§ 44–3.101–51 Preference for local contractors in Presidentially declared major disasters or emergencies.

(a) *Scope of subsection.* This subsection establishes policies relating to local contractor preference to receive procurement awards resulting from competitively negotiated solicitations under a Presidentially-declared major disaster or emergency operation.

(b) *Geographical coverage.* The geographic areas to which local contractor preference shall apply are those affected by the Presidentially-declared disaster and designated by the Associate Director for Disaster Response and Recovery in the **Federal Register.** Geographical areas shall be identified by county or other political subdivision.

(c) *Procurement for implementation of the procurement of supplies and services for disaster relief response.* Pursuant to the provisions of Pub. L. 93–288, the clause set forth below shall be included in each competitively negotiated solicitation for disaster relief response.

Provision for Competitively Negotiated Solicitations

In awarding any contract(s) pursuant to this solicitation, the Government shall give preference to local organizations, firms and individuals residing or doing business primarily in the geographic area identified as the disaster area by the Associate Director for Disaster Response and Recovery.

The Contracting Officer reserves the right to request offerors to furnish documentation to demonstrate eligibility for local contractor preference. To be eligible for local contractor preference, the offeror shall have been residing (in the case of individuals) or doing the major portion of its business (in the case of business entities) in the disaster area.

Offerors for which eligibility is established (local offerors) shall be permitted to reduce their proposed price to meet the lowest price received from an otherwise eligible non-local offeror, provided that the proposed price from the local offeror(s) does not exceed 130% of the price received from the non-local offeror. The lowest priced local offeror within 130% of the lowest non-local price shall be given the initial opportunity to meet the non-local price. If the local offeror meets the lowest non-local price and is determined to be responsible, award shall be made. If the non-local offer is not met, the next lowest local offeror within 130% shall be given an opportunity to meet the lowest non-local price. This process shall continue until award is made to a local offeror within the 130% requirement or the supply of such local offerors is exhausted and award made to the lowest non-local offerors.

(d) *Exception to use of local preference provisions.* If it is determined by the Contracting Officer to be in the best interest of the Government the clause set forth in Paragraph (c) need not be included in solicitations. Such determination shall be documented in the contract file with a findings and determination signed by the Contracting Officer and approved by the Head of the Procuring Activity.

(e) *Additional methods for encouraging local participation.* In the event the Contracting Officer makes the determination of paragraph (d) above, local participation may be encouraged by:

(1) Setting the procurement aside for labor surplus area if the disaster area has been established as a labor surplus area;

(2) Advertising only in the local disaster area; and/or

(3) Subdividing large requirements into several smaller requirements.

§ 44–3.103 Dissemination of procurement information.

(a) *Publicizing procurement actions.* The agency shall continually search for and develop information on sources (including small businesses owned and controlled by one or more socially or economically disadvantaged individuals) competent to provide supplies or services. Advance publicity, including use of the Commerce Business Daily to the fullest extent practicable, shall be given for this purpose. The search should include (a) a review of relevant data or brochures furnished by sources seeking to do business with the agency and (b) a cooperative effort by program personnel, small business specialists and Contracting Officers to obtain information and recommendations with respect to potential sources and to consider the desirability of seeking other sources by publication of proposed procurements, in addition to the synopsis requirements. Each procuring office shall use to the maximum extent practicable its bidders mailing list for soliciting competition.

(b) *Release of information during the solicitation phase.* No information shall be released during the solicitation phase of a procurement except as follows:

Each solicitation for a negotiated procurement shall specify an individual within the procuring office who shall be responsible for responding to inquiries concerning the solicitation and evaluation of proposals resulting from the solicitation. All questions concerning the solicitation, whether of a procedural or substantive nature, shall be directed to the above individual. All other personnel will avoid exchange of comments with all offerors or potential offerors. Answers to questions requiring clarification of the substantive portion of the solicitation shall be provided by amendment to the solicitation a copy of which shall be furnished to each recipient of the solicitation.

(c) *Release of information during the evaluation phase.* During the course of evaluating proposals, personnel involved in this activity shall not reveal any information concerning the evaluation of proposals to anyone who is not also participating in the same evaluation proceedings, except as may be required for internal clearances. However, the Contracting Officer, upon determination that a proposal is unacceptable, or not within the competitive range, shall provide prompt notice of the fact to the offeror submitting the proposal. In addition to stating that the proposal has been determined to be unacceptable, or not within the competitive range, the notice to the offeror shall indicate, in general terms, the basis for such determination and shall advise the offeror that since further negotiation with him is not contemplated, a revision of his proposal will not be considered. Such notice need not be given if (a) in the judgment of the Contracting Officer, the disclosure will prejudice the Government's interest (the possibility of protest shall not be considered prejudicial), or if the proposed contract is to be awarded within a few days and notice pursuant to 41 CFR 1–3.103 would suffice. This notification procedure shall not apply to procurements negotiated pursuant to 41 USC 252(c) (4), (5) or (6); negotiated with a foreign supplier when only foreign sources of supplies or services have been solicited; or urgent procurement actions which the Contracting Officer determines in writing must be awarded without delay to protect the public interest. The Contracting Officer's determination shall be placed in the contract file.

(d) *Post-award release of procurement information.* Promptly after making award of any procurement in excess of $10,000, the Contracting Officer shall, if he has not done so pursuant to FEMAPR 44–3.103(c), give written notice to the unsuccessful offerors that their proposals were not accepted. The notice should name the successful contractor and state the amount of the award and the number of proposals received. Where additional information is requested by the offeror, it shall be provided as follows:

(1) It is the policy of FEMA to provide a debriefing to any unsuccessful offeror who makes a written request to the Contracting Officer within two (2) months after contract award.

(2) A debriefing is intended to:

(i) Tell an unsuccessful offeror which areas of his proposal were judged to be weak or deficient and whether the weaknesses or deficiencies were factors in his not having been selected.

(ii) Identify the factors which were the basis for selection of the successful contractor. If the quality of the successful offeror's proposal to satisfy the mission requirement was the basis, the unsuccessful offeror should be so informed and given a general comparison of significant areas, but not a point by point comparison of all the elements considered in the evaluation criteria.

(3) A debriefing should not reveal:

(i) Confidential business information, trade secrets, techniques, or processes of the other offerors; and

(ii) The relative merits or technical standing of the unsuccessful offerors or the scoring by the Source Evaluation Board or Technical Evaluation Panel.

(4) Any FEMA official who receives from an unsuccessful offeror a request, written or oral, for a debriefing shall immediately refer the request to the appropriate procuring office which shall make the necessary arrangements for the debriefing.

(5) It is essential that the debriefing be conducted in a scrupulously fair, objective and impartial manner, and that the information given be factual and consistent with the findings of the evaluation and the basis on which the source selection official made his decision.

(6) It is most important that all FEMA personnel engaged in the evaluation and selection process be aware of the foregoing policies and procedures. Detailed and complete records will be maintained by key technical and business participants in a manner which will facilitate either a written or oral debriefing of any unsuccessful offeror's proposal.

§ 44–3.103–50 Preproposal conferences.

In cases of complex procurement, preproposal conferences may be used to explain complicated specifications and requirements to prospective offerors so as to permit them to submit proposals without undue expenditure of effort, time and money. Attendance at the preproposal conference shall not be used as a method for prequalification of offerors. The preproposal conference may only be used when approved by the Head of the Procuring Activity. The preproposal conference shall be arranged and conducted by the Contracting Officer or his representative with participation by technical, legal and such other personnel as appropriate. All prospective offerors shall be furnished identical information in connection with the proposed procurement. Remarks and explanations at the conference shall not qualify the terms of the solicitation and specifications. All conferees shall be advised that unless the solicitation is amended in writing it will remain unchanged and that if an amendment is issued, normal procedures relating to the acknowledgement and receipt of solicitation amendments shall be applied. A complete record shall be made of the conference. The record shall be made available to those requesting it.

§ 44–3.150 Treatment of proposal information.

§ 44–3.150–1 General.

It is the general policy of FEMA to use information contained in proposals only for evaluation purposes except to the extent such information is generally available to the public, is already the property of the Government or the Government already has unrestricted use rights, or it is, or has been made available to the Government from other sources, including the offeror, without restriction.

§ 44–3.150–2 Disposition of unsuccessful proposals.

Unsuccessful proposals shall be disposed of as follows:

(a) All but one copy of each unsuccessful proposal shall be destroyed upon contract award. The one remaining copy of each unsuccessful proposal shall be retained in the official contract file for six (6) months at the end of which time it may be destroyed.

(b) Unsuccessful proposals shall not be used for purposes other than internal reference unless (1) written permission has been obtained from the offeror or (2) the proposal expressly states that unrestricted use of the proposal is given to the Government regardless of its success in the competition or (3) any of the conditions described in FEMAPR 44–3.150–1 exist.

§ 44–3.150–3 Use of successful proposals.

The Government shall normally be accorded unrestricted use of successful proposals. In the event that the successful offeror desires to place restrictions on the use of his proposal, the terms and extent of such restrictions may be set forth in the resulting contract. In any event the Freedom of Information Act will govern.

Subpart 3.4—Types of Contracts

§ 44–3.400 Scope of subpart.

This subpart sets forth policies and procedures concerning the use of cost-sharing contracts.

§ 44–3.405–3 Cost sharing contract.

(a) *Purpose.* This subsection sets forth basic guidelines governing cost-sharing on research contracts with non-Federal organizations.

(b) *Basic guidelines.* (1) Cost sharing with non-Federal organizations shall be encouraged in contracts for basic or applied research in which the parties have considerable mutual interest in the research.

(2) Contracting Officers shall assure themselves of the following in the determination of contract type.

V 45 A G 19 80 UMI

(i) The research effort has more than minor relevance to the non-Federal activities of the performing organization and the research is not primarily a service to the government;

(ii) The performing organization has adequate non-Federal sources of funds from which to make a cost contribution;

(iii) The performing organization conducts production or other service activities, as opposed to being primarily engaged in research and development, and is in a favorable position to make a cost contribution;

(iv) The principle purpose of the contract is research as opposed to the production of, or design, testing or improving of products, materials, devices, systems or methods.

(v) Payment of the full cost of the project is not necessary in order to obtain the services of the particular organization.

(3) FEMA's Appropriation Act includes provisions requiring cost sharing by the contractor under research contracts resulting from unsolicited proposals. This requirement may only be wavied when the offeror certifies in writing to the Contracting Officer that it has no commercial, production, educational or service activities on which to use the results of the research and that it has no means of recovering any cost sharing on such projects. In situations such as the foregoing, the Contracting Officer may determine that there is no measurable gain to the performing organization and no mutuality of interest; therefore, it would not be equitable for the Government to require cost sharing. Such determinations shall be in writing and placed in the file.

(c) *Guidelines for determining the amount of cost sharing.* (1) For educational institutions and other not-for-profit or nonprofit organizations, cost sharing normally may vary from 1 percent to as much as 50 percent of the costs of the project. In some cases it may be appropriate for educational institutions to provide a higher degree of cost sharing, such as when the cost of the research consists primarily of the academic year salary of faculty members, or when the equipment acquired by the institution for the project will be of significant value to the institution in its educational activities.

(2) The amount of cost participation by commercial or industrial organizations may vary from as little as 1 percent or less of the total project cost to more than 50 percent of total project cost, depending upon the extent to which the research effort is likely to enhance the performing organization's capability, expertise or competitive position and the value of such enhancement to the performing organization. It should be recognized that those organizations which are predominately engaged in research and development and have little or no production or other service activities may not be in a favorable position to derive a monetary benefit from the research under Federal agreements.

(3) A fee or profit will usually not be paid to the performing organization if the organization is to contribute to the cost of the research effort, but the amount of cost sharing may be reduced to reflect the fact that the organization is foregoing its normal fee or profit on the research. However, if the research is expected to be of only minor value to the performing organization and if cost-sharing is not required by statute, it may be appropriate for the performer to make a contribution in the form of a reduced fee or profit, rather than sharing the costs of the project.

(4) Each cost-sharing contract negotiated by the agency shall contain the clause included in FEMAPR 44–7.500 2–9.

§ 44–3.408 Letter contract.

Prior to the award of a letter, contract the Contracting Officer shall make a determination that no other type of contract is suitable under the circumstances surrounding the procurement and shall support this determination by detailing the reasons why no other type of contract is suitable. The determination and supporting documentation shall then be submitted to, and must be approved by, the Head of the Procuring Activity before the letter contract may be awarded.

Subpart 3.7—Negotiated Overhead Rates

§ 44–3.700 Scope of subpart.

This subpart sets forth policies and procedures concerning negotiated overhead rates for use in cost-reimbursement type contracts.

§ 44–3.702 General.

(a) When a contractor performs work in the same period under several contracts for one or more procuring offices or agencies, it may be desirable and appropriate, when mutually agreed to by FEMA and the contractor, to negotiate uniform overhead rates for application to all such contracts in order to (1) effect uniformity of approach, (2) effect economy in administrative effort, and (3) promote timely settlement of reimbursement claims.

(b) When the Contracting officer determines that the above conditions exist, he shall include the negotiated ovrhead rate clause set forth in 41 CFR 1–3.704–1.

(c) If the prospective cost-reimbursement contract is the only contract to be performed by the contractor for the Government during a given period or if the Contracting Officer determines that it is not appropriate to include the clause specified in 41 CFR 1–3.704–1, determination of the reimbursable amount of the overhead under the contract shall be based upon final audit of the actual costs incurred during the period of performance and the clause set forth in FEMAPR 44–7.500 2–6 shall be included.

§ 44–3.707 Overhead ceiling.

When the Contracting Officer determines in accordance with 41 CFR 1–3.707 that it is appropriate to place an overhead ceiling in the contract, he shall include the clause set forth in FEMAPR 44–7.500 2–8.

Subpart 3.8—Price negotiation Policies and Techniques

§ 44–3.800 Scope of subpart.

This subpart sets forth policies and procedures concerning final price negotiation, consideration of late proposals, and source selection.

§ 44–3.801–2 Responsibility for determination of final price.

In the event a contractor insists on a price or demands a profit or fee which the Contracting Officer considers unreasonable and the Contracting Officer is unable to obtain a satisfactory solution after exhausting the courses of action set forth in 41 CFR 1–3.801–2(c), the matter shall be referred to the Head of the Procuring Activity, with a statement of facts and the Contracting Officer's recommendations, for resolution.

§ 44–3.802 Preparation for negotiation.

§ 44–3.802–2 Alternate procedures for consideration of late proposals.

When the Head of the Procuring Activity determines that the procedures set forth in 41 CFR 1–3.802–1 are not appropriate for certain classes of negotiated procurement conducted by FEMA, he may authorize the adoption of the procedures set forth in 41 CFR 1–3.802–2(b) for consideration of late proposals and modifications (except where the procurement of general purpose automated data processing equipment is involved unless use of the procedures set forth in 41 CFR 1–3.802–2(b) is expressly authorized by the

Commissioner, automated Data and Telecommunications Service, GSA)

§ 44–3.805 Selection of offerors for negotiation and award.

§ 44–3.805–50 Source selection procedures.

All competitive procurements in excess of $10,000 shall be subject to a formal selection procedure as described herein.

(a) A proposal evaluation team shall be appointed for each competitive procurement. For procurements under $500,000, the team shall be called the Technical Evaluation Panel. For those procurements in excess of $500,000, the team shall be called the Source Evaluation Board.

(b) Each competitive solicitation shall contain applicable selection criteria including the numerical ranking of each selecting official for those procurements under $500,000 shall be the Contracting Officer and for those over $500,000 the head of the cognizant program office shall be the selecting official.

(c) The proposal evaluation team shall evaluate each proposal against the criteria established in the request for proposal. The initial evaluation shall be to determine technical merit and then shall be combined with the business evaluation to determine the overall merit. Upon completion of this total evaluation the competitive range shall be established. The competitive range shall include those proposals which through written or oral discussions with the offeror, have a reasonable change of selection when all factors are considered, including cost. The competitive range shall be established by the Source Evaluation Board for procurements in excess of $500,000 and by the Contracting Officer on those under $500,000.

(d) discussions shall be conducted with all offerors in the competitive range. Each offeror shall be given an opportunity to submit a revised proposal. A common cutoff date shall be established for receipt of the revisions. Upon receipt the appropriate evaluation team shall evaluate and prepare a final ranking. A final recommendation report will be prepared and furnished to the selecting official. The selecting official for those procurements under $500,000 shall be the Contracting Officer and for those over $500,000 the head of the cognizant program office shall be the selecting official.

(e) The selecting official shall consider the recommendations and select the firm(s) for final negotiations. The Contracting Officer shall then enter into final negotiations with the selected firm(s) to resolve all remaining terms and conditions necessary to reach final agreement.

Subpart 3.51—Protests Against Award

§ 44–3.5101 Negotiated procurement protests.

Protests against award of neogtiated contracts shall be processed in accordance with FEMAPR 44–2.407–8 and 41 CFR 1–2.407–8.

PART 44–4—SPECIAL TYPES AND METHODS OF PROCUREMENT

44–4.1104 Request for procurement action.
44–4.1104–50 Clearance procedures.

Subpart 4.50—Interagency Procurement [Reserved]

§ 44–4.000 Scope and applicability of part.

This part sets forth policies and procedures regarding unsolicited proposals and the procurement of architect-engineer services, automatic data processing equipment and services, and property and services from other Federal agencies.

Subpart 4.9—Unsolicited Proposals

§ 44–4.900 Scope of subpart.

This subpart sets forth policies and procedures concerning the receipt, evaluation, and acceptance of unsolicited proposals.

§ 44–4.901 General.

The unsolicited proposal is a valuable means by which unique or innovative methods or approaches which have originated or developed outside the Government can be made available to FEMA for use in its mission. It is offered in the hope that FEMA will enter into a contract with the offeror for (a) research on or development of the methods, approaches, or ideas it contains, or (b) the conduct of the activity or services or delivery of the items it proposes. It should not be merely an advance proposal for a specific FEMA requirement which would normally be procured by competitive methods. An unsolicited proposal should be prepared independent of Government supervision. As it often represents a substantial investment of time and effort by the offeror, it should present the proposed work in sufficient detail to allow a determination that FEMA support could be worthwhile and that the proposed work could enhance, benefit, and/or provide valuable input to FEMA's research and development mission or to some other area of this Agency's responsibility.

§ 44–4.902 Policy.

FEMA fosters and encourages the submission of unsolicited proposals which contribute new ideas consistent with the contributing to the accomplishment of this Agency's objectives.

§ 44–4.903 Program direction and operation.

For detailed information on unsolicited proposals see 44–4.905 and 44–4.908 below.

§ 44–4.904 Definitions.

As used in this subpart, the following terms have the meanings stated.

(a) "Unsolicited proposal" means a written offer to perform a proposed task or effort, initiated and submitted to FEMA by a prospective contractor (offeror) without a solicitation by FEMA, with the objective of obtaining a contract. Advertising materials, commercial product offerings, contributions, or technical correspondence as defined in paragraphs (b) through (e) below which are submitted to this Agency shall not be considered to constitute unsolicited proposals within the intent of this subpart.

(b) "Advertising material" means material designed to acquaint FEMA with a prospective contractor's present off-the-shelf products or potential capabilities, or designed to determine

this Agency's interest in buying such

(iii) FEMA's Appropriation Act

§ 44–4.906 Content of unsolicited

proposal and negotiate any resultant

addition to any other criteria, the

and circumstances that operate to

this Agency's interest in buying such products.

(c) "Commercial product offerings" means offers of standard commercial products usually sold in substantial quantities to the general public and which the vendor wishes to see introduced in the FEMA supply system as an alternate or replacement for an existing supply item.

(d) "Contributions" means concepts, suggestions, or merely ideas presented to FEMA for its use, with no indication on the part of the offeror that he will devote any further effort in relation to such concepts, suggestions, or ideas on behalf of this Agency.

(e) "Technical correspondence" includes written inquiries regarding FEMA interest in research areas, pre-proposal explorations, technical inquiries, and research descriptions.

§ 44–4.905 Advance guidance.

Organizations or individuals who are interested in submitting an unsolicited proposal are encouraged, before expending extensive effort in preparing a detailed unsolicited proposal or submitting any proprietary information to FEMA, to make preliminary inquiries as to the general need for the type of effort contemplated.

(a) Prior contact with FEMA technical personnel is permissible and encouraged with the limited objective of conveying to the prospective offeror an understanding of the FEMA mission and needs relative to the type of effort contemplated.

(b) The following information regarding policy and procedures for unsolicited proposals is furnished for the use of potential offerors.

(1) Definition—See 44–4.904(a) above

(2) Characteristics of a suitable proposal acceptable for formal evaluation. See 44–4.906 and 44–4.910 below.

(3) Prospective offerors are advised that:

(i) Any awards, based upon acceptance of unsolicited proposals, shall be made only to responsible prospective contracts who meet the standards set forth in 41 CFR 1–1.1203–1 and 1–1.1203–2 and such special standards as may be prescribed in 1–1.2303–3.

(ii) In the areas of research, this Agency's choice of a contractor shall be based primarily upon getting the job done effectively and efficiently with due regard to the long-term strength of the Nation's scientific and technical resources, and avoiding assignments of work which would create inherent conflicts of interest.

(iii) FEMA's Appropriation Act includes provisions requiring cost sharing by the contractor under research contracts resulting from unsolicited proposals. This requirement may only be waived when (A) the offeror certifies in writing to the Contracting Officer that it has no commercial, production, educational or service activities on which to use the results of the research and that it has no means of recovering any costs sharing on such projects; and (B) the Contracting Officer makes a written determination that there is no measurable gain to the performing organization and no mutuality of interest; therefore, it would not be equitable for the Government to require cost sharing.

(4) Prospective offerors, prior to investing substantial time and money in preparation of an unsolicited proposal, should correspond with Agency technical personnel as to the general need for the type of effort to be offered. (See 44–4.904(e) and 44–4.905(a) above, and 44–4.908 below.)

(5) The FEMA point of contact for information regarding unsolicited proposals and other types of transactions frequently misconstrued as unsolicited proposals, e.g., advertising, bidders mailing lists, etc., is the Acquisition Management Division, Policy and Support Branch (See 44–4.908 below).

(6) Information regarding unsolicited proposal submission procedures is contained in 44–4.906 through 44–4.913 below.

(7) Information regarding unsolicited proposal evaluation procedures is contained in 44–4.909 below.

(8) Information on FEMA objectives and areas of potential interest suitable for unsolicited proposal submissions may be obtained from this Agency's technical representatives through the Acquisition Management Division, Policy and Support Branch (See 44–4.908 below).

(9) Prospective offerors should identify any proprietary information that may be contained in proposals and any restrictive legend appearing in the proposal must conform to the legend set forth in 44–4.913(a) below.

(10) Unsolicited proposals shall conform to the procedural and submission guidelines contained in 44–4.906 through 44–4.913 below.

(c) All FEMA personnel shall conduct personal contacts in a manner that will preclude FEMA commitments regarding acceptability of unsolicited proposals.

§ 44–4.906 Content of unsolicited proposals.

Unsolicited proposals shall contain the following information in order to permit consideration in an orderly and timely manner.

(a) *Basic information.* Name and address of offeror; if an organization, indicate type; e.g., profit, nonprofit, educational, small business, names and telephone numbers of the offerors technical and business personnel whom FEMA may contact for evaluation and negotiation purposes; identification of any proprietary data which the offeror intends to be used by FEMA only for evaluation purposes (See 44–4.913 below), names of any other Federal, States, local agencies or other parties receiving the proposal and/or funding the proposed effort or activity; date of submission; and signature of a responsible official or authorized representative of the organization or a person authorized to contractually obligate the organization.

(b) *Technical information.* A concise title and an abstract (approximately 200 words) of the proposed effort; a reasonably complete discussion stating the objectives of the effort, the method of approach and extent of effort to be employed, the nature and extent of the anticipated results, and the manner in which the work will help support accomplishment of the FEMA mission; the names and brief biographical information of the offerors key personnel who would be involved and the types of support if any, the offeror requests of FEMA, e.g., facilities, equipment, materials, or personnel resources.

(c) *Supporting information.* A proposed price or total estimated cost; a cost estimate for the proposed effort sufficiently detailed by element of cost for meaningful evaluation; the type of contract preferred; period of time for which the proposal is valid (a minimum of 6 months is suggested); proposed duration of effort, statements, if applicable, regarding cost sharing, organizational conflicts of interests, security clearance status, and environmental impacts; and brief descriptions of the organization, previous work or experience in the field of the proposal, and facilities to be utilized for the work, where appropriate for understanding the proposal.

§ 44–4.907 Submission.

Unsolicited proposals shall be submitted in an original and five copies at least six months in advance of the offeror's desired beginning of the proposed effort in order to allow this Agency sufficient time to evaluate the proposal and negotiate any resultant contract.

§ 44–4.908 Agency point of contact.

The Acquisition Management Division is the FEMA point of contact for the receipt, acknowledgement and handling of unsolicited proposals. Unsolicited proposals and requests for additional information regarding their preparation shall be submitted to:

Federal Emergency Management Agency, Acquisition Management Division, Policy & Support Branch (M Street Building), Washington, D.C. 20472.

Unsolicited proposals received by other FEMA offices shall be immediately furnished to the Acquisition Management Division, Policy & Support Branch.

§ 44–4.909 Receipt, review, and evaluation.

(a) The Acquisition Management Division shall acknowledge an unsolicited proposal within ten (10) days of its receipt. Simultaneously, copies of the proposal shall be sent to the appropriate program office(s) for evaluation.

(b) Prior to having a comprehensive evaluation made on any unsolicited proposal, the Acquisition Management Division shall insure that the proposal:

(1) Contains sufficient technical and cost information to permit a meaningful evaluation; and

(2) Has been approved by a responsible official of the offeror's organization or a person authorized to contractually obligate the organization.

(c) If the unsolicited proposal does not meet the requirements in (b) above, the Acquisition Management Division shall give the offeror the opportunity to provide the required data. A comprehensive evaluation of an unsolicited proposal shall not be made if the proposal is not within the purview of the mission of FEMA. In such cases the offeror shall be advised how the proposal is being interpreted, the reason(s) for not evaluating it, and the disposition of the material submitted. An appropriately revised or supplemented proposal which is responsive to the above may be reconsidered.

(d) For each unsolicited proposal that is circulated for a comprehensive evaluation within FEMA, the Acquisition Management Division shall attach a legend identifying it as an unsolicited proposal, and stating that it shall be used only for the purpose of evaluation (See 44–4.913(c) below). In evaluating unsolicited proposals, program officials shall consider, in addition to any other criteria, the following:

(1) Unique, innovative or meritorious methods, approaches, or ideas which originated with or are assembled together by the offeror that are contained in the proposed effort or activity.

(2) Overall scientific, technical, or socioeconomic merits of the proposed effort or activity.

(3) Potential contribution which the proposed effort is expected to make to the FEMA mission, if pursued at this time.

(4) Capabilities, related experience, facilities, or techniques, or unique combinations thereof which the offeror possesses and offers and which are considered to be integral factors for achieving the scientific, technical, or socioeconomic objective(s) of the proposal.

(5) Qualifications, capabilities, and experience of the proposed principal investigator, team leader, or key personnel who are considered to be critical in achieving the objectives of the proposal.

(e) Upon completion of the comprehensive evaluation, program officials shall notify the Acquisition Management Division of their conclusions together with recommendations for further action.

§ 44–4.910 Method of procurement.

(a) A favorable comprehensive evaluation of an unsolicited proposal is not, in itself, sufficient justification for negotiating on a noncompetitive basis with the offeror. When a document qualifies as an unsolicited proposal but the substance is available to the Government without restriction from another source, or closely resembles that of a pending requirement that will result in a competitive solicitation, or is otherwise not sufficiently unique to justify acceptance, the unsolicited proposal shall not be accepted and shall be returned to the offeror by the Acquisition Management Division with reasons for the return.

(b) A noncompetitive procurement is permissible when an unsolicited proposal has received a favorable technical evaluation, unless FEMA has determined that the substance thereof is available to the Government without restriction from another source, or a competitive procurement is otherwise appropriate. The program office sponsoring the procurement shall support its recommendation with a justification for a noncompetitive procurement. The justification shall be based on a comprehensive evaluation of the proposal and shall include the facts and circumstances that operate to preclude competition and that support the recommended noncompetitive action. Consideration shall include the evaluation factors listed in 44–4.909(d) above.

(c) When it is determined that the subject matter of an unsolicited proposal is acceptable for award on a noncompetitive basis, the unsolicited proposal will serve as the basis for negotiation.

§ 44–4.911 Prohibitions.

No unsolicited proposal nor any part of an unsolicited proposal shall be used as the basis, or as a portion, of a solicitation, or in negotiation with other firms unless the offeror is notified of and agrees to the intended use. However, FEMA may use any data, concept, or idea which it could have used had the unsolicited proposal not been submitted. Unauthorized disclosure of data tendered in an unsolicited proposal (see 44–4.913(a) below) which concerns or relates to trade secrets, processes, operations, style of work, or apparatus, or other matters may result in the imposition of a criminal penalty pursuant to the provisions of 18 U.S.C. 1905.

§ 44–4.912 Interagency coordination.

When it is determined that a meritorious unsolicited proposal is not related to the mission of FEMA or may be of interest to other agencies in addition to this Agency, FEMA may identify for the offeror other agencies whose missions bear a relationship to the subject matter of the unsolicited proposal.

§ 44–4.913 Limited use of data.

(a) An unsolicited proposal may include data which the offeror does not want disclosed for any purpose other than evaluation of the proposal. If the offeror wishes to impose such a restriction on his unsolicited proposal the offeror shall mark the title page with the following legend:

Use and Disclosure of Data

This data shall not be disclosed outside the Government and shall not be duplicated, used, or disclosed in whole or in part for any purpose other than to evaluate the proposal, PROVIDED, That if a contract is awarded to this offeror as a result of or in connection with the submission of this data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the contract. This restriction does not limit the Government's right to use information contained in the data if it is obtainable from another source without restriction. The data subject to this restriction is contained in Sheets ——.

The offeror also shall mark each sheet which the offeror wishes to restrict with the following legend:

Use of disclosure of proposal data is subject to the restriction on the title page of this proposal.

(b) If an unsolicited proposal is marked with a legend substantially different from that provided in (a) above, the Acquisition Management Division shall return the proposal to the offeror advising the offeror that the proposal cannot be considered because it is impracticable for the Government to comply with the legend. However, the offeror shall also be advised that the proposal will be considered if it is resubmitted with the legend provided in (a) above.

(c) Except as provided in paragraphs (d) or (e) below, the Acquisition Management Division shall place a cover sheet on the proposal or the proposal shall be otherwise clearly marked as follows unless the offeror gives a clear written indication that it does not wish to impose any restrictions on the disclosure or use of the data contained in the proposal.

Unsolicited Proposal

Use of Data Limited

All Government personnel handling this proposal shall exercise EXTREME CARE to insure that the information contained herein is not disclosed outside the Government and is NOT DUPLICATED, USED, OR DISCLOSED in whole or in part for any purpose other than to evaluate the proposal, without the written permission of the offeror (except that if a contract is awarded on the basis of this proposal, the terms of the contract shall control disclosure and use).

This notice does not limit the Government's right to use information contained in the proposal if it is obtainable from another source without restriction.

This is a Government notice, and shall not by itself be construed to impose any liability upon the Government or Government personnel for any disclosure or use of data contained in this proposal.

The notice in this paragraph (c) is used by FEMA solely as a manner of handling unsolicited proposals which will be compatible with the provisions of this section. Nevertheless, the use of the notice in this paragraph (c) shall not be used by FEMA to justify the withholding of a document (record) nor to improperly deny access to a document to an individual (the public) where an obligation is imposed on FEMA by the Freedom of Information Act, 5 U.S.C. 552, as amended. Matters which the prospective offeror considers to be trade secrets and commercial or financial information and privileged or confidential should be identified by the offeror upon submission to FEMA in accordance with (a) above.

(d) If an unsolicited proposal is received without any restrictive legend from an educational or nonprofit organization or institution and it is necessary or appropriate to obtain an evaluation outside the Government, the Acquisition Management Division shall place a cover sheet on the proposal or shall clearly mark the proposal with the legend set forth in (c) above, modified by changing the first two words to read "All Government and Non-Government," and by deleting the words "is not disclosed outside the Government and." The Acquisition Management Division shall obtain from any non-Government evaluator a written agreement that the evaluator will not disclose information in the proposal outside the Government. If the proposal is received with the restrictive legend specified in (a) above, the modified cover shall also be used and permission shall be obtained from the offeror, prior to release, for the release of the proposal for outside evaluation.

(e) If an unsolicited proposal is received from other than an education or nonprofit organization or institution irrespective of whether it contains a restrictive legend, and it is necessary or appropriate to obtain an evaluation of the proposal by Government personnel outside of FEMA and/or outside the Government, written permission shall be obtained from the offeror prior to release of the proposal for such evaluation. The Acquisition Management Division shall place a cover sheet on the proposal or shall clearly mark the proposal with the legend set forth in (c) above, if appropriate. The Acquisition Management Division shall obtain from any non-Government evaluator a written agreement that the evaluator will not disclose information in the proposal outside the Government.

Subpart 4.10—Architect-Engineer Services

§ 44-4.1000 Scope of subpart.

This subpart sets forth policies and procedures for the establishment of architect-engineer evaluation boards and for architect-engineer source selection.

§ 44-4.1004 Selection.

§ 44-4.1004-1 Establishment of architect-engineer evaluation boards.

Each architect-engineer evaluation board, whether permanent or ad hoc, shall consist of at least five voting members who are Federal employees from the appropriate FEMA program office or, from Federal offices outside the program office, as appropriate. One member of each board shall be appointed chairman. Five alternate members, who are Federal employees, shall also be appointed. The majority of voting members shall be from the program office concerned. The members of a permanent board shall be appointed by the Director for a period of two (2) years.

§ 44-4.1004-4 Source selection.

(a) The heads of offices cognizant over programs which from time to time may require architect-engineer services are designated as source selection officials for all procurements of architect-engineer services, and as such are vested with the authority to review the recommendations of the evaluation board and to make the final selection of the firms best qualified to perform the work, in accordance with the provisions of 41 CFR 1-4.1004-4. Rejections of the recommended firms and the reasons for their rejection will be in writing.

(b) Upon the determination of the qualified firms by the source selection official, a requisition shall be forwarded to the procuring office which shall indicate the order of qualification, including capability, of the selected firms. The procuring office shall then send a request for proposal to, and begin negotiations with, the firm ranked highest on the list.

§ 44-4.1004-50 Conflict of interest.

If at any time during the selection process a board member or advisor to the board, encounters a situation with one or more of the firms being considered that might be, or might appear to be, a conflict of interest, he will disqualify himself and call it to the attention of the chairman who shall refer the matter to the Office of General Counsel.

§ 44-4.1004-51 Privity of information.

The evaluation board is to be insulated from outside pressures to the extent practical. No person having knowledge of the activities of the board shall divulge information concerning the deliberations of the board to any other persons not having a need to know such information.

Subpart 4.11—Procurement and Contracting for Government-Wide Automated Data Processing Equipment, Software, Maintenance Service, and Supplies.

§ 44-4.1100 Scope of subpart.

This subpart sets forth policy governing the procurement of all automatic data processing equipment, software, maintenance services, and supplies by FEMA.

§ 44-4.1104 Request for procurement action.

§ 44-4.1104-50 Clearance procedures.

No solicitation or modification to an existing contract, when related in whole or in part to the procurement of ADP equipment or services, shall be issued until approval is obtained from the General Services Administration pursuant to 41 CFR 1-4.1104.

44-7.5002-13 Cost Accounting Standard Withdrawal.
44-7.5002-14 Rights in Technical Data—Specific Acquisition.

Authority: Sec: 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

§ 44-7.000 Scope of part.

This part sets forth special contract clauses which are in addition to clauses set forth in the FPR for use in connection with the procurement of personal property and nonpersonal services (including construction).

Subpart 7.50—Additional Clauses

§ 44-7.5001 Additional clauses to be used in all contracts.

§ 44-7.5001-1 Notification of changes.

Notification of Changes

(a) *Notices.* The Contractor shall notify the Contracting Officer within five (5) calendar days of receipt of any instruction which he/she considers to be a change to the contract terms and conditions. Instructions to be reported can include actions, inactions and written or oral communications but need not include written communication from the Contracting Officer specifically directing changes. Notice from the Contractor shall state:

(1) The date, nature, and circumstance of the instructions regarded as a change;

(2) The name, function, and activity of each Government individual and Contractor employee involved in or knowledgeable about such instructions; and

(3) The identification of any documents and the substance of any oral communication involved in such instruction.

(b) *Continued Performance.* Following submission of the notice required by (a) of this provision the Contractor shall continue performance of this contract in accordance with its terms and conditions as understood prior to receipt of said instruction. The Contractor shall *not* institute a change to the terms and conditions of the contract until specifically authorized by the Contracting Officer, in writing, to do so.

(c) *Contractor's Liability.* If the Contractor proceeds with any change to the terms and conditions of the contract without prior written approval from the Contracting Officer, the Contractor assumes all liability for costs incurred by such action.

§ 44-7.5001-2 Suspension of work.

Suspenson of work

(a) The Contracting Officer may, at any time, by written order to the contractor, require the contractor to suspend, delay or interrupt all, or any part, of the work called for by this contract for a period up to ninety (90) days after the order is delivered to the contractor, and for any further period to which the parties may agree. Any such order shall be specifically identified as a suspension of work issued pursuant to this clause. Upon receipt of such an order, the contractor shall forthwith comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work suspension. Within a period of ninety (90) days after a suspension of work order is delivered to the contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either:

(1) Cancel the suspension of work order; or

(2) Terminate the work covered by such order as provided in the "Termination for Convenience" clause of this contract.

(b) If a suspension of work issued under this clause is cancelled or the period of the order or any extension thereof expires, the contractor shall resume work. An equitable adjustment shall be made in the delivery schedule or contract price, or both, and the contract shall be modified in writing accordingly, if:

(1) The suspension of work results in an increase in the time required for, or in the contractor's cost properly allocable to, the performance of any part of this contract, and

(2) The contractor asserts a claim for such adjustment within thirty (30) days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify such action, he may receive and act upon any such claim asserted at any time prior to final payment under this contract.

Failure to agree to any adjustment shall be a dispute concerning a question of fact within the meaning of the "Disputes" clause of this contract.

(c) If a suspension of work order is not cancelled and the work covered by such order is terminated for the convenience of the Government, the reasonable costs resulting from the suspension of work order shall be allowed in arriving at the termination settlement.

(d) If a suspension of work order is not cancelled and the work covered by such order is terminated for default, the reasonable costs resulting from the suspension of work order shall be allowed by equitable adjustment or otherwise.

§ 44-7.5001-3 Affirmative action for disabled veterans and veterans of the Vietnam era.

Affirmative Action for Disabled Veterans and Veterans of the Vietnam Era

(a) The contractor will not discriminate against any employee or applicant for employment because he or she is a disabled veteran or veterans of the Vietnam era in regard to any position for which the employee or applicant for employment is qualified. The contractor agrees to take affirmative action to employ, advance in employment, and otherwise treat qualified disabled veterans and veterans of the Vietnam era without discrimination based upon their disability or veterans status in all employment practices such as the following: employment upgrading, demotion or transfer, recruitment, advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship.

(b) The contractor agrees that all suitable employment openings of the contractor which exist at the time of the execution of this contract and those which occur during the performance of this contract, including those not generated by this contract and including those occurring at an establishment of the contractor other than the one wherein the contract is being performed but excluding those of independently operated corporate affiliates, shall be listed at an appropriate local office of the State employment service system wherein the opening occurs. The contractor further agrees to provide such reports to such local office regarding employment openings and hires as may be required.

State and local government agencies holding Federal contracts of $10,000 or more shall also list all their suitable openings with the appropriate office of the State employment service, but are not required to provide those reports set forth in paragraphs (d) and (e).

(c) Listing of employment openings with the employment service system pursuant to this clause shall be made at least concurrently with the use of any other recruitment source or effort and shall involve the normal

obligations which attach to the placings of a bona fide job order, including the acceptance of referrals of veterans and nonveterans. The listing of employment openings does not require the hiring of any particular job applicant or from any particular group of job applicants, and nothing herein is intended to relieve the contractor from any requirements in Executive orders or regulations regarding nondiscrimination in employment.

(d) The reports required by paragraph (b) of this order shall include, but not be limited to periodic reports which shall be filed at least quarterly with the appropriate local office or, where the contractor has more than one hiring location in a State, with the central office of that State employment service. Such reports shall indicate for each hiring location (1) the number of individuals hired during the reporting period, (2) the number of nondisabled veterans of Vietnam era hired, (3) the number of disabled veterans of the Vietnam era hired, and (4) the total number of disabled veterans hired. The reports should include covered veterans hired for on-the-job training under 38 U.S.C. 1787. The contractor shall submit a report within 30 days after the end of each reporting period wherein any performance is made on this contract identifying data for each hiring location. The contractor shall maintain at each hiring location copies of the reports submitted until the expiration of one year after final payment under the contract, during which time these reports and related documentation shall be made available, upon request, for examination by any authorized representatives of the Contracting Officer or of the Secretary of Labor. Documentation would include personnel records respecting job openings, recruitment, and placement.

(e) Whenever the contractor becomes contractually bound to the listing provisions of this clause, it shall advise the employment service system in each State where it has establishments of the name and location of each hiring location in the State. As long as the contractor is contractually bound to these provisions and has so advised the State system, there is no need to advise the State system of subsequent contracts. The contractor may advise the State system when it is no longer bound by this contract clause.

(f) This clause does not apply to the listing of employment openings which occur and are filled outside the 50 States, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands.

(g) The provisions of paragraphs (b), (c), (d), and (e) of this clause do not apply to openings which the contractor proposes to fill from within his own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement. This exclusion does not apply to a particular opening once an employer decides to consider applicants outside of his own organization or employer-union arrangement for that opening.

(h) As used in this clause:

(1) "All suitable employment openings" includes, but is not limited to, openings which occur in the following job categories: production and non-production; plant and office; laborers and mechanics; supervisory and nonsupervisory; technical; and executive, administrative, and professional openings that are compensated on a salary basis of less than $25,000 per year. This term includes full-time employment, temporary employment of more than 3 days' duration, and part-time employment. It does not include openings which the contractor proposes to fill from within his own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement nor openings in an educational institution which are restricted to students of that institution. Under the most compelling circumstances an employment opening may not be suitable for listing, including such situations where the needs of the Government cannot reasonably be otherwise supplied, where listing would be contrary to national security, or where the requirement of listing would otherwise not be in the best interest of the Government.

(2) "Appropriate office of the State employment service system" means the local office of the Federal/State national system of public employment offices with assigned responsibility for serving the area where the employment opening is to be filled, including the District of Columbia, Guam, Puerto Rico, and the Virgin Islands.

(3) "Openings which the contractor proposes to fill from within his own organization" means employment openings for which no consideration will be given to persons outside the contractor's organization (including any affiliates, subsidiaries, and the parent companies) and includes any openings which the contractor proposes to fill from regularly established "recall" lists.

(4) "Openings which the contractor proposes to fill pursuant to a customary and traditional employer-union hiring arrangement" means employment openings which the contractor proposes to fill from union halls, which is part of the customary and traditional hiring relationship which exists between the contractor and representatives of his employees.

(i) The contractor agrees to comply with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(j) In the event of the contractor's noncompliance with the requirements of this clause, actions for noncompliance may be taken in accordance with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(k) The contractor agrees to post in conspicuous places available to employees and applicants for employment notices in a form to be prescribed by the Director, provided by or through the Contracting Officer. Such notice shall state the contractor's obligation under the law to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era for employment, and the rights of applicants and employees.

(l) The contractor will notify each labor union or representative of workers with which it has a collective bargaining agreement or other contract understanding that the contractor is bound by terms of the Vietnam Era Veteran's Readjustment Assistance Act and is committed to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era.

(m) The contractor will include the provisions of this clause in every subcontract or purchase order of $10,000 or more unless exempted by rules, regulations, or orders of the Secretary issued pursuant to the Act, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the Director of the Office of Federal Contract Compliance Programs may direct to enforce such provisions, including action for noncompliance.

§ 44-7.5002 Additional clauses to be used in contracts as appropriate.

§ 44-7.5002-1 Rights in technical data and computer software.

Rights in Data

(a) Definitions. (1) Technical Data means recorded information, regardless of form or characteristic, of a scientific or technical nature. It may, for example, document research, experimental, developmental or engineering work; or be usable or used to define a design or process or to procure, produce, support, maintain, or operate materiel. The data may be graphic or pictorial delineations in media such as drawings or photographs; text in specifications or related performance or design type documents; or computer printouts. Examples of technical data include research and engineering data, engineering drawings and associated lists, specifications standards, process sheets, manuals, technical reports, catalog item identifications and related information and computer software documentation. Technical data does not include computer software or financial, administrative, cost and pricing, and management data or other information incidental to contract administration.

(2) Computer—a data processing device capable of accepting data, performing prescribed operations on the data, and suppling the results of these operations; for example, a device that operates on discrete data by performing arithmetic and logic processes on these data, or a device that operates on analog data by performing physical processes on the data.

(3) Computer Software—computer programs and computer data bases

(4) Computer Program—a series of instructions or statements in a form acceptable to a computer, designed to cause the computer to execute an operation or operations. Computer programs include operating systems, assemblers, compilers, interpreters, data management systems, utility programs, sort-merge programs, and ADPE maintenance/diagnostic programs, as well as applications programs such as payroll, inventory control, and engineering analysis programs. Computer programs may be either machine-dependent or machine-independent, and may be general-purpose in nature or designed to satisfy the requirements of a particular user.

(5) Computer Data Base—a collection of data in a form capable of being processed and operated on by a computer.

(6) Computer Software Documentation—Technical data, including computer listing and printouts, in human-readable form which (i) documents the design or details of computer software, (ii) explains the capabilities of the software, or (iii) provides operating instructions for using the software to obtain desired results from a computer.

(7) Unlimited Rights means rights to use, duplicate, or disclose technical data or computer software in whole or in part, in any manner and for any purpose whatsoever, and to have or permit others to do so.

(8) Limited Rights means rights to use, duplicate, or disclose technical data, in whole or in part, by or for the Government, with the express limitation that such technical data shall not, without the written permission of the party furnishing such technical data be (a) released or disclosed in whole or in part outside the Government, (b) used in whole or in part by the Government for manufacture, or in the case of computer software documentation, for preparing the same or similar computer software, or (c) used by a party other than the Government, except for:

(i) emergency repair or overhaul work only, by or for the Government, where the item or process concerned is not otherwise reasonably available to enable timely performance of the work, provided that the release or disclosure thereof outside the Government shall be made subject to a prohibition against further use, release of disclosure; or

(ii) release to a foreign government, as the interest of the United States may require, only for information or evaluation within such government or for emergency repair or overhaul work by or for such government under the conditions of (i) above.

(9) Restricted Rights apply only to computer software, and include, as a minimum, the right to:

(i) use computer software with the computer for which or with which it was acquired, including use at any Government installation to which the computer may be transferred by the Government;

(ii) use computer software with a backup computer if the computer for which or with which it was acquired is inoperative;

(iii) copy computer programs for safekeeping (archives) or backup purposes;

(iv) modify computer software, or combine it with other software, subject to the provision that those portions of the derivative software incorporating restricted rights software are subject to the same restricted rights; and

(v) treat computer software bearing a copyright notice as a published copyrighted work; and in addition, any other specific rights not inconsistent therewith listed or described in this contract or described in a license or agreement made a part of this contract.

(b) Government Rights. (1) Unlimited Rights. The Government shall have unlimited rights in:

(i) technical data and computer software resulting directly from performance of experimental, developmental or research work which was specified as an element of performance in this or any other Government contact or subcontact;

(ii) computer software required to be originated or developed under a Government contract, or generated as a necessary part of performing a contract;

(iii) computer data bases, prepared under a Government contract, consisting of information supplied by the Government, information in which the Government has unlimited rights, or information which is in the public domain;

(iv) technical data necessary to enable manufacture of end-items, components and modifications, or to enable the performance of processes, when the end-items, components, modifications or processes have been, or are being, developed under this or any other Government contract or subcontract in which experimental, developmental or research work is, or was specified as an element of contract performance, except technical data pertaining to items, components, processes, or computer software developed at private expense (but see (2)(ii) below);

(v) technical data or computer software prepared or required to be delivered under this or any other Government contract or subcontract and constituting corrections or changes to Government-furnished data or computer software;

(vi) technical data pertaining to end-items; components or processes, prepared or required to be delivered under this or any other Government contract or subcontract, for the purpose of identifying sources, size, configuration, mating and attachment characteristics, functional characteristics and performance requirements ("form, fit and function" data, e.g., specification control drawings, catalog sheets, envelope drawings, etc.);

(vii) manuals or instructional materials prepared or required to be delivered under this contract or any subcontract hereunder for installation, operation, maintenance or training purposes;

(viii) technical data or computer software which is in the public domain, or has been or is normally furnished without restriction by the Contractor or subcontractor; and

(ix) technical data or computer software listed or described in an agreement incorporated into the schedule of this contract which the parties have predetermined, on the basis or subparagraphs (i) through (viii) above, and agreed will be furnished with unlimited rights.

(2) Limited Rights. The Government shall have limited rights in:

(i) technical data, listed or described in an agreement incorporated into the Schedule of this contract, which the parties have agreed will be furnished with limited rights; and

(ii) technical data pertaining to items, components or processes developed at private expense, and computer software documentation related to computer software that is acquired with restricted rights, other than such data as may be included in the data referred to in (b)(1)(i), (v), (viii), and (viii); provided that only the portion or portions of each piece of data to which limited rights are to be asserted pursuant to (2) (i) and (ii) above are identified (for example, by circling, underscoring, or a note), and that the piece of data is marked with the legend below in which is inserted:

A. the number of the prime contract under which the technical data is to be delivered,

B. the name of the Contractor and any subcontractor by whom the technical data was generated, and

C. an explanation of the method used to identify limited rights data.

Limited Rights Legend

Contract No. ———
Contractor: ———
Explanation of Limited Rights Identification Method Used

———

Those portions of this technical data indicated as limited rights data shall not, without the written permission of the above Contractor, be either (a) used, released or disclosed in whole or in part outside the Government, (b) used in whole or in part by the Government for manufacture or, in the case of computer software documenation, for preparing the same or similar computer software, or (c) used by a party other than the Government, except for: (i) emergency repair or overhaul work only, by or for the Government, where the item or process concerned is not otherwise reasonably available to enable timely performance of the work, provided that the release or disclosure hereof outside the Government shall be made subject to a prohibition against further use, release or disclosure; or (ii) release to a foreign government, as the interest of the United States may require, only for information or evaluation within such government or for emergency repair or overhaul work by or for such government under the conditions of (i) above. This legend, together with the indications of the portions of this data which are subject to such limitations shall be included on any reproduction hereof which includes any part of the portions subject to such limitations.

(3) Restricted Rights. The Government shall have restricted rights in computer software, listed or described in a license or agreement made a part of this contract, which the parties have agreed will be furnished with restricted rights, provided, however, notwithstanding any contrary provision in any such license or agreement, the Government shall have the rights in (a)(9)(i) through (v). Such restricted rights are of no effect unless the computer software is marked by the Contractor with the following legend:

Restricted Rights Legend

Use, duplication or disclosure is subject to restrictions stated in Contract No. ——— with ——— (Name of Contractor) ———, and the related computer software documentation includes a prominent statement of the restrictions applicable to the computer software. The Contractor may not place any legend on computer software indicating restrictions on the Government's rights in such software unless the restrictions are set forth in a license or agreement made a part of this contract prior to the delivery date of the software. Failure of the Contractor to apply a restricted rights legend to such computer software shall relieve the Government of liability with respect to such unmarked software.

V 45 A G 1980 UMI

(4) No legend shall be marked on, nor shall any limitation or restriction on rights of use be asserted as to, any data or computer software which the Contractor has previously delivered to the Government without restriction. The limited or restricted rights provided for by this paragraph shall not impair the right of the Government to use similar or identical data or computer software acquired from other sources.

(c) Material Covered by Copyright. (1) In addition to the rights granted under the provisions of (b) above, the Contractor agrees to and does hereby grant to the Government a royalty-free, nonexclusive and irrevocable license throughout the world for Government purposes to publish, translate, reproduce, deliver, perform, dispose of, and to authorize others so to do, all technical data, except computer software documentation bearing a copyright notice and furnished in support of restricted rights computer software, and unlimited rights computer software prepared or required to be delivered under the contract, now or hereafter covered by copyright.

(2) Copyrighted matter shall not be included in technical data furnished hereunder without the written permission of the copyright owner for the Government to use such copyright matter in the manner described in (c)(1) above, unless the written approval of the Contracting Officer is obtained.

(3) The Contractor shall report to the Government (or higher-tier Contractor) promptly and in reasonable written detail each notice or claim of copyright infringement received by the Contractor with respect to any technical data or computer software delivered hereunder.

(d) Removal of Unauthorized Markings. Notwithstanding any provision of this contract concerning inspection and acceptance, the Government may correct, cancel, or ignore any marking not authorized by the terms of this contract on any technical data or computer software furnished hereunder, if:

(i) the Contractor fails to respond within sixty (60) days to a written inquiry by the Government concerning the propriety of the markings, or

(ii) the Contractor's response fails to substantiate, within sixty (60) days after written notice, the propriety of limited rights markings by clear and convincing evidence, or of restricted rights markings by identification of the restrictions set forth in the contract.

In either case the Government shall give written notice to the Contractor of the action taken.

(e) Relation to Patents. Nothing contained in this clause shall imply a license to the Government under any patent or be construed as affecting the scope of any license or other right otherwise granted to the Government under any patent.

(f) Limitation on Charges for Data and Computer Software. The Contractor recognizes that the Government or a foreign government with funds derived through the Military Assistance Program or otherwise through the United States Government may contract for property or services with respect to which the vendor may be liable to the Contractor for charges for the use of technical data or computer software on account of such a contract. The Contractor further recognizes that it is the policy of the Government not to pay in connection with its contracts, or to allow to be paid in connection with contracts made with funds derived through the Military Assistance Program or otherwise through the United States Government, charges for data or computer software which the Government has a right to use and disclose to others, which is in the public domain, or which the Government has been given without restrictions upon its use and disclosure to others. This policy does not apply to reasonable reproduction, handling, mailing, and similar administrative costs incident to the furnishing of such data or computer software. In recognition of this policy, the Contractor agrees to participate in and make appropriate arrangements for the exclusion of such charges from such contracts, or for the refund or amounts received by the Contractor with respect to any such charges not so excluded.

(g) Acquisition of Data and Computer Software from Subcontractors. (1) Whenever any technical data or computer software is to be obtained from a subcontractor under this contract, the Contractor shall use this same clause in the subcontract, without alteration, and no other clause shall be used to enlarge or diminish the Government's or the Contractor's rights in that subcontractor data or computer software which is required for the Government.

(2) Technical data required to be delivered by a subcontractor shall normally be delivered to the next-higher tier Contractor. However, when there is a requirement in the prime contract for data which may be submitted with limited rights pursuant to (b)(2) above, a subcontractor may fulfill such requirement by submitting such data directly to the Government rather than through the prime Contractor.

(3) The Contractor and higher-tier subcontractors will not use their power to award subcontracts as economic leverage to acquire rights in technical data-or computer software from their subcontractors for themselves.

§ 44–7.5002–2 Reproduction of reports.

Include the following clause when the product of the contract is a report, data or other written material.

Reproduction of Reports

Reproduction of reports, data or other written material, if required herein is authorized provided that the material produced does not exceed 5,000 production units of any page and that items consisting of multiple pages do not exceed 25,000 production units in aggregate. The aggregate number of production units is to be determined by multiplying pages times copies. A production unit is one sheet, size 8½ by 11 inches or less, printed on one size only and in one color. All copy preparation to produce camera ready copy for reproduction must be set by methods other than hot metal typesetting. The reports should be produced by methods employing stencils masters and plates which are to be used on single unit duplicating equipment no larger than 11 by 17 inches with a maximum image of 10¾ by 14¼ inches and are prepared by methods or devices that do not utilize reusable contact negatives and/or positives prepared with a camera requiring a darkroom. All reproducibles (camera ready copies for reproduction by photo offset methods) shall become the property of the Government and shall be delivered to the Government with the report, data or other written material.

§ 44–7.5002–3 Coordination of Federal reporting requirements.

The following clause shall be included in contracts when appropriate:

Coordination of Federal Reporting Services

In the event that it is a contractual requirement to collect information from ten or more public respondents, the provisions of 44 U.S.C., Chapter 35 (Coordination of Federal Reporting Requirements), shall apply to this contract. The contractor shall obtain through the Project Officer the required Office of Management and Budget clearance before making public contacts for the collection of data or expending any funds for such collection. The authority to proceed with the collection of data from public respondents and the expenditure of funds therefor shall be in writing signed by the Contracting Officer.

§ 44–7.5002–4 Services of consultants.

The following clause shall be used in contracts where it is anticipated that consultant services may be used:

Services of Consultants

Except as otherwise expressly provided elsewhere in this contract, and notwithstanding the provisions of the clause of this contract entitled, "Subcontracting" the prior written approval of the Contracting Officer shall be required:

(a) Whenever any employee of the contractor is to be reimbursed as a "consultant" under this contract; and

(b) For the utilization of the services of any consultant under this contract except when the consultant has been identified and rates established during negotiations of this contract.

Whenever Contracting Officer approval is required, the contractor shall obtain and furnish to the Contracting Officer information concerning the need of such consultant services and the reasonableness of the fees to be paid, including, but not limited to, whether fees to be paid to any consultant exceed the lowest fee charged by such consultant to others for performing consultant services of a similar nature.

§ 44–7.5002–5 Publication.

The following clause shall be used in all contracts under which it is anticipated that a report will be a product:

Publication

(a) *Definition.* For the purpose of this clause, "publication" includes (1) any document containing information intended for public consumption or (2) the act of, or any act which may result in disclosing information to the public.

(b) *General.* The results of the research and development and studies conducted under this contract are to be made available to the public through dedication, assignment to the Government, or such other means as the Director of the Federal Emergency Management Agency shall determine.

(c) *Reports furnished the Government.* All intermediate and final reports of the research and development and studies conducted hereunder shall indicate on the cover or other initial page that the research and development and studies forming the basis for the report were conducted pursuant to a contract with the Federal Emergency Management Agency. Such reports are official Government property and may not be published or reproduced (in toto, in verbatim excerpt, or in a form approximating either of these) as an unofficial paper or article. The contractor or technical personnel (each employee or consultant working under the administrative direction of the contractor or any subcontractor hereunder) may publish such reports in whole or in part in a non-Government publication only in accordance with this paragraph (c) and paragraph (e) (1) of this clause.

(d) *Publication by Government.* The Government shall have full right to publish all information, data, and findings developed as a result of the research and development and studies conducted hereunder.

(e) *Publication by contractor or technical personnel.* (1) *Publication in whole or in part of contractor's reports furnished the Government.* Unless such reports have been placed in the public domain by Government publication, the contractor or technical personnel (each employee or consultant working under the administrative direction of the contractor or any subcontractor hereunder) may publish a report furnished the Government, in toto or in verbatim excerpt, but consistent with paragraph (c) of this clause may not secure copyright therein, subject to the following conditions, and the conditions in paragraph (e)(4) and paragraph (f):

(i) During the first six months after submission of the full final report, if written permission to publish is obtained from the Contracting Officer.

(ii) After six months following submission of the full final report, and if paragraph (e)(3) is inapplicable, if a foreword or footnote in the non-Government publication indicates the source of the verbatim material.

(2) *Publication, except verbatim excerpts, concerning or based in whole or in part on results of research and development and studies hereunder.* The contractor or technical personnel may issue a publication concerning, or based in whole or in part on the results of, the research and development and studies conducted under this contract and may secure copyright therein but in so publishing is not authorized thereby to inhibit the unrestricted right of the Director of the Federal Emergency Management Agency to disclose or publish in such manner as he may deem to be in the public interest the results of such research and development and studies, subject to the following conditions and the requirement in paragraph (e)(4):

(i) During the first six months after submission of the full final report, and if paragraph (e)(3) is inapplicable, if written waiver of the waiting period is obtained from the Contracting Officer.

(ii) After six months following submission of the full final report, and if paragraph (e)(3) is inapplicable, subject to Government exercise of an option that the publication contain a foreword or initial footnote substantially as follows:

The (research) (development) (studies) forming (part of) the basis for this publication were conducted pursuant to a contract with the Federal Emergency Management Agency. The substance of such (research) (development) (studies) is dedicated to the public. The author and publisher are solely responsible for the accuracy of statements or interpretations contained herein.

(3) *General condition if FEMA determines that contractor's final report contains patentable subject matter developed in contract performance.* If the Contracting Officer determines that the contractor's full final report contains patentable subject matter developed in the performance of this contract and so notifies the contractor in writing prior to six months from date of submission of such report, no publication of verbatim excerpts from contractor's reports or publication concerning or based in whole or in part on the results of the research and development and studies hereunder shall be made without the written consent of the Contracting Officer.

(4) *Copies of contractor and technical personnel publications to be furnished the Government.* The contractor or technical personnel will furnish the Contracting Officer six (6) copies of any publications which are based in whole or in part on the research and development and studies conducted under this contract.

(f) *Administratively confidential information.* The contractor shall not publish or otherwise disclose, except to the Government and except matters of public record, any information or data obtained hereunder from private individuals, organizations, or public agencies, in a publication whereby the information or data furnished by any particular person or establishment can be identified, except with the consent of such person or establishment.

(g) *Inclusion of provisions in contractor's agreements.* The contractor shall include provisions appropriate to effectuate the purposes of this clause in all contracts of employment with persons who perform any part of the research or development or study under this contract and in any consultant's agreements or subcontracts involving research or development or study hereunder.

§ 44–7.5002–6 Indirect costs (actual).

When it has been determined pursuant to FEMAPR 44–3.702(c) that it is not appropriate to include the Negotiated Overhead Rates clause set forth in 41 CFR 1–3.704, the following clause shall be inserted:

(Indirect Costs (Actual))

In accordance with the "Allowable Cost, Fixed-Fee, and Payment" clause of the contract, the contractor shall be paid his actual overhead costs. Allowable overhead cost will be determined by the Contracting Officer in accordance with the principles set forth in 41 CFR Part 1–15. Any failure of the parties hereto to agree as to what constitutes actual overhead costs shall be considered a dispute covering a question of fact within the meaning of the clause of this contract entitled "Disputes".

§ 44–7.5002–7 [Reserved]

§ 44–7.5002–8 [Reserved]

§ 44–7.5002–9 Consideration and payment (cost-sharing).

The following clause shall be inserted in each cost-sharing contract:

Consideration and Payment (Cost-Sharing)

(a) The estimated cost for the performance of this contract is $————. The contractor agrees to bear without reimbursement by the Government —% of the cost for performance hereunder. Such cost sharing shall be effected as set forth in Paragraph (b) below.

(b) Public vouchers or invoices shall be submitted in an original and five (5) copies and shall show the total cost incurred for the period for which the voucher or invoice is submitted, the cumulative total of costs incurred through the billing period, and the percentage of costs to be reimbursed by the Government. However, the Government is not obligated to reimburse the contractor in excess of————% of such amount. The Government shall not be obligated to reimburse the contractor for the Government's share of the costs in excess of $————nor is the contractor obligated by this contract to expend his own funds in excess of $————.

§ 44–7.5002–10 Warranty.

When it has been determined that it is appropriate to place a warranty on equipment or services furnished under a contract, insert the following clause set forth below. Each construction contract shall incorporate an appropriate clause.

Warranty

The contractor agrees that the supplies or services furnished by the contractor under this contract shall be covered by warranties which are either standard or customary in the trade or are substantially similar to, and not in excess of, a standard or customary trade warranty. The contractor shall furnish any warranty description at time of delivery. Supply package shall be simply marked to show existence of the warranty, its expiration date and the company official to be notified.

§ 44–7.5002–11 [Reserved]

§ 44–7.5002–12 Methods of payment—Letter of Credit.

(a) The contractor shall be paid with funds made available under the Federal Reserve Letter of Credit No.————, established by————, Federal Emergency Management Agency (FEMA), against which the contractor will withdraw funds pursuant to prescribed

Federal Reserve Letter of Credit procedures, as implemented by FEMA.

(b) The contractor shall: (1) initiate cash drawdowns only when actually needed for its disbursements, (2) timely report cash disbursements and balances as required by the Contracting Officer, and (3) impose the same standards of timing and amount upon any secondary recipients including the furnishing of reports of cash disbursements and balances. Failure to adhere to these material provisions will be considered an event under paragraph (f) of this clause.

(c) The funds drawn by the contractor against the Federal Reserve Letter of credit referred to above shall be only for current allowable expenditures necessary for the performance of the contract.

(d) Then so requested in writing by the Contracting Officer, the contractor shall repay to the government, in accordance with prescribed agency procedures, such part in the unliquidated balance of the advance payments as shall, in the opinion of the Contracting Officer, be in excess of the contractor's current needs or in excess of the contract price.

(e) If upon completion or termination of this contract all amounts obtained by the contractor under this letter of credit shall have not been fully liquidated by authorized charges under the contract, the balance thereof shall be deducted from any sums otherwise due to the contractor from the Government, and any excess funds shall be repaid by the contractor to the Government.

(f) Upon the happening of any of the following events of default: (1) a finding by the Contracting Officer that the contractor (i) has failed to observe any of the convenants, conditions, or warranties of these provisions or has failed to comply with any material provision of this contract, or (ii) has so failed to make progress, or is in such unsatisfactory financial condition, as to endanger performance of this contract, or (iii) has allocated inventory to this contract substantially exceeding reasonable requirements, or (iv) is delinquent in payment of taxes or of the costs of performance of this contract in the ordinary course of business; (2) appointment of a trustee, receiver or liquidator for all or a substantial part of the contractor's property, or institution of bankruptcy, reorganization, arrangement or liquidation proceedings, by or against the contractor; (3) service of any writ of attachment, levy of execution, or commencement of garnishment proceedings; or (4) the commission of an act of bankrutcy; the Government, without limiting any rights which it may otherwise have, may, in its discretion and upon written notice to the contractor withhold further withdrawals under the Letter of Credit and withhold further payments on this contract.

(g) Upon the continuance of any such events of default for a period of thirty (30) days after such written notice to the contractor, the Government may, in its discretion, and without limiting any other rights which the Government may have, take the following additional actions as it may deem appropriate in the circumstances:

(1) Charge interest on advance payments outstanding during the period of any such default at the rate established by the Secretary of the Treasury pursuant to Public Law 92-41, 85 Stat. 97 for the Renegotiation Board;

(2) Demand immediate repayment of the unliquidated balance of advance payments hereunder; or

(3) Take possession of and, with or without advertisements, sell at public sale at which the Government may be the purchaser, or at a private sale, all or any part of the property on which the Government has a lien under this contract and, after deducting any expenses incident to such sale, apply the net proceeds of such sale in reduction of the unliquidated balance of advance payments hereunder and in reduction of any other claims of the Government against the contractor.

(h) Notwithstanding any other provision of this contract, the contractor shall not transfer, pledge, or otherwise assign this contract, or any interest therein, or any claim arising thereunder, to any party or parties, bank, trust company, or other financing institution.

(i)(1) Interest shall be charged in the manner provided herein at the rate established by the Secretary of the Treasury pursuant to Public Law 92-41; 85 Stat. 97, for the Renegotiation Board on subadvances or downpayments to subcontractors, and such interest will be credited to the account of the Government. However, interest need not be charged on subadvances on subcontracts with nonprofit educational or research institutions for experimental, developmental or research work.

(2) The office administering advance payments is designated as the Acquisition Management Division.

(j) For the performance of this contract, the Government shall pay the contractor: The cost thereof (hereinafter referred to as "allowable cost" determined by the Contracting Officer to be allowable in accordance with (1) 41 CFR 1-15 as in effect on the date of this contract; and (2) the terms of this contract.

(k) For the purpose of determining amounts to be advanced under this contract, costs previously incurred shall only include those recorded costs which result, at the time of requests for further advances, from payment by cash, check, or other form of actual payment for items or services purchased directly for the contract, together with (when the contractor is not delinquent in payment of costs of contract performance in the ordinary course of business) costs incurred, but not necessarily paid for materials which have been issued from the contractor's stores inventory and production process for use on the contract, for direct labor, for direct travel, for other direct inhouse costs, and for properly allocable and allowable indirect costs, as is shown by records maintained by the contractor for purposes of obtaining reimbursement under Government contracts plus the amount of progress payments which have been paid to the Contractor's subcontractors under similar cost standards. In addition, when pension contributions are paid by the contractor to the retirement fund less frequently than quarterly, accrued costs therefor shall be excluded from indirect costs for purposes of obtaining advances under this contract until such costs are paid. If pension contributions are paid on a quarterly or more frequent basis, accruals therefor may be included in indirect costs for payment purposes provided that they are paid to the fund within 30 days after the close of the period covered. If payments are not made to the fund within such 30-day period, pension contribution costs shall be excluded from indirect cost for payment purposes of obtaining advances under this contract until payment has been made.

(l) The contractor shall submit an invoice or a voucher designated as a "Completion Invoice" or "Completion Voucher" promptly following completion of the work under this contract but in no event later than one year (or such longer time as the Contracting Officer may in his discretion approve in writing) from the date of such completion. The Contracting Officer can direct that a final report of expenditures be included with the completion invoice or voucher.

(m) The contractor agrees that any refunds, rebates, credits, or other amounts (including any interest thereon) accruing to or received by the contractor or any assignee under this contract shall be paid by the contractor to the Government, to the extent that they are properly allocable to costs for which the contractor has been reimbursed by the Government under this contract. Reasonable expenses incurred by the contractor for the purpose of securing such refunds, rebates, credits, or other amounts shall be allowable costs hereunder when approved by the Contracting Officer. Prior to final payment under this contract, the contractor shall execute and deliver:

(1) An assignment to the Government, in form and substance satisfactory to the Contracting Officer, of refunds, rebates, credits, or other amounts (including any interest thereon) properly allowable to costs for which the contractor has been reimbursed by the Government under this contract; and

(2) A release discharging the government, its officers, agents, and employees from all liabilities, obligations, and claims arising out of or under this contract subject only to the following exceptions:

(i) Specified claims in stated amounts or in estimated amounts where the amounts are not susceptible to exact statements by the contractor;

(ii) Claims, together with reasonable expenses incidental thereto, based upon liabilities of the contractor to third parties arising out of the performance of this contract; provided, however, that such claims are not known to the contractor on the date of the execution of the release, and provided further, that the contractor gives notice of such claims in writing to the Contracting Officer not more than six years after the date of the release or the date of any notice to the contractor that the Government is prepared to make final payment, whichever is earlier; and

(iii) Claims for reimbursement of costs (other than expenses of the contractor by reason of its indemnification of the Government against patent liability), including reasonable expenses incidental thereto, incurred by the contractor under the provisions of this contract relating to patents.

(n) Any cost incurred by the contractor under the terms of this contract which would constitute allowable cost under the provisions of this clause shall be included in determining the amount payable under this contract, notwithstanding any provisions contained in the specifications or other documents incorporated in this contract by references, designating services to be performed or materials to be furnished by the contractor at his expense or without cost to the Government.

§ 44-7.5002-13 Cost Accounting Standard Withdrawal.

Cost Accounting Standard 414—Cost of money as an element of cost of facilities capital—is withdrawn from application to the provisions of the clauses in this contract entitled "Cost Accounting Standards" and "Administration of Cost Accounting Standards."

§ 44-7.5002-14 Rights in Technical Data—Specific Acquisition.

(a) Definition. Technical Data means recorded information, regardless of form or characteristic, of a scientific or technical nature. It may, for example, document research, experimental, developmental or engineering work; or be usable or used to define a design or process or to procure, produce, support, maintain, or operate material. The data may be graphic or pictorial delineations in media such as drawings or photographs; text in specifications or related performance or design type documents; or computer printouts. Examples of technical data include research and engineering data, engineering drawings and associated lists, specifications, standards, process sheets, manuals, technical reports, catalogs item identifications, and related information, and documentation related to computer software. Technical data does not include computer software or financial, administrative, cost and pricing, and management data, or other information incidental to contract administration.

(b) Government Rights. The Government may duplicate, use and disclose in any manner and for any purpose whatsoever, and have others so do, all or any part of the technical data delivered by the Contractor to the Government under this contract.

(c) Material Covered by Copyright. (1) In addition to the rights granted under the provisions of (b) above, the Contractor agrees to and does hereby grant to the Government a royalty-free, nonexclusive and irrevocable license throughout the world for Government purposes to publish, translate, reproduce, deliver, perform, dispose of, and to authorize others so to do, all technical data, required to be delivered under the contract, now or hereafter covered by copyright.

(2) Copyrighted matter shall not be included in technical data furnished hereunder without the written permission of the copyright owner for the Government to use such copyrighted matter in the manner described in (c)(1) above, unless the written approval of the Contracting Officer is obtained.

(3) The Contractor shall report to the Government (or higher-tier Contractor) promptly and in reasonable written detail each notice or claim of copyright infringement received by the Contractor with respect to any technical data delivered hereunder.

(d) Relation to Patents. Nothing contained in this clause shall imply a license to the Government under any patent, or be construed as affecting the scope of any license or other right otherwise granted to the Government under any patent.

(e) Limitation on Charges for Data. The Contractor recognizes that the Government, or a foreign government with funds derived through the Military Assistance Program or otherwise through the United States Government, may contract for property or services with respect to which the vendor may be liable to the Contractor for charges for the use of technical data on account of such a contract. The Contractor further recognizes that it is the policy of the Government not to pay in connection with its contracts, or to allow to be paid in connection with contracts made with funds derived through the Military Assistance Program or otherwise through the United States Government, charges for data which the Government has a right to use and disclose to others which is in the public domain, which the Government has been given without restrictions upon its use and disclosure to others. This policy does not apply to reasonable reproduction, handling, mailing, and similar administrative costs incident to the furnishing of such data. In recognition of this policy, the Contractor agrees to participate in and make appropriate arrangements for the exclusion of such charges from such contracts, or for the refund of amounts received by the Contractor with respect to any such charges not so excluded.

PART 44-11—FEDERAL, STATE, AND LOCAL TAXES

Sec.

§ 44-11.000 Scope of part.

Subpart 11.4—Contract Clauses

§ 44-11.401-4 Matters requiring special consideration.

Subpart 11.50—Resolution of Tax Problems

§ 44-11.500-1 Resolution of tax problems.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

§ 44-11.000 Scope of part.

This part sets forth policies and procedures for dealing with matters concerning Federal, State or local taxes.

Subpart 11.4—Contract Clauses

§ 44-11.401-4 Matters requiring special consideration.

Pursuant to 41 CFR 1-11.401-4(d), it is the policy of FEMA to implement the procedures set forth in 41 CFR 1-11.404-4 (a), (b), and (c) as appropriate.

Subpart 11.50—Resolution of Tax Problems

§ 44-11.500-1 Resolution of tax problems.

In order to have uniformity in FEMA's treatment of the tax aspects of a contract and to insure effective cooperation with other Government agencies on tax matters of mutual interest, the Office of General Counsel has the responsibility within FEMA for handling all tax problems. Therefore, procuring offices will not engage in negotiation with any taxing authority for the purpose of determining the validity or applicability of, or obtaining exemptions from or refund of, any tax. When a problem exists, the Contracting Officer shall request in writing the assistance of the Office of General Counsel. The request shall detail the problem and be accompanied by appropriate backup data. The Office of General Counsel shall report to the Contracting Officer as to the necessary disposition of the tax problem. The Contracting Officer will notify the contractor of the outcome of the tax problem. The Office of General Counsel shall have the responsibility for communications with the Department of Justice for representation or intervention in proceedings concerning taxes.

PART 44-13—GOVERNMENT PROPERTY

Sec.

44-13.000 Scope of part.
44-13.001 General policy.

Subpart 13.1—Definitions

44-13.100 Scope of subpart.
44-13.101 Government property.
44-13.102 Real property.
44-13.103 Personal property.
44-13.104 Facilities.

Subpart 13.2—Furnishing Government Property to Contractors

44-13.201 Responsibility of FEMA.
44-13.202 Availability of required property.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganizaion Plan No. 3 of 1978, 43 FR 41943.

§ 44-13.000 Scope of part.

This part sets forth policy concerning the furnishing of Government property to contractors under FEMA contracts.

§ 44-13.001 General policy.

It is the general policy of FEMA to contract with suppliers which are able to perform the requirements of a contract without being furnished property by the Government. This policy has been established to prevent FEMA from assuming any responsibility for the performance of work under a contract which rightly vests in the contractor,

V 45 AG 1980 UMI

and to preclude the possibility of creating an unfair competitive advantage for one prospective contractor over another. However, circumstances may arise in which the interests of the Government would be best served by furnishing property to contractors, such as in a case where the property is necessary to contract performance, or, when furnishing Government property will result in substantial cost savings to the Government.

Subpart 13.1—Definitions

§ 44-13.100 Scope of subpart.

For purposes of this part, and unless otherwise indicated, the following terms have the meaning set forth in this subpart.

§ 44-13.101 Government property.

"Government property" means all property furnished by the Government or acquired with Federal funds by the contractor for use in performance of his contractual obligations. Government property includes Government-furnished property and contractor-acquired property as defined below:

(a) "Government-furnished property" is property in the possession of, or acquired directly by, the Government and subsequently delivered or otherwise made available to the contractor; and

(b) "Contractor-acquired property" is property procured or otherwise provided by the contractor for the performance of a contract, title to which is vested in the Government.

§ 44-13.102 Real property.

"Real Property" means land, buildings or items permanently affixed to either land or buildings.

§ 44-13.103 Personal property.

"Personal property" means all property that is subject to ownership except real property. Personal property includes:

(a) *Reportable property.* All property other than real property having a unit acquisition cost of $100.00 or more and tools regardless of cost.

(b) *Expendable property (material).* Property which may be incorporated into, or attached to, an end item to be delivered under the contract or which may be consumed or expended in the performance of the contract.

It is the general policy of FEMA that contractors will furnish all materials required for the performance of its contracts. However, furnishing materials to contractors could be preferable when:

(1) The material is not readily available on the market or cannot be conveniently manufactured by a contractor or his subcontractors. This premise is valid only if the Government has the material in inventory or can readily obtain it;

(2) The cost would be less than if the contractor obtained the material;

(3) The Government may already be exercising control over the material;

(4) Standardization or Government-design control is desired;

(5) It is necessary to expedite the research; and

(6) Furnishing the material may significantly broaden the competitive base.

(c) *Residual materials and property.* All serviceable material not consumed in the performance of a contract, and all unserviceable or scrap equipment not consumed in the performance of a contract.

§ 44-13.104 Facilities.

"Facilities" means all industrial property (other than material, special tooling, military or space property, special test equipment and technical information) used for the production, maintenance, research, development, or test, including real property and rights therein, buildings, structures, improvements, and plant equipment.

Subpart 13.2—Furnishing Government Property to Contractors

§ 44-13.201 Responsibility of FEMA.

When the Government furnishes property it assumes a direct role in the performance of the contract. Therefore, the furnishing of Government property should be carefully planned and scheduled in order to avoid delays or mistakes. When Government-furnished property is essential for performance of the contract, FEMA must insure that the contractor receives the property in the specified quantities and at the required time.

§ 44-13.202 Availability of required property.

(a) Prior to making a decision to furnish property to a prospective contractor, the Contracting Officer shall first ascertain whether the subject property is available by inquiring into existing inventories. Property requested should be identified by functional need in order to maximize the effectiveness of furnishing Government property. The functions to which the Government furnished property are to be applied should be analyzed to determine what types of equipment can be used from available sources.

(b) When existing Government property is not available or suitable, the contractor may be authorized (subject to surveillance and approval of the Contracting Officer) to purchase new property. The contractor then vouchers for the property along with the normal billing process, is reimbursed and the Government takes title to the property. Contractor-acquired and Government furnished property can be combined in the same contract.

PART 44-15—CONTRACT COST PRINCIPLES AND PROCEDURES

Sec.

44-15.000 Scope of part.

Subpart 15.50—Suspension and Disallowance of Contract Costs

44-15.5000 Scope of subpart.
44-15.5001 Suspension and disallowance of costs.
44-15.5001-1 Procedure.
44-15.5001-2 Recourse to determination of cost as unallowable.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

§ 44-15.000 Scope of part.

This part sets forth policies and procedures concerning unallowable costs.

Subpart 15.50 Suspension and Disallowance of Contract Costs

§ 44-15.5000 Scope of subpart.

This subpart sets forth policies and procedures concerning suspension and disallowance of contract costs and recourse to determination of costs as unallowable.

§ 44-15.5001 Suspension and disallowance of costs.

§ 44-15.5001-1 Procedure.

In the event that the contractor presents a cost for reimbursement which the Contracting Officer considers to be unallowable, questionably allowable or partially unallowable, either specifically pursuant to 41 CFR 1-15, or consistent with the intent thereof, he shall notify the Division of Budget and Finance, the Project Officer, and the contractor that the subject cost, plus any corresponding overhead, general and administrative expense, indirect cost or fee associated with its incurrence, is being suspended pending receipt of supporting documentation from the contractor justifying the cost. This notification in each case shall be in writing and shall be accompanied by a copy of the invoice indicating the questioned cost. The notification to the contractor shall also indicate that supporting documentation for the cost must be received within thirty days, or such longer period as may be granted by the Contracting Officer, or the cost will be disallowed pending final audit. The notification to the Division of Budget and Finance shall also indicate that the cost and associated pool costs and/or fee should not be reimbursed. If the contractor provides the requested documentation, and the Contracting Officer considers it to adequately support the cost as allowable, the Contracting Officer shall so notify the contractor and advise him to resubmit the cost and associated pool costs on his next invoice clearly indicating the origin and identity of the cost. In the event that the contractor should fail to submit the requested documentation, or if the supporting documentation is considered to be inadequate, or does not support the cost as allowable, the Contracting Officer shall notify the contractor, in writing, to this effect and advise him that the cost is being disallowed and, therefore, shall not be reimbursed.

§ 44-15.5001-2 Recourse to determination of cost as unallowable.

When the Contracting Officer has determined, in accordance with the foregoing procedure, that a cost is unallowable, his decision shall be final and conclusive unless the contractor seeks remedy pursuant to the "Disputes" clause of the contract.

PART 44-16—PROCUREMENT FORMS

Sec.

44-16.000 Scope of part.

Subpart 16.1—Forms for Advertised Supply Contracts

44-16.101 Contract forms.

Subpart 16.2—Forms for Negotiated Supply Contracts

44-16.202 Contracts forms.
44-16.202-50 Fixed price contracts.
44-16.202-51 Cost-reimbursement contracts.

Subpart 16.3—Purchase and Delivery Order Forms

44-16.301 Order-invoice-voucher forms.
44-16.301-2 Order for supplies or services (Standard Forms 147 and 148).

Subpart 16.5—Forms for Advertised and Negotiated Nonpersonal Service Contracts (Other Than Construction and Architect Engineer Contracts)

44-16.501 Contracts forms.
44-16-501-1 Fixed price contracts.
44-16.501-2 Cost-reimbursement contracts.

Subpart 16.7—Forms for Negotiated Architect-Engineer Contracts

44-16.701 Forms prescribed.
44-16.701-1 Cost-reimbursement contracts.

Subpart 16.8—Miscellaneous Forms

44-16.806 Contract pricing proposals.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

§ 44-16.000 Scope of part.

This part prescribes forms for use by FEMA procuring offices in connection with the procurement of supplies, purchase and delivery orders, nonpersonal services, and architect-engineer services and other miscellaneous forms for use in connection with the procurement of supplies and services.

Subpart 16.1—Forms for Advertised Supply Contracts

§ 44-16.101 Contract forms.

FEMA Form 40-8 shall be used for all advertised supply contracts in excess of $10,000.

Subpart 16.2—Forms for Negotiated Supply Contracts

§ 44-16.202 Contract forms.

§ 44-16.202-50 Fixed price contracts.

FEMA Form 40-8 shall be used for all negotiated fixed price supply contracts in excess of $10,000.

§ 44-16.202-51 Cost-reimbursement contracts.

FEMA Form 40-7 shall be used for all cost-reimbursement supply contracts in excess of $10,000.

Subpart 16.3—Purchase and Delivery Order Forms

§ 44-16.301 Order-invoice-voucher forms.

§ 44-16.301-2 Order for supplies or services (standard form 147 and 148).

All FEMA purchase and delivery orders shall be executed on Standard Form 147 (SF-147), "Order for Supplies or Services", and Standard Form 148 (SF-148) "Continuation Sheet".

Subpart 16.5—Forms for Advertised and Negotiated Nonpersonal Service Contracts (Other Than Construction and Architect-Engineer Contracts)

§ 44-16.501 Contract forms.

§ 44-16.501-1 Fixed Price contracts.

FEMA Form 40-11 shall be used for all advertised or negotiated fixed price contracts in excess of $10,000 for nonpersonal services other than construction, architect-engineer services and transportation.

§ 44-16.501-2 Cost-reimbursement contracts.

FEMA Form 40-10 shall be used for all cost-reimbursement contracts in excess of $10,000 for nonpersonal services other than construction, architect-engineer services or transportation.

Subpart 16.7—Forms for Negotiated Architect-Engineer Contracts

§ 44-16.701 Forms prescribed.

§ 44-16.701-1 Cost-reimbursement contracts.

FEMA Form 40-10 shall be used for all cost-reimbursement architect-engineer contracts. The form may be modified by substituting appropriate clauses from 41 CFR 1-16.

Subpart 16.8—Miscellaneous Forms

§ 44-16.806 Contract pricing proposals.

Cost or pricing data shall be submitted by contractors on Optional Form 59 if the proposed contract is for other than research and development work.

PART 44-30—CONTRACT FINANCING

Sec.

44-30.000 Scope of part.

Subpart 30.4—Advance Payments

44-30.400 Scope of subpart.
44-30.406 Responsibility—delegation of authority.
44-30.408-1 Use of letter of credit method of financing.
44-30.414-2 Contract provisions for advance payments.

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); Reorganization Plan No. 3 of 1978, 43 FR 41943.

§ 44-30.000 Scope of part.

This part sets forth policies and procedures concerning advance payments on prime contracts.

Subpart 30.4—Advance Payments

§ 44-30.400 Scope of subpart.

This subpart covers policies and procedures concerning authority to make advance payments and the letter of credit method of financing and sets forth clauses to be used in contract where advance payment has been authorized.

§ 44-30.406 Responsibility—delegation of authority.

The responsibility and authority for making findings and determinations with respect to advance payments and in each case for approval of contract provisions for advanced payments, or for approval of terms and conditions thereof, shall be vested in the Head of the Procuring Activity. Prior to committing FEMA to the making of an advance payment, the Head of the Procuring Activity shall obtain the advice and concurrence of the Director, Division of Budget and Finance concerning such advance payment.

V 45 A G 19 80 UMI

§ 44-30.408-1 Use of letter of credit method of financing.

Letters of credit for contracts shall be established and administered in accordance with FEMA procedures established for all Letter of Credit transactions.

§ 44-30.414-2 Contract provisions for advance payments.

The clause set forth in 41 CFR 1-30.414-2 shall be included in all contracts for which advance funding has been authorized but for which the letter of credit method of providing advance funding is not appropriate. The clause set forth in FEMAPR 44-7.5002-12 shall be included in all contracts for which advance funding has been authorized and the letter of credit method of providing such advance funding is appropriate.

Department of Energy

Economic Regulatory Administration

Distribution of Strategic Petroleum Reserve Crude Oil

DEPARTMENT OF ENERGY

SUPPLEMENTARY INFORMATION:

any severe shortage of crude oil should

indicated that while they believed that

the allocation would be conducted

DEPARTMENT OF ENERGY

Economic Regulatory Administration

10 CFR Parts 211 and 220

[Docket No. ERA-R-79-38]

Distribution of Strategic Petroleum Reserve Crude Oil

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Final rule.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) is issuing a final rule adopting a new Part 220 to implement the authority of section 161 of the Energy Policy and Conservation Act for the allocation of crude oil from the Strategic Petroleum Reserve (SPR) and the SPR Distribution Plan. The rule gives DOE discretion to distribute SPR crude oil under the current Buy/Sell Program, the Standby Crude Oil Allocation Program, or by means of allocation outside of those programs. The rule also prescribes the manner in which SPR crude oil would be priced in allocated sales.

EFFECTIVE DATE: September 18, 1980.

SUPPLEMENTARY INFORMATION:

I. *Background*
II. *Discussion of Major Comments*
III. *Amendments Adopted*
IV. *Procedural Matters*

I. Background

On August 17, 1979, we issued a notice of proposed rulemaking (44 FR 48696, August 20, 1979) to adopt a new Part 220 to provide a regulatory framework for the allocation of Strategic Petroleum Reserve (SPR) oil as an alternative to distributing SPR crude oil by competitive sale.[1] The proposed rule gave DOE discretion to distribute SPR crude under the current Buy/Sell Program, the Standby Crude Oil Allocation Program, or by means of a new, separate SPR allocation system set forth in the notice. In addition, the proposed rule set forth procedures for the conduct of sales of SPR crude oil which apply under each allocation alternative, and prescribed the manner in which SPR crude oil would be priced in allocated sales. For a detailed discussion of the statutory basis for the SPR, the SPR physical distribution system and the policy issues concerning distribution of SPR crude oil, as well as the details of the proposed regulation, *see* the regulation preamble at 44 FR 48696. These matters are also discussed in the SPR Distribution Plan (Amendment No. 3 to the SPR Plan), which was transmitted to Congress on October 21, 1979 and became effective November 15, 1979, and which can be obtained from the National Technical Information Service.

II. Discussion of Major Comments

Comments on the proposed rule were requested through October 10, 1979. In addition, a hearing on the proposal was held in Washington, D.C. on September 18, 1979. Oral and written comments regarding the proposed rule were submitted by twenty-nine respondents, including major oil refiners, small oil refiners, trade associations, end user groups, two private citizens, and two government entities.

Many respondents opposed use of the current or even an amended version of the Buy/Sell program to allocate SPR crude oil. These commenters felt that any severe shortage of crude oil should be shared equitably throughout the industry, which in their view could not be achieved through use of the current Buy/Sell program since it allocates crude only to certain small refiners. In addition, some respondents felt that the six-month allocation schedule on which the current Buy/Sell program operates would prohibit timely response to a severe supply shortage. It was also suggested that since the legislation authorizing the allocation of crude oil under the Buy/Sell program expires in September 1981, it would be unwise to base the SPR distribution system on the continued existence of this program.

We can foresee particular circumstances in which use of the current small refiner Buy/Sell program might be appropriate. These might include a moderate interruption of short duration at a time when the physical ability to draw down the SPR would be limited. Thus, while we do not believe that this alternative would be appropriate in most interruption scenarios, we believe it should be retained as an option in the final rule in order to provide the flexibility to address all possible situations.

The majority of respondents supported allocation of SPR crude oil by the Standby Mandatory Crude Oil Allocation Program, primarily because it was viewed as the most equitable of the proposed allocation mechanisms, since it would distribute the effects of a reduced supply by spreading the reduction equally among all refiners. Several respondents also stressed the efficiency of using a system such as the Standby Program which is already finalized and enacted in regulatory form.

Some respondents who opposed use of the Standby Program, as well as some who generally favored its use, expressed concern about the ability of DOE and industry to meet the timing requirements under the program. Sales of SPR crude oil under the Standby Program would be subject to the requirements that sale/purchase agreements for allocated crude oil be completed within 10 days following publication of the buy/sell notice, that deliveries of allocated crude oil be completed within 30 days following the signing of sale/purchase agreements, and that allocated crude oil be processed within 60 days from the date of execution of the sale/purchase agreement. These respondents expressed doubt that the timing requirements of the program would provide sufficient time for the negotiation of sale/purchase agreements and the delivery and processing of allocated crude oil. However, others

[1] Section 161(e) of the Energy Policy and Conservation Act of 1975 (Pub. L. 94-163, EPCA) (42 U.S.C. 6231 *et. seq.*) provides that the Secretary may, by rule, provide for the allocation of any petroleum product withdrawn from the Strategic Petroleum Reserve in amounts specified in (or determined in a manner prescribed by) and at prices specified in (or determined in a manner prescribed by) such rules. Such price levels and allocation procedures shall be consistent with the attainment, to the maximum extent practicable, of the objectives specified in section 4(b)(1) of the EPAA.

indicated that while they believed that industry could work within the time frame set forth in the Standby Program, the Administrator could if necessary revise the current time requirements upon activating the Standby Program.

While we recognize that the timing requirements of the Standby Program may present some problems in the distribution of SPR oil under that program, we have decided not to modify these requirements at this time. However, in the course of our periodic review of the standby regulations and at the time implementation may be warranted, we will consider the need to amend the timing requirements in light of the program's possible use as a means of allocating SPR crude oil.

Several commenters responded to our proposal authorizing the Secretary to allocate SPR crude oil in a flexible manner outside the Buy/Sell or Standby Programs. While the comments reflected general approval of an alternative allocation system designed to give the Secretary flexibility in responding to a variety of shortage situations, many respondents expressed concern over the absence of any announced criteria to guide the Secretary in his decisions. Several believed that both DOE and the industry would be better prepared to handle an emergency if DOE developed a more specific plan under this third alternative. Other commenters argued that the lack of criteria in the rule increased the likelihood of legal action challenging DOE's response as inconsistent with the objectives under the EPAA. In addition, some commenters expressed the view that since the provision was so vaguely drawn, any DOE response plan under this provision might be in violation of the rulemaking requirements of the Administrative Procedure Act (APA) and Section 501 of the DOE Organization Act (DOE Act).

While we appreciate the concerns of those respondents who felt that the third allocation system proposed should in advance specify more criteria to guide the Secretary in deciding how to allocate SPR crude oil, rather than specify the criteria at the time of a drawdown, we nevertheless believe that it is essential to maximize the Secretary's flexibility in responding to a variety of shortfall situations. Since it is impossible to forecast with precision the nature of particular crude oil shortage situations, any attempt to devise a more detailed scheme to deal with in unpredictable situation would likely restrict, rather than enhance, the Secretary's ability to address the impacts of an interruption. Moreover, the allocation would be conducted pursuant to criteria specified in Notices of Sale, at the time of drawdown. Further, the final rule makes clear that actions taken under this new allocation provision must be consistent with the objectives set forth in section 4(b)(1) of the EPAA.

Finally, if a decision is made to distribute SPR crude oil under the third allocation provision, DOE could at that time comply with any procedural requirements that might be required by the APA and the DOE Act.

In connection with the new allocation provision, we specifically requested comments regarding a "buy rights" system for allocating SPR crude oil, under which "eligible refiners" would be issued rights to purchase SPR crude oil based on their runs to stills during a specified base period. Comments regarding this alternative generally were split between those who favored and those who opposed it. Those who supported this approach felt that it was an equitable means of dealing with a crude oil shortage, since "rights" would be available to all interested domestic refiners. Others who favored this approach felt that the opportunity for refiners to exchange or sell buy rights among themselves would promote efficiency in the crude oil transportation system and would assure that refiners with the capability to produce the highest valued products could, by purchasing other refiners' buy rights, acquire sufficient crude oil to satisfy demand. In this regard, it was suggested that the proposed buy rights system best approximates the free market.

On the other hand, respondents who were opposed to an allocation system based on buy rights expressed concern that such a system would exert significant upward pressure on prices. Some respondents expressed concern that a buy righs system would not necessarily allocate oil to those refiners most hard hit by a crude oil shortage, but rather to those that were strongest economically. Other commenters opposed to this system felt that it would be difficult to administer in a crisis situation and that allocation under the Standby Program would accomplish the same results with fewer complications.

In view of the considerable number of comments on the proposed "buy rights" allocation system, we are retaining it as an option available under Part 220 as originally proposed. Specifics of a satisfactory "buy right" approach would be addressed at the time of an interruption when SPR use is authorized. While there is a possibility that such an allocation system might result in higher prices and thus preclude its implementation in certain shortage situations, we can conceive of circumstances in which the incremental effect of such cost pressure on prices would be negligible in comparison with other contributing factors. In addition, any adverse distributional effects which might result from implementation of a buy rights system could be mitigated by the ongoing operation of a buy/sell program, if it was in existence at the time of an interruption. The issues involved with its use would have to be fully explored at the time an interruption occurred.

We also requested comments regarding the price rule proposed in the notice. Most respondents favored our proposal that DOE establish monthly prices for sales of SPR crude oil at approximately the average landed cost to all refiners of imported crude oil in the month of sale. There was general agreement that such a pricing system would approximate the market value for crude oil, would provide real incentives for companies to find lower priced alternative supplies, as well as inducing conservation efforts by the general public. There was also general agreement that a uniform price should be applied to all refiners regardless of size.

One commenter suggested that the price of SPR oil in allocated sales should be based on the "port of entry" cost of imported oil, rather than the average landed cost to refiners of imported oil as proposed. Since the latter includes the average domestic transportation cost from port of entry to the refinery and since buyers of SPR crude oil are responsible for the transportation costs between SPR storage sites and their refineries, if a landed cost price rule were used there would be double counting of transportation costs and the delivered cost of SPR crude oil would likely exceed the delivered cost of non-SPR allocated crude oil. The concern was expressed that this anomaly could create a disincentive to the purchase of SPR crude oil.

We have decided to adopt the proposed method of establishing prices for SPR oil for several reasons. First, ERA currently collects landed cost data on a routine basis. Adoption of a price formula based on port-of-entry costs of imported crude oil would require the development of a new data collection system by ERA, which would likely be burdensome for the industry. Moreover, ERA does not believe that pricing SPR crude oil on the basis of the average landed cost of imported crude would create a serious disincentive to its purchase. It can be expected that in

SPR sales contract. The second step

quality of the environment, provide a

times of a supply emergency severe enough to require distribution of the SPR, prices of other oil available on the world market would likely exceed an SPR selling price based on the average landed cost of imported crude.

Several commenters argued that the proposed price rule might generate "windfall profits" for the Government, since the acquisition cost of SPR crude oil would likely be far less than the ultimate sales price. One commenter suggested that DOE use funds derived from sales of SPR crude oil for the purchase of replacement volumes of crude oil for storage in the SPR.

While it is likely that sale prices for SPR oil might exceed the acquisition cost of SPR crude oil, we believe that it would be inappropriate to sell the oil at less than current market prices. First, if SPR crude oil was sold at less than current market prices, there would be a "windfall" to purchasers of SPR supplies. In these circumstances, a complicated regulatory scheme would be necessary to ensure that the benefits of such a windfall were passed on to consumers. Further, such a price differential would be a disincentive to conservation and could create price discrepancies in the product market. Finally, any "windfall" that accrued to the Government would benefit the public to the extent that it could be used to offset the cost of operating and refilling the SPR.

Several other issues were addressed by the commenters. All respondents agreed that recipients of SPR crude oil should be refiners who had executed the Basic Sales Agreement (BSA) with DOE, although some expressed concern that completing the BSA might be difficult for small refiners not experienced with government contracts. With regard to the treatment of SPR oil under the Entitlements Program, the majority of respondents favored our proposal to treat SPR crude oil as imported or uncontrolled domestic crude oil. Moreover, most of the respondents who addressed the issue favored our proposal to permit exchanges of SPR crude oil and agreed that only quality and location differentials should be taken into account in the exchange ratio. However, some respondents urged DOE to limit the total number of exchanges which could be made, in order to minimize speculative sales which might hinder the rapid distribution of SPR crude oil. Based on the record in this proceeding, we have concluded that exchanges of SPR oil should be regulated only to the extent of requiring that the exchange ratio reflect quality and location differentials, as proposed, to ensure maximum flexibility in the distribution of SPR oil.

Although we did not indicate in the notice of proposed rulemaking any perference for distributing SPR crude oil by allocation rather than by competitive sale, the overwhelming majority of respondents favored distribution of SPR crude oil by an allocation system. Opposition to a competitive bidding system was based primarily on the fear that during a shortage, the bid price would be so high as to exclude many potential buyers from sharing in the SPR system. In addition, many respondents feared that distribution of SPR oil by competitive sale would produce upward pressure on crude prices in general, and might encourage foreign suppliers to further raise their prices. It was also suggested that competitive sales would be cumbersome and difficult to implement in time to respond to a major crude oil shortage.

III. Amendments Adopted

For the reasons discussed above, we are adopting substantially as proposed a new Part 220 to establish a regulatory framework for the allocation and pricing of SPR crude oil in the event that the Secretary decides to distribute SPR crude oil by allocation rather than by competitive sale. Part 220 consists of three major Subparts, setting forth (i) the method of allocation, (ii) procedures for the sale of SPR crude oil, and (iii) a price rule. In addition, we are adopting as proposed the conforming amendments to the Buy/Sell Program and the Standby Allocation Program.[2]

In general, Part 220 provides DOE three alternative methods of allocating SPR crude oil in a manner consistent with the objectives of section 4(b)(1) of EPAA. First, the Secretary could allocate SPR crude oil in such amounts as he determines appropriate to small refiners under the current Buy/Sell Program. Second, the Secretary could allocate SPR crude oil under the Standby Allocation Program. Third, the rule provides that the Secretary may allocate SPR crude oil under a separate allocation system as established in Part 220.

The rule also establishes a three-step procedure for the conduct of sales of SPR crude oil which applies to each of the allocation alternatives set forth in Part 220. First, in order to be eligible to purchase SPR crude oil, refiners must accept a Basic Sales Agreement (BSA) setting forth the basic provisions of an SPR sales contract. The second step involves the issuance of a Notice of Sale (NS) to eligible refiners following a decision to draw down the SPR. The NS will specify the quantity and quality of SPR crude oil to be sold, the prices and other terms and conditions of sale, as well as the criteria to be employed in evaluating offers by eligible refiners. The class of "eligible refiners" will depend on the allocation option which the Secretary adopts. If appropriate, a third step in conducting sales of SPR crude oil would be the evaluation of offers and awarding of contracts by DOE on the basis of the selection criteria announced in the NS.

Finally, the pricing provision of the rule permits DOE to establish on a monthly basis the prices, along with appropriate gravity and sulfur differentials, for allocated sales of high and low sulfur SPR crude oil. In determining the prices, DOE will consider the weighted average per barrel landed cost to all refiners of imported high and low sulfur crude oil in the month of sale, prices between affiliated entities and other relevant data. DOE anticipates that the price of SPR crude oil in allocated sales would be set at approximately the average landed cost to all refiners of imported crude oil in the month of sale. However, under the final rule DOE retains the discretion to charge a higher or lower price so long as the price charged is not significantly higher or lower than the highest or lowest prices, respectively, in comparable sales of non-SPR allocated crude oil (for example, Buy/Sell Program sales) in the month.

IV. Procedural Matters

A. Section 404 of the DOE Act

Pursuant to the requirements of Section 404(a) of the Department of Energy Act, we have referred these amendments to the Federal Energy Regulatory Commission (FERC) for a determination whether they would significantly affect any matter within the Commission's jurisdiction. Following an opportunity to review these amendments, the FERC has declined to determine that they may significantly affect any of its functions.

B. Section 7 of the FEA Act

Under Section 7(a) of the Federal Energy Administration Act of 1974 (15 U.S.C. 787 et seq., Pub. L. 93–275, as amended), the requirements of which remain in effect under Section 501(a) of the DOE Act, the delegate of the Secretary of Energy shall, before, promulgating proposed rules, regulations, or policies affecting the

[2] For an extensive discussion of Part 220 and conforming amendments to Part 221, *see* Notice of Proposed Rulemaking at 44 FR 48696, August 24, 1979.

quality of the environment, provide a period of not less than five working days during which the Administrator of the Environmental Protection Agency (EPA) may provide written comments concerning the impact of such rules, regulations, or policies on the quality of the environment. Following an opportunity to review a draft of the proposed rule, the EPA Administrator expressed concern that the proposed rule contemplated a greater number of drawdowns of the SPR than had been described in earlier programmatic and site-specific Environmental Impact Statements (EIS) on the SPR. The Administrator advised us that, if this presumption was correct, it might be necessary for DOE to revise the original EIS's for the SPR program to reflect the change.

Recently, we advised EPA that the fact that the regulation does not address the number of times that drawdown may be implemented should not be interpreted as an indication of any change in the assumptions upon which the Department of Energy prepared its Programmatic and site-specific EIS's for the SPR. Specifically, DOE has reviewed the original assumption that the program will undergo five fill and drawdown cycles during its life and concluded that the assumption remains valid. Therefore, DOE has determined that the publication of this final regulation is not a major federal action requiring amendment of the SPR's Final EIS.

In a letter dated May 19, 1980, EPA indicated that our assurance that the original assumptions underlying the SPR EIS's remain valid satisfactorily addresses its concerns. However, EPA noted that if at any future time DOE contemplates more frequent use of the SPR, then further review of the program under the National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) would be indicated.

C. National Environmental Policy Act

For the reasons noted above, it has been determined that an environmental assessment or an environmental impact statement is not required by NEPA and the applicable DOE regulations for compliance with NEPA.

D. Executive Order 12044

Executive Order 12044 (43 FR 12661, March 23, 1978) requires the agencies subject to it to prepare a regulatory analysis for those significant regulations that may have a major economic impact. Section 3(a) of the Executive Order directs the agencies to establish criteria to identify which regulations require regulatory analyses. DOE's implementing procedures are contained in DOE Order 2030.1 (44 FR 1032, January 3, 1979). In the Notice of Proposed Rulemaking we stated that we had determined that the criteria for the preparation of a regulatory analysis were not met by the proposed amendments. Specifically, since the rules adopted today are simply a regulatory mechanism to facilitate the distribution of SPR oil, we do not believe the regulations themselves are likely to impose significant economic costs. In this regard, since the regulations provide that SPR oil will be priced at roughly the average landed cost of imported oil to all refiners, sales of SPR oil under the allocation regulations should not result in appreciable increases in costs or prices for crude oil or petroleum products.

(Emergency Petroleum Allocation Act of 1973, 15 U.S.C. 751 *et seq.*, Pub. L. 93–159, as amended, Pub. L. 93–511, Pub. L. 94–99, Pub. L. 94–133, Pub. L. 94–163, and Pub. L. 94–385; Federal Energy Administration Act of 1974, 15 U.S.C. 787 *et seq.*, Pub. L. 93–275, as amended, Pub. L. 94–332, Pub. L. 94–385, Pub. L. 95–70, and Pub. L. 95–91; Energy Policy and Conservation Act, 42 U.S.C. 6201 *et seq.*, Pub. L. 94–163, as amended, Pub. L. 94–385, and Pub. L. 95–70; Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*, Pub. L. 95–91; E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267)

In consideration of the foregoing, we are amending Part 211 and adding a new Part 220 to Chapter II, Title 10 of the Code of Federal Regulation as set forth below.

Issued in Washington, D.C., August 12, 1980.

Hazel R. Rollins,
Administrator, Economic Regulatory Administration.

§ 211.62 [Amended]

1. Section 211.62 is amended by revising the definition of "Refiner-seller" and by adding the definitions of "Strategic Petroleum Reserve" and "SPR crude oil" in proper alphabetical order to read as follows:

* * * * *

"Refiner-seller" means a refiner which is not a small refiner or independent refiner as defined in this section; *provided, that* a refiner which is not a small refiner or an independent refiner, and all of the refining capacity of which has been constructed after January 1, 1974, shall not be classified as a refiner-seller; and *provided further, that,* for the allocation period commencing October 1, 1977, the refiners considered to be refiner-sellers for purposes of § 211.65 of this subpart shall include only those firms classified as refiner-sellers in the allocation quarter commencing June 1, 1977. Refiner-seller shall also mean the United States Government when SPR crude oil is allocated pursuant to § 211.65 of this subpart; *except that,* unless expressly provided, the provisions of § 211.65(e)–(j) shall not apply to the United States Government.

* * * * *

"Strategic Petroleum Reserve (SPR)" means the program for the storage of crude oil and/or petroleum products authorized by Title I, Part B of the Energy Policy and Conservation Act (EPCA), 42 U.S.C. section 6231 *et seq.*

"SPR crude oil" means crude oil stored in or acquired for storage in the SPR, or for the distribution thereof. For the purposes of this subpart, such crude oil shall be considered as imported crude oil.

§ 211.65 [Amended]

2. Section 211.65 is amended by adding a new paragraph (k) to read as follows:

* * * * *

(k) *Special provisions for allocation of Strategic Petroleum Reserve crude oil.* (1) *General.* This paragraph applies to the allocation of such amounts of SPR crude oil as the Secretary of Energy determines pursuant to Part 220 of this chapter shall be allocated under this section. Except as expressly provided in this paragraph (k), the provisions of paragraphs (a) through (j) of this section shall not apply to the allocation of such crude oil.

(2) *Notice of availability of SPR crude oil.*

(i) ERA shall announce the availability of SPR crude oil for distribution under this section for a particular allocation period in the buy/sell notice specified in paragraph (g)(1) of this section or, if the SPR crude oil is not available until after the beginning of an allocation period, in a supplemental buy/sell notice. The buy/sell notice shall set forth to the maximum extent practicable information concerning the quantity, quality and delivery points of SPR crude oil available for sale under this section for the allocation period; any maximum or minimum volume restrictions; and any delivery and/or transportation restrictions.

(ii) Any refiner-buyer desiring to purchase SPR crude oil under this section in an allocation period must submit to DOE an offer in accordance with the procedures set forth in Subpart C of Part 220 of this chapter. To the extent practicable, DOE shall award contracts for the purchase of SPR crude oil under this section prior to the beginning of an allocation period.

(3) *Adjustments to refiner-sellers' sales obligations, purchase opportunities and allocations.* (i) For the purpose of the calculations of the sales

obligation for each refiner-seller for a

oil from the delivery points to its

to read as follows:

§ 211.65 Mandatory Crude Oil Allocation

Regulation 212–1. SPR crude oil shall be

Appendix A, Part 211 (Standby

obligation for each refiner-seller for a particular allocation period, the total allocation obligation specified in paragraph (e) of this section and the total sales obligation specified in paragraph (f)(1) of this section shall be reduced by the total volume of SPR crude oil allocated under this section in that allocation period.

(ii) If during any allocation period DOE sells SPR crude oil to any refiner-buyer in a manner other than pursuant to the provisions of this section, ERA shall issue a supplemental buy/sell notice that (A) reduces the purchase opportunity or allocation of each such refiner by the volume of SPR crude oil purchased by each such refiner and (B) reduces the sales obligation for each refiner-seller in the manner prescribed in subclause (i) of this subdivision.

(4) *Permitted exchanges and sales of SPR crude oil.* (i) No volumes of SPR crude oil allocated under this section shall be sold or otherwise disposed of by refiner-buyers except pursuant to (A) crude oil exchanges in which only quality and location differentials are given effect in the calculation of the exchange ratio or (B) matching purchase and sale transactions which have the same effect as an exchange described in clause (A); *provided, that,* the volume of non-SPR crude oil received by a refiner-buyer pursuant to such transactions shall be processed in such refiner's refinery.

(ii) SPR crude oil allocated under this section must be processed by the ultimate recipient of the SPR crude oil within forty-five (45) days following the close of the allocation period for which that crude oil was allocated; *provided, that,* if SPR crude oil is purchased from the Government in the last month of the allocation period, it must be processed within sixty (60) days following the close of the allocation period.

(iii) Within forty-eight hours of the completion of the arrangements therefor, each exchange transaction involving SPR crude oil shall be reported to ERA in writing or by telex by all parties to the exchange. This report shall identify the exchange partners, the refineries to which the SPR crude oil and the non-SPR crude oil is to be delivered, and the period over which the delivery is expected to take place.

(5) *Procedures for sale of SPR crude oil.* (i) Sales of SPR crude oil pursuant to this section shall be conducted in accordance with the procedures set forth in Subpart C of Part 220 of this chapter.

(ii) The refiner-buyer shall be responsible for the transportation, including the cost thereof, of SPR crude oil from the delivery points to its refinery.

(iii) SPR crude oil sold pursuant to this section shall be priced in accordance with the provisions of § 220.32 of this chapter.

3. Section 211.66 is amended by revising subclause (vi) of paragraph (d) and subparagraph (5) of paragraph (h) to read as follows:

§ 211.66 Reporting requirements.

* * * * *

(d) *Refiner-buyers' semiannual report.* * * *

* * * * *

(vi) Purchases of allocated crude oil for each eligible refinery, separately stating the volumes of SPR crude oil purchased from the Government.

* * * * *

(h) *Monthly report.* * * *

* * * * *

(5) The weighted average costs for that refiner (including transportation costs to the refinery) of old oil, upper tier crude oil, ANS crude oil, stripper well crude oil (as defined in Part 212 of this chapter), incremental tertiary crude oil (as determined pursuant to § 212.78), tertiary incentive crude oil (as determined pursuant to § 212.78), SPR crude oil purchased from the Government, other domestic crude oils the first sale of which is exempt from the provisions of Part 212 of this chapter, and imported crude oil included in that refiner's crude oil receipts. For refiners required to file transfer pricing report forms under § 212.84 of this chapter, the weighted average cost of imported crude oil reported under this subparagraph should be derived from the landed costs set forth in such reports.

* * * * *

Appendix A [Amended]

4. Standby Regulation 211–1 in Appendix A, Part 211, is amended—

a. in paragraph 1, by revising the second sentence;

b. in paragraph 4, by revising the definitions of "Estimated crude oil runs to stills," "National estimated crude oil runs to stills" and "seller"; and

c. in paragraph 5, by revising § 211.65(a)(4)(ii); by adding a new subparagraph (3) to § 211.65(b); by revising § 211.65(g)(1); by revising § 211.65(h)(5); and by adding new subparagraphs (7) and (8) to § 211.65(h);

d. in paragraphs 1–8, by changing (i) all references to "special rule" to "Standby Regulation" and (ii) all references to "Part 212, Subpart L, Special Rule No. 1" to "Standby Regulation 212–1, Appendix A, Part 212";

to read as follows:

Appendix A to Part 211—Standby Regulations

Standby Regulation 211–1

Standby Mandatory Crude Oil Allocation and Refinery Yield Control Programs

1. *Scope.* This Standby Regulation 211–1 sets forth the DOE Standby Mandatory Crude Oil Allocation and Refinery Yield Control Programs. This Standby Regulation also provides for the distribution of such amounts of SPR crude oil as the Secretary of Energy determines pursuant to Part 220 of this chapter shall be distributed under the Standby Regulation.

* * * * *

4. * * *

* * * * *

"Estimated crude oil runs to stills" means the volume of crude oil a refiner estimates it will run to stills for its own account during an allocation period for all of its refineries, the volume of crude oil to be processed for nonrefiners, the volume of crude oil to be processed for the refiner's account by other refiners, and, if SPR crude oil is distributed in a manner other than pursuant to this Standby Regulation, the volume of SPR crude oil purchased from, or received through exchange with, the Government. A refiner's estimated runs to stills shall be based on the volume of its total crude oil supply (as defined in paragraph 4 of this Standby Regulation) that could be processed in its refineries or for its account by other refiners in the particular allocation period, excluding crude oil purchased or to be purchased under this Standby Regulation. If the exemption in paragraph 3(a) of this Standby Regulation is applicable, "estimated crude oil runs to stills" shall not include the quantity of crude oil a refiner-seller estimates it will be required to sell to refiner-buyers pursuant to § 211.65 during the allocation period.

* * * * *

"National estimated crude oil runs to stills" means, for any allocation period, the total of the estimated crude oil runs to stills for all U.S. refiners, plus the volume of SPR crude oil to be allocated under this Standby Regulation, minus the quantity of crude oil directed to all refiners pursuant to § 211.65(d)(2) or § 211.71(d) of this Standby Regulation.

* * * * *

"Seller" means any refiner whose estimated crude oil runs to stills during the allocation period is greater than the national utilization rate multiplied by that refiner's base period average monthly crude oil runs to stills, including the United States Government when SPR crude oil is allocated pursuant to this Standby Regulation. Except as expressly provided, the provisions of paragraphs (a) and (c)–(j) of § 211.65 in paragraph 5 of this Standby Regulation shall not apply to the U.S. Government.

* * * * *

(4) *Calculation Procedure.*

* * * * *

(ii) For each allocation period, the ERA shall compute the national estimated crude oil runs to stills, which shall equal the total estimated crude oil runs to stills for all U.S. refiners for that allocation period, plus the quantity, if any, of SPR crude oil allocated under this Standby Regulation, minus the quantity of crude oil directed to all refiners pursuant to § 211.65(d)(2) or § 211.71(d) of this Standby Regulation.

* * * * *

(b) *Buyers.* * * *

* * * * *

(3) Any buyer desiring to purchase SPR crude oil under this section in an allocation period must submit to DOE an offer in accordance with the procedures set forth in Subpart C of Part 220 of this chapter.

* * * * *

(g) *Buy/Sell Notice and Negotiation of Transactions.*

(1) Except for the first allocation period, a buy/sell notice shall be published at least 10 days prior to the beginning of the allocation period. Except when the exemption in paragraph 3(a) of this Standby Regulation is applicable, each buy/sell notice shall contain two lists. One list shall set forth the quantity of crude oil each buyer whose DOE certified crude oil refining capacity is 50,000 barrels per day or less is eligible to purchase and the quantity of crude oil that each seller shall be obligated to offer for sale to such buyers. The other list shall set forth the quantity of crude oil each buyer whose DOE certified crude oil refining capacity exceeds 50,000 barrels per day is eligible to purchase and the quantity of crude oil that each seller shall be obligated to offer for sale to such buyers (less the obligations shown on the first list). If SPR crude oil is distributed under this section for an allocation period, the buy/sell notice shall set forth to the maximum extent practicable information concerning the quantity, quality and delivery points of the SPR crude available for sale; any maximum or minimum volume restrictions; and any delivery and/or transportation restrictions.

(h) *Terms and Conditions of Sales.*

* * * * *

(5) All crude oil except SPR crude oil sold pursuant to this section shall be priced in accordance with the provisions in Part 212, Appendix A, Standby Regulation 212–1. SPR crude oil shall be priced in accordance with the provisions of § 220.32 of this chapter.

* * * * *

(7) Sales of SPR crude oil pursuant to this Standby Regulation shall be conducted in accordance with the procedures set forth in Subpart C of Part 220 of this chapter.

(8) The buyer shall be responsible for the transportation, including the cost thereof, of SPR crude oil from the delivery points specified by DOE to its refinery.

* * * * *

5. Part 220 is aded to Title 10, Chapter II of the Code of Federal Regulations, to read as follows:

PART 220—STRATEGIC PETROLEUM RESERVE CRUDE OIL ALLOCATION

Subpart A—General Provisions

Sec.
220.1 Purpose and scope.
220.2 Definitions.

Subpart B—Method of Allocation

220.10 Rule.

Subpart C—Procedures for Sales of SPR Crude Oil

220.20 Basic sales agreement.
220.21 Notice of sale.
220.22 Contract awards.

Subpart D—Price Rule

220.30 Applicability.
220.31 Definitions.
220.32 Rule.

Authority: Emergency Petroleum Allocation Act of 1973, 15 U.S.C. § 751 *et seq.*, Pub. L. 93–159, as amended, Pub. L. 93–511, Pub. L. 94–99, Pub. L. 94–133, Pub. L. 94–163, and Pub. L. 94–385; Federal Energy Administration Act of 1974, 15 U.S.C. § 787 *et seq.*, Pub. L. 93–275, as amended, Pub. L. 94–332, Pub. L. 94–385, Pub. L. 95–70, and Pub. L. 95–91; Energy Policy and Conservation Act, 42 U.S.C. § 6201 *et seq.*, Pub. L. 94–163 as amended, Pub. L. 94–385, and Pub. L. 95–70; Department of Energy Organization Act, 42 U.S.C. § 7101 *et seq.*, Pub. L. 95–91; E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267.

Subpart A—General Provisions

§ 220.1 Purpose and scope.

(a) This part implements section 161(e) of the Energy Policy and Conservation Act (Pub. L. 94–163) (42 U.S.C. § 6231), as amended, which authorizes the Secretary of Energy to provide for the allocation of any petroleum product withdrawn from the Strategic Petroleum Reserve.

(b) *Applicability.* This part applies to any allocation of SPR crude oil, other than distribution by price competition, whether or not conducted pursuant to § 211.65 of this chapter (Buy/Sell Program), Standby Regulation 211–1, Appendix A, Part 211, (Standby Mandatory Crude Oil Allocation and Refinery Yield Control Programs), or this part.

§ 220.2 Definitions.

"Basic Sales Agreement" means a document issued by DOE containing many of the terms and conditions of any contract which may be awarded for the purchase of SPR crude oil from the Government.

"DOE" means the Department of Energy established by the Department of Energy Organization Act (Pub. L. 95–91), and includes the Secretary of DOE or his delegate.

"Notice of Sale" means the document (other than the buy/sell notice specified in § 211.65(g) of this chapter) issued by DOE announcing the sale of SPR crude oil. The Notice of Sale will specify the method of sale, eligibility to purchase, prices, applicable terminalling, handling and transportation charges, the crude oil types and quantities available for purchase, the sales period, delivery location(s), minimum and maximum volume restrictions, place and date for submission of offers, modes of transportation applicable for each delivery point (i.e., pipeline, barge, tanker and applicable port data/restrictions), special terms and conditions of sale, and the criteria to be employed in evaluating offers to purchase.

"Strategic Petroleum Reserve (SPR)" means the program for the storage of crude oil and/or petroleum products authorized by Title I, Part B of the Energy Policy and Conservation Act (EPCA), 42 U.S.C. section 6231 *et seq.*

"SPR crude oil" means crude oil stored in or acquired for storage in the SPR, or for the distribution thereof. For the purposes of Subpart C, Part 211 of this chapter, such crude oil shall be considered as imported crude oil.

Subpart B—Method of Allocation

§ 220.10 Rule.

(a) Upon a determination by the President that implementation of the Distribution Plan contained in the Strategic Petroleum Reserve Plan is required by a severe energy supply interruption or by obligations of the United States under the international energy program, the Secretary may allocate, in a manner consistent with the objectives of section 4(b)(1) of the Emergency Petroleum Allocation Act of 1973, in such amounts as he shall determine: (1) pursuant to the provisions of § 211.65 (Buy/Sell Program) of this chapter, (2) pursuant to the provisions of Standby Regulation 211–1, Appendix A,

V 45 A G 19 80 UMI

Part 211 (Standby Mandatory Allocation and Refinery Yield Control Programs) of this chapter, or (3) to any refiner, in accordance with criteria announced in a Notice of Sale.

(b) No volumes of SPR crude oil sold to any firm pursuant to paragraph (a)(3) of this section shall be sold or otherwise disposed of by such firm except pursuant to (A) crude oil exchanges in which only quality and location differentials are given effect in the calculation of the exchange ratio or (B) matching purchase and sale transactions which have the same effect as an exchange described in clause (A).

Subpart C—Procedures for Sale of SPR Crude Oil

§ 220.20 Basic Sales Agreement.

SPR crude oil will be sold only to refiners which have executed a Basic Sales Agreement by the deadlines announced in the Notice of Sale for submission of offers.

§ 220.21 Notice of sale.

SPR crude oil sales will be announced in a Notice of Sale.

§ 220.22 Contract awards.

Recipients of SPR crude oil will be selected from among those refiners offering to buy SPR crude oil, on the basis of the criteria announced in the Notice of Sale. The basis for the selection of recipients thereafter will be documented.

Subpart D—Price Rule

§ 220.30 Applicability.

The price rule stated in this subpart shall apply to any sale of SPR crude oil pursuant to the provisions of § 211.65 of this chapter, Standby Regulation 211–1, Appendix A, Part 211 of this chapter, or this part.

§ 220.31 Definitions.

For purposes of this subpart—

"High sulfur crude oil" means crude oil the sulfur content of which is equal to or greater than 0.6% (six-tenths of one percent) by weight.

"Low sulfur crude oil" means crude oil the sulfur content of which is less than 0.6% (six-tenths of one percent) by weight.

"Imported crude oil" means crude oil brought into the United States from a foreign country for consumption within the United States, but excluding crude oil stored in, or owned and controlled by the United States Government in connection with the SPR.

"United States" means the several states, the District of Columbia, Puerto Rico and the territories and possessions of the United States.

§ 220.32 Rule.

(a) DOE shall establish the price at which low sulfur SPR crude oil and high sulfur SPR crude oil shall be sold, plus any gravity, and sulfur content adjustments as specified in paragraphs (b) and (c), respectively, of this section. The sale prices of SPR crude oils shall not be significantly higher or significantly lower than the highest and lowest prices, respectively, in comparable sales of allocated crude oil in the month of sale. In determining the prices of SPR crude oils, the DOE shall consider (1) the weighted average per barrel landed cost (as defined in § 212.82) for all low sulfur crude oil and for high sulfur imported crude oil delivered to all U.S. refiners in the month of sale; (2) the data on the Transfer Pricing Report ERA–51 (or any successor to this form), wherein refiners report crude oil prices obtained in transactions between affiliated entities and in transactions between non-affiliated entities pursuant to 10 CFR 212.84; and (3) other data that the DOE considers to be appropriate for price determination purposes.

(b) a price adjustment shall be made for gravity differentials of SPR crude oil offered for sale by adding to or subtracting from the price determined under paragraph (a) of this section an amount per barrel fixed monthly by the DOE for each degree API that the crude oil being offered for sale is above or below, respectively, the weighted average degree API of the reference crude oil of the same sulfur content category, established monthly by the DOE.

(c) a further price adjustment shall be made for sulfur content differentials of SPR crude oil offered for sale by adding to or subtracting from the price determined under paragraph (a) of this section an amount per barrel fixed monthly by the DOE for each one tenth of one percent that the sulfur content by weight of the SPR crude oil being offered for sale is either below or above, respectively, the percentage representing the sulfur content of the reference crude oil of the same sulfur content category established monthly by the DOE.

Part IV

Department of Health and Human Services

Office of Human Development Services

Social Services Programs for Individuals and Families (Title XX); Disclosure by Providers of Certain Ownership Interests and Other Information

V 45 AG 19 80 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Human Development Services

45 CFR Part 228

Social Services Programs for Individuals and Families: Title XX of the Social Security Act; Disclosure by Providers of Certain Ownership Interests and Other Information

AGENCY: Office of Human Development Services (HDS), Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: The Office of Human Development Services is amending its final regulations published July 17, 1979, at 44 FR 41646. Those regulations among other things, require private providers of medical or remedial care and health-related homemaker services under Title XX of the Social Security Act to disclose the names of persons with an ownership or control interest. These amendments are being made to clarify the effective date statement due to unnecessary inconsistencies between those States whose program year begins July 1, and those that begin on October 1. Two technical changes and two editorial changes are also being made.

EFFECTIVE DATE: These regulations continue to be effective on July 17, 1979 with the following specific clarification:

(1) Contracts signed on or before July 17, 1979 need not meet the requirements in 45 CFR 228.72 and 228.73 until the time the contract is renewed;

(2) Contracts signed between July 18, 1979 and December 31, 1979 must meet the requirements of § 228.72 and § 228.73 by December 31, 1979; and

(3) Contracts signed after December 31, 1979 must meet the requirements of §§ 228.72 and 228.73 prior to the approval of the contract.

Although this is a final rule, comments will be accepted and any changes found necessary will be made. Consideration will be given to written coments or suggestions received on or before September 18, 1980. Agencies and organizations are requested to submit their comments in duplicate.

ADDRESS: Address comments to: Acting Director, Division of Policy Coordination, Office of Policy Development, Department of Human Services, Washington, D.C. 20201. Comments will be available for public inspection beginning approximately two weeks after publication, in room 722–E of the Department's offices at 200 Independence Avenue SW., Washington, D.C., on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (area code 202–472–4415).

FOR FURTHER INFORMATION CONTACT: Mrs. Johnnie U. Brooks, Room 722–E, HHH Building, Department of HHS, 200 Independence Avenue SW., Washington, D.C. 20201, (202) 472–4415.

SUPPLEMENTARY INFORMATION:

Effective Date

These regulations continue to be effective July 17, 1979. However, we have provided clarification. The most critical clarification is that irrespective of a State's program year, the State has until December 31, 1979 to obtain the required information from providers with whom they enter into a contract after July 17, 1979 and prior to December 31, 1979.

This clarification is needed because the language in the current effective date statement produced unnecessary inconsistencies between those States whose program year began July 1 and those whose program year began October 1. The current effective date statement requires that all contracts signed after July 17, 1979 must meet these disclosure requirements, except that States whose program year begins July 1, have an additional 90 days to secure the required information. Since the reporting forms were not available from the Department until late September, we believe it is unreasonable to expect States to meet the current deadline.

Technical Changes

The first technical change made is in § 228.40(d). We have deleted the specific reference to paragraph (d) of § 228.72, thus requiring the provider to comply with § 228.72 in its entirety. As this is a current requirement, no policy change is intended.

The second technical change corrects the definition of provider. "Provider" is currently defined as "a private non-profit or for-profit non-governmental party (other than an individual practitioner or group of practitioners) which is under contract with the State or local agency *or* under subcontract with a public or private agency to deliver medical or remedial care or health-related services funded under title XX." The last phrase beginning "or under subcontract with a public or private agency * * *" was added to the final regulation in response to the question: Did the requirements of § 228.72 apply to private subcontractors of public agencies? (See Preamble 44 FR 41647.)

The answer given was yes, and the above phrase was added to the definition of provider as a way to assure reporting from these subcontractors.

Questions have been raised however about how this definition is to be applied. For example, are State title XX agencies required to contact subcontractors of public agencies and obtain the required information? Are subcontractors of either public or private agencies then responsible for obtaining disclosure information from their subcontractors?

On further analysis, we have concluded that this provision goes beyond the statute and was not intended to do so. A subcontractor is clearly defined in § 228.72(a)(12) and the circumstances under which the subcontractor is required to disclose information is also clearly stated in § 228.72(b) and (d).

Our analysis is as follows: As required by the statute, "disclosing entities" must provide information to the appropriate State agency(s). In the title XX program, disclosing entities for the purpose of § 228.72 are defined as *private* providers of:

(a) Medical or remedial care, and/or

(b) Health-related homemaker services. (See discussion of how this definition was determined in the NPRM 43 FR 34719.)

These disclosing entities (private providers) must report information regarding ownership and control interests and business transactions for themselves and certain subcontractors specified in the statute.

Thus, private subcontractors of private agencies are clearly included and must provide the required information. Private subcontractors of public agencies are not included because a public agency is not a disclosing entity for the purpose of § 228.72. For example, there is no way that a public agency can meet the requirement to report the "name and address of persons who have an ownership or control interest in the public agency and in certain subcontractors of the public agency."

In addition, two editorial corrections are made in § 228.72(a)(11) and in § 228.72(a)(12).

(Sec. 1102, 1124, and 1128, Social Security Act (42 U.S.C. 1302, 1320a–3 and 1320a–5))

(Catalog of Federal Domestic Assistance Program No. 13.642, Social Services for Low Income and Public Assistance Recipients.)

Note.— It has been determined that this document does not require Preparation of a Regulatory Analysis under Executive Order 12044.

Dated: March 7, 1980.

Cesar A. Perales,

Acting Assistant Secretary for Human Development Services.

Approved: August 7, 1980.

Patricia Roberts Harris,

Secretary.

45 CFR Part 228 is revised as follows:

1. Section 228.40(d) is revised by removing the specific reference to § 228.72(d) as follows:

§ 228.40 Minor medical and remedial care.

* * * * *

(d) FFP is not available for medical or remedial care or health-related homemaker services purchased from a private provider for any period during which the provider fails to comply with § 228.72 that requires disclosure about ownership, control interests, and certain information about past business transactions.

2. Section 228.72(a)(10) is amended as follows:

§ 228.72 Disclosure of information about ownership and business transactions.

(a) * * *

(10) *Provider* means a private non-profit or for-profit nongovernmental party (other than an individual practitioner or group of practitioners) which is under contract with the State or local agency to deliver services funded under title XX.

* * * * *

§ 228.72 [Amended]

3. Section 228.72(a)(11) is revised by substituting the word "or" for the word "and" as follows:

(a) * * *

(11) *Significant business transaction* means any business transaction or series of transactions which, during any one fiscal year, exceeds the lesser of either $25,000 or 5 percent of the total operating expenses of the provider.

* * * * *

§ 228.72 [Amended]

4. Section 228.72(a)(12) adds a comma after the word "individual" as follows:

(a) * * *

(12) *Subcontractor* means an individual, agency, or organization which by contract:

* * * * *

Environmental Protection Agency

Hazardous Waste Management System

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 122–124 and 260–265

[FRL–1574–4]

Hazardous Waste Management System; Intent to Issue Amendments to Interpretations of and Answers to Questions on Final Regulations

AGENCY: United States Environmental Protection Agency.

ACTION: Notice of intent to issue amendments to, interpretations of and answers to questions on final regulations.

SUMMARY: The Environmental Protection Agency (EPA) intends to begin issuing amendments to, interpretations of and answers to questions on its February 26, and May 19, 1980, hazardous waste regulations within the next several weeks. These were promised by EPA in the preamble to its May 19th regulations (see 45 FR 33089) and in the subsequent public meetings on the new hazardous waste regulations. Because of the complexity and breadth of the Resource Conservation and Recovery Act of 1976 (RCRA) subtitle C regulations, it is important for EPA to systematically provide the regulated community and interested public with clarifications and additional details regarding the coverage of the regulations.

ADDRESSES: Requests for the issuance of amendments and interpretive memoranda should be sent to Filomena Chau, whose address appears below. Requests for EPA's question-and-answer book and copies of amendments or interpretive memoranda should be sent to Edward Cox, Solid Waste Information, U.S. Environmental Protection Agency, 26 W. Saint Clair Street, Cincinnati, Ohio 45268, (513) 684–5382.

FOR FURTHER INFORMATION CONTACT: Filomena Chau, Office of Solid Waste (WH–562), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 755–9173.

SUPPLEMENTARY INFORMATION:

I. Introduction

On February 26, and May 19, 1980, EPA published its initial regulations implementing sections 3001 through 3006 and 3010 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended; see 45 FR 12722, 12746 and 33066. These regulations represent the first step in the development of a comprehensive Federal and State regulatory program to control the transportation, treatment, storage and disposal of hazardous waste.

Since their promulgation, the Agency has received thousands of questions from the regulated community and the States concerning the applicability of these regulations. In the majority of cases, the questions can be answered by a careful reading of the regulations. In others, the answers either do not appear in the regulations or are not clear.

To date, EPA has been responding to individual questions orally. Recognizing that this is not an effective way of communicating interpretations of the regulations to the public, the Agency has devised the following approach for dealing with the many issues which have been raised regarding these regulations.

A. Questions Which Can Be Answered by A Careful Reading of the Regulations

Many questions have been raised which could have been answered by a careful reading of the regulations or accompanying preamble. Because the Agency believes that those raising such questions either have not had an opportunity to read the regulations and preambles thoroughly or simply wish to confirm their own reading of the regulations, EPA does not feel it is necessary to issue specific written responses to them. However, the Agency will make available to the public during September 1980, upon request, a question-and-answer document which addresses many of questions in this category. EPA hopes that this document will assist persons reading the regulations for the first time to understand some of the more basic requirements of the hazardous waste program. Requests for this document should be sent to Edward Cox, whose address appears above.

B. Questions Which the Regulations Do Not Answer or Do Not Answer Clearly

In promulgating its February 26, and May 19, 1980, regulations, EPA recognized that it would probably not be able to adequately address *every* hazardous waste management situation, due to the large number of individual transportation, treatment, storage, and disposal situations to be addressed. To appropriately address these classes of situations, EPA sought comment on those sections of the regulations which it thought might require some additional refinement (*see* 45 FR 33084 and 33154). The Agency also requested the public to advise it of situations in which a literal application of the regulations would lead to an inappropriate result (45 FR 33088–33089). Finally, three public meetings were held to answer questions about the regulations (45 FR 33084).

EPA intends to initiate rulemaking to expand, correct or clarify the regulations as appropriate for these situations. Many of these changes will be promulgated in the Federal Register as technical amendments, with explanation, but without opportunity for public comment. Others will be published in interim final form or proposed, as appropriate.

It will not be possible for EPA to respond to all these issues immediately, due to their complexity. Also, the Agency must complete several other major priority tasks in the next six months. Such tasks include reviewing State hazardous waste programs for interim authorization, finalizing the interim final portions of the May 19, 1980, regulations and proposals, and developing permitting standards for hazardous waste management facilities. Therefore, EPA will deal first with issues which identify those persons subject to the regulations and those facilities which can qualify for interim status. Those issues the Agency intends to address in the next several weeks are outlined in section II, below.

C. Questions for Which Interpretive Guidance Would be Helpful

Questions have been raised whose answers require a fairly sophisticated understanding of the regulations. For this category of questions, EPA intends to begin issuing interpretive memoranda to explain how the regulations will apply in particular situations. These interpretive memoranda will be referred to as Regulatory Interpretation Memoranda (RIMs).

RIMs will be issued by EPA's Deputy Assistant Administrator for Solid Waste, with the concurrence of its Deputy Assistant Administrator for Water Enforcement and Associate General Counsel for Water & Solid Waste. Each memorandum will be assigned a three-part number. The first part will correspond to the CFR Part it interprets ("260" will be used for memoranda which address several regulations or general issues). The second part will identify the calendar year in which it is issued. The third part will reflect the sequential order in which the memorandum is issued (*e.g.*, RIM 260–80–01). Each RIM will be published in the Federal Register, will be available at EPA Regional Offices and State agencies regulating hazardous waste management, and will be mailed to individuals on request. All such requests should be sent to Edward Cox, whose address appears above and should specify whether the requestor wishes (1) to obtain a specific memorandum (identified, for instance, as, "RIM 260–80–01") or (2) to be placed on a mailing list to receive all memoranda in a particular series (identified, for instance as, "RIM Series 262 and 123" memoranda).

For the reasons stated in Section I.B., EPA will not be able to issue interpretive memoranda responding to all the questions in this category immediately, but will set priorities along the lines outlined above. Issues which the Agency intends to address in the next several months are outlined below.

II. Issues to be Addressed in August, September, and October 1980

EPA is currently developing RIMs or amendments to the regulations on the following issues.

1. *When is a hazardous waste first subject to regulation?* Many hazardous wastes are created in pipes, tanks or closed vessels, which are an integral part of a manufacturing, product storage, or waste treatment process. Examples are: sludges formed in raw material or product storage tanks (such as petroleum storage tanks, distillation residues created in distillation units) and sludges formed in treatment facilities where the wastewater itself is not a hazardous waste. We expect to be issuing an amendment to Part 261 in August which will clarify when these wastes become subject to regulation under Subtitle C.

2. *Clarification of the definition of "totally enclosed treatment facility."* A large number of questions have been asked about this definition, which appears in § 260.10(a)(70). Most of these questions relate to the definition of the term "totally enclosed" from an engineering standpoint (*e.g., does the term cover a vented tank, a tank in a building or a tank with a floating cover). We will address these in a RIM or an amendment to the regulations to be published in August.*

3. *Application of regulation to certain neutralization processes.* Several questions have been raised about application of the regulations to the neutralization of process wastes that are hazardous only because they exhibit the characteristic of corrosivity, and where the neutralization treatment is an integral part of the manufacturing process. We hope to publish an amendment on this matter in August.

4. *Clarification of the exclusion for wastes generated in the combustion of coal and other fossil fuels and in the exploration, development and production of crude oil, natural gas or geothermal energy.* We anticipate issuing a RIM to clarify the scope of these exclusions in August.

5. *Clarification of the application of regulations to surface coal mining wastes.* There is an inconsistency between the preamble to EPA's Section 3004 regulations and the regulations themselves concerning the applicability of the regulations to coal mining wastes which are regulated under the Surface Mining Control and Reclamation Act. We hope to clarify this issue during August.

6. *Clarification of small generator special requirements.*

A large number of questions have been raised regarding the requirements in § 261.5 for hazardous wastes generated by small quantity generators. We hope to publish a RIM and regulatory amendment dealing with these questions in August.

7. *Clarification of the regulation of commerical products listed under § 261.33.* Many questions have been raised about when the commercial products listed in § 261.33 become "wastes." The most frequent question is whether manufacturing wastes that contain the chemicals listed in § 261.33 are hazardous wastes. Other questions relate to the regulation of commercial products that are used, re-used, recycled or reclaimed. We intend to address these and other questions in a RIM to be published in August.

8. *Clarification of the term "sometimes discarded" in the definition of solid wastes which are by-products in § 261.2(b)(3).* Many persons have asked the meaning of this term and asked how they can show that their by-product is never discarded and therefore is not a solid waste. We hope to publish a RIM or amendment addressing this issue in August.

9. *Application of the regulation to inactive facilities.* EPA's regulations do not apply to "inactive" facilities. Questions have been raised as to whether this exclusion includes inactive storage facilities and whether the regulations apply if inactive facilities are reactivated. We hope to publish a RIM or an amendment to the regulations dealing with these questions in late September.

10. *Application of the regulations to NPDES and pretreatment wastewater treatment facilities that treat or generate hazardous wastes.* Numerous comments have been received about the appropriateness of applying the requirements of Parts 264 and 265 to these facilities and requiring them to have RCRA Subtitle C permits. We hope to address this issue in late September.

11. *Clarification of and possible amendments to the delisting procedures in § 260.22.* Many questions and comments are being received on these procedures, one of which is the status of a delisting petition during the period between a favorable tentative decision to grant the petition and a final decision (see § 260.22). We are considering these questions and comments and hope to address them in November.

12. *Application of the regulations to spills of listed chemicals and hazardous wastes.* Questions have been raised about the applicability of the regulations to spills of listed chemicals and hazardous wastes (both at facilities and during transportation). They include the following: Is a permit required for clean-up activities, particularly those involving treatment, storage or disposal? Is a manifest required for emergency transport of spilled material? Who is the generator—the transporter or the clean-up firm? How do the hazardous waste spill regulations relate to the spill regulations issued by EPA under Section 311 of the Clean Water Act? We hope to address these and related questions in RIMs and amendments to the regulations in October.

13. *Application of the regulations to dredged materials which are hazardous wastes because they exhibit any of the characteristics of hazardous wastes.* Questions have been raised about the application of the hazardous waste regulations to dredged materials and the interrelationship between these regulations and those issue by EPA under Section 404 of the Clean Water Act. We hope to address these questions in a RIM and, where appropriate, amendments to the regulations in October.

14. *The circumstances under which a facility can obtain interim status after November 19, 1980.* We have been asked whether an existing facility which does not now handle hazardous waste can obtain interim status in the future if, for example, EPA amends its hazardous waste list to add a waste which the facility now handles. We hope to address this issue in a RIM in September.

15. *Clarification of "existing facility".* A number of persons have asked us to clarify the definition of "existing facility," particularly whether the definition of "commenced construction" pertains to an entire manufacturing site or only the hazardous waste facility located on the site. We intend to deal with this issue in a RIM or an amendment in September.

16. *The Office of Management and Budget's (OMB) review of EPA's Parts 264 and 265 reporting requirements under the Federal Reports Act.* OMB recently approved EPA's Parts 264 and

265 reporting requirements under the

EPA will also issue interpretive

Tuesday

265 reporting requirements under the Federal Reports Act on the condition that EPA extend, until May 19, 1981, the deadline by which landfills, landfarms and surface impoundments which intend to close as landfills must prepare a closure and post-closure monitoring and maintenance plan. EPA will be issuing an amendment to its regulations to reflect this change in August.

In addition to the foregoing, we expect to publish a RIM or an amendment to the regulations, as appropriate, on each of the following issues during the next three months:

1. Definition of empty container
2. Clarification of "empty tank" as it applies in the accumulation of hazardous wastes
3. Application of regulations to samples of hazardous wastes being transported to and processed in laboratories
4. Application of the regulations to pipelines transporting hazardous wastes to off-site facilities
5. Application of regulations to run-off from non-hazardous waste storage piles and raw materials storage piles
6. Clarification of the regulations as they apply to ocean disposal of hazardous wastes

III. Effect of Technical Amendments and Interpretive Memoranda on Compliance Deadlines

This notice does not suspend any requirements in EPA's February 26, and May 19, 1980, regulations. Until an amendment or interpretive memorandum is published on a particular issue, those regulations will remain in effect and individuals should use their best judgment in interpreting them. It is EPA's intent to resolve the issues outlined above prior to the November 19, 1980, effective date of the February 26, 1980 and May 19, 1980 regulations. Should a number of outstanding major issues not be addressed by November 19, 1980, EPA will consider whether the adoption of a temporary special enforcement policy would be appropriate to deal with these situations.

IV. Requesting Amendments or Interpretive Memoranda

As explained in the preamble to EPA's May 19, 1980, regulations any person may submit a petition to amend EPA's hazardous waste regulations (45 FR 33068–33070). Sections 260.20 through 260.22 of the regulations prescribe the information which should be contained in such petitions and describe the procedures which EPA will follow in acting on them.

EPA will also issue interpretive memoranda (if appropriate) on written request. Persons wishing to file such a request should follow the general requirements for rulemaking petitions in § 260.20, except that in lieu of describing their proposed amendment and the justification for it, they should indicate the particular factual situation or regulation for which a regulatory interpretation is requested.

For the reasons stated in I. B., it may be many months before EPA can act on rulemaking petitions or requests for interpretive memoranda. However, requests will be acknowledged within 10 days after receipt. To the extent feasible, the Agency will address first those issues having the most immediate and wide-ranging impact. It should be noted that the filing of a petition or request for interpretation does not stay the compliance date for any regulation.

Dated: August 5, 1980.

Eckardt C. Beck,

Assistant Administrator for Water & Waste Management.

Part VI

Department of Agriculture

Federal Grain Inspection Service

Official Grain Inspection Functions; Assignment of Geographic Area

V 45 AUG 19 80 UMI

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

Assignment of Geographic Area to the Fort Worth Grain Exchange Inspection Service, Inc., Fort Worth, Tex.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the Fort Worth Grain Exchange Inspection Service, Inc., Fort Worth, Texas, for the performance of official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECTIVE DATE: September 18, 1980.

FOR FURTHER INFORMATION CONTACT:
J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262. Actions of this kind were anticipated under the provisions of Section 7 of the United States Grain Standards Act as amended (7 U.S.C. 79) and are specifically considered in the Final Impact Statement prepared for this notice. Thus, the Final Impact Statement describing the options considered in developing this notice and the impact of implementing each option is available on request from the Issuance and Coordination Staff, United States Department of Agriculture, Federal Grain Inspection Service, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION:

This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified as "not significant."

Fort Worth Grain Exchange Inspection Service, Inc., 2707 Decatur Avenue, P.O. Box 4421, Fort Worth, Texas 76106, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on March 20, 1979. The designation also included an assignment of geographic area, on an interim basis, within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the Octo- ber 18, 1979, issue of the **Federal Register** (44 FR 60130). No comments were received. Accordingly, after due consideration of all information available to the United States Department of Agriculture, the geographic area shall remain as originally proposed.

The geographic area assigned to the Agency shall be the area within the following Counties in Texas:

Bell, Bosque, Brown, Coleman, Collin, Comanche, Cooke, Dallas, Denton, Ellis, Falls, Fannin, Grayson, Hamilton, Hill, Johnson, Lamar, Limestone, McLennan, Milam, Red River, Tarrant, and Williamson.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service points within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262.

(Sec. 8, Pub. L. 94–582, 90 Stat. 2870 (7 U.S.C. 79))

Done in Washington, D.C. on: August 13, 1980.

Neil E. Porter,
Acting Director Compliance Division.

Assignment of Geographic Area to Grain Inspection, Inc., Jamestown, N. Dak.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the Grain Inspection, Inc., Jamestown, North Dakota, for the performance of official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECTIVE DATE: September 18, 1980.

FOR FURTHER INFORMATION CONTACT:
J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262. Actions of this kind were anticipated under the provisions of Section 7 of the United States Grain Standards Act as amended (7 U.S.C. 79) and are specifically considered in the Final Impact Statement prepared for this notice. Thus, the Final Impact Statement describing the options considered in developing this notice and the impact of implementing each option is available on request from the Issuance and Coordination Staff, United States Department of Agriculture, Federal Grain Inspection Service, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION:

This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified as "not significant."

Grain Inspection, Inc., 217 4th Avenue, N.W., P.O. Box 1652, Jamestown, North Dakota 58401, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on March 1, 1979. The designation also included an assignment of geographic area, on an interim basis, within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the November 23, 1979, issue of the **Federal Register** (44 FR 67199–67200). No comments were received. Accordingly, after due consideration of all information available to the United States Department of Agriculture, the geographic area shall remain as originally proposed.

The geographic area assigned to the Agency is as follows:

Bounded: on the North by Interstate 94 to U.S. Route 85; U.S. Route 85 north to State Route 200; State Route 200 east to U.S. Route 83; U.S. Route 83 southeast to State Route 41; State Route 41 north to State Route 200; State Route 200 east to State Route 3; State Route 3 north to U.S. Route 52; U.S. Route 52 southeast to State Route 15; State Route 15 east to U.S. Route 281; U.S. Route 281 south to Foster County; the northern Foster County line; the northern Griggs County line east to State Route 32;

Bounded: on the East by State Route 32 south to State Route 45; State Route 45 south to State Route 200; State Route 200 west to State Route 1; State Route 1 south to the Soo Railroad line; the Soo Railroad line southeast to Interstate 94; Interstate 94 west to State Route 1; State Route 1 south to Dickey County line;

Bounded: on the South by the southern Dickey County line west to U.S. Route 281; U.S. Route 281 north to the Lamoure County line; the southern Lamoure County line; the southern Logan County line west to State Route 13; State Route 13 west to U.S. Route 83; U.S. Route 83 south to the Emmons County line; the southern Emmons County line; the southern Sioux County line west to State Route 49; State Route 49 north to State Route 21; State Route 21 west to the Chicago Milwaukee St. Paul and Pacific Railroad line; the Chicago Milwauee St. Paul and Pacific Railroad line northwest to State Route 22; State Route 22 south to U.S. Route 12; U.S. Route 12 west-northwest to the North Dakota State line; and

Bounded: on the West by the western North Dakota State line north to Interstate 94.

In addition, the following locations outside of the foregoing contiguous geographic area, which have been and will continue to be serviced by the Agency, shall be considered as part of the Agency's geographic area: Farmers Coop Elevator, Fessenden, North Dakota, in Wells County; Farmers Union Elevator and Manfred Grain, Manfred, North Dakota, in Wells County; and Norway Spur and Oakes Grain, Oakes, North Dakota, in Dickey County.

Exceptions to this geographic area are the following locations situated inside the Agency's area which have been and will continue to be serviced by: Aberdeen Grain Inspection, Inc.: Farmers Elevator, Guelph, North Dakota, in Dickey County; Farmers Equity Exchange and Sun Grain, New England, North Dakota, in Hettinger County; and Regent Grain Company and Regent Equity, Regent, North Dakota, in Hettinger County; and by Minot Grain Inspection, Inc.: Farmers Elevator & Mercantile Co., and Coast Trading Company, Underwood, North Dakota, in McLean County; and Merle A. Larson Elevator, Inc., Washburn, North Dakota, in McLean County.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service points within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262.

(Sec. 8, Pub. L. 94–582, 90 Stat. 2870 (7 U.S.C. 79))

Done in Washington, D.C. on: August 13, 1980.

J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262. Actions of this kind were anticipated under the provisions of Section 7 of the United States Grain Standards Act as amended (7 U.S.C. 79) and are specifically considered in the Final Impact Statement prepared for this notice. Thus, the Final Impact Statement describing the options considered in developing this notice and the impact of implementing each option is available on request from the Issuance and Coordination Staff, United States Department of Agriculture, Federal Grain Inspection Service, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION:

This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified as "not significant."

Minot Grain Inspection, Inc., 601 3rd Avenue, P.O. Box 13, Minot, North Dak. 58701, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on February 1, 1979. The designation also included an assignment of geographic area, on an interim basis, within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the November 23, 1979, issue of the **Federal Register** (44 FR 67196–67197). No comments were received. Accordingly, after due consideration of all information available to the United States Department of Agriculture, the geographic area shall remain as originally proposed.

The geographic area assigned to the Agency is as follows:

Bounded: on the North by the North Dakota State line east to State Route 14;

Bounded: on the East by State Route 14 south to State Route 5; State Route 5 east to State Route 60; State Route 60 southeast to State Route 3; State Route 3 south to State Route 200;

Bounded: on the South by State Route 200 west to State Route 41; State Route 41 south to U.S. Route 83; U.S. Route 83 northwest to State Route 200; State Route 200 west to U.S. Route 85; U.S. Route 85 south to Interstate 94; Interstate 94 west to the North Dakota State line; and

Bounded: on the West by the North Dakota State line.

In addition, the following locations outside of the foregoing contiguous geographic area, which have been and will continue to be serviced by the Agency, shall be considered as part of the Agency's geographic area: Farmers Elevator Company, Bottineau, North Dakota, in Bottineau County; Farmers Feed & Grain and Farmers Union, Harvey, North Dakota, in Wells County; Farmers Union, Rugby, North Dakota, in Pierce County; Farmers Elevator & Mercantile Co., and Coast Trading Company, Underwood, North Dakota, in McLean County; and Merle A. Larsen Elevator, Inc., Washburn, North Dakota, in McLean County.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service points within the assigned geographic area, the agency will provide official inspection services not requiring a licensed

Tuesday

inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262.

BILLING CODE 3410-02-M

Assignment of Geographic Area to A. V. Tischer and Son, Inc., Fort Dodge, Iowa

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the A. V. Tischer and Son, Inc., Fort Dodge, Iowa, for the performance of official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECTIVE DATE: September 18, 1980.

FOR FURTHER INFORMATION CONTACT: J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262. Actions of this kind were anticipated under the provisions of Section 7 of the United States Grain Standards Act as amended (7 U.S.C. 79) and are specifically considered in the Final Impact Statement prepared for this notice. Thus, the Final Impact Statement describing the options considered in developing this notice and the impact of implementing each option is available on request from the Issuance and Coordination Staff, United States Department of Agriculture, Federal Grain Inspection Service, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION:

This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified as "not significant."

A. V. Tischer and Son, Inc., 137 10th Street, N.W., P.O. Box 339, Fort Dodge, Iowa 50501, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on February 1, 1979. The designation also included an assignment of geographic area, on an interim basis, within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the November 19, 1979, issue of the **Federal Register** (44 FR 66220–66221). No comments were received during the comment period. However, in a March 13, 1980, letter, the Agency requested that the geographic area which was assigned on an interim basis be amended to exclude a portion of the area as described below. The Agency indicated that servicing this portion of the area imposed a financial hardship upon them and that the distance from their main office was a deterrent to providing timely service. This portion of the area was assigned on an interim basis effective May 18, 1980, and terminating at such time as a permanent replacement agency is designated, to the Fremont Grain Inspection Department, Inc., in the May 16, 1980, issue of the **Federal Register** (45 FR 32569).

The description of the area being deleted from the Agency is as follows:

Bounded: on the North by the Iowa-Minnesota State line east from U.S. Route 59 to U.S. Route 71;

Bounded: on the East by U.S. Route 71 south to the southern Clay County line;

Bounded: on the South by the southern Clay County Line west;

Bounded: on the West by the western Clay County Line north to B24; B24 west to U.S. Route 59; U.S. Route 59 north to the Iowa-Minnesota State Line.

After due consideration of all information available to the United States Department of Agriculture, the geographic area assigned to the Agency is as follows:

Bounded: on the North by the Iowa-Minnesota State line from U.S. Route 71 east to U.S. Route 169;

Bounded: on the East by U.S. Route 169 south to State Route 9; State Route 9 west to U.S. Route 169; U.S. Route 169 south to the northern Humboldt County line; the Humboldt County line east to State Route 17; State Route 17 south to C54; C54 east to U.S. Route 69; U.S. Route 69 south to the northern Hamilton County line; the Hamilton County line west to R38; R38 south to U.S. Route 20; U.S. Route 20 west to the eastern Webster County line; the Webster County line south; the southern Webster County line to U.S. Route 169; U.S. Route 169 south to E18 west; E18 west to the eastern Greene County line; the Greene County line to U.S. Route 30;

Bounded: on the South by U.S. Route 30 west to E53; E53 west to N44; N44 north to U.S. Route 30; U.S. Route 30 west to U.S. Route 71; and

Bounded: on the West by U.S. Route 71 north to the Iowa-Minnesota State line.

In addition, the following locations outside of the foregoing contiguous geographic area, which have been and will continue to be serviced by the Agency, shall be considered as part of the Agency's geographic area: Cargill, Inc., Algona, Iowa, in Kossuth County; Farmers Coop Elevator, Boxholm, Iowa, in Boone County; Big Six Elevator, Burt, Iowa, in Kossuth County; Farmers Elevator, Goldfield, Iowa, in Wright County; and Farmers Coop Elevator, Holmes, Iowa, in Wright County.

Exceptions to this geographic area are the following locations situated inside the Agency's area which have been and will continue to be serviced by: D. R. Schaal: Farmers Coop Company, Eagle Grove, Iowa, in Wright County; and by Sioux City Inspection and Weighing Agency, Inc.: Gooch Seed Mill and Ernie's Seed and Field Service, Storm Lake, Iowa, in Buena Vista County.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service points within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262.

(Sec. 8, Pub. L. 94–582, 90 Stat. 2870 (7 U.S.C. 79))

Done in Washington, D.C. on: August 13, 1980.

Neil E. Porter,

Acting Director Compliance Division.

BILLING CODE 3410-02-M

federal register

Tuesday
August 19, 1980

Part VII

Federal Mediation and Conciliation Service

Arbitration of Pesticide Data Disputes

FEDERAL MEDIATION AND CONCILIATION SERVICE

29 CFR Part 1440

Arbitration of Pesticide Data Disputes

AGENCY: Federal Mediation and Conciliation Service.

ACTION: Final Regulations.

SUMMARY: The Federal Insecticide, Fungicide, & Rodenticide Act (hereinafter "FIFRA") provides for the appointment of arbitrators by the Federal Mediation and Conciliation Service (hereinafter "FMCS" or "the Service") if the parties to a dispute regarding either compensation for the use or joint development of pesticide data cannot reach an agreement. FIFRA provides that the procedure and rules of the Service shall be applicable to such arbitration proceedings. (Pub. L. 95–396, September 30, 1978, Sections 3(c)(1)(D)(ii) and 3(c)(2)(B)(iii)).

The final rule establishes the procedure by which the Federal Mediation and Conciliation Service will appoint arbitrators to assist pesticide producers in the resolution of disputes over the value of technical data concerning the properties and effects of pesticides or joint development of such data. For this purpose, the Service will utilize as its roster of arbitrators the roster of commercial arbitrators maintained by the American Arbitration Association ("AAA"), a non-profit private organization with long experience in commercial dispute resolution. The FIFRA arbitration rules of the AAA will be the rules of procedure to be followed for arbitration of pesticide data compensation disputes.

Interested parties were invited to submit written comments concerning interim regulations published at 45 FR 28105, April 28, 1980. No submissions were received. Therefore, this final regulation does not differ from the interim rule.

EFFECTIVE DATE: This regulation becomes effective September 18, 1980.

FOR FURTHER INFORMATION CONTACT: Nancy B. Broff, Assistant General Counsel, 2100 K Street, NW., Washington, D.C. 20427, (202) 653–5305.

SUPPLEMENTARY INFORMATION: This rule will provide a mechanism for the binding resolution of certain disputes that may arise between persons who have attained or are seeking government authorization to produce and sell pesticides. Rules promulgated by the Environmental Protection Agency ("EPA") at 40 CFR 162.9–1 through –.8 (see 40 FR 28242, July 3, 1975 and 44 FR 27932 May 11, 1979) described the circumstances in which one pesticide producer either may or must base an application for licensing of a pesticide upon information previously submitted to EPA. Use of said data gives rise to an obligation under § 3(c)(1)(D)(ii) of the Federal Insecticide, Fungicide and Rodenticide Act ("FIFRA") on the part of the applicant to pay compensation to the submitter of the information. Under § 3(c)(2)(B)(iii), disputes concerning joint development of data to satisfy EPA data requirements are also subject to compulsory arbitration.

The role of the FMCS is limited to the appointment of arbitrators to resolve compensation disputes. The duties and obligations of EPA and the parties to the dispute are specified in the rules cited above and are explained in considerable detail in the preambles. Therefore, interested persons are urged to read and understand the EPA rulemaking and contact EPA concerning those matters not addressed in the following rule.

Background

Congress has demonstrated its belief that the costs of generating information to evaluate pesticide risks be equitably apportioned among registrants of pesticide products. In Section 3(c)(1)(D) of the 1972 FIFRA, Congress authorized the Administrator of EPA to consider data submitted by firm A (other than "trade secret" data) when evaluating an application from firm B so long as firm B offered to pay "reasonable compensation" to A. The 1972 Act provided that the Administrator would fix the amount of compensation if the applicant and submitter could not agree on an amount.

In 1973, EPA implemented the compensation provision of FIFRA with an Interim Policy Statement. This policy did not require direct communication of an offer from firm B to firm A. Rather, it permitted firm A to claim compensation from B on the basis of a general notice in the **Federal Register** that B's application had been granted. If the parties could not agree on an amount of compensation, they could offer evidence concerning the reasonableness of the amount sought or offered in a hearing before an Administrative Law Judge, who would decide the sum. The situation became complicated in 1975, when EPA eliminated the practice of granting registration based on "established use patterns." Applicants were now required to identify data submitted by prior registrants on which they intended to rely and to advise the Agency that they had offered compensation to the original submitter. The response of many prior registrants to such offers was to advise EPA that the data on which applicants intended to rely were "trade secret," and therefore not subject to licensing. In other cases, because of poorly organized files at EPA, applicants experienced difficulty in identifying appropriate data to support registrations, or applicants were unwilling to extend offers to pay an unspecified amount of compensation.

Because of concern that FIFRA's complex provisions and EPA's difficulties in implementing them were affecting the viability of the pesticide industry, Congress directed EPA to conduct an evaluation and report its findings (H.R. 94–1105). A report, entitled *FIFRA: Impact on the Industry*, was subsequently submitted to Congress on March 7, 1977. Almost simultaneously EPA requested that Congress enact major changes to the pesticide statute.

On April 27, 1977, EPA Administrator Costle testified on behalf of an Administration proposal to amend FIFRA. He recomnmended the deletion of the "trade secret" exclusion for the Act's mandatory data licensing scheme. He also observed that EPA felt uncomfortable as the judge of data valuation disputes and asked Congress to provide guidance by specifying the factors to be considered when making valuations.

In response, the Senate and the House passed bills providing for final and binding arbitration of compensation disputes by arbitrators appointed by FMCS. Neither S. 1678 nor H.R. 8681 specified a formula or other guidance on the valuation of data for compensation purposes. The Conference Committee substantially modified the provisions of each bill which pertained to data available for compensation, the duration of the compensable period and sanctions for failure to negotiate or arbitrate compensation disputes. Provisions were incorporated to permit any party to a compensation dispute of a specified duration to "initiate binding arbitration by requesting the Federal Mediation and Conciliation Service to appoint an arbitrator from the roster of arbitrators maintained by (the) Service."

Section 3(c)(1)(D)(ii) of FIFRA, as amended by the Federal Pesticide Act of 1978, provides in pertinent part:

> (ii) except as otherwise provided in subparagraph (D)(i) of this paragraph, with respect to data submitted after December 31, 1969, by an applicant or registrant to support an application for registration, experimental use permit, or amendment adding a new use to an existing registration, to support or maintain in effect an existing registration, or for reregistration, the Administrator may, without the permission of the original data submitter, consider any such item of data in support of an application by any other person (hereinafter in this subparagraph referred to as the "applicant") within the fifteen-year period following the date the data were originally submitted only if the applicant has made an offer to compensate the original data submitter and submitted such offer to the Administrator accompanied by evidence of delivery to the original data submitter of the offer. The terms and amount of compensation may be fixed by agreement between the original data submitter and the applicant, or, failing such agreement, binding arbitration under this subparagraph. If, at the end of ninety days after the date of delivery to the original data submitter of the offer to compensate, the original data submitter and the applicant have neither agreed on the amount and terms of compensation nor on a procedure for reaching an agreement on the amount and terms of compensation, either person may initiate binding arbitration proceedings by requesting the Federal Mediation and Conciliation Service to appoint an arbitrator from the roster of arbitrators maintained by such Service. The procedure and rules of the Service shall be applicable to the selection of such arbitrator and to such arbitration proceedings, and the findings and determination of the arbitrator shall be final and conclusive, and no official or court of the United States shall have power or jurisdiction to review any such findings and determination, except for fraud, misrepresentation, or other misconduct by one of the parties to the arbitration or the arbitrator where there is a verified complaint with supporting affidavits attesting to specific instances of such fraud, misrepresentation, or other misconduct. The parties to the arbitration shall share equally in the payment on the fees expenses of the arbitrator.

Section 3(c)(2)(B)(iii) contains similar provisions for disputes arising during joint development of data. In addition, the parties to any dispute may choose to submit their dispute voluntarily to arbitration. In such case, the parties may go directly to AAA for appointment of an arbitrator.

The role of the FMCS is relatively minor within the context of the pesticide registration program as indicated by FIFRA and the limited legislative history which is available. According to the statute, the duties of the Service under FIFRA are to:

(1) Designate a person to arbitrate a compensation dispute, when requested.

(2) Maintain a roster of persons qualified and available to conduct the arbitration proceedings.

(3) Adopt rules of procedure to be followed in the conduct of compensation arbitration.

The Federal Mediation and Conciliation Service rarely arranges or conducts arbitration of commercial disputes. The Service is in the business of helping to resolve labor disputes between employers and representative of their employees. Among various means to further that purpose, FMCS maintains a roster of names of private labor arbitrators who do not handle commercial disputes such as the compensation disputes arising under FIFRA.

Therefore, in the Notice of Proposed Rulemaking (44 FR 43293, July 24, 1979) the Service proposed to adopt and use the Commercial Arbitration Roster of the American Arbitration Association (AAA) as its roster and to adopt the AAA's rules of commercial arbitration as its rules of procedure for disputes arising under FIFRA.

The Notice of Proposed Rulemaking was published in the **Federal Register** on July 24, 1979 for a 60-day period of public comment. Five thousand copies of the proposed regulations were mailed to interested parties. The comment period was reopened to allow further comment. (44 FR 65407, November 13, 1979). All comments received have been carefully considered.

After reviewing the comments, FMCS promulgated an interim final rule on April 28, 1980, (45 FR 28105). No comments were received during the comment period on the interim regulation.

This final rule is issued under the authority of the Federal Insecticide, Fungicide, and Rodenticide Act, Public Law 95–396 September 30, 1978, Sections 3(c)(1)(D)(ii) and 3(c)(2)(B)(iii).

Federal Mediation and Conciliation adds Part 1440 to Title 29 of the Code of Federal Regulations as set forth below.

Dated: August 8, 1980.

Robert P. Gajdys,

Director of Administration.

A new Part 1440 is added to 29 CFR as follows:

PART 1440—ARBITRATION OF PESTICIDE DATA DISPUTES

Sec.

1440.1 Arbitration of pesticide data disputes.

Appendix—FIFRA Arbitration Rules.

Authority: Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.), as amended, Pub. L. 95–396, 92 Stat. 819.

PART 1440—ARBITRATION OF PESTICIDE DATA DISPUTES

§ 1440.1 Arbitration of Pesticide Data Disputes.

(a) Persons requesting the appointment of an arbitrator under Section 3(c)(1)(D)(ii) and Section 3(c)(2)(B)(iii) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136, as amended), shall send such requests in writing to the appropriate American Arbitration Association Regional Office. Such requests must include the names, addresses, and telephone numbers of the parties to the dispute; issue(s) in dispute, the amount in dollars or any other remedy sought; sufficient facts to show that the statutory waiting period has passed, and the appropriate fee provided in the Fee Schedule.

(b) For the purpose of compliance with the Federal Insecticide, Fungicide, and Rodenticide Act (hereinafter "the Act"), the roster of arbitrators maintained by the Federal Mediation and Conciliation Service shall be the roster of commerical arbitrators maintained by the American Arbitration Association. Under this Act, arbitrators will be appointed from that roster. The fees of the American Arbitration Association shall apply, and the procedure and rules of the Federal Mediation and Conciliation Service, applicable to arbitration proceedings under the Act, shall be the FIFRA arbitration rules of the American Arbitration Association, which are hereby made a part of this regulation.

Appendix—FIFRA Arbitration Rules

Section 1

These rules shall apply as published in the **Federal Register** unless modified by FMCS.

Sec. 2. Definitions

For the purpose of these Rules of Procedure the terms are defined as follows:

(1) "AAA" means the American Arbitration Association.

(2) "Act" or "FIFRA" means the Federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. 136 *et seq.*

(3) "EPA" means the United States Environmental Protection Agency.

(4) "Arbitrator(s)" means the person or persons appointed to the tribunal constituted by the parties for the settlement of their dispute under these Rules.

(5) "Claimant" means a person asserting a claim for compensation under these Rules or filing a claim concerning joint development of data.

(6) "Compulsory arbitration" means arbitration invoked under the mandatory provisions of section 3(c)(1)(d) or 3(c)(2)(B)(iii) of the Act.

(7) "Voluntary arbitration" means arbitration voluntarily agreed to by the parties to settle a dispute under section 3(c)(1)(d) or 3(c)(2)(B)(iii) of the Act.

(8) "Director" means Director, Registration Division, Office of Pesticide Programs, Environmental Protection Agency, or any officer or employee of the EPA to whom authority has been or

may hereafter be lawfully delegated to

involved, if any, and the remedy sought, together with the appropriate

Sec. 7—Direct Appointment by Parties

shall be filed with AAA prior to the opening of the first hearing.

(3) A detailed statement of the matter in dispute under 3(c)(2)(B)

for the filing of any document or paper,

may hereafter be lawfully delegated to act in his stead.

(9) "Administator" means the AAA, its Tribunal Administrators or such officers or committees as the AAA may direct.

(10) "Roster" means the Commercial Arbitration Roster of AAA.

(11) "FMCS" or "Service" means the Federal Mediation and Conciliation Service.

(12) "Party" means claimant or respondent.

(13) "Person" means any individual, partnership, association, corporation, or any organized group of persons, whether incorporated or not.

(14) "Respondent" means the person against whom a claim is made under section 3(c)(1)(D) or 3(c)(2)(B)(iii) of the Act.

Terms defined in the Act and not explicitly defined herein are used herein with the meanings given in the Act.

Sec. 3. Initiation of Arbitration

(a) *Under compulsory procedures of FIFRA.* Upon the request of a party qualified under FIFRA § 3(c)(1)(D) or 3(c)(2)(B)(iii) for the appointment of an arbitrator, the Service will appoint an arbitrator in accordance with 29 CFR § 1440(a) and these rules. Requests shall be submitted in writing to the appropriate AAA Regional Office and must include the names, addresses and telephone numbers of the parties to the dispute; issues in dispute; the amount in dollars or any other remedy sought; sufficient facts to show that the statutory waiting period has passed; and the appropriate fee as provided in the Fee Schedule.

AAA shall give notice of filing of a request for arbitration to the other party. If he so desires, the party upon whom the demand for arbitration is made may file an answering statement in duplicate with AAA within seven days after notice, in which event he shall simultaneously send a copy of his answer to the other party. If a monetary claim is made in the answer the appropriate fee provided in the Fee Schedule shall be forwarded with the answer. If no answer is filed within the stated time, it will be assumed that the claim is denied. Failure to file an answer shall not operate to delay the arbitration.

(b) *Under a Voluntary Submission.*—Parties to any existing dispute may commence an arbitration under these Rules by filing at any AAA Regional Office two (2) copies of a written agreement to arbitrate under these Rules (Submission), signed by the parties. It shall contain a statement of the matter in dispute, the amount of money involved, if any, and the remedy sought, together with the appropriate administrative fee as provided in the Fee Schedule.

Sec. 4—Fixing of Locale

The parties may mutually agree on the locale where the arbitration is to be held. If the locale is not designated within seven days from the date of filing the Demand or Submission the AAA shall have power to determine the locale. Its decision shall be final and binding. If any party requests that the hearing be held in a specific locale and the other party files no objection thereto within seven days after notice of the requests, the locale shall be the one requested.

Sec. 5—Qualification of Arbitrator

Any Arbitrator appointed pursuant to these rules shall be neutral, subject to disqualification for the reasons specified in Section 11. If the agreement of the parties names an Arbitrator or specifies any other method of appointing an Arbitrator, or if the parties specifically agree in writing, such Arbitrator shall not be subject to disqualification for said reasons.

Sec. 6—Appointment From Panel

If the parties have not appointed an Arbitrator and have not provided any other method of appointment, the Arbitrator shall be appointed in the following manner. Immediately after the filing of the Request or Submission, the AAA shall submit simultaneously to each party to the dispute an identical list of names of persons chosen from the Panel. Each party to the dispute shall have seven days from the mailing date in which to cross off any names to which he objects, number the remaining names indicating the order of his preference, and return the list to the AAA. If a party does not return the list within the time specified, all persons named therein shall be deemed acceptable. From among the persons who have been approved on both lists, and in accordance with the designated order of mutual preference, the AAA shall invite the acceptance of an Arbitrator to serve, and the Service shall appoint the Arbitrator. If the parties fail to agree upon any of the persons named, or if acceptable Arbitrators are unable to act, or if for any other reason the appointment cannot be made from the submitted lists, the FMCS shall have the power to make the appointment from other members of the Panel without the submission of any additional lists.

Sec. 7—Direct Appointment by Parties

If the agreement of the parties to a Submission names an Arbitrator or specifies a method of appointment of an Arbitrator, that designation or method shall be followed. The notice of appointment, with name and address of such Arbitrator, shall be filed with the AAA by the appointing party. Upon the request of any such appointing party, the AAA shall submit a list of members from the Panel from which the party may, if he so desires, make the appointment.

If the agreement specifies a period of time within which an Arbitrator shall be appointed, and any party fails to make such appointment within that period, the AAA shall make the appointment.

Sec. 8—Appointment of Neutral Arbitrator by Party Appointed Arbitrators

If the parties have appointed their Arbitrators or if either or both of them have been appointed as provided in Section 7, and have authorized such Arbitrators to appoint a neutral Arbitrator within a specified time and no appointment is made within such time or any agreed extension thereof, the FMCS shall appoint a neutral Arbitrator who shall act as Chairman.

If no period of time is specified for appointment of the neutral Arbitrator and the parties do not make the appointment within seven days from the date of the appointment of the last party-appointed Arbitrator, the FMCS shall appoint such neutral Arbitrator, who shall act as Chairman.

If the parties have agreed that their Arbitrators shall appoint the neutral Arbitrator from the Panel, the AAA shall furnish to the party-appointed Arbitrators, in the manner prescribed in Section 6, a list selected from the Panel, and the appointment of the neutral Arbitrator shall be made as prescribed in such Section.

Sec. 9—Number of Arbitrators

If the arbitration agreement does not specify the number of Arbitrators, the dispute shall be heard and determined by one Arbitrator, unless the AAA in its discretion, directs that a greater number of Arbitrators be appointed.

Sec. 10—Notice to Arbitrator of His or Her Appointment

Notice of the appointment of the neutral Arbitrator, whether appointed by the parties, by the AAA or FMCS shall be mailed to the Arbitrator, together with a copy of these Rules, and the signed acceptance of the Arbitrator

shall be filed with AAA prior to the opening of the first hearing.

Sec. 11—Disclosure and Challenge Procedure

A person appointed as neutral Arbitrator shall disclose to the AAA any circumstances likely to affect his or her impartiality, including any bias or any financial or personal interest in the result of the arbitration or any past or present relationship with the parties or their counsel. Upon receipt of such information from such Arbitrator or other source, the AAA shall communicate such information to the parties, and, if it deems it appropriate to do so, to the Arbitrator. Thereafter, the AAA shall make a determination whether the Arbitrator should be disqualified. The determination, however, may be appealed to FMCS. The decision of FMCS shall be conclusive.

Sec. 12—Vacancies

If any Arbitrator should resign, die, withdraw, refuse, be disqualified, or be unable to perform the duties of his office, AAA may, on proof satisfactory to it, declare the office vacant. Either party to a compulsory arbitration may request the FMCS to review a declaration of disqualification. Vacancies shall be filled in accordance with the applicable provision of these Rules and the matter shall be reheard unless the parties shall agree otherwise.

Sec. 13—Commencement of Proceeding

(a) Within 60 days from receipt by the parties of notice of the appointment of an arbitrator, the claimant shall file with AAA:

(1) If appropriate, a detailed statement as to the amount of compensation claimed, the method of computing said amount, and terms of payment, and a list of the test data deemed to be compensable, together with a detailed justification therefore.

(2) A certification as to: (i) Whether any court or tribunal has made determinations for payment by any other persons to claimant for use of the same test data and, if so, identification of the persons against whom the 3(c)(2)(B) determinations were issued and the application for registration for which the test data was used; and (ii) whether any other claims against any persons are pending in arbitration or in any court for use of the same test data and, if so, an identification of the persons against whom the claims are pending and the applications for registration on which the claims are being made.

(3) A detailed statement of the matter in dispute under 3(c)(2)(B).

(b) Within 60 days of service of the documents referred to in subsection (a) the respondent shall file a detailed statement of its position as to the amount of compensation due, method of computation, terms of payment, and list of data deemed to be compensable together with a detailed justification therefore or a detailed statement of the dispute under 3(c)(2)(5). To the extent any portion of the claimant's statement of its claim is not denied or challenged by respondent, it shall be deemed admitted.

(c) After respondent's statement is filed, the arbitrator may, upon request by a party, request the Director to supplement the file with additional information, including copies of relevant test data, information contained in a relevant registration file, a statement as to data requirements for registration, or any other information which the arbitrator deems to be relevant. Upon request by a party or other interested person, the arbitrator shall order protective measures to safeguard and restrict access to confidential business information.

Sec. 14—Filing and Service

(a) All documents or papers required or authorized to be filed, shall be filed with the AAA for transmittal to the arbitrator, except as otherwise herein provided, and shall bear the caption of the case and the docket number. At the same time that a party files documents or papers with the AAA, the party shall serve upon all other parties copies thereof, with a certificate of service on or attached to each document or paper, including those filed with the arbitrator. If a party is represented by counsel or other representative, service shall be made on such representative. Service may be made personally or by regular mail, and if made by mail shall be deemed complete on mailing. If filing is accomplished by mail addressed to the AAA, filing shall be deemed timely if the papers are postmarked on the due date.

(b) All orders, decisions, or other documents made or signed by the arbitrator shall be served immediately upon all parties.

Sec. 15—Time

(a) In computing any period of time prescribed or allowed by these rules, except as otherwise provided, the day of the act, event, or default from which the designated period of time begins to run shall not be included. Saturdays, Sundays and legal holidays shall be included in computing the time allowed for the filing of any document or paper, except that when such time expires on a Saturday, Sunday, or legal holiday, such period shall be extended to include the next following business day.

(b) When by these rules or by order of the arbitrators, an act is required or allowed to be done at or within a specified time, the arbitrator or AAA for cause shown may at any time in their discretion (1) with or without motion or notice, order the period enlarged if request therefore, which may be made *ex parte*, is made before the expiration of the period originally prescribed or as extended by a previous order, or (2) on motion made after the expiration of the specified period, permit the act to be done where the failure to act was the result of excusable neglect or other good cause.

Sec. 16—Communication with Arbitrator and Serving of Notices

(a) There shall be no communication between the parties and a neutral arbitrator other than at oral hearings. Any other oral or written communications from the parties to the arbitrator shall be directed to the AAA for transmittal to the arbitrator.

(b) Each party to an agreement which provides for arbitration under these Rules shall be deemed to have consented that any papers, notices or process necessary or proper for the initiation or continuation of an arbitration under these Rules and for any court action in connection therewith or for the entry of judgment on any award made thereunder may be served upon such party by mail addressed to such party or his attorney at his last known address or by personal service, within or without the State wherein the arbitration is to be held (whether such party be within or without the United States of America): *Provided*, That reasonable opportunity to be heard with regard thereto has been granted such party.

Sec. 17—Time of Award

The award shall be made promptly by the arbitrator and, unless otherwise agreed by the parties, or specified by law, no later than thirty days from the date of closing the hearings, or if oral hearings have been waived, from the date of transmitting the final statements and proofs to the arbitrator.

Sec. 18—Appearances

(a) Parties may appear in person or by counsel or other representative. Persons who appear as counsel or in a representative capacity must conform to the standards of ethical conduct

required of practitioners before the

hearing setting a time and place for such

(1) cannot be obtained by alternative

Sec. 25—Evidence

place determined by the arbitrator. The

required of practitioners before the courts of the United States.

(b) Any party to the proceeding who, after being duly notified and without good cause being shown fails to appear at a prehearing conference or fails to respond to correspondence, shall be deemed to have waived his rights with respect thereto and shall be subject to such orders or determinations with respect thereto as the arbitrator shall make. The failure of a party to appear at a hearing shall constitute a waiver of the right to present evidence at such hearing. Where either party fails to appear at a hearing, the arbitrator shall require the presentation by the present party of such evidence as he deems necessary to prepare a decision in conformity with the requirements of the act.

(c) Any person having a direct interest in the arbitration is entitled to attend hearings. The arbitrator shall otherwise have the power to require the exclusion of any witness, other than a party or other essential person, during the testimony of any other witness. It shall be discretionary with the arbitrator to determine the propriety of the attendance of any other person.

Sec. 19—Consolidation and Severance

(a) The AAA may with agreement of all parties consolidate any matters at issue in two or more proceedings docketed under these Rules of Procedure where there exist common parties, common questions of fact and law, and where such consolidation would expedite or simplify consideration of the issues. Consolidation may also be effected where separate claims for use of the same test data are made against different respondents. The arbitrator who presides over the consolidated proceeding shall be chosen in accordance with section 3, *supra*.

(b) The arbitrator may, by motion or *sua sponte*, for good cause shown order any proceeding severed with respect to some or all parties or issues.

Sec. 20—Protection of Confidential Information

(a) The arbitrator shall make such orders as required to protect the secrecy of confidential information or documents such as review *in camera*.

(b) The arbitrator shall impose a sanction against any party who violates an order issued under this section. Such sanction may include an award against the offending party.

Sec. 21—Scheduling of Hearing

(a) After consideration of the convenience of the parties, the AAA shall serve upon the parties a notice of hearing setting a time and place for such hearing.

(b) Except for good cause shown, no request for postponement of a hearing will be granted. Such request must be received in writing at least a day in advance of the time set for the hearing. In case of postponement, the hearing shall be rescheduled for a date as early as circumstances will permit.

Sec. 22—Optional Accelerated Procedure

(a) In claims involving $25,000 or less, the parties may elect, prior to commencement of hearing, to have the claim processed under an expedited procedure. If no specific amount of claim is stated, a case will be considered to fall within this rule if the amount which the claimant represents in writing that it could recover as a result of any arbitrator's decision favorable to it does not exceed $25,000. Upon such election, a case shall then be processed under this rule unless the respondent objects and shows good cause why the substantive nature of the dispute requires processing under the regular procedures. In cases proceeding under this rule, the parties have waived discovery and briefs.

(b) The arbitrator shall schedule the dispute for hearing within thirty (30) days of service of notice to the parties that the dispute will be governed by this accelerated procedure, unless either party requests that the case be submitted without hearing under Section 19.

(c) Written decision by the arbitrators in cases proceeding under this rule normally will be short and contain summary findings of fact and conclusions only. The arbitrator shall render such decisions promptly, but in no event later than thirty days after the dispute is ready for decision.

Sec. 23—Discovery

(a) Either party may move for permission to serve written interrogatories and requests for production of documents upon the opposing party. The arbitrator shall grant such motion to the extent that such interrogatories and requests are designed to produce relevant evidence and only upon such terms as the arbitrator in his or her discretion considers to be consistent with the objective of securing a just and inexpensive determination of the dispute without unnecessary delay.

(b) Upon motion by either party, the arbitrator may order a deposition upon a showing of good cause and a finding that the deposition is designed to secure relevant and probative evidence which (1) cannot be obtained by alternative means, or (2) may otherwise not be preserved for presentation at hearing.

(c) If a party fails to comply with an order issued under this section, the arbitrator shall draw inferences adverse to that party in connection with the facts sought to be discovered.

(d) At least thirty days prior to the hearing, each party shall make available to each other party the names of the expert and other witnesses it intends to call, together with a detailed summary of their expected testimony, and copies of all documents and exhibits which the party intends to introduce into evidence. Thereafter, witnesses, documents, or exhibits may be added and narrative summaries of expected testimony amended only upon motion by a party for good cause shown.

Sec. 24—Prehearing Conference

(a) When it appears that such procedure will expedite the preceeding, the arbitrator at any time prior to the commencement of the hearing may request the parties and their counsel or other representative to appear at a conference before him or her to consider:

(i) The possibility of settlement of the case;

(ii) The simplification of issues and stipulation of facts not indispute;

(iii) The necessity or desirability of amending or supplementing documents in the record;

(iv) The possibility of obtaining admissions or stipulations of fact and of documents which will avoid unnecessary proof;

(v) The limitation of the number of expert or other witnesses;

(vi) The setting of a time and place for the hearing, giving consideration to the convenience of all parties and to the public interest; and

(vii) Any other matters as may expedite the disposition of the proceeding.

(b) No transcript of any prehearing conference shall be made unless ordered upon motion of a party or *sua sponte* by the arbitrator. In the absence of a transcript, the arbitrator shall prepare and file a report of the action taken at such conference. Such report shall incorporate any written stipulations or agreements made by the parties, all rulings upon matters considered at such conference, and appropriate orders containing directions to the parties. Such report shall, as appropriate, direct the subsequent course of the proceeding, unless modified by the arbitrators on motion or *sua sponte*.

Sec. 25—Evidence

(a) The arbitrator shall admit all evidence which is relevant, competent, material, not privileged, and not unduly repetitious. The weight to be given evidence shall be determined by its reliability and probative value.

(b) Except as otherwise provided in these Rules of Procedure or by the arbitrator, witnesses shall be examined orally, under oath or affirmation. Parties shall have the right to cross-examine a witness who appears at the hearing provided that such cross-examination is not unduly repetitious.

(c) Except where the arbitrator finds it impracticable, an original and two copies of each exhibit shall be filed at the time the exhibit is offered into evidence and a copy shall be furnished to each party. A true copy of an exhibit may be substituted for the original.

(d) Official notice may be taken of any matter judicially noticed in the Federal courts. The parties shall be given adequate opportunity to show that such facts are erroneously noticed.

Sec. 26—Order of Proceedings

(a) Hearing shall be opened by the filing of the oath of the arbitrator, and by the recording of the place, time and date of the hearing, the presence of the arbitrator, parties, and counsel.

(b) The arbitrator may, at the beginning of the hearing, ask for statements clarifying the issues involved. The claimant shall then present his claim and proofs and his witnesses. The respondent shall then present his response and proofs and his witnesses. The arbitrator may in his descretion vary this procedure but he or she shall afford full and equal opportunity to all parties for the presentation of any material or relevant proofs.

Sec. 28—Burden of Presentation; Burden of Persuasion

The claimant shall have the burden of going forward to establish his entitlement to an amount of compensation that respondent should pay for use of the test data relied upon. Each matter of controversy shall be decided by the arbitrator upon a preponderance of the evidence.

Sec. 29—Stenographic Record

Any party may request a stenographic record by making arrangements for same through the AAA. If such transcript is agreed by the parties to be, or in appropriate cases determined by the arbitrator to be, the official record of the proceeding, it must be made available to the arbitrator, and to the other party for inspection, at a time and place determined by the arbitrator. The total cost of such a record shall be shared equally by those parties that order copies.

Sec. 30—Filing of Briefs, Proposed Findings of Fact and Conclusions of Law, and Proposed Order

Unless otherwise ordered by the arbitrator, each party may within thirty days after delivery of the transcript of a hearing to the arbitrator as provided in Section 29, file with AAA and serve upon all other parties a brief together with references to relevant exhibits and the record. Within Fifteen days thereafter each party may file a reply brief concerning matters contained in the opposing brief. Oral argument may be had at the discretion of the arbitrator.

Sec. 31—Closing of Hearings

The Arbitrator shall inquire of all parties whether they have any further proofs to offer or witnesses to be heard. Upon receiving negative replies, the arbitrator shall declare the hearings closed and the time and date shall be recorded. If briefs or other documents are to be filed, the hearings shall be declared closed as of the final date set by the arbitrator for filing with the AAA. The time limit within which the Arbitrator is required to make the award shall commence to run, in the absence of other agreement by the parties, upon the closing of the hearings.

Sec. 32—Arbitrators' Decision

(a) The arbitrator shall as soon as practicable after the filing of briefs evaluate the record and prepare and file a decision. The decision shall contain findings of fact and conclusions regarding all issues in dispute as well as reasons therefore.

(b) The decision shall contain a determination as to the compensation, if any respondent must pay to claimant, or other remedy as appropriate, the method of payment, and may fix such other terms and conditions as may be reasonable under the circumstances, including the furnishing of a bond or other guarantee of payment by the respondent to the claimant.

Sec. 33—Reopening of Hearings

(a) The hearings may be reopened by the arbitrator on his or her own motion, or upon application of a party at any time before the award is made. If the reopening of the hearings would prevent the making of the award within the specific time agreed upon by the parties in the contract out of which the controversy has arisen, the matter may not be reopened, unless the parties agree upon the extension of such time limit. When no specific date is fixed, the arbitrator may reopen the hearings, and the arbitrator shall have thirty days from the closing of the reopened hearings within which to make an award.

(b) A motion to reopen a hearing to take further evidence, to rehear or reargue any matter related to such proceeding, or to reconsider the arbitrator's decision, must be made by motion in writing to the arbitrator in accordance with these Rules of Procedure. Every such motion must state the specific grounds upon which relief is sought.

(c) A motion to reopen a hearing for the purpose of taking further evidence may be filed at any time prior to the issuance of the arbitrator's decision. Such motion shall state briefly the nature and purpose of the evidence to be adduced, shall show that such evidence is not cumulative, and shall set forth a good reason why such evidence was not adduced at a hearing.

(d) Motions to modify the arbitrator's decision shall be filed within 30 days after the date of service of the decision. Such motion must state specifically one of the following grounds for modification:

1. There was a miscalculation of figures or a mistake in the description of any person, thing or property referred to in the award; or

2. The arbitrators have awarded upon a matter not submitted to them and the award may be corrected without affecting the merits of the decision upon the issues submitted; or

3. The award is imperfect in a matter of form, not affecting the merits of the controversy.

Sec. 34—Award Upon Settlement

If the parties settle their dispute during the course of the arbitration, the arbitrator, upon their request, may set forth the terms of the agreed settlement in an award.

Sec. 35—Delivery of Award to Parties

Parties shall accept as legal delivery of the award the placing of the award or a true copy thereof in the mail by the AAA, addressed to such party at his last known address or to his attorney, or personal service of the award, or the filing of the award in any manner which may be prescribed by law.

Sec. 36—Release of Documents for Judicial Proceedings

The AAA shall, upon the written request of a party, furnish to such party, at his or her expense, certified facsimiles of any papers in the AAA's possession that may be required in

judicial proceedings relating to the

Sec. 42—Deposits

Refund Schedule—If the AAA is

Tuesday

judicial proceedings relating to the arbitration.

Sec. 37—Application to Court

(a) No judicial proceedings by a party relating to the subject matter of the arbitration shall be deemed a waiver of the party's right to arbitrate.

(b) Neither the AAA nor FMCS is a necessary party in judicial proceedings relating to the arbitration.

(c) Parties to these Rules shall be deemed to have consented that judgment upon the arbitration award may be entered in any Federal or State Court having jurisdiction thereof.

Sec. 38—Administrative Fees

As a nonprofit organization, the AAA shall prescribe an administrative fee schedule and a refund schedule to compensate it for the cost of providing administrative services. The schedule in effect at the time of filing or the time of refund shall be applicable.

The administrative fees shall be advanced by the initiating party or parties, subject to final appointment by the arbitrator in his award.

When a matter is withdrawn or settled, the refund shall be made in accordance with the refund schedule.

The AAA, in the event of extreme hardship on the part of any party, may defer or reduce the administrative fee.

Sec. 39—Fee When Oral Hearings Are Waived

Where all oral hearings are waived the Administrative Fee Schedule shall apply.

Sec. 40—Expenses

The expenses of witnesses for either side shall be paid by the party producing such witnesses.

The cost of the stenographic record, if any is made, and all transcripts thereof, shall be prorated equally among all parties ordering copies unless they shall otherwise agree and shall be paid for by the responsible parties directly to the reporting agency.

All other expenses of the arbitration, including required traveling and other expenses of the arbitrator and of AAA representatives, and the expenses of any witness or the cost of any proofs produced at the direct request of the arbitrator, shall be borne equally by the parties.

Sec. 41—Arbitrator's Fee

Any arrangement for the compensation of a neutral arbitrator shall be made through the AAA and not directly by him or her with the parties. Where parties cannot agree, AAA shall fix reasonable compensation.

Sec. 42—Deposits

The AAA may require the parties to deposit in advance such sums of money as it deems necessary to defray the expense of the arbitration, including the arbitrator's fee if any, and shall render an accounting to the parties and return any unexpened balance.

Sec. 43—Interpretation and Application of Rules

The arbitrator shall interpret and apply these Rules insofar as they relate to his or her powers and duties. When there is more than one arbitrator and a difference arises among them concerning the meaning or application of any such Rules, it shall be decided by a majority vote. If that is unobtainable, either an arbitrator or a party may refer the question to the AAA for decision. All other Rules shall be interpreted and applied by the AAA. Either party may request that FMCS review any decision of AAA on interpretation or application of these rules.

Administrative Fee Schedule

The administrative fee of the AAA is based upon the amount of each claim and counterclaim as disclosed when the claim and counterclaim are filed, and is due and payable at the time of filing.

Amount of claim	Fee
Up to $25,000	$500.
$25,000 to $100,000	$600, plus 1% of excess over $25,000.
$100,000 to $200,000	$1350, plus ½% of excess over $100,000.
$200,000 to $5,000,000	$1850, plus ⅛% of excess over $200,000.

Where the claim or counter claim exceeds $5 million, an appropriate fee will be determined by the AAA.

When no amount can be stated at the time of filing, the administrative fee is $500, subject to adjustment in accordance with the above schedule as soon as an amount can be disclosed.

If there are more than two parties represented in the arbitration, an additional 10% of the initiating fee will be due for each additional represented party.

Other Service Charges—$50.00 payable by a party causing an adjournment of any scheduled hearing;

$100 payable by a party causing a second or additional adjournment of any scheduled hearing.

$25.00 payable by each party for each hearing after the first hearing which is either clerked by the AAA or held in a hearing room provided by the AAA.

Refund Schedule—If the AAA is notified that a case has been settled or withdrawn before a list of Arbitrators has been sent out, all the fees in excess of $500 will be refunded.

If the AAA is notified that a case has been settled or withdrawn thereafter but before the due date for the return of the first list, two-thirds of the fee in excess of $500.00 will be refunded.

If the AAA is notified that a case is settled or withdrawn thereafter but at least 48 hours before the date and time set for the first hearing, one-half of the fee in excess of $500 will be refunded.

Part VIII

Nuclear Regulatory Commission

Emergency Planning; Final Regulations

V 45 AG 19 80 UMI

V 45 A G 1 9 8 0 UMI

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 50 and 70

Emergency Planning

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission is upgrading its emergency planning regulations in order to assure that adequate protective measures can and will be taken in the event of a radiological emergency. Nuclear power plants and certain other licensed facilities are required to submit their emergency plans, together with the emergency response plans of State and local governments, to the Commission. The Commission and the Federal Energy Management Agency will review the plans for adequacy. The amendment also extends emergency planning considerations to "Emergency Planning Zones", and makes additional clarifications.

EFFECTIVE DATE: November 3, 1980.

Note.—The Nuclear Regulatory Commission has submitted this rule to the Comptroller General for review of the reporting requirements in the rule, pursuant to the Federal Reports Act, as amended (44 U.S.C. 3512). The date on which the reporting requirements of the rule become effective includes a 45-day period, which the statute allows for Comptroller General review (44 U.S.C. 3512(c)(2)).

FOR FURTHER INFORMATION CONTACT: Mr. Michael T. Jamgochian, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (telephone: 301–443–5966).

SUPPLEMENTARY INFORMATION: On September 19, 1979 and on December 19, 1979, the Commission published for public comment (44 FR 54308 and 44 FR 75167) proposed amendments to its emergency planning regulations for production and utilization facilities. Extensive comments were received, all of which were evaluated and considered in developing the final rule. The comments received and the staff's evaluation is contained in NUREG–0684. In addition, the NRC conducted four Regional Workshops to solicit comments; these comments are available in NUREG/CP–0011 (April 1980).[1]

The final regulation contains the following elements:

1. In order to continue operations or to receive an operating license an applicant/licensee will be required to submit its emergency plans, as well as State and local governmental emergency response plans, to NRC. The NRC will then make a finding as to whether the state of onsite and offsite emergency preparedness provides reasonable assurance that adequate protective measures can and will be taken in the event of a radiological emergency. The NRC will base its finding on a review of the Federal Emergency Management Agency (FEMA) findings and determinations as to whether State and local emergency plans are adequate and capable of being implemented and on the NRC assessment as to whether the licensee's/applicant's emergency plans are adequate and capable of being implemented. These issues may be raised in NRC operating license hearings, but a FEMA finding will constitute a rebuttable presumption on the question of adequacy,

2. Emergency planning considerations will be extended to "Emergency Planning Zones,"

3. Detailed emergency plan implementing proceudres of licensees/applicants will be required to be submitted to NRC for review, and

4. Requirements in 10 CFR Part 50, Appendix E are clarified and upgraded.

Background

In June 1979, the Nuclear Regulatory Commission began a formal reconsideration of the role of emergency planning in ensuring the continued protection of the public health and safety in areas around nuclear power facilities. The Commission began this reconsideration in recognition of the need for more effective emergency planning and in response to the TMI accident and to reports issued by responsible offices of government and the NRC's Congressional oversight committees.

On December 19, 1979, the Nuclear Regulatory Commission published in the **Federal Register** (44 FR 75167) proposed amendments to 10 CFR Part 50 and Appendix E to Part 50 of its regulations. Publication of these final rule changes in the **Federal Register** is not only related to the December 19, 1979 proposed rule changes but also incorporates the proposed changes to 10 CFR Parts 50 and 70 (44 FR 54308) published on September 19, 1979. Interested persons were invited to submit written comments/suggestions in connection with the proposed amendments within 60 days after publication in the **Federal Register**. During this comment period (in January 1980) the Commission conducted four regional workshops with State and local officials, utility representatives, and the public to discuss the feasibility of the various portions of the proposed amendments, their impact, and the procedures proposed for complying with their provisions. The NRC used the information from these workshops along with the public comment letters to develop the final rule (more than 200 comment letters and the points made in two petitions for rulemaking were also considered).

In addition to the above, on June 25, 1980, the Commission was briefed by three panels of public commenters on the rule, one each comprised of representatives from the industry, State and local governments, and public interest groups. Each panel raised important concerns regarding the final rule. On July 3, 1980, the Commission was briefed by its staff in response to these panels, including several modifications to the proposed final rules. Finally, on July 23, 1980, at the final Commission consideration of these rules, the Commission was briefed by the General Counsel on the substance of conversations with Congressional staff members who were involved with passage of the NRC Authorization Act for fiscal year 1980, Pub. L. No. 96–295. The General Counsel advised the Commission that the NRC final rules were consistent with that Act. The Commission has relied on all of the above information in its consideration of these final rules. In addition, the Commission directs that the transcripts of these meetings shall be part of the administrative record in this rulemaking. However, the transcripts have not been reviewed for accuracy and, therefore, are only an informal record of the matters discussed.

After evaluating all public comment letters received and all the information obtained during the workshops as well as additional reports such as the Presidential Commission and the NRC Special Inquiry Group Reports, the Commission has decided to publish the final rule changes described below.

Description of Final Rule Changes

The Commission has decided to adopt a version of the proposed rules similar to alternative A described in Sections 50.47 and 50.54 in the **Federal Register** Notice dated December 19, 1979 (44 FR 75167), as modified in light of comments. These rules are consistent with the approach outlined by FEMA and NRC in a Memorandum of Understanding (45 FR 5847, January 24, 1980). No new operating license will be granted unless the NRC can make a favorable finding that the integration of onsite and offsite emergency planning provides reasonable assurance that adequate protective measures can and will be taken in the event of a radiological emergency. In the case of an operating reactor, if it is determined that there are such deficiencies that a favorable NRC finding is not warranted and if the deficiencies are not corrected within 4 months of that determination, the Commission will determine expeditiously whether the reactor should be shut down or whether some other enforcement action is appropriate, pursuant to procedures provided for in 10 CFR 2.200–2.206. In any case where the Commission believes that the public health, safety, or interest so requires, the plant will be required to shut down immediately (10 CFR 2.202(f), see 5 U.S.C. 558(c)).

The standards that the NRC will use in making its determinations under these rules are set forth in the final regulation. Wherever possible, these standards may blend with other emergency planning procedures for nonnuclear emergencies presently in existence. The standards are a restatement of basic NRC and now joint NRC–FEMA guidance to licensees and to State and local governments. See NUREG–0654; FEMA–REP–1, "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants for Interim Use and Comment," (January 1980). In deciding whether to permit reactor operation in the face of some deficiencies, the Commission will examine among other factors whether the deficiencies, are significant for the reactor in question, whether adequate interim compensatory actions have been or will be taken promptly, or whether other compelling reasons exist for reactor operation. In determining the sufficiency of "adequate interim compensatory actions" under this rule, the Commission will examine State plans, local plans, and licensee plans to determine whether features of one plan can compensate for deficiencies in another plan so that the level of protection for the public health and safety is adequate. This interpretation is consistent with the provisions of the NRC Authorization Act for fiscal year 1980, Pub. L. 96–295.

The regulation contains the following three major changes from past practices:

1. In order to continue operations or to recieve an operating license, an applicant/licensee will be required to submit its emergency plans, as well as State and local governmental emergency response plans, to NRC. The NRC will then make a finding as to whether the state of onsite and offsite emergency preparedness provides reasonable assurance that adequate protective measures can and will be taken in the event of a radiological emergency.

The NRC will base its finding on a review of the FEMA findings and determinations as to whether State and local emergency plans are adequate and capable of being implemented and on the NRC assessment as to whether the applicant's/licensee's emergency plans are adequate and capable of being implemented. In any NRC licensing proceeding, a FEMA finding will consitute a rebuttable presumption on the question of adequacy. Specifically:

a. An operating license will not be issued unless a favorable NRC overall finding can be made.

b. After April 1, 1981, an operating plant may be required to shut down if it is determined that there are deficiencies such that a favorable NRC finding cannot be made or is no longer warranted and the deficiencies are not corrected within 4 months of that determination.

2. Emergency planning considerations must be extended to "Emergency Planning Zones," and

3. Detailed emergency planning implementing procedures of both licensees and applicants for operating licenses must be submitted to NRC for review.

In addition, the Commission is revising 10 CFR Part 50, Appendix E, "Emergency Plans for Production and Utilization Facilities," in order to clarify, expand, and upgrade the Commission's emergency planning regulations. Sections of Appendix E that are expanded include:

1. Specification of "Emergency Action Levels" (Sections IV.B and C)

2. Dissemination to the public of basic emergency planning information (Section IV.D)

3. Provisions for the State and local governmental authorities to have a capability for rapid notification of the public during a serious reactor emergency, with a design objective of completing the initial notification within 15 minutes after notification by the licensee (Section IV.D)

4. A licensee onsite technical support center and a licensee near site emergency operations facility (Section IV.E)

5. Provisions for redundant communications systems (Section IV.E)

6. Requirement for specialized training (Section IV.F)

7. Provisions for up-to-date plan maintenance (Section IV.G)

Applicants for a construction permit would be required to submit more information as required in the new Section II of Appendix E.

Rationale for the Final Rules

The Commission's final rules are based on the significance of adequate emergency planning and preparedness to ensure adequate protection of the public health and safety. It is clear, based on the various official reports described in the proposed rules (44 FR 75169) and the public record compiled in this rulemaking, that onsite and offsite emergency preparedness as well as proper siting and engineered design features are needed to protect the health and safety of the public. As the Commission reacted to the accident at Three Mile Island, it became clear that the protection provided by siting and engineered design features must be bolstered by the ability to take protective measures during the course of an accident. The accident also showed clearly that onsite conditions and actions, even if they do not cause significant offsite radiological consequences, will affect the way the various State and local entities react to protect the public from any dangers associated with the accident. In order to discharge effectively its statutory responsibilities, the Commission must know that proper means and procedures will be in place to assess the course of an accident and its potential severity, that NRC and other appropriate authorities and the public will be notified promptly, and that adequate protective actions in response to actual or anticipated conditions can and will be taken.

The Commission's organic statutes provide it with a unique degree of discretion in the execution of agency functions. *Siegel* v. *AEC*, 400 F.2d 778, 783 (D.C. Cir. 1968), see *Westinghouse Electric Corp.* v. *NRC*, 598 F.2d 759, 771 & n.47 (3d Cir. 1979). "Both the Atomic Energy Act of 1954 and the Energy Reorganization Act of 1974 confer broad regulatory functions on the Commission and specifically authorize it to promulgate rules and regulations it deems necessary to fulfill its responsibilities under the Acts, 42 U.S.C. § 2201(p)." *Public Service Co. of New Hampshire* v. *NRC*, 582 F.2d 77, 82 (1st Cir.), *cert. denied*, 439 U.S. 1046 (1978). *See* 42 U.S.C. 2133(a). As the Supreme Court stated almost 20 years ago, the Atomic Energy Act "clearly contemplates that the Commission shall

[1] Copies of NUREG documents are available at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555. Copies may be purchased from the Government Printing Office. Information on current prices may be obtained by writing the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Publications Sales Manager.

by regulation set forth what the public safety requirements are as a prerequisite to the issuance of any license or permit under the Act," *Power Reactor Development Co.* v. *International Union of Electrical Radio Machine Workers*, 367 U.S. 396, 404 (1961). Finally, it is also clear that "Congress, when it enacted [42 U.S.C. 2236] . . ., must have envisioned that licensing standards, especially in the areas of health and safety regulation, would vary over time as more was learned about the hazards of generating nuclear energy. Insofar as those standards became more demanding, Congress surely would have wanted the new standards, if the Commission deemed it appropriate, to apply to those nuclear facilities already licensed," *Ft. Pierce Utilities Authority* v. *United States*, 606 F.2d 986, 996 (D.C. Cir. 1979).

In response to and guided by the various reports and public comments, as well as its own determination on the significance of emergency preparedness, the Commission has therefore concluded that adequate emergency preparedness is an essential aspect in the protection of the public health and safety. The Commission recognizes there is a possibility that the operation of some reactors may be affected by this rule through inaction of State and local governments or an inability to comply with these rules. The Commission believes that the potential restriction of plant operation by State and local officials is not significantly different in kind or effect from the means already available under existing law to prohibit reactor operation, such as zoning and land-use laws, certification of public convenience and necessity, State financial and rate considerations (10 CFR 50.33(f)), and Federal environmental laws. The Commission notes, however, that such considerations generally relate to a one-time decision on siting, whereas this rule requires a periodic renewal of State and local commitments to emergency preparedness. Relative to applying this rule in actual practice, however, the Commission need not shut down a facility until all factors have been thoroughly examined. The Commission believes, based on the record created by the public workshops, that State and local officials as partners in this undertaking will endeavor to provide fully for public protection.

Summary of Comments on Major Issues

The Commission appreciates the extensive public comments on this important rule. In addition to the record of the workshops, the NRC has received over 200 comment letters on the proposed rule changes. The following major issues have been raised in the comments received.

Issue A: NRC Review and Concurrence in State and Local Radiological Plans

1. FEMA is best suited to assess the adequacy of State and local radiological emergency planning and preparedness and report any adverse findings to NRC for assessment of the licensing consequences of those findings.

2. The proposed rule fails to provide objective standards for NRC concurrence, reconcurrence, and withdrawal of concurrence.

3. In the absence of additional statutory authority, the proposed rule frustrates Congressional intent to preempt State and local government veto power over nuclear power plant operation.

4. Procedures and standards for adjudication of emergency planning disputes are not adequately specified in the proposed rule.

Issue B: Emergency Planning Zones (EPZs)

1. Regulatory basis for imposition of the Emergency Planning Zone concept should be expressly stated in the regulation.

2. Provisions regarding the plume exposure pathway EPZ should provide a maximum planning distance of 10 miles.

3. References to NUREG–0396 should be deleted to avoid disputes over its meaning in licensing proceedings.

Issue C: Alternative A and B (in 50.47 and 50.54)

1. Neither alternative is necessary because the Commission has sufficient authority to order a plant shut down for safety reasons and should be prepared to exercise that authority only on a case-by-case basis and when a particular situation warrants such action.

2. No case has been made by the Commission for the need for automatic shutdown, as would be required in alternative B, and certainly no other NRC regulations exist that would require such action based on a concept as amorphous as "concurrence in State and local emergency plans."

3. The idea that the Commission might grant an exemption to the rules that would permit continued operation (under alternative B) has little significance, primarily because 10 CFR Part 50.12(a) already permits the granting of exemptions.

4. The process and procedures for obtaining such exemptions are not defined, nor is there any policy indication that would indicate the Commission's disposition to grant such exemptions.

5. The Commission, in developing this aspect of the proposed rule, must consider its own history. There was time when regulation was characterized by the leaders of the agency by simple and very appropriate expressions. The process was to be "effective and efficient." The application of regulatory authority was to be "firm, but fair." Regardless of the outcome of the "concurrence" issue, the Commission must appreciate that alternative B is not fair. It is not effective regulation.

Issue D: Public Education

Only information required to inform the public about what to do in the event of a radiological emergency need be disseminated. There should be flexibility, in any particular case, as to who will be ultimately responsible for disseminating such information.

Issue E: Legal Authority

1. A few commenters felt that NRC had no authority to promulgate a rule as the one proposed.

2. Other comments were the nature that NRC has statutory authority only inside the limits of the plant site.

3. Some commenters suggested that NRC and FEMA should seek additional legislation to compel State and local governments to have emergency plans, if that is what is necessary.

Issue F: Schedule for Implementation

The schedule for implementing the proposed rule was considered to be unrealistic and in some cases in conflict with various State schedules already in existence. A sampling of the comments on the implementation schedule follows:

1. The 180 days in the schedule is an insufficient amount of time to accomplish tasks of this magnitude; the Federal government does not work with such speed. States are bureaucracies also; there is no reason to assume they can work faster. It took years of working with States to get the plans that are presently concurred in. It is just insufficient time for new concurrences and review. Also, to get a job done within that time frame means a hurried job, rather than an acceptable and meaningful plan.

2. The time provided is inadequate for States to acquire the hardware needed. States must go out for competitive bids just as the Federal government does. Between processing and accepting a bid and actual delivery of equipment, it may take a year to get the hardware. The State budgets years ahead; therefore, if a State or local government needs more money, it may have to go to the legislature. This is a time-consuming public process that may not fit the Federal schedule.

3. NRC and FEMA could not review 70 or more plans and provide concurrence by January 1, 1981. The Federal government moves slowly. Commenters did not think that NRC and FEMA can review all the plans within the time frame scheduled. If the Federal government cannot meet its schedule, why or how should the States?

4. Funding could not be appropriated by State and local governments before the deadline. It was suggested that the Commission use H. Rept. #96–413, "Emergency Planning U.S. Nuclear Power Plants: Nuclear Regulatory Commission Oversight," for the time frame rather than that in the proposed rule or use a sliding-scale time frame since States are at various stages of completing their emergency plans.

Issue G: Impact of Proposed Rule

1. The proposed regulations were considered by some commenters as unfair to utilities because it was felt they place the utilities in the political and financial role that FEMA should be assuming. NRC is seen as in effect giving State and local governments veto over the operation of nuclear plants. It was questioned whether this was an intent of the rule. In addition, it was felt that utilities, their customers, and their shareholders should not be penalized by a shutdown (with a resulting financial burden) because of alleged deficiencies or lack of cooperation by State and local officials.

2. It was suggested that NRC's Office of Inspection and Enforcement conduct the reviews of the State and local governmental emergency response plans in order to ensure prompt, effective, and consistent implementation of the proposed regulations.

3. One commenter noted that the public should be made aware of the issue of intermediate and long-term impacts of plant shutdowns. Specifically, people should be informed of the possibility of "brownouts," cost increases to the consumer due to securing alternative energy sources, and the health and safety factors associated with those alternative sources.

Issue H: Public Notification

1. Ultimate responsibility for public notification of a radiological emergency must be placed on State and local government.

2. The "fifteen minute" public notification rule is without scientific justification, fails to differentiate between areas close in and further away from the site, and ignores the technical difficulties associated with such a requirement.

Issue I: Emergency Action Levels

Applicants, in cooperation with State and local governmental authorities, should be permitted the necessary flexibility to develop emergency action level criteria appropriate for the facility in question, subject to NRC approval. Inflexible NRC emergency action level standards are not necessary.

Issue J: Training

1. Mandatory provision for training local service personnel and local news media persons is outside of NRC's jurisdiction and is not necessary to protect the public health and safety.

2. Public participation in drills or critiques thereof should not be required.

3. The provision regarding formal critiques should be clarified to mean the licensee is responsible for developing and conducting such critiques.

4. Definitive performance criteria for evaluation of drills should be developed by the licensee, subject to NRC approval.

Issue K: Implementing Procedures

NRC review of implementing procedures is only necessary to apprise the NRC staff of the details of the plans for use by the NRC during the course of an actual emergency.

Issue L: Funding

1. Nuclear facilities, although located in one governmental tax jurisdiction and taxed by that jurisdiction, affect other jurisdictions that must bear immediate and long-term planning costs without having access to taxes from the facility.

2. As the radius of planning requirements becomes greater, few facilities are the concern of a single county. The planning radius often encompasses county lines, State lines, and in some instances, international boundaries.

3. As new regulations are generated to oversee the nuclear industry and old ones expanded, there is an immediate need to address fixed nuclear facility planning at all levels of government, beginning at the lowest and going to the highest. All levels of government need access to immediate additional funds to upgrade their response capability.

4. It is well understood that the consumer ultimately must pay the price for planning, regardless of the level in government at which costs are incurred. It becomes a matter of how the consumer will be taxed, who will administer the tax receipts, and what is the most effective manner in which to address the problem.

5. The basis for effective offsite response capabilities is a sound emergency preparedness program. Federal support (funding and technical assistance) for the development of State and local offsite capabilities should be incorporated into FEMA's preparedness program for all emergencies.

Issue M: General

The States support Federal oversight and guidance in the development of offsite response capabilities. However, many States feel the confusion and uncertainty in planning requirements following Three Mile Island is not a proper environment in which to develop effective capabilities nor does it serve the best interests of their citizens. The development of effective nuclear facility incident response capabilities will require close coordination and cooperation among responsible Federal agencies, State government, and the nuclear industry. An orderly and comprehensive approach to this effort makes it necessary that onsite responsibilities be clearly associated with NRC and the nuclear industry while deferring offsite responsibilities to State government with appropriate FEMA oversight and assistance.

In addition to these comments, two petitions for rulemaking were filed in reference to the proposed rule. These were treated as public comments rather than petitions and were considered in developing the final rule.

The Commission has placed the planning objectives from NUREG–0654; FEMA–REP–1, "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants for Interim Use and Comment," January 1980, into the final regulations. Comments received concerning NUREG–0654 were available in developing the final regulation. The Commission notes that the planning objectives in NUREG–0654 were largely drawn from NUREG–75/111, "Guide and Checklist for Development and Evaluation of State and Local Government Radiological Emergency Response Plans in Support of Fixed Nuclear Facilities," (December 1, 1974) and Supplement 1 thereto dated March 15, 1977, which have been in use for some time.

The approximately 60 public comment letters received on NUREG–0654 were not critical of the proposed planning objectives. The Commission also notes that at the May 1, 1980 ACRS meeting, the Atomic Industrial Forum representative encouraged the use of the planning objectives from NUREG–0654 in the final regulations in order to

reduce ambiguity and provide specificity to the final regulation.

Based on the above, the Commission has decided to modify the proposed rule changes in the areas discussed in paragraphs I through X below.

I. FEMA/NRC Relationship

In issuing this rule, NRC recognizes the significant responsibilities assigned to FEMA, by Executive Order 12148 on July 15, 1979, to coordinate the emergency planning functions of executive agencies. In view of FEMA's new role, NRC agreed on September 11, 1979, that FEMA should henceforth chair the Federal Interagency Central Coordinating Committee for Radiological Emergency Response Planning and Preparedness (FICCC). On December 7, 1979, the President issued a directive assigning FEMA lead responsibility for offsite emergency preparedness around nuclear facilities. The NRC and FEMA immediately initiated negotiations for a Memorandum of Understanding (MOU) that lays out the agencies' roles and provides for a smooth transfer of responsibilities. It is recognized that the MOU, which became effective January 14, 1980, supersedes some aspects of previous agreements. Specifically, the MOU identifies FEMA responsibilities with respect to emergency preparedness as they relate to NRC as the following:

1. To make findings and determinations as to whether State and local emergency plans are adequate.

2. To verify that State and local emergency plans are capable of being implemented (e.g., adequacy and maintenance of procedures, training, resources, staffing levels and qualification, and equipment).

3. To assume responsibility for emergency preparedness training of State and local officials.

4. To develop and issue an updated series of interagency assignments that delineate respective agency capabilities and responsibilities and define procedures for coordination and direction for emergency planning and response.

Specifically, the NRC responsibilities for emergency preparedness identified in the MOU are:

1. To assess licensee emergency plans for adequacy.

2. To verify that licensee emergency plans are adequately implemented (e.g., adequacy and maintenance of procedures, training, resources, staffing levels and qualifications, and equipment).

3. To review the FEMA findings and determinations on the adequacy and capability of implementation of State and local plans.

4. To make decisions with regard to the overall state of emergency preparedness (i.e., integration of the licensee's emergency preparedness as determined by the NRC and of the State/local governments as determined by FEMA and reviewed by NRC) and issuance of operating licenses or shutdown of operating reactors.

In addition, FEMA has prepared a proposed rule regarding "Review and Approval of State Radiological Emergency Plans and Preparedness" (44 FR 42342, dated June 24, 1980). According to the proposed FEMA rule, FEMA will approve State and local emergency plans and preparedness, where appropriate, based upon its findings and determinations with respect to the adequacy of State and local plans and the capabilities of State and local governments to effectively implement these plans and preparedness measures. These findings and determinations will be provided to the NRC for use in its licensing process.

II. Emergency Planning Zone Concept

The Commission notes that the regulatory basis for adoption of the Emergency Planning Zone (EPZ) concept is the Commission's decision to have a conservative emergency planning policy in addition to the conservatism inherent in the defense-in-depth philosophy. This policy was endorsed by the Commission in a policy statement published on October 23, 1979 (44 FR 61123). At that time the Commission stated that two Emergency Planning Zones (EPZs) should be established around each light-water nuclear power plant. The EPZ for airborne exposure has a radius of about 10 miles; the EPZ for contaminated food and water has a radius of about 50 miles. Predetermined protective action plans are needed for the EPZs. The exact size and shape of each EPZ will be decided by emergency planning officials after they consider the specific conditions at each site. These distances are considered large enough to provide a response base that would support activity outside the planning zone should this ever be needed.

III. Position on Planning Basis for Small Light-Water Reactors and Ft. St. Vrain

The Commission has concluded that the operators of small light-water-cooled power reactors (less than 250 MWt) and the Ft. St. Vrain gas-cooled reactor may establish smaller planning zones which will be evaluated on a case-by-case basis. This conclusion is based on the lower potential hazard from these facilities (lower radionuclide inventory and longer times to release significant amounts of activity in many scenarios). Guidance regarding the radionuclides to be considered in planning is set forth in NUREG–0396; EPA 520/1–78–016, "Planning Basis for the Development of State and Local Government Radiological Emergency Response Plans in Support of Light-Water Nuclear Power Plants," December 1978.

IV. Rationale for Alternatives Chosen

In a few areas of the proposed rule, the Commission identified two alternatives that it was considering. Many public comments were received on these alternatives; based on due consideration of all comments received as well as the discussions presented during the workshops, the Commission has determined which of each pair of alternatives to retain in the final rule.

In Sections 50.47 and 50.54 (s) and (t), the alternatives dealth with conditioning the issuance of an operating license or continued operation of a nuclear power plant on the existence of State and local government emergency response plans concurred in by NRC.* The basic difference between alternatives A and B in these sections was that, under alternative A, the proposed rule would require a determination by NRC on issuing a license or permitting continued operation of plants in those cases where relevant State and local emergency response plans had not received NRC concurrence. Denial of a license or shutdown of a reactor would not follow automatically in every case. Under alternative B, shutdown of the reactor would be required automatically if the appropriate State and local emergency response plans had not received NRC concurrence within the prescribed time periods unless an exemption is granted.

After consideration of the public record and on the recommendation of its staff, the Commission has chosen a text for Sections 50.47 and 50.54 (s) and (t) that is similar to, but less restrictive than, alternative A in the proposed rule. Rather than providing for the shutdown of the reactor as the only enforcement action and prescribing specific preconditions for the shutdown remedy, the final rule makes clear that for emergency planning rules, like all other rules, reactor shutdown as outlined in the rule is but one of a number of possible enforcement actions and many factors should be considered in determining whether it is an appropriate action in a given case. This Commission choice is consistent with most of the comments received from State and local governments and is consistent with the provisions of Section 109 of the NRC fiscal year 1980 Authorization Act. Alternative B was seen by some of the commenters as potentially causing unnecessarily harsh economic and social consequences to State and local governments, utilities, and the public.

State and local governments that are directly involved in implementing planning objectives of the rule strongly favor alternative A since it provides for a cooperative effort with State and local governments to reflect their concerns and desires in these rules. This choice is responsive to that effort. In addition, the industry strongly supported alternative A as being the more workable of the two alternatives.

In Appendix E, Sections II.C and III, alternative A would require an applicant/licensee to outline ". . . corrective measures to prevent damage to onsite and offsite property," as well as protective measures for the public. Alternative B addresses only protective measures for the public health and safety. The Commission has chosen alternative B because public health and safety should take clear precedence over actions to protect property. Measures to protect property can be taken on an ad hoc basis as resources become available after an accident.

In Appendix E, under Training, alternative A would provide for a joint licensee, Federal, State, and local government exercise every 3 years, whereas alternative B would provide for these exercises to be performed every 5 years at each site. The Commission has chosen alternative B because the Commission is satisfied that the provision that these exercises be performed every 5 years for each site will allow for an adequate level of preparedness among Federal emergency response agencies. In addition, under these regulations, each licensee is required to exercise annually with local governmental authorities. Furthermore, Federal emergency response agencies may have difficulty supporting exercises every 3 years for all of the nuclear facilities that would be required to comply with these rule changes.

V. Definition of Plan Approval Process

The term "concurrence" has been deleted from the proposed regulations and replaced with reference to the actual procedure and standards that NRC and FEMA have agreed upon and are implementing. According to the agreed upon procedure, FEMA will make a finding and determination as to the adequacy of State and local government emergency response plans. The NRC will determine the adequacy of the licensee emergency response plans. After these two determinations have been made, NRC will make a finding in the licensing process as to the overall and integrated state of preparedness.

It was pointed out to the Commission at the workshops and in public comment letters that the term "concurrence" was confusing and ambiguous. Also, there was a great deal of misunderstanding with the use of the term because, in the past, the obtaining of NRC "concurrence" in State emergency response plans was voluntary on behalf of the States and not a regulatory requirement in the licensing process. Previously too, "concurrence" was statewide rather than site-specific.

VI. Fifteen-Minute Notification

The requirement for the capability for notification of the public within 15 minutes after the State/local authorities have been notified by the licensee has been expanded and clarified. It also has been removed as a footnote and placed in the body of Appendix E. The implementation schedule for this requirement has been extended to July 1, 1981. This extension of time has been adopted because most State and local governments identified to the Commission the difficulty in procuring hardware, contracting for installation, and developing procedures for operating the systems used to implement this requirement.

The Commission is aware that various commenters, largely from the industry, have objected to the nature of the 15-minute notification requirement, indicating that it may be both arbitrary and unworkable.

Among the possible alternatives to this requirement are a longer notification time, a notification time that varies with distance from the facility, or no specified time. In determining what that criterion should be, a line must be drawn somewhere, and the Commission believes that providing as much time as practicable for the taking of protective action is in the interest of public health and safety. The Commission recognizes that this requirement may present a significant financial impact and that the technical basis for this requirement is not without dispute. Moreover, there may never be an accident requiring using the 15-minute notification capability. However, the essential rationale behind emergency planning is to provide additional assurance for the public protection even during such an unexpected event. The 15-minute notification capability requirement is wholly consistent with that rationale.

The Commission recognizes that no single accident scenario should form the basis for choice of notification capability requirements for offsite authorities and for the public. Emergency plans must be developed that will have the flexibility to ensure response to a wide spectrum of accidents. This wide spectrum of potential accidents also reflects on the appropriate use of the offsite notification capability. The use of this notification capability will range from immediate notification of the public (within 15 minutes) to listen to predesignated radio and television stations, to the more likely events where there is substantial time available for the State and local governmental officials to make a judgment whether or not to activate the public notification system.

Any accident involving severe fuel degradation or core melt that results in significant inventories of fission products in the containment would warrant immediate public notification and consideration, based on the particular circumstances, of appropriate protective action because of the potential for leakage of the containment building. In addition, the warning time available for the public to take action may be substantially less than the total time between the original initiating event and the time at which significant radioactive releases take place. Specification of particular times as design objectives for notification of offsite authorities and the public are a means of ensuring that a system will be in place with the capability to notify the public to seek further information by listening to predesignated radio or television stations. The Commission recognizes that not every individual would necessarily be reached by the actual operation of such a system under all conditions of system use. However, the Commission believes that provision of a general alerting system will significantly improve the capability for taking protective actions in the event of an emergency. The reduction of notification times from the several hours required for street-by-street notification to minutes will significantly increase the options available as protective actions under severe accident conditions. These actions could include staying indoors in the case of a release that has already occurred or a precautionary evacuation in the case of a potential release thought to be a few hours away. Accidents that do not result in core melt may also cause relatively quick releases for which protective actions, at least for the public in the immediate plant vicinity, are desirable.

* See Section V for a discussion concerning "concurrence."

Some comments received on the proposed rule advocated the use of a staged notification system with quick notification required only near the plant. The Commission believes that the capability for quick notification within the entire plume exposure emergency planning zone should be provided but recognizes that some planners may wish to have the option of selectively actuating part of the system during an actual response. Planners should carefully consider the impact of the added decisions that offsite authorities would need to make and the desirability of establishing an official communication link to all residents in the plume exposure emergency planning zone when determining whether to plan for a staged notification capability.

VII. Effective Date of Rules and Other Guidance

Prior to the publication of these amendments, two guidance documents were published for public comment and interim use. These are NUREG–0610, "Draft Emergency Action Level Guidelines for Nuclear Power Plants," (September 1979) and NUREG–0654/FEMA–REP–1, "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants for Interim Use and Comment," (January 1980). It is expected that versions of these documents, revised on the basis of public comments received, will be issued to assist in defining acceptable levels of preparedness to meet this final regulation. In the interim, these documents should continue to be used as guidance.

VIII. Hearing Procedures Used in Implementation of These Regulations

Should the NRC believe that the overall state of emergency preparedness at and around a licensed facility is such that there is some question whether a facility should be permitted to continue to operate, the Commission may issue an order to the licensee to show cause, pursuant to 10 CFR 2.202, why the plant should not be shut down. This issue may arise, for example, if NRC finds a significant deficiency in a licensee plan or in the overall state of emergency preparedness.

If the NRC decides to issue an order to show cause, it will provide the licensee the opportunity to demonstrate to the Commission's satisfaction, for example, that the alleged deficiencies are not significant for the reactor in question, whether adequate interim compensating actions have been or will be taken promptly, or whether other compelling reasons exist for reactor operation. Finally, pursuant to 10 CFR 2.202(f), the Commission may, in appropriate circumstances, make the order immediately effective, which could result in immediate plant shutdown subject to a later hearing.

IX. Funding

In view of the requirements in these rule changes regarding the actions to be taken in the event State and local government planning and preparedness are or become inadequate, a utility may have an incentive, based on its own self interest as well as its responsibility to provide power, to assist in providing manpower, items of equipment, or other resources that the State and local governments may need but are themselves unable to provide. The Commission believes that in view of the President's Statement of December 7, 1979, giving FEMA the lead role in offsite planning and preparedness, the question of whether the NRC should or could require a utility to contribute to the expenses incurred by State and local governments in upgrading and maintaining their emergency planning and preparedness (and if it is to be required, the mechanics for doing so) is beyond the scope of the present rule change. It should be noted, however, that any direct funding of State or local governments solely for emergency preparedness purposes by the Federal government would come through FEMA.

X. Exercises

On an annual basis, all commercial nuclear power facilities will be required by NRC to exercise their plans; these exercises should involve exercising the appropriate local government plans in support of these facilities. The State may choose to limit its participation in exercises at facilities other than the facility (site) chosen for the annual exercise(s) of the State plan.

Each State and appropriate local government shall annually conduct an exercise jointly with a commercial nuclear power facility. However, States with more than one facility (site) shall schedule exercises such that each individual facility (site) is exercised in conjunction with the State and appropriate local government plans not less than once every 3 years for sites with the plume exposure pathway EPZ partially or wholly within the State, and not less than once every 5 years for sites with the ingestion exposure pathway EPZ partially or wholly within the State. The State shall choose, on a rotational basis, the site(s) at which the required annual exercise(s) is to be conducted; priority shall be given to new facilities seeking an operating license from NRC that have not had an exercise involving the State plan at that facility site.

The Commission has determined under the criteria in 10 CFR Part 51 that an environmental impact statement for the amendments to 10 CFR Part 50 and Appendix E thereof is not required. This determination is based on "Environmental Assessment for Final Changes to 10 CFR Part 50 and Appendix E of 10 CFR Part 50, Emergency Planning Requirements for Nuclear Power Plants" (NUREG–0685, June 1980). Comments on the "Draft Negative Declaration; Finding of No Significant Impact" (45 FR 3913, January 21, 1980) were considered in the preparation of NUREG–0685.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and Sections 552 and 553 of Title 5 of the United States Code, notice is hereby given that the following amendments to Title 10, Chapter I, Code of Federal Regulations, Parts 50 and 70, are published as a document subject to codification.

Part 50—Domestic Licensing of Production and Utilization Facilities

1. Paragraph (g) of Section 50.33 is revised to read as follows:

§ 50.33 Contents of applications; general information.

* * * * *

(g) If the application is for an operating license for a nuclear power reactor, the applicant shall submit radiological emergency response plans of State and local governmental entities in the United States that are wholly or partially within the plume exposure pathway Emergency Planning Zone (EPZ)[1], as well as the plans of State governments wholly or partially within the ingestion pathway EPZ.[2] Generally, the plume exposure pathway EPZ for nuclear power reactors shall consist of an area about 10 miles (16 km) in radius and the ingestion pathway EPZ shall consist of an area about 50 miles (80 km) in radius. The exact size and configuration of the EPZs surrounding a particular nuclear power reactor shall be determined in relation to the local emergency response needs and

[1] Emergency Planning Zones (EPZs) are discussed in NUREG–0396, EPA 520/1–78–016, "Planning Basis for the Development of State and Local Government Radiological Emergency Response Plans in Support of Light-Water Nuclear Power Plants," December 1978.

[2] If the State and local emergency response plans have been previously provided to the NRC for inclusion in the facility docket, the applicant need only provide the appropriate reference to meet this requirement.

capabilities as they are affected by such conditions as demography, topography, land characteristics, access routes, and jurisdictional boundaries. The size of the EPZs also may be determined on a case-by-case basis for gas-cooled reactors and for reactors with an authorized power level less than 250 MW thermal. The plans for the ingestion pathway shall focus on such actions as are appropriate to protect the food ingestion pathway.

2. A new § 50.47 is added.

§ 50.47 Emergency plans.

(a)(1) No operating license for a nuclear power reactor will be issued unless a finding is made by NRC that the state of onsite and offsite emergency preparedness provides reasonable assurance that adequate protective measures can and will be taken in the event of a radiological emergency.

(2) The NRC will base its finding on a review of the Federal Emergency Management Agency (FEMA) findings and determinations as to whether State and local emergency plans are adequate and capable of being implemented, and on the NRC assessment as to whether the applicant's onsite emergency plans are adequate and capable of being implemented. In any NRC licensing proceeding, a FEMA finding will constitute a rebuttable presumption on a question of adequacy.

(b) The onsite and offsite emergency response plans for nuclear power reactors must meet the following standards: [1]

(1) Primary responsibilities for emergency response by the nuclear facility licensee and by State and local organizations within the Emergency Planning Zones have been assigned, the emergency responsibilities of the various supporting organizations have been specifically established, and each principal response organization has staff to respond and to augment its initial response on a continuous basis.

(2) On-shift facility licensee responsibilities for emergency response are unambiguously defined, adequate staffing to provide initial facility accident response in key functional areas is maintained at all times, timely augmentation of response capabilities is available and the interfaces among various onsite response activities and offsite support and response activities are specified.

[1] These standards are addressed by specific criteria in NUREG–0654; FEMA–REP–1 entitled "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants—For Interim Use and Comment" January 1980.

(3) Arrangements for requesting and effectively using assistance resources have been made, arrangements to accommodate State and local staff at the licensee's near-site Emergency Operations Facility have been made, and other organizations capable of augmenting the planned response have been identified.

(4) A standard emergency classification and action level scheme, the bases of which include facility system and effluent parameters, is in use by the nuclear facility licensee, and State and local response plans call for reliance on information provided by facility licensees for determinations of minimum initial offsite response measures.

(5) Procedures have been established for notification, by the licensee, of State and local response organizations and for notification of emergency personnel by all organizations; the content of initial and followup messages to response organizations and the public has been established; and means to provide early notification and clear instruction to the populace within the plume exposure pathway Emergency Planning Zone have been established.

(6) Provisions exist for prompt communications among principal response organizations to emergency personnel and to the public.

(7) Information is made available to the public on a periodic basis on how they will be notified and what their initial actions should be in an emergency (e.g., listening to a local broadcast station and remaining indoors), the principal points of contract with the news media for dissemination of information during an emergency (including the physical location or locations) are established in advance, and procedures for coordinated dissemination of information to the public are established.

(8) Adequate emergency facilities and equipment to support the emergency response are provided and maintained.

(9) Adequate methods, systems, and equipment for assessing and monitoring actual or potential offsite consequences of a radiological emergency condition are in use.

(10) A range of protective actions have been developed for the plume exposure pathway EPZ for emergency workers and the public. Guidelines for the choice of protective actions during an emergency, consistent with Federal guidance, are developed and in place, and protective actions for the ingestion exposure pathway EPZ appropriate to the locale have been developed.

(11) Means for controlling radiological exposures, in an emergency, are established for emergency workers. The means for controlling radiological exposures shall include exposure guidelines consistent with EPA Emergency Worker and Lifesaving Activity Protective Action Guides.

(12) Arrangments are made for medical services for contaminated injured individuals.

(13) General plans for recovery and reentry are developed.

(14) Periodic exercises are (will be) conducted to evaluate major portions of energency response capabilities, periodic drills are (will be) conducted to develop and maintain key skills, and deficiencies identified as a result of exercises or drills are (will be) corrected.

(15) Radiological emergency response training is provided to those who may be called on to assist in an emergency.

(16) Responsibilities for plan development and review and for distribution of emergency plans are established, and planners are properly trained.

(c)(1) Failure to meet the standards set forth in paragraph (b) of this subsection may result in the Commission declining to issue an Operating License; however, the applicant will have an opportunity to demonstrate to the satisfaction of the Commission that deficiencies in the plans are not significant for the plant in question, that adequate interim compensating actions have been or will be taken promptly, or that there are other compelling reasons to permit plant operation.

(2) Generally, the plume exposure pathway EPZ for nuclear power plants shall consist of an area about 10 miles (16 km) in radius and the ingestion pathway EPZ shall consist of an area about 50 miles (80 km) in radius. The exact size and configuration of the EPZs surrounding a particular nuclear power reactor shall be determined in relation to local emergency response needs and capabilities as they are affected by such conditions as demography, topography, land characteristics, access routes, and jurisdictional boundaries. The size of the EPZs also may be determined on a case-by-case basis for gas-cooled nuclear reactors and for reactors with an authorized power level less than 250 MW thermal. The plans for the ingestion pathway shall focus on such actions as are appropriate to protect the food ingestion pathway.

3. Section 50.54 is amended by adding five new paragraphs (q), (r), (s), (t), and (u).

§ 50.54 Conditions of licenses.

* * * * *

(q) A licensee authorized to possess and/or operate a nuclear power reactor shall follow and maintain in effect emergency plans which meet the standards in § 50.47(b) and the requirements in Appendix E of this Part. A licensee authorized to possess and/or operate a research reactor or a fuel facility shall follow and maintain in effect emergency plans which meet the requirements in Appendix E of this Part. The nuclear power reactor licensee may make changes to these plans without Commission approval only if such changes do not decrease the effectiveness of the plans and the plans, as changed, continue to meet the standards of § 50.47(b) and the requirements of Appendix E of this Part. The research reactor licensee and/or the fuel facility licensee may make changes to these plans without Commission approval only if such changes do not decrease the effectiveness of the plans and the plans, as changed, continue to meet the requirements of Appendix E of this Part. Proposed changes that decrease the effectiveness of the approved emergency plans shall not be implemented without application to and approval by the Commission. The licensee shall furnish 3 copies of each proposed change for approval; and/or if a change is made without prior approval, 3 copies shall be submitted within 30 days after the change is made or proposed to the Director of the appropriate NRC regional office specified in Appendix D, 10 CFR Part 20, with 10 copies to the Director of Nuclear Reactor Regulation, or, if appropriate, the Director of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

(r) Each licensee who is authorized to possess and/or operate a research or test reactor facility with an authorized power level greater than or equal to 500 kW thermal, under a license of the type specified in § 50.21(c), shall submit emergency plans complying with 10 CFR Part 50, Appendix E, to the Director of Nuclear Reactor Regulation for approval within one year from the effective date of this rule. Each licensee who is authorized to possess and/or operate a research reactor facility with an authorized power level less than 500 kW thermal, under a license of the type specified in § 50.21(c), shall submit emergency plans complying with 10 CFR Part 50, Appendix E, to the Director of Nuclear Reactor Regulation for approval within two years from the effective date of this amendment.

(s)(1) Each licensee who is authorized to possess and/or operate a nuclear power reactor shall summit to NRC within 60 days of the effective date of this amendment the radiological emergency response plans of State and local governmental entities in the United States that are wholly or partially within a plume exposure pathway EPZ, as well as the plans of State governments wholly or partially within an ingestion pathway EPZ.[1,2] Ten (10) copies of the above plans shall be forwarded to the Director of Nuclear Reactor Regulation with 3 copies to the Director of the appropriate NRC regional office. Generally, the plume exposure pathway EPZ for nuclear power reactors shall consist of an area about 10 miles (16 km) in radius and the ingestion pathway EPZ shall consist of an area about 50 miles (80 km) in radius. The exact size and configuration of the EPZs for a particular nuclear power reactor shall be determined in relation to local emergency response needs and capabilities as they are affected by such conditions as demography, topography, land characteristics, access routes, and jurisdictional boundaries. The size of the EPZs also may be determined on a case-by-case basis for gas-cooled nuclear reactors and for reactors with an authorized power level less than 250 MW thermal. The plans for the ingestion pathway EPZ shall focus on such actions as are appropriate to protect the food ingestion pathway.

(2) For operating power reactors, the licensee, State, and local emergency response plans shall be implemented by April 1, 1981, except as provided in Section IV.D.3 of Appendix E of this Part. If after April 1, 1981, the NRC finds that the state of emergency preparedness does not provide reasonable assurance that appropriate protective measures can and will be taken in the event of a radiological emergency and if the deficiencies are not corrected within four months of that finding, the Commission will determine whether the reactor shall be shut down until such deficiencies are remedied or whether other enforcement action is appropriate. In determining whether a shutdown or other enforcement action is appropriate, the Commission shall take into account, among other factors, whether the licensee can demonstrate to the Commission's satisfaction that the deficiencies in the plan are not significant for the plant in question, or that adequate interim compensating actions have been or will be taken promptly, or that there are other compelling reasons for continued operation.

(3) The NRC will base its finding on a review of the FEMA findings and determinations as to whether State and local emergency plans are adequate and capable of being implemented, and on the NRC assessment as to whether the licensee's emergency plans are adequate and capable of being implemented. Nothing in this paragraph shall be construed as limiting the authority of the Commission to take action under any other regulation or authority of the Commission or at any time other than that specified in this paragraph.

(t) A nuclear power reactor licensee shall provide for the development, revision, implementation, and maintenance of its emergency preparedness program. To this end, the licensee shall provide for a review of its emergency preparedness program at least every 12 months by persons who have no direct responsibility for implementation of the emergency preparedness program. The review shall include an evaluation for adequacy of interfaces with State and local governments and of licensee drills, exercises, capabilities, and procedures. The results of the review, along with recommendations for improvements, shall be documented, reported to the licensee's corporate and plant management, and retained for a period of five years. The part of the review involving the evaluation for adequacy of interface with State and local governments shall be available to the appropriate State and local governments.

(u) Within 60 days after the effective date of this amendment, each nuclear power reactor licensee shall submit to the NRC plans for coping with emergencies that meet standards in § 50.47(b) and the requirements of Appendix E of this Part.

* * * * *

4. 10 CFR Part 50, Appendix E, is amended as follows:

Appendix E—Emergency Planning and Preparedness for Production and Utilization Facilities[1]

Table of Contents

I. Introduction
II. The Preliminary Safety Analysis Report
III. The Final Safety Analysis Report
IV. Content of Emergency Plans
V. Implementing Procedures

[1] Emergency Planning Zones (EPZs) are discussed in NUREG–0396; EPA 520/1–78–016, "Planning Basis for the Development of State and Local Government Radiological Emergency Response Plans in Support of Light Water Nuclear Power Plants," December 1978.

[2] If the State and local emergency response plans have been previously provided to the NRC for inclusion in the facility docket, the applicant need only provide the appropriate reference to meet this requirement.

Footnotes continued on next page

[1] NRC staff has developed two regulatory guides: 2.6, "Emergency Planning for Research Reactors," and 3.42, "Emergency Planning in Fuel Cycle Facilities and Plants Licensed Under 10 CFR Parts 50 and 70;" and a joint NRC/FEMA report, NUREG–0654; FEMA–REP–1, "Criteria for Preparation and

I. Introduction

Each applicant for a construction permit is required by § 50.34(a) to include in the preliminary safety analysis report a discussion of preliminary plans for coping with emergencies. Each applicant for an operating license is required by § 50.34(b) to include in the final safety analysis report plans for coping with emergencies.

This appendix establishes minimum requirements for emergency plans for use in attaining an acceptable state of emergency preparedness. These plans shall be described generally in the preliminary safety analysis report and submitted as a part of the final safety analysis report.

The potential radiological hazards to the public associated with the operation of research and test reactors and fuel facilities licensed under 10 CFR Parts 50 and 70 involve considerations different than those associated with nuclear power reactors. Consequently, the size of Emergency Planning Zones [2] (EPZs) for facilities other than power reactors and the degree to which compliance with the requirements of this Section and Sections II, III, IV, and V as necessary will be determined on a case-by-case basis.[3]

II. The Preliminary Safety Analysis Report

The Preliminary Safety Analysis Report shall contain sufficient information to ensure the compatibility of proposed emergency plans for both onsite areas and the EPZs, with facility design features, site layout, and site location with respect to such considerations as access routes, surrounding population distributions, land use, and local jurisdictional boundaries for the EPZs in the case of nuclear power reactors as well as the means by which the standards of § 50.47(b) will be met.

As a minimum, the following items shall be described:

A. Onsite and offsite organizations for coping with emergencies and the means for notification, in the event of an emergency, of persons assigned to the emergency organizations.

B. Contacts and arrangements made and documented with local, State, and Federal governmental agencies with responsibility for coping with emergencies, including identification of the principal agencies.

C. Protective measures to be taken within the site boundary and within each EPZ to protect health and safety in the event of an accident; procedures by which these measures are to be carried out (e.g., in the case of an evacuation, who authorizes the evacuation, how the public is to be notified and instructed, how the evacuation is to be carried out); and the expected response of offsite agencies in the event of an emergency.

(D) Features of the facility to be provided for onsite emergency first aid and decontamination and for emergency transportation of onsite individuals to offsite treatment facilities.

E. Provisions to be made for emergency treatment at offsite facilities of individuals injured as a result of licensed activities.

F. Provisions for a training program for employees of the licensee, including those who are assigned specific authority and responsibility in the event of an emergency, and for other persons who are not employees of the licensee but whose assistance may be needed in the event of a radiological emergency.

G. A preliminary analysis that projects the time and means to be employed in the notification of State and local governments and the public in the event of an emergency. A nuclear power plant applicant shall perform a preliminary analysis of the time required to evacuate various sectors and distances within the plume exposure pathway EPZ for transient and permanent populations, noting major impediments to the evacuation or taking of protective actions.

H. A preliminary analysis reflecting the need to include facilities, systems, and methods for identifying the degree of seriousness and potential scope of radiological consequences of emergency situations within and outside the site boundary, including capabilities for dose projection using real-time meteorological information and for dispatch of radiological monitoring teams within the EPZs; and a preliminary analysis reflecting the role of the onsite technical support center and of the near-site emergency operations facility in assessing information, recommending protective action, and disseminating information to the public.

III. The Final Safety Analysis Report

The Final Safety Analysis Report shall contain the plans for coping with emergencies. The plans shall be an expression of the overall concept of operation; they shall describe the essential elements of advance planning that have been considered and the provisions that have been made to cope with emergency situations. The plans shall incorporate information about the emergency response roles of supporting organizations and offsite agencies. That information shall be sufficient to provide assurance of coordination among the supporting groups and with the licensee.

The plans submitted must include a description of the elements set out in Section IV for the Emergency Planning Zones (EPZs) [2] to an extent sufficient to demonstrate that the plans provide reasonable assurance that appropriate measures can and will be taken in the event of an emergency.

IV. Content of Emergency Plans

The applicant's emergency plans shall contain, but not necessarily be limited to, information needed to demonstrate compliance with the elements set forth below, i.e., organization for coping with radiation emergencies, assessment action, activation of emergency organization, notification procedures, emergency facilities and equipment, training, maintaining emergency preparedness, and recovery. In addition, the emergency response plans submitted by an applicant for a nuclear power reactor operating license shall contain information needed to demonstrate compliance with the standards described in Section 50.47(b),[4] and they will be evaluated against those standards. The nuclear power reactor operating license applicant shall also provide an analysis of the time required to evacuate and for taking other protective actions for various sectors and distances within the plume exposure pathway EPZ for transient and permanent populations.

A. Organization

The organization for coping with radiological emergencies shall be described, including definition of authorities, responsibilities, and duties of individuals assigned to the licensee's emergency organization and the means for notification of such individuals in the event of an emergency. Specifically, the following shall be included:

1. A description of the normal plant operating organization.

2. A description of the onsite emergency response organization with a detailed discussion of:

a. Authorities, responsibilities, and duties of the individual(s) who will take charge during an emergency;

b. Plant staff emergency assignments;

c. Authorities, responsibilities, and duties on an onsite emergency coordinator who shall be in charge of the exchange of information with offsite authorities responsible for coordinating and implementing offsite emergency measures.

3. A description, by position and function to be performed, of the licensee's

Footnotes continued from last page

Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants for Interim Use and Comment," January 1980, to provide guidance in developing plans for coping with emergencies. Copies of these documents are available at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555. Copies of these documents may be purchased from the Government Printing Office. Information on current prices may be obtained by writing the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Publications Sales Manager.

[2] EPZs for power reactors are discussed in NUREG–0396; EPA 520/1–78–016, "Planning Basis for the Development of State and Local Government Radiological Emergency Response Plans in Support of Light Water Nuclear Power Plants," December 1978. The size of the EPZs for a nuclear power plant shall be determined in relation to local emergency response needs and capabilities as they are affected by such conditions as demography, topography, land characteristics, access routes, and jurisdictional boundaries. The size of the EPZs also may be determined on a case-by-case basis for gas-cooled nuclear reactors and for reactors with an authorized power level less than 250 MW thermal. Generally, the plume exposure pathway EPZ for nuclear power plants with an authorized power level greater than 250 MW thermal shall consist of an area about 10 miles (16 km) in radius and the ingestion pathway EPZ shall consist of an area about 50 miles (80 km) in radius.

[3] Regulatory Guide 2.6 will be used as guidance for the acceptability of research and test reactor emergency response plans.

[4] These objectives are addressed by specific criteria in NUREG–0654; FEMA–REP–1 entitled "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants for Interim Use and Comment" January 1980.

V 45 A G 19 80 UMI

headquarters personnel who will be sent to the plant site to augment the onsite emergency organization.

4. Identification, by position and function to be performed, of persons within the licensee organization who will be responsible for making offsite dose projections, and a description of how these projections will be made and the results transmitted to State and local authorities, NRC, and other appropriate governmental entities.

5. Identification, by position and function to be performed, of other employees of the licensee with special qualifications for coping with emergency conditions that may arise. Other persons with special qualifications, such as consultants, who are not employees of the licensee and who may be called upon for assistance for emergencies shall also be identified. The special qualifications of these persons shall be described.

6. A description of the local offsite services to be provided in support of the licensee's emergency organization.

7. Identification of, and assistance expected from, appropriate State, local, and Federal agencies with responsibilities for coping with emergencies.

8. Identification of the State and/or local officials responsible for planning for, ordering, and controlling appropriate protective actions, including evacuations when necessary.

B. Assessment Actions

The means to be used for determining the magnitude of and for continually assessing the impact of the release of radioactive materials shall be described, including emergency action levels that are to be used as criteria for determining the need for notification and participation of local and State agencies, the Commission, and other Federal agencies, and the emergency action levels that are to be used for determining when and what type of protective measures should be considered within and outside the site boundary to protect health and safety. The emergency action levels shall be based on in-plant conditions and instrumentation in addition to onsite and offsite monitoring. These emergency action levels shall be discussed and agreed on by the applicant and State and local governmental authorities and approved by NRC. They shall also be reviewed with the State and local governmental authorities on an annual basis.

C. Activation of Emergency Organization

The entire spectrum of emergency conditions that involve the alerting or activating of progressively larger segments of the total emergency organization shall be described. The communication steps to be taken to alert or activate emergency personnel under each class of emergency shall be described. Emergency action levels (based not only on onsite and offsite radiation monitoring information but also on readings from a number of sensors that indicate a potential emergency, such as the pressure in containment and the response of the Emergency Core Cooling System) for notification of offsite agencies shall be described. The existence, but not the details, of a message authentication scheme shall be noted for such agencies. The emergency classes defined shall include: (1) notification of unusual events, (2) alert, (3) site area emergency, and (4) general emergency. These classes are further discussed in NUREG–0654; FEMA–REP–1.

D. Notification Procedures

1. Administrative and physical means for notifying local, State, and Federal officials and agencies and agreements reached with these officials and agencies for the prompt notification of the public and for public evacuation or other protective measures, should they become necessary, shall be described. This description shall include identification of the appropriate officials, by title and agency, of the State and local government agencies within the EPZs.[2]

2. Provisions shall be described for yearly dissemination to the public within the plume exposure pathway EPZ of basic emergency planning information, such as the methods and times required for public notification and the protective actions planned if an accident occurs, general information as to the nature and effects of radiation, and a listing of local broadcast stations that will be used for dissemination of information during an emergency. Signs or other measures shall also be used to disseminate to any transient population within the plume exposure pathway EPZ appropriate information that would be helpful if an accident occurs.

3. A licensee shall have the capability to notify responsible State and local governmental agencies within 15 minutes after declaring an emergency. The licensee shall demonstrate that the State/local officials have the capability to make a public notification decision promptly on being informed by the licensee of an emergency condition. By July 1, 1981, the nuclear power reactor licensee shall demonstrate that administrative and physical means have been established for alerting and providing prompt instructions to the public within the plume exposure pathway EPZ. The design objective shall be to have the capability to essentially complete the initial notification of the public within the plume exposure pathway EPZ within about 15 minutes. The use of this notification capability will range from immediate notification of the public (within 15 minutes of the time that State and local officials are notified that a situation exists requiring urgent action) to the more likely events where there is substantial time available for the State and local governmental officials to make a judgment whether or not to activate the public notification system. Where there is a decision to activate the notification system, the State and local officials will determine whether to activate the entire notification system simultaneously or in a graduated or staged manner. The responsibility for activating such a public notification system shall remain with the appropriate government authorities.

E. Emergency Facilities and Equipment

Adequate provisions shall be made and described for emergency facilities and equipment, including:

1. Equipment at the site for personnel monitoring;

2. Equipment for determining the magnitude of and for continuously assessing the impact of the release of radioactive materials to the environment;

3. Facilities and supplies at the site for decontamination of onsite individuals;

4. Facilities and medical supplies at the site for appropriate emergency first aid treatment;

5. Arrangements for the services of physicians and other medical personnel qualified to handle radiation emergencies on-site;

6. Arrangements for transportation of contaminated injured individuals from the site to specifically identified treatment facilities outside the site boundary;

7. Arrangements for treatment of individuals injured in support of licensed activities on the site at treatment facilities outside the site boundary;

8. A licensee onsite technical support center and a licensee near-site emergency operations facility from which effective direction can be given and effective control can be exercised during an emergency;

9. At least one onsite and one offsite communications system; each system shall have a backup power source.

All communication plans shall have arrangements for emergencies, including titles and alternates for those in charge at both ends of the communication links and the primary and backup means of communication. Where consistent with the function of the governmental agency, these arrangements will include:

a. Provision for communications with contiguous State/local governments within the plume exposure pathway EPZ. Such communications shall be tested monthly.

b. Provision for communications with Federal emergency response organizations. Such communications systems shall be tested annually.

c. Provision for communications among the nuclear power reactor control room, the onsite technical support center, and the near-site emergency operations facility; and among the nuclear facility, the principal State and local emergency operations centers, and the field assessment teams. Such communications systems shall be tested annually.

d. Provisions for communications by the licensee with NRC Headquarters and the appropriate NRC Regional Office Operations Center from the nuclear power reactor control room, the onsite technical support center, and the near-site emergency operations facility. Such communications shall be tested monthly.

F. Training

The program to provide for (1) the training of employees and exercising, by periodic drills, of radiation emergency plans to ensure that employees of the licensee are familiar with their specific emergency response duties and (2) the participation in the training and drills by other persons whose assistance may be needed in the event of a radiation emergency shall be described. This shall include a description of specialized initial training and periodic retraining programs to be provided to each of the following categories of emergency personnel:

a. Directors and/or coordinators of the plant emergency organization;

b. Personnel responsible for accident assessment, including control room shift personnel;

c. Radiological monitoring teams;

d. Fire control teams (fire brigades);

e. Repair and damage control teams;

f. First aid and rescue teams;

g. Medical support personnel;

h. Licensee's headquarters support personnel;

i. Security personnel.

In addition, a radiological orientation training program shall be made available to local services personnel, e.g., local Civil Defense, local law enforcement personnel, local news media persons.

The plan shall describe provisions for the conduct of emergency preparedness exercises. Exercises shall test the adequacy of timing and content of implementing procedures and methods, test emergency equipment and communication networks, test the public notification system, and ensure that emergency organization personnel are familiar with their duties. Each licensee shall exercise at least annually the emergency plan for each site at which it has one or more power reactors licensed for operation. Both full-scale and small-scale exercises shall be conducted and shall include participation by appropriate State and local government agencies as follows:

1. A full-scale exercise which tests as much of the licensee, State, and local emergency plans as is reasonably achievable without mandatory public participation shall be conducted;

a. For each site at which one or more power reactors are located and licensed for operation, at least once every five years and at a frequency which will enable each State and local government within the plume exposure pathway EPZ to participate in at least one full-scale exercise per year and which will enable each State within the ingestion pathway to participate in at least one full-scale exercise every three years.

b. For each site at which a power reactor is located for which the first operating license for that site is issued after the effective date of this amendment, within one year before the issuance of the operating license for full power, which will enable each State and local government within the plume exposure EPZ and each State within the ingestion pathway EPZ to participate.

2. The plan shall also describe provisions for involving Federal emergency response agencies in a full-scale emergency preparedness exercise for each site at which one or more power reactors are located and licensed for operation at least once every 5 years;

3. A small-scale exercise which tests the adequacy of communication links, establishes that response agencies understand the emergency action levels, and tests at least one other component (e.g., medical or offsite monitoring) of the offsite emergency response plan for licensee, State, and local emergency plans for jurisdictions within the plume exposure pathway EPZ shall be conducted at each site at which one or more power reactors are located and licensed for operation each year a full-scale exercise is not conducted which involves the State(s) within the plume exposure pathway EPZ.

All training, including exercises, shall provide for formal critiques in order to identify weak areas that need corrections. Any weaknesses that are identified shall be corrected.

G. Maintaining Emergency Preparedness

Provisions to be employed to ensure that the emergency plan, its implementing procedures, and emergency equipment and supplies are maintained up to date shall be described.

H. Recovery

Criteria to be used to determine when, following an accident, reentry of the facility would be appropriate or when operation could be resumed shall be described.

V. Implementing Procedures

No less than 180 days prior to scheduled issuance of an operating license for a nuclear power reactor or a license to possess nuclear material, 3 copies of each of the applicant's detailed implementing procedures for its emergency plan shall be submitted to the Director of the appropriate NRC Regional Office with 10 copies to the Director of Nuclear Reactor Regulation or, if appropriate, the Director of Nuclear Material Safety and Safeguards. In cases where a decision on an operating license is scheduled less than one year after the effective date of this rule, such implementing procedures shall be submitted as soon as practicable but before full power operation is authorized. Prior to March 1, 1981, licensees who are authorized to operate a nuclear power facility shall submit 3 copies each of the licensee's emergency plan implementing procedures to the Director of the appropriate NRC Regional Office with 10 copies to the Director of Nuclear Reactor Regulation. Three copies each of any changes to maintain these implementing procedures up to date shall be submitted to the same NRC Regional Office with 10 copies to the Director of Nuclear Reactor Regulation or, if appropriate, the Director of Nuclear Material Safety and Safeguards within 30 days of such changes.

PART 70—DOMESTIC LICENSING OF SPECIAL NUCLEAR MATERIAL

2. Section 70.32 is amended by adding paragraph (i) to read as follows:

§ 70.32 Conditions of licenses.

* * * * *

(i) Licensees required to submit emergency plans in accordance with § 70.22(i) shall follow and maintain in effect emergency plans approved by the Commission. The licensee may make changes to the approved plans without Commission approval only if such changes do not decrease the effectiveness of the plans and the plans, as changed, continue to meet the requirements of Appendix E, Section IV, 10 CFR Part 50. The licensee shall furnish the Director of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, with a copy to the appropriate NRC Regional Office specified in Appendix D, Part 20 of this Chapter, each change within six months after the change is made. Proposed changes that decrease the effectiveness of the approved emergency plan shall not be implemented without prior application to and prior approval by the Commission.

10 CFR Part 50

Emergency Planning: Negative Declaration; Finding of no Significant Impact for Effective Rule Changes

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Final negative declaration; finding of no significant impact.

SUMMARY: The Nuclear Regulatory Commission's regulations require that the environmental impact of certain regulatory actions, including substantive amendments to 10 CFR Part 50, be evaluated to determine if an environmental impact statement should be prepared. If it is determined an environmental impact statement need not be prepared, a negative declaration will be issued. The NRC has evaluated the environmental impact of the proposed changes to Part 50 dealing with emergency planning requirements for nuclear power plants (published elsewhere in this issue), and has determined that the rule changes will not have a significant impact on the human environment. Therefore, an environmental impact statement will not be prepared, and a negative declaration is being issued.

DATES: The rule changes for emergency planning will become effective November 3, 1980.

ADDRESSES: Copies of the Final Environmental Assessment, NUREG–0685, and the comments received by the Commission may be examined in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Michael T. Jamgochian, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone: (301) 443–5966.

SUPPLEMENTARY INFORMATION: On January 21, 1980 the Nuclear Regulatory Commission published a "Draft Negative Declaration; Finding of No Significant Impact" (45 FR 3913, January 21, 1980) for proposed changes to 10 CFR Part 50, §§ 50.33, 50.47, 50.54 and Appendix E that deal with emergency planning requirements for nuclear power plants (44 FR 75167, December 19, 1979). A draft Environmental Assessment accompanied the draft Negative Declaration. The comment period ended on February 18, 1980.

Sixteen sets of comments were submitted and have been analyzed. Although all 16 commenters felt that the draft Environmental Assessment was inadequate to support the Finding of No Significant Impact, the staff analysis does not support this view. The commenters suggested that some points in the draft Environmental Assessment were in error, some required much more detailed discussion, and some points had been ignored. The errors have been corrected and do not significantly affect the earlier conclusion. The levels of detail and the omissions are generally related to the penalties associated with noncompliance with the rule. The staff originally judged that invocations of the noncompliance penalties (i.e., nuclear power plant shutdown) would be infrequent and of short duration and the associated impacts would thus be insignificant. Commenters asserted that there will be frequent and long-term shutdowns which will have severe impacts which would require detailed consideration in an Environmental Impact Statement. The staff analysis has supported the judgment of infrequent, short-term shutdowns and thus concludes that no additional detailed studies are necessary.

Minor revisions have been made in the environmental assessment reflecting comments received, but its conclusions have not been altered. Based on this assessment, a final determination has been made by the Director, Office of Standards Development, that the proposed rule changes will not have a signficant impact on the human environment and, therefore, that an environmental impact statement will not be prepared for these rule changes.

Analysis of Comments

The groups that submitted comments are identified on the Table together with their principal comments. No comments were received from State or local governments, other Federal agencies, or public interest groups.

The main point of each set of comments was that an Environmental Impact Statement should be prepared for the rule changes and that the Environmental Assessment ". . . inadequately addresses the environmental impact of the Emergency Planning Proposed Rule and the economic and social impacts on U.S. industry of long-term or permanent premature shutdowns of nuclear plants" (AEP). The comments have been reconstructed into 14 general criticisms, which have been analyzed for their relevance to the validity of the conclusions in the "Draft Negative Declaration; Finding of No Significant Impact."

One matter warrants additional mention here. An assumption was made in preparation of the DEA that shutdowns of nuclear power plants as a result of actions taken under these rule changes would be infrequent and of short duration. This assumption is critical to the decision that an Environmental Impact Statement should not be prepared. The basis for this assumption was that, since State and local authorities have the responsibility, in common with the NRC, to protect public health and safety and are concerned with meeting the energy needs of their citizens, it is likely that they will cooperate to ensure the continued safe operation or timely commencement of safe operation of nuclear generation capability within their jurisdiction. The only significant adverse reaction by the State and local governments that must bear this burden has been that complications in funding of State programs and lead time for equipment acquisition might make it difficult to completely satisfy all of the planning and preparedness requirements by the date set forth in the proposed rule changes. As a direct result of this, the deadline for plans and implementation has been extended to April 1, 1981, and the deadline for having warning systems in place has been extended to July 1, 1981. These extensions should be sufficient in most cases.

It should also be noted that the Commission has chosen the alternative that requires Commission action to initiate a shutdown. Conditions are specified in the regulation that the Commission will use in each case to determine whether a shutdown is warranted. When considered together, the lack of any significant adverse comment from State and local governments, the necessity for Commission action before a plant will be shut down, and the conditions for whether a shutdown is warranted, all argue convincingly that the assumption that shutdowns will be infrequent and of short duration is sound. Thus, the assumption is retained in the final Environmental Assessment (NUREG–0685) and the impacts of extended shutdowns are not considered valid impacts of these rule changes.

The 14 reconstructed general comments and a discussion of each follow:

1. *Three commenters (see Table) contend that alternatives to the proposed rule changes are inadequately addressed. They specifically mention alternative ways of achieving the same end such as proposing legislation.*

In view of the existing safety record of the nuclear industry and the lack of effective preparation for the TMI accident, the Commission had the following three alternatives from which to choose:

A. The Commission could take no immediate action itself while encouraging other parties, i.e., the Congress, other Federal Agencies, the States, and the utilities themselves to take effective action. This "no action" alternative would be counter to the Commission's legislative mandate to protect public health and safety. In fact, the TMI accident was a clear indication that this "urging without requiring" emergency preparedness had proved to be ineffective. This alternative clearly could not stand in the face of the Commission's responsibility in this area.

B. The Commission is a regulatory agency and has as one of its chief tools the authority to issue regulations that bind those parties that it regulates. If an effective method for achieving protection of public health and safety is available through promulgation of regulations with specific requirements and penalties and conditions governing those requirements and penalties, this should be the proper way for the Commission to proceed.

C. If the Commission judged that danger to public health and safety was significant and imminent because of continued operation of existing plants while effective regulations are developed, it had the authority to impose immediate shutdowns until a solution could be found. The safety record of nuclear power, including the TMI accident, does not support an industry-wide judgment of imminent, significant danger. However, potential does exist for significant harm to the public in the event of a severe accident and the events at TMI suggest that plans must be made to account for this potential problem. Notwithstanding this potential, given the likelihood of an accident requiring off-site emergency protective measures, immediate industry-wide shutdown and the attendant severe long-term impacts are not warranted.

Alternatives A and C are clearly unacceptable. The discussion of alternatives in the Final Environmental Assessment has not been changed from that in the Draft Environmental Assessment.

2. *Seven commenters (see Table) assert that the impacts of shutdowns are underestimated and that shutdowns of multiple unit plants or several in the same State were not considered.*

The DEA was prepared with the understanding that ever increasing fuel prices make it difficult to make stable predictions of the costs of replacement power. While individual values of replacement costs may be in error, the upper end of the range of costs of replacement power, which is compared in the Environmental Assessment to the costs of compliance, is only changed by about 36% when the heat rate is changed as suggested. The response to comment eleven indicates that the costs of compliance were also underestimated. the relative comparison of these two costs was used to demonstrate the strong economic incentive that exists for all parties to strive for effective emergency planning and preparedness. The staff agrees that the net plant heat rate assumed in the DEA is low and therefore changed the assumed heat rate from 9,400 Btu/kWh to 11,000 Btu/kWh. Accordingly, the cost figures have been modified in the Final Environmental Assessment; but these modifications do not alter the conclusions of the Environmental Assessment.

The question of multiple-plant shutdowns because of a common reason, i.e., an unacceptable State plan or multiple units on a site where the local plan is unacceptable, is a more difficult problem. The State plans are only a part of the overall Federal Emergency Management Agency (FEMA) program to enhance the ability of State governments to handle emergencies. The economic incentive for the utilities to help the States in every way possible should result in the preparation of plans and equipment for a nuclear plant emergency that will be a sound, significant contribution to the overall capability of a State to handle many different kinds of emergencies. The provision of conditions that permit issuance of an operating license or continuation of operation, the extension of the compliance date and deadline for warning systems to be in place, and the record of cooperation from the States up to the present time make it unlikely that any State's program will be so deficient that shutdown of all plants in the State will be required.

The potential that an unsatisfactory local plan might result in the shutdown of all units on a specific site appears to be significantly greater. Depending on the size and number of the units involved, the incentive of the utility for aiding the local governments is also greater. The potential magnitude of the impact of shutdown in these cases is two to three times greater than for the single unit case, and this determination has been added to the Environmental Assessment. In any case, it would appear that whether these impacts, if severe enough, constitute "other compelling reasons" to permit continued operation will be determined in the individual reviews.

3. *Four groups comment that health effects of fossil substitution are underestimated in the draft Environmental Assessment and that other effects are ignored.*

The critical assumption in the draft and final Environmental Assessment is that shutdowns will be infrequent and of short duration. In such a case, the fossil generating capacity is simply that which is available for normal replacement power during refueling and maintenance outages and would probably be used in periods of peak demand until the utility phases it out of the generating system completely. (The impacts are thus ones that occur anyway, but at a different time. Short, infrequent shutdowns will only change the time period for suffering an impact that will most likely be felt eventually anyway.) For such short-term replacement, no new plants will be built. The draft and final Environmental Assessment accepts these impacts as a consequence of infrequent and brief shutdowns. (A more accurate analysis might conclude that there is zero cumulative impact because the useful life of the replacement capability is unaltered.) The discussions in the Final Environmental Assessment are unaltered on this subject.

4. *Nine commenters challenged the assumption that shutdowns would be infrequent and of short duration and questioned the lack of treatment of the availability of replacement capacity.*

The assumption that shutdowns will be infrequent and of short duration is critical to the validity of the Environmental Assessment. At the time when the Draft Environmental Assessment was prepared, this assumption was based on the assertion that State and local governments (having in common with NRC the responsibility to protect public health and safety) will cooperate to provide fully for protection of the public. Since that time, the Commission, in cooperation with FEMA, has been working diligently to help State and local governments develop satisfactory emergency plans and programs. The response of the State and local governments has confirmed the validity of the earlier assumption. In addition, no State or local government provided any comment on the Draft Environmental Assessment, thus indicating at least tacit agreement with the basis for the assumption.

Since the basis for the assumption of infrequent shutdowns has not received substantive challenge from the parties directly involved, but there has instead been activity that tends to confirm the assumption, it will remain as a fundamental assumption of the final Environmental Assessment.

The availability of replacement capacity also hinges on this assumption. Part of the purpose of reserve capacity is replacement during plant outages. As long as shutdowns are infrequent and of short duration, they should fit into this normal pattern of utilization of replacement capacity. No additional discussions of this topic have been prepared for the final Environmental Assessment.

5. *Seven commenters contend the judgment that ". . . it is likely that the States will cooperate to assure the continued safe operation or timely commencement of safe operation of nuclear generation capability within their jurisdiction" is unsubstantiated.*

While this assumption was made in the absence of first-hand information, the experience of the Commission since December 1979, in attempting to work with state and local government officials, has confirmed the accuracy of this assumption.

6. *Five commenters assert that impacts of long-term shutdowns are not addressed.*

The assumption that shutdowns will be infrequent and of short duration defines the scope of this Environmental Assessment. As described above, long-term shutdowns are not the expected result of these rule changes. The goal of these rule changes is timely implementation of adequate emergency plans and programs. The draft and final Environmental Assessment address the impacts of this action based on the expected consequences and practical considerations of implementation of the provisions of the rule changes. No analysis of the effects of long-term shutdowns has been added to the final Environmental Assessment.

7. *Six commenters contend that psychological and physical risks to the public of false alarms are not evaluated.*

The Emergency Action Level Guidelines (NUREG–0610) recommend notification of the public when a "Site Emergency" has been declared. The expected frequency of an event of this type is predicted to be 1 in 100 to 1 in 5,000 per reactor per year. The high end of this range indicates that two such warnings might occur over the effective life (40 years) for every five units. The low end indicates one event over the life of 125 units. Far from causing excessive psychological and physical risks, this

Reader Aids

V 45 A G 1980 UMI

kind of behavior should lead to a more accurate public perception of the true incidence of risk from nuclear power facilities and a more practical and considered response to an emergency when one occurs. No change has been made in the final Environmental Assessment.

8. *Five commenters assert that the use of the mix of fuels already in use in the State is a poor predicter of what would be the fuel replacement capacity for a specific plant shutdown.*

A generic assessment must make some averaging assumptions or become hopelessly lost in detail. In this case, the commenters are correct that this is a "gross assumption." It is, however, sufficient to establish the range of costs for replacement power, which is the way the detailed information was used. No change has been made in the mix of fuels used to generically assess the range of costs of replacement power.

9. *Five commenters observe that all of the significant impacts are due to linkage between adequacy of emergency plans and continued plant operation.*

These commenters agree that the impacts of compliance are insignificant and that if there were no penalty associated with inadequate emergency preparedness then an Environmental Assessment or no Environmental Assessment would be appropriate. The thrust of the rule is to protect the public through adequate emergency planning. The thrust of the shutdown provision is to protect the public in the event that adequate provision has not been and is not being made to provide adequate emergency planning and preparedness.

The decision of how the public should be protected has been made, i.e., either emergency planning and preparedness is adequate or a plant may be placed in a condition of safe shutdown. The State and local authorities have the responsibility to determine which option is in the best interest of their citizens. The linkage remains in the effective rule changes. No additional discussion has been provided in the final Environmental Assessment.

10. *Two commenters observed that the proposed rule was issued prior to the expanded role of FEMA in emergency planning for nuclear power plants.*

The NRC and FEMA are working closely to establish and carry out their respective roles in emergency planning for nuclear power plants. The effective rule has been changed to reflect this change in relationship between the two agencies. However, the substantive provisions of the rule have not changed, only the parties responsible for specific actions.

11. *Seven commenters assert that the costs of implementation are too low and that there may not be enough time allowed to achieve adequacy in all areas of emergency planning and preparedness.*

The draft Environmental Assessment based its estimates of cost of implementation on information contained in "Beyond Defense in Depth: Cost and Funding of State and Local Government Radiological Emergency Response Plans and Preparedness in Support of Commercial Nuclear Power Stations," NUREG–0553, October 1979. This report did not consider the costs of a warning system that would effectively warn everyone within 10 miles within 15 minutes of the time when the decision to warn the public is made. The cost estimates in the draft Environmental Assessment thus do not include the costs of 15-minute notification. The estimates provided by the commenters have been used to revise the cost estimate in the final Environmental Assessment. It should be noted that all cost figures are approximate and are only intended to give an estimate of the normal magnitude of costs and fees associated with building and operating a nuclear power plant. Significant variations from these costs for individual cases should be expected.* These changes do not affect the earlier conclusions of the draft Environmental Assessment.

In response to comments that more time might be needed, the deadline for plans and implementation to be completed has been extended to April 1, 1981, and the deadline for installation of warning systems has been extended to July 1, 1981 to allow for procurement problems. Appropriate changes have been made in the Environmental Assessment but the earlier conclusions remain unaffected.

12. *One commenter suggested that decisions on shutdowns, allowing continued operation despite inadequate plans, or the resumption of operation after a shutdown should be listed in 10 CFR Part 51 as a categorical exclusion.*

The categorical exclusions in Part 51 are those Commission actions that have been judged as a class not to have any significant environmental impact and thus have been excluded from further consideration under those portions of the Commission's regulations that implement the National Environmental Policy Act of 1969. The Commission will consider this as a comment on the ongoing rulemaking on 10 CFR Part 51 (45 FR 13739).

13. *Two commenters noted that no consideration was given to the costs to the utilities of those portions of the rule changes that upgrade previous onsite requirements.*

This oversight has been corrected. While these costs added a significant increment to the total cost of implementation, this total cost is still low compared to the reference costs of (1) replacement power, (2) tax and fee burden, and (3) capital investment. While several of the cost figures in the final Environmental Assessment have been revised upward, the comparison of these costs has remained unchanged and the conclusions of the Environmental Assessment are unchanged.

14. *One commenter observed that there is no consideration given to plants under construction.*

The cost estimates were forecast for all plants scheduled to be operating by the time the rule was to become effective. To go beyond this period would only complicate the estimates with future costs of greater uncertainty. The purpose here was to present an approximation of the relative significance of the cost impacts to determine whether a more detailed analysis is necessary. The relative magnitude of these costs is well established by the information at hand and these are clearly sufficient to support a decision without the preparation on environmental impact statement.

Dated at Bethesda, Maryland, this 6th day of August 1980.

For the Nuclear Regulatory Commission.

Robert B. Minogue,

Director, Office of Standards Development, U.S. Nuclear Regulatory Commission.

[FR Doc. 80–25248 Filed 8–18–80; 8:45 am]

BILLING CODE 7590–01–M

* Northeast Utilities indicated costs as much as 2.5 times those quoted in the Environmental Assessment but also cited unusual complications such as large numbers of local governments that escalated their costs. Since this single estimate was not confirmed by other State or utility commenters, the values were considered beyond the usual range of costs.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/FHWA	USDA/FSQS		DOT/FHWA	USDA/FSQS
DOT/FRA	USDA/REA		DOT/FRA	USDA/REA
DOT/NHTSA	MSPB/OPM		DOT/NHTSA	MSPB/OPM
DOT/RSPA	LABOR		DOT/RSPA	LABOR
DOT/SLSDC	HHS/FDA		DOT/SLSDC	HHS/FDA
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

REMINDERS

The "reminders" below identify documents that appeared in issues of the **Federal Register** 15 days or more ago, inclusion or exclusion from this list has no legal significance.

Rules Going Into Effect Today

Note: There were no items eligible for inclusion in the list of **Rules Going Into Effect Today.**

List of Public Laws

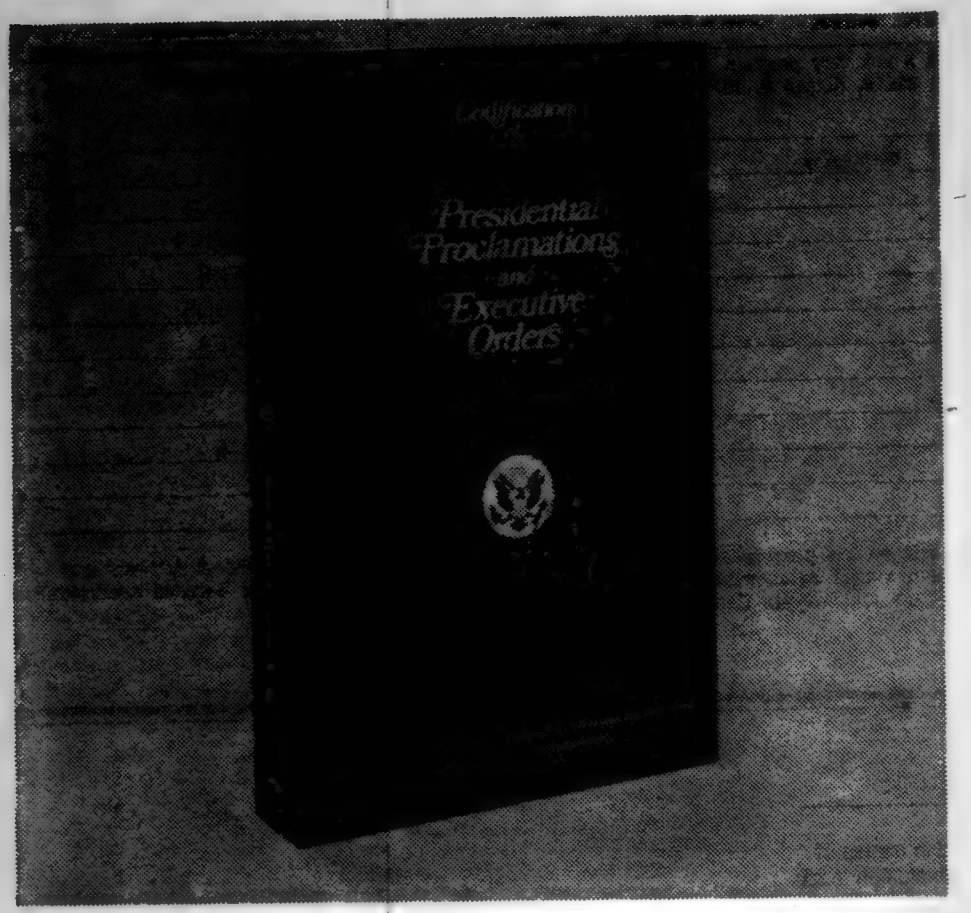
Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last Listing August 14, 1980

NEW PUBLICATION NOW AVAILABLE

For those of you who must keep informed about Presidential proclamations and Executive orders, there is now a

NEW PUBLICATION NOW AVAILABLE



For those of you who must keep informed about Presidential proclamations and Executive orders, there is now a convenient reference source that will make researching certain of these documents much easier.

Arranged by subject matter, this first edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period January 20, 1961, through January 20, 1977, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1961–1977 period, along with any amendments, an indication of its current status, and, where applicable, its location in this volume.

Highlights

55556 **Grant Programs—Data Processing** SBA announces availability of FY 1980 funds to continue its data base development work; apply by 8–22–80

55426 **Scholarships and Fellowships** HHS sets forth requirements for award of scholarships to students receiving academic training in medicine, osteopathy, dentistry, and other health professions for the National Health Service Corps; effective 8–20–80

55566 **Old-Age, Survivors and Disability Insurance** HHS/Sec'y updates and rewrites in simpler language rules determining disability and blindness; effective 8–20–80 (Part II of this issue)

55465 **Common Carriers** ICC adopts rule which will change the way that storage-in-transit (SIT) charges are assessed on household goods moving interstate or foreign commerce; effective 11–18–80; comments by 9–19–80

55520 **Fuel** DOE/EIA publishes alternative fuel price ceilings and incremental price threshold for high cost natural gas; effective 9–1–80

55474 **Customs Duties and Inspection** Treasury/Customs proposes to amend regulations relating to U.S. and Canada in-transit truck procedures; comments by 10–20–80

CONTINUED INSIDE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Highlights

55469 **Commodities Exchanges** CFTC in a proposed rulemaking requests comments on function of current price limit rules and practices of designated contract markets; comments by 11–18–80

55559 **Exports** Treasury/Customs advises exporting community of new provisions which change procedures regarding disclosure of information on export documents; effective 8–1–80

55502 **Antidumping** Commerce/ITA determines final countervailing duty for certain iron-metal castings from India; effective 8–20–80

55425 **Procurement** VA amends regulations to specify that small purchases be reserved for exclusive participation of small business concerns in most cases; effective 8–27–80

55636 **Pensions** PBGC prescribes reporting and notification requirements for reportable events imposed by the Employee Retirement Income Security Act of 1974; effective 9–19–80 (Part III of this issue)

55419 **Nuclear Energy** NRC deletes provision for general license authorization for use of source material in humans by physicians, pharmacists and others receiving source material in form of medicinals or drugs; effective 9–19–80

55654 **Endangered and Threatened Wildlife** Interior/FWS determines the Beaver Dam Slope population of the desert tortoise in Utah to be threatened species with critical habitat; effective 9–19–80 (Part IV of this issue)

55668 **Generalized Systems of Preferences (GSP)** Trade announces deadline for requests to participate in public hearings and of acceptance for review of petitions requesting modification of list of articles eligible to receive duty-free treatment under GSP (Part V of this issue)

Federal Register
Vol. 45, No. 163
Wednesday, August 20, 1980

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 991

Hops of Domestic Production; Expenses of the Hop Administrative Committee, and Rate of Assessment for the 1980–81 Marketing Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation authorizes expenses and a rate of assessment for the 1980–81 marketing year, to be collected from handlers to support activities of the Committee which locally administers the Federal marketing order covering hops of domestic production.

DATES: Effective August 1, 1980 through July 31, 1981.

FOR FURTHER INFORMATION CONTACT: J. S. Miller, Chief, Specialty Crops Branch, Fruit and Vegetable Division, U.S. Department of Agriculture, Washington, DC, (202) 447–5053.

SUPPLEMENTARY INFORMATION: Findings. Pursuant to Marketing Order No. 991, as amended (7 CFR Part 991), regulating the handling of hops of domestic production, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Committee, established under this marketing order, and upon other information, it is found that the expenses and rate of assessment, as hereinafter provided, will tend to effectuate the declared policy of the act.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), as the order requires that the rate of assessment for a particular market year shall apply to all assessable hops handled from the beginning of such year which began August 1. To enable the Committee to meet marketing year obligations approval of the expenses and assessment rate is necessary without delay. Handlers and other interested persons were given an opportunity to submit information and views on the expenses and assessment rate at an open meeting of the Committee. To effectuate the declared purposes of the Act, it is necessary to make these provisions effective as specified.

Further, in accordance with procedures in Executive Order 12044, the emergency nature of this regulation warrants publication, without opportunity for further comments. The regulation has not been classified significant under USDA criteria for implementing the Executive Order. An Impact Analysis is available from J. S. Miller (202) 447–5053.

§ 991.315 Expenses and rate of assessment.

(a) Expenses that are reasonable and likely to be incurred by the Hop Administrative Committee during the 1980–81 marketing year, will amount to $255,000.

(b) The rate of assessment for said year payable by each handler in accordance with § 991.56 is fixed at 0.4 cent per pound of salable hops.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: August 14, 1980.

Charles R. Brader,
Director, Fruit and Vegetable Division.

BILLING CODE 3410–02–M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 40

Deletion of Source Material Medicinals From the General License for Small Quantities of Source Material

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its licensing regulations by deleting the provision for general license authorization of the use of source material [1] in humans by physicians, pharmacists, and other persons receiving source material in the form of medicinals or drugs. Thorotrast, containing alpha-emitting thorium-232 dioxide, was the only source material medicinal used in humans. However, as the radiobiological hazards of alpha-emitting radionuclides became known, the product fell into disuse and production of Thorotrast was discontinued in 1965. This action will require authorization by means of an NRC specific license for internal or external administration of source material, or the radiation therefrom, to human beings.

EFFECTIVE DATE: September 19, 1980.

FOR FURTHER INFORMATION CONTACT: Deborah A. Bozik, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (Telephone 301–443–5860).

SUPPLEMENTARY INFORMATION: Thorotrast, authorized for use by the general license in § 40.22, "Small quantities of source material," of 10 CFR Part 40, and used as an X-ray contrast agent, has been the only source material utilized as a medicinal; no other thorium or uranium compounds have been used as source material medicinals. Thorotrast is the colloidal dioxide of thorium-232 which is an alpha-emitting radionuclide. As the radiobiological hazards of these radionuclides became apparent, the carcinogenic potential of Thorotrast became evident, and, in 1965, the production of Thorotrast was stopped. Improvements in X-ray machines and imaging techniques have resulted in Thorotrast being replaced with nonradioactive contrast agents. The Food and Drug Administration (FDA) terminated the approved New Drug Application (NDA) for Thorotrast on June 13, 1977.

NRC and FDA both strive for consistency with respect to each other's regulations. On March 6, 1980, NRC published a proposed rule (45 FR 14589) to amend the general license in § 40.22 by deleting the authorization for the

[1] Source material, as defined in 10 CFR 40.4(h) means, among other things, uranium or thorium, or any combination thereof, in any physical or chemical form.

following persons to use and transfer

research, development, educational,

SUPPLEMENTARY INFORMATION: The

(Sec. 701, Pub. L. 89–136, 42 U.S.C. 3211; Department of Commerce Organization Order

SUPPLEMENTARY INFORMATION: On

prohibited from inducing dealers or

following persons to use and transfer small quantities of source material:

(1) Pharmacists using source material solely for compounding medicinals;

(2) Physicians using source material for medicinal purposes; and

(3) Persons receiving possession of source material from pharmacists and physicians in the form of medicinals or drugs.

Under the proposed rule, the following groups would still retain their authorization under this general license to use small quantities of source material for research, development, educational, commercial or operational purposes:

(1) Commercial and industrial firms;

(2) Research, educational and medical institutions; and

(3) Federal, State and local government agencies.

A new paragraph would be added under the proposed rule to the general license in § 40.22 of 10 CFR Part 40 which would prohibit licensees from administering source material, or the radiation therefrom, either internally or externally, to human beings, except where authorized by an NRC specific license.

The public was invited to submit written comments on the proposed rule by May 6, 1980. Eight comments were received, and all supported the proposed amendment. One commenter qualified his support by inquiring if the people whose authorization is being withdrawn by this amendment have been making other use of source material. To the best of the Commission's knowledge, no one in the affected groups has been using source material since Thorotrast production was discontinued in 1965. Therefore, the Commission is adopting the final rule in the form identical to the proposed amendment.

Under the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552 and 553 of title 5 of the United States Code, the following amendment to Title 10, Chapter I, Code of Federal Regulations, Part 40 is published as a document subject to codification.

1. Section 40.22 of 10 CFR Part 40 is amended by revising paragraph (a), and by adding a new paragraph, (c), to read as follows:

§ 40.22 Small quantities of source material.

(a) A general license is hereby issued authorizing commercial and industrial firms, research, educational and medical institutions and Federal, State and local government agencies to use and transfer not more than fifteen (15) pounds of source material at any one time for research, development, educational, commercial or operational purposes. A person authorized to use or transfer source material, pursuant to this general license, may not receive more than a total of 150 pounds of source material in any one calendar year.

* * * * *

(c) Persons who receive, possess, use or transfer source material pursuant to the general license in paragraph (a) of this section are prohibited from administering source material, or the radiation therefrom, either externally or internally, to human beings except as may be authorized by NRC in a specific license.

(Secs. 62, 63, 161b., Pub. L. 83–703, 68 Stat. 932, 933, 948b. (42 U.S.C. 2092, 2093, 2201b.); Sec. 201, as amended, Pub. L. 93–438, 88 Stat. 1242, Pub. L. 94–97, 89 Stat. 413 (42 U.S.C. 5841))

Dated at Bethesda, Md., this 7th day of August 1980.

For the Nuclear Regulatory Commission.

William J. Dircks,

Acting Executive Director for Operations.

BILLING CODE 7590-01-M

DEPARTMENT OF COMMERCE

Economic Development Administration

13 CFR Part 309

Environmental Requirements

AGENCY: Economic Development Administration (EDA), Department of Commerce.

ACTION: Interim rule.

SUMMARY: Regulations promulgated by the Council on Environmental Quality (40 CFR Parts 1500–1508) directed each executive agency to develop procedures to implement the requirements of the National Environmental Policy Act of 1969, as amended, in its programs. EDA's procedures developed in response to this requirement were published in the **Federal Register** (45 FR 41028, June 17, 1980) as EDA Directive 17.02–2. This amendment conforms EDA's regulation on environmental review to the procedures contained in Directive 17.02–2.

DATES: Effective date: August 14, 1980. Comments by: October 20, 1980.

ADDRESS: Send comments to: Assistant Secretary for Economic Development, U.S. Department of Commerce, Room 7800B, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Andrew Kauders, Special Assistant for the Environment, (202) 377–4208.

SUPPLEMENTARY INFORMATION: The purpose of this amendment is to remove any inconsistences between EDA's CEQ-approved environmental review procedures as contained in Directive 17.02–2 and its previous review policies as contained in the environmental regulation, 13 CFR § 309.18. This amendment does not represent any changes from the EDA policies and procedures concerning the environmental review of its actions as announced in the recently published directive.

Since the specific procedures governing environmental review of actions are described in detail in the directive and since the directive is readily available to EDA applicants, other interested parties and the public in general, the environmental regulation does not repeat those matters. Instead, the regulation states EDA's policy regarding environmental review of its actions and refers readers to the directive for further information on specific procedures.

Because the subject matter of this amendment has been made available for public review and comment through publication of Directive 17.02–2 in the **Federal Register**, EDA is publishing this rule as an interim regulation.

Since this change in EDA procedures is required by the Council on Environmental Quality, EDA has no significant discretion in implementing this change. As a result, this regulation is deemed not to be significant under the criteria of Executive Order 12044 and Department of Commerce and EDA procedures implementing it. However, in the spirit of the executive order, EDA will accept comments on the regulation for 60 days after publication until October 20, 1980 and will consider these comments before publishing the regulation in final form.

Accordingly, EDA revises 13 CFR 309.18 to read as follows:

§ 309.18 Environmental requirements.

(a) It is the policy of EDA to ensure that proper environmental review of its actions takes place; that there is a proper balance between the goals of economic development and environmental enhancement in its actions; and, that adverse environmental impacts from its actions are mitigated or avoided to the extent possible.

(b) Environmental reviews of EDA actions are conducted in accordance with the procedures described in EDA Directive 17.02–2 which is available from any EDA office.

(Sec. 701, Pub. L. 89–136, 42 U.S.C. 3211; Department of Commerce Organization Order 10–4, as amended (40 FR 56702, as amended))

Dated: August 14, 1980.

Robert T. Hall,

Assistant Secretary for Economic Development.

BILLING CODE 3510-24-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. C-3028]

Fred Meyer, Inc.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order requires, among other things, a Portland, Oreg. operator of a chain of retail stores to provide each charge account customer having an outstanding credit balance with a periodic statement setting forth the amount of the credit balance; and enclose with regular monthly statements, a notice advising that credit balances are refundable upon request. Refunds of credit balances must be made upon request or automatically at the end of a six-month period. The firm is further required to refund, with interest all unpaid credit balances existing between January 1, 1974 and the effective date of the order. The order additionally requires that the firm notify layaway customers who had not completed their purchases during the fourteen (14) months prior to entry of the order that they have the option of either completing the transaction or receiving a refund of the layaway account credit balance; refund credit balances to any customer who indicates, in response to a notice, that the purchase was not completed and the customer received no reimbursement or credit on other merchandise; and maintain specified records for at least three years.

DATES: Complaint and order issued July 23, 1980.[1]

FOR FURTHER INFORMATION CONTACT: Thomas Armitage, Director, 10R, Seattle Regional Office, Federal Trade Commission, 28th Floor, Federal Bldg., 915 Second Ave., Seattle, Wash. 98174, (206) 442–4655.

[1] Copies of the Complaint and the Decision and Order filed with the original document.

SUPPLEMENTARY INFORMATION: On Wednesday, April 30, 1980, there was published in the **Federal Register**, 45 FR 28754, a proposed consent agreement with analysis In the Matter of Fred Meyer, Inc., a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart-Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; 13.533–20 Disclosures; 13.533–35 Employment of independent agencies; 13.533–45 Maintain records; 13.533–55 Refunds, rebates and/or credits. Subpart-Delaying or Withholding Corrections, Adjustments or Action Owed: § 13.675 Delaying or withholding corrections, adjustments or action owed. Subpart-Neglecting, Unfairly or Deceptively, To Make Material Disclosure: § 13.1895 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721; (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended; (15 U.S.C. 45))

BILLING CODE 6750-01-M

16 CFR Part 13

[Docket No. C-3029]

Towle Manufacturing Co.; Prohibited Trade Practices, and Affirmative Corrective Actions.

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order requires, among other things, a Newburyport, Mass. manufacturer, importer and distributor of silver products to cease establishing, maintaining or enforcing any agreement or arrangement with its dealers that has the effect of fixing and enforcing resale prices for its products, and conditioning retention of dealerships on adherence to suggested resale prices. The firm is prohibited from inducing dealers or prospective dealers to report those who fail to adhere to suggested resale prices and barred from taking adverse action against reported dealers. Materials containing resale pricing information must include a statement advising that dealers are not bound to listed prices. Respondent is further required to reinstate those dealers who were terminated for failing to comply with the firm's pricing policy and maintain a file containing specified data for a period of three years.

DATES: Complaint and order issued July 29, 1980.[1]

FOR FURTHER INFORMATION CONTACT: Lois G. Pines, Director, 2R, Boston Regional Office, Federal Trade Commission, 150 Causeway St., Room 1301, Boston, Mass. 02114. (617) 223–6621.

SUPPLEMENTARY INFORMATION: On Thursday, May 22, 1980, there was published in the **Federal Register**, 45 FR 34293, a proposed consent agreement with analysis In the Matter of Towle Manufacturing Company, a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Coercing And Intimidating: § 13.350 Customers or prospective customers. Subpart—Combining Or Conspiring: § 13.395 To control marketing practices and conditions; § 13.425 To enforce or bring about resale price maintenance; § 13.470 To restrain or monopolize trade; § 13.497 To terminate or threaten to terminate contracts, dealings, franchises, etc. Subpart—Corrective Actions And/Or Requirements: § 13.533 Corrective actions and/or requirements; 13.533–20 Disclosures. Subpart—Cutting Off Supplies Or Service: §13.610 Cutting off supplies or service; § 13.655 Threatening disciplinary action or otherwise. Subpart—Maintaining Resale Prices: § 13.1130 Contracts and agreements; § 13.1150 Penalties; § 13.1160 Refusal to sell; § 13.1165

[1] Copies of the Complaint and the Decision and Order filed with the original document.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL 1578–3]

Approval and Revision of the District of Columbia Implementation Plan; Correction

AGENCY: Environmental Protection Agency.

ACTION: Correction of final rule.

SUMMARY: This notice clarifies and corrects Part 52 of Chapter I, Title 40 of the Code of Federal Regulations as published in the **Federal Register** on January 4, 1980, 45 FR 1024. It was the intent of the Administrator to approve until December 31, 1980, amendments to §§ 8–2:704 (Allowable Sulfur Content in Fuel Oil) and 8–2:705 (Allowable Sulfur Content in Coal) of the District's Air Quality Control Regulations submitted on December 27, 1978, by Mayor Walter E. Washington. Such intent, by the Administrator, was reflected throughout the notice but not so stipulated in the Part 52 delineation. Therefore, § 52.470(c)(13) of Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is corrected to read as follows:

Subpart J—District of Columbia

§ 52.470 Identification of plan.

* * * * *

(c) the plan revision listed below was submitted on the date specified * * *

(13) Amendments to §§ 8–2:704 (Allowable Sulfur Content in Fuel Oil) and 8–2:705 (Allowable Sulfur Content in Coal) of the District's Air Quality Control Regulations submitted on December 27, 1978, by Mayor Walter E. Washington is hereby approved until December 31, 1980.

EFFECTIVE DATE: Immediately August 20, 1980. This notice clarifies information which appeared in a previous **Federal Register** notice and does not alter the intent or substance of that rulemaking.

FOR FURTHER INFORMATION CONTACT: Bernard E. Turlinski, Regional Energy Coordinator (3AH13), Air Programs Branch, U.S. Environmental Protection Agency, Region III, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106, telephone number (215) 597–9944.

40 CFR Part 52

[FRL 1569–2]

Approval and Promulgation of Implementation Plans; North Carolina: Duke—CP&L Variance

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: EPA announces its approval of a three-year variance granted by North Carolina on June 14, 1979, to the coal-fired electric generating units of Duke Power Company and Carolina Power & Light Company except for the provision concerning excess emissions during periods of startup, shutdown, and verified malfunction. EPA, furthermore, at this time is disapproving utility operation and maintenance manuals and the definitions of startup, shutdown, and verified malfunction contained therein which were incorporated by reference as part of this variance. In addition, EPA is disapproving the definitions of startup, shutdown, and verified malfunction found in a letter submitted by the State on December 14, 1979.

The variance exempts these units from the particulate emission limits specified in North Carolina Regulation 15 N.C.A.C. 2D.0503, Control of Particulates from Fuel Burning Sources. Under the variance, less stringent interim limits are specified for each unit. These interim limits expire on June 30, 1982, unless sooner revoked, modified, or extended by the State (with the modification or extension finally concurred in by EPA for purposes of federal enforcement). If the State does not act by June 30, 1982, to extend or modify the interim limits, the original particulate matter limits of Regulation 15 N.C.A.C. 2D.0503 will again be in effect for these units as of July 1, 1982.

DATE: These actions are effective September 19, 1980.

ADDRESSES: Copies of the materials submitted in conjunction with this revision are available for public inspection during normal business hours at the following locations:

FOR FURTHER INFORMATION CONTACT: Walter Bishop, Air Programs Branch, U.S. Environmental Protection Agency, Region IV, 345 Courtland Street, NE., Atlanta, Georgia, 30365. 404/881–3286 (FTS 257–3286).

SUPPLEMENTAL INFORMATION: Under the original North Carolina Implementation Plan, the coal-fired power plants of the State's two electric utilities, Duke Power and Carolina Power & Light, are subject to particulate emission limits ranging from 0.10 to 0.14 pounds per million Btu heat imput depending on the size of the electric generating unit (the more stringent limit applies to the larger units). On June 14, 1979, the North Carolina Environmental Management Commission granted the two companies a three-year variance from these limits, which are set forth in Regulation 15 N.C.A.C. 2D.0503 of the State Implementation Plan (SIP), and established interim limits as indicated in the following table. The interim limits are to be met on a continuous basis.

Facility	Original particulate emission limit (number per million Btu)	Revised (interim) particulate emission limit (number per million Btu)
Duke Power:		
Allen	0.10	0.25.
Belews Creek	0.10	0.25.
Buck	0.13	0.23 (Units 3–5, 3–6,4.) 0.20 (Units 5,6).
Cliffside	0.11	0.23 (Units 1,2). 0.20 (Units 3,4). 0.25 (Unit 5).
Dan River	0.14	0.20 (Units 1,2) 0.25 (Unit 3).
Marshal	0.10	0.25
Riverbend	0.12	0.20
Carolina Power & Light:		
Asheville	0.13	0.25.
Cape Fear	0.13	0.25.
Lee	0.13	0.25.
Roxboro	0.10	0.25 (Unit 3 at 1.6. until 1/1/80).
Sutton	0.11	0.25
Weatherspoon	0.13	0.20 (Units 1,2). 0.25 (Unit 3).

These interim limits were submitted for EPA's approval as a plan revision on June 18, 1979. Additional information requested by EPA was submitted on September 7, October 31, and December 14, 1979. The materials submitted by the State in support of the revision show that the interim limits will not adversely affect the attainment and maintenance of the national ambient air quality standards nor cause any violations of the applicable prevention of significant deterioration (PSD) increments for particulate matter.

A potential problem is posed for future expansion in the vicinity of several plants since the State's materials show that a substantial portion, half or more, of the available PSD increment is consumed by the variance granted to Carolina Power & Light's Asheville plant and to Duke Power's Buck, Cliffside, Dan River, and Marshall Plants. In regard to the five plants referenced in the immediately preceding sentence, as well as Cape Fear, Sutton, Weatherspoon, Lee, Cliffside, Riverbend, and Belews Creek, EPA believes that the State has not submitted information adequate to justify the baseline used to determine PSD increment consumption. In the submittal from the State, the baseline was set in every case at the allowable limit as of August 7, 1977, despite stack tests showing lower actual emissions on nearly the same date. In case of future industrial expansion in the area impacted by emissions from these plants, the State will be unable to use the allowable limit to set the baseline unless more information is provided to justify its use. It should be noted that EPA will reevaluate potential increment consumption associated with this SIP revision when EPA promulgates final PSD regulations in light of the decision of *Alabama Power Co. v. Costle,* 13 E.R.C. 1993 (D.C. Cir. 1979). In view of the expected air quality impact of the variance, EPA is approving this revision. This action is taken despite the fact that EPA cannot endorse all of the findings made by the Commission, e.g. "* * * all plants under consideration cannot consistently and continuously comply with the performance standards as set forth in the regulations; this finding is based principally on a recognition of both the technical difficulty and the unreliability inherent in,retroactive application of precipitators to existing plants." (North Carolina Environmental Management Commission Variance for Duke Power and Carolina Power & Light, Findings of Fact No. 5). EPA has refrained from inquiring into the State's technical findings supporting the SIP revision in this case since those revisions meet all requirements set forth in the Clean Air Act, and the regulations and guidance adopted pursuant thereto.

The interim limits remain in effect until June 30, 1982, unless sooner revised, revoked, or extended by the Commission. If the Commission has not done so by that date, the original emission limits of Regulation 15 N.C.A.C. 2D.0503 will automatically apply once more as of July 1, 1982. EPA has obtained confirmation from the State that the above interpretation is correct.

In its Order, the Commission provided for a situation which could arise if the Commission acted by June 30, 1982, but EPA had not yet had time to take final approval/disapproval action on the Commission's action, to preclude any

possible misunderstanding, EPA has secured confirmation from the State of

overlap in certain respects, the comments are consolidated where

and "shutdown," just the undefined exemptions as presented in this SIP

company can find no apparent explanation for this variation.

Air Act would rule out the use of stacks higher than good engineering practice to

the North Carolina Department of Natural Resources and Community

possible misunderstanding, EPA has secured confirmation from the State of EPA's interpretation of the Commission's Order on this point. The correct interpretation of the language of the Commission's Order assuring the continuing effectiveness of the interim limits between any Commission action prior to June 30, 1982, and before EPA action on the resulting SIP revision, if any (if the Commission simply revokes the interim limits, no action by EPA will be called for), is that "EPA approves" means "EPA take final action." This means that for purposes of federal enforcement a modification or extension of the limitation is not effective unless concurred in by EPA in a final action on a SIP revision embodying the modification or extension. During the time before EPA final action on a modification or extension submitted before June 30, 1982, the variance limits remain in effect. Today's approval is based on this understanding.

Since the terms "startup, shutdown, and verified malfunction" are not defined in the State's Implementation Plan or in the variance itself, EPA disapproves the provision in the variance that allows excess emissions during periods of startup, shutdown, and verified malfunction. While the State sent a letter to EPA on December 14, 1979, defining these terms, EPA cannot approve the definitions adopted in this manner because the terms were not adopted by the State after notice and opportunity for a public hearing required by Section 110 of the Clean Air Act and 40 CFR 51.4 and 51.6 (1979).

Under the State Order granting the variance, the companies were required to prepare operation and maintence manuals for their coal-fired plants and submit them for the State's approval. This has been done, and copies of the manuals have been provided to EPA. However, EPA does not consider the manuals as an approvable part of the revision since there was no public hearing concerning the manuals including the definition of startup, shutdown, and verified malfunction contained in the manuals. EPA at this time is taking disapproval action on the manuals and the pertinent definitions contained in the manuals.[1] See 40 CFR 51.4(a) (1979).

These actions were proposed in the **Federal Register** on February 14, 1980 (45 FR 9952). Comments in response to the proposal were made by the two electric utility companies involved in the variance request. Since there comments overlap in certain respects, the comments are consolidated where appropriate for purposes of EPA's response. Responses by EPA to the public comments of Duke Power and Caroline Power & Light are attached to this final rule and are available for public inspection at the locations listed above.

[1] EPA will provide the State with further guidance regarding the drafting of a startup, shutdown, and verified malfunction provision at an early date.

Public Comments

Comment: EPA should not disapprove the provision in the variance that allows excess emissions during periods of startup, shutdown, and verified malfunction. In making this comment, the Duke Power Company (Duke) stated that the operation and maintenance manuals (of Duke and Carolina Power & Light Company (CP&L)) were submitted in a timely manner and have been approved by the (State agency) Director. Duke also asserted that the "startup" and "shutdown" definitions (in the Duke manual) are consistent with long-standing State policy, and that the "malfunction" definition is consistent with EPA-sanctioned definitions.

Response: Since the submitted SIP revision exempts periods of "startup, shutdown, and verified malfunction" from any emission standards, these terms must be clearly defined in the SIP revision itself to prevent this exemption from being open-ended. EPA regulations require that a public hearing be held by the State on this type of SIP revision. See 40 CFR 51.4(a)(1) and 51.6 (c) and (f) (1979). The operation and maintenance manuals were submitted by both Duke and CP&L on November 15 and 20, 1979—well after the State public hearing on the SIP revision on April 4–6, 1979. Since these important definitions and the manuals themselves were not subject to any public scrutiny before or during the State public hearing, they may not be approved by EPA as part of this SIP revision. See also Sections 110(a)(1), (a)(2), and (a)(3) of the Clean Air Act, 42 U.S.C. 7410. The State can resubmit appropriate definitions of these terms to EPA as a future SIP revision after notice and public hearings on these definitions and manuals are afforded.

Comment: EPA should not disapprove the startup and shutdown provisions. As support for this comment, CP&L contended that the precipitator manufacturer recommends that the precipitators not be used during periods of startup and shutdown. CP&L also asserted that "industry practice" makes these concepts sufficiently objective to permit enforcement without a definition being needed.

Response: See immediately preceding Response. EPA has not disapproved the concept of an exemption for "startup" and "shutdown," just the undefined exemptions as presented in this SIP revision. EPA could not approve this exemption based on something as vague and unobjective as "industry practice," which was not described or explained by CP&L.

Comment: No Prevention of Significant Deterioration (PSD) increment is consumed, and no increment consumption analysis is required for this SIP revision. In making this comment Duke asserted that a July 17, 1979, letter from the EPA General Counsel supported this latter position. Duke also requested the Agency to wait until PSD regulations are revised to conform to *Alabama Power Co.* v. *Costle*, 13 E.R.C. 1993 (D.C. Cir. 1979), before deciding whether an increment consumption calculation is needed for this SIP revision.

Response: Although PSD regulations will be revised in the future as a result of *Alabama Power*, the presently-effective definition of "baseline concentration" must be used for analyzing the subject revision. As pertinent here, that definition speaks of actual air quality as of August 7, 1977. 40 CFR 51.24(b)(11) (1979). Since neither CP&L nor Duke has admitted violations of the TSP standards around August 7, 1977, and since performance tests around that time show emissions at or below allowable emission levels, EPA concludes that emissions from the affected sources were at or below allowable levels. Thus, today's relaxation of the TSP standard (allowing higher emissions than before) results in consumption of (part of the) PSD increment. The Preamble to present PSD regulations requires that:

> Any SIP relaxations submitted after (June 19, 1978) that would affect a PSD area must include a demonstration that the applicable increment will not be exceeded. 43 FR 26380 (1978).

The March 17, 1979, letter from the EPA General Counsel does not change this position. That letter concludes that: (1) EPA has considerable discretion in evaluating data to determine baseline concentration; and (2) no increment consumption analysis is necessary if allowable emissions after a SIP revision are no higher than the baseline concentration.

Comment: The increment consumption should be reassessed when EPA changes PSD regulations to conform to *Alabama Power*. This commenter, CP&L, also urges EPA to consider all relevant data when reassessing increment consumption. A reason given for this recommendation is that performance at CP&L plants varies markedly, and the company can find no apparent explanation for this variation.

Response: The Agency will of course reassess increment consumption if such is required in revised PSD regulations conforming to *Alabama Power*. In that event, EPA will consider all relevant information that is also reliable, as has been done for this revision.

Comment: Today's inferim limits should remain in effect after June 30, 1982, if extended by the State, even if EPA final action on an extension is not forthcoming by that date.

Response: A SIP revision (which an extension beyond June 30, 1982, would require in this case) is not effective for federal enforcement purposes unless and until finally approved by EPA. See Section 110(d) of the Clean Air Act, 42 U.S.C. 7410.

Comment: It is inappropriate to speak of a potential problem with regard to new source growth in the vicinity of the Asheville plant because (1) only one-fourth of the annual increment is used by the variance, (2) changes in air quality levels for the annual and 24-hour averaging times are insignificant beyond seven kilometers, and (3) there is sufficient increment remaining close to the plant to permit new source growth, e.g., the doubling of the plant's capacity.

Response: (1) The potential violation of any increment would be sufficient grounds for denying a PSD permit to a proposed source. Thus it is not relevant that a relatively modest portion of one increment is consumed if a quite large portion of another is consumed. (2) Because the consumption of increment is receptor-specific, EPA acknowledges that the potential problem spoken of would not present itself outside of the area quite close to the Asheville plant. (3) EPA required that the Cramer model be used for assessing the effect of the interim limits on the area around the Asheville plant. This model calculated the Class II 24-hour increment consumption as 29 $\mu g/m^3$, or 80 percent of the increment available (36 $\mu g/m^3$), at the point of maximum impact. Since any new emissions would consume increment, since the present units have a maximum 24-hour impact of 61 $\mu g/m^3$, and since only 7 $\mu g/m^3$ of the 24-hour increment remain for the new emissions, it appears quite unlikely that the addition of generating capacity equal to that of the present units could be accommodated under PSD at or near the Asheville plant site. While it is true that new coal-fired units, because of the Federal requirement to scrub sulfur dioxide from the off-gases, could emit a plume having a buoyancy somewhat different from that of the present units, the stack height provisions of the Clean Air Act would rule out the use of stacks higher than good engineering practice to place the modeled maximum impact of the new plume at a receptor well-removed from that at which the present plume has its maximum impact.

Actions: The North Carolina revision is approved except insofar as it allows excess emissions in periods of startup, shutdown, and malfunction. The exemption for excess emissions during startup, shutdown and verified malfunction is disapproved. In addition, the manuals and the definitions of these terms contained therein are not approved nor are the definitions submitted by the State by letter dated December 14, 1979, approved. These actions are effective September 19, 1980.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this final rule is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations, "specialized". This regulation has been reviewed, and it has been determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044. Section 110(a) of the Clean Air Act, 42 U.S.C. 7410(a).

Dated: August 7, 1980.

Douglas M. Costle,

Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart II—North Carolina

1. In § 52.1770 paragraph (c) is amended by adding subparagraph (22) as follows:

§ 52.1770 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified.

* * * * *

(22) Three-year variance for the coal-fired units of Duke Power Company and Carolina Power & Light Company from the particulate emission limits of Regulation 15 N.C.A.C. 2D.0503, with submittals on June 18, September 7, October 31, and December 14, 1979, by the North Carolina Department of Natural Resources and Community Development.

2. Section 52.1781 is added as follows:

§ 52.1781 Control strategy: Sulfur oxides and particulate matter.

The plan's control strategy for particulate matter as outlined in the three-year variance for the coal-fired units of Duke Power Company and Carolina Power & Light Company from the particulate emission limits of Regulation 15 N.C.A.C. 2D.0503, with submittals on June 18, September 7, October 31, and December 14, 1979, by the North Carolina Department of Natural Resources and Community Development, is disapproved only insofar that it provides an exemption for excess emissions during periods of startup, shutdown, and verified malfunction. (See § 52.1770(c)(22).)

BILLING CODE 6560-01-M

VETERANS ADMINISTRATION

41 CFR Part 8–3

Procurement by Negotiation; Small Purchases

AGENCY: Veterans Administration.

ACTION: Final Regulation.

SUMMARY: This amendment to the Veterans Administration Procurement Regulations revises a section to specify that small purchases are to be reserved for the exclusive participation of small business concerns unless offers cannot be obtained from two small business concerns that are competitive with market price and in terms of quality and delivery of the goods or services being purchased. This amendment also increases the imprest fund purchase limitation to $250 per transaction under normal circumstances and $500 per transaction under emergency conditions.

EFFECTIVE DATE: This rule is effective August 27, 1980.

FOR FURTHER INFORMATION CONTACT: Chris A. Figg, Policy and Interagency Service, Office of Supply Services, Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420, (202) 389–2334.

SUPPLEMENTARY INFORMATION: Pub. L. 95–507, October 24, 1978 revised the Small Business Act. One revision specifies that small purchases will be reserved exclusively for small business concerns under specified conditions. Section 8–3.602 is revised to comply with this provision.

V 45 AG 2080 UMI

Section 8-3.604-5 is added to increase the imprest fund purchase limitation to $250 per transaction under normal conditions and $500 per transaction in an emergency. The Department of the Treasury has specifically authorized these limitation revisions due to increased requirements to make cash purchases.

Section 8-3.604-5 is revised to require lesser documentation for imprest fund purchases which do not exceed $25. This revision is intended to better correlate appropriate documentation requirements to the value of individual transactions.

It is the general policy of the Veterans Administration to allow time for interested parties to participate in the regulatory process (§ 1.12, Title 38, CFR). Since this amendment merely implements public law and revises internal administrative restrictions, compliance with notice and public procedure is considered unnecessary.

Approved: August 13, 1980.

By direction of the Administrator.

Rufus H. Wilson,

Deputy Administrator.

PART 8-3—PROCUREMENT BY NEGOTIATION

Subpart 8-3.6—Small Purchases

1. In § 8-3.602, paragraph (a) is revised to read as follows:

§ 8-3.602 Policy.

(a) Pursuant to Pub. L. 95-507, small purchases will be reserved exclusively for small business concerns unless the contracting officer is unable to obtain offers from two or more small business concerns that are competitive with market prices and in terms of quality and delivery of the goods or services being purchased. Such procurements from small business concerns will be considered small business set-asides.

* * * * *

2. In § 8-3.604-6, paragraphs (a) and (b) are revised to read as follows:

§ 8-3.604-6 Procurement and payment.

(a) Each purchase costing $25.00 or more will be supported by a cash register receipt, invoice, sales slip, or other sales document which shall, if possible, contain an itemized listing of the itmes purchased and be signed by the vendor or his/her agent. The cash receipt or sales document shall be furnished by the vendor to whom cash payment is made. Such cash receipt or sales document shall indicate the name of the vendor. When it is not possible to secure the listing of signature, the purchaser (employee authorized to accomplish the cash purchase) shall prepare and sign Standard Form 1165, Receipt for Cash-Subvoucher, listing thereon the name of the vendor and the ariticles or services purchased. The vendor's receipt for cash payment shall be attached to the SF 1165 subvoucher.

(b) Each purchase costing less than $25.00 shall be supported by a receipt for cash or sales document as required in paragraph (a) of this section, except that the signature of the vendor or agent need not be secured. When a receipt is obtained for purchases costing less than $25.00, the SF 1165 is not required. If a receipt cannot be secured, the purchaser shall prepare and sign the SF 1165, listing thereon the name of the vendor and the article or services purchased.

* * * * *

3. In § 8-3.605-3, paragraph (a) is revised to read as follows:

§ 8-3.605-3 Agency order forms.

(a) VA Form 60-2138 (or 90-2138), Order for Supplies or Services, and VA Form 60-2139 (or 90-2139), Order for Supplies or Services (Continuation), provide in one interleaved set of forms a purchase or delivery order, vendor's invoice, and receiving report. They will be used in lieu of and in the same manner as Standard Forms 147 and 148.

BILLING CODE 8320-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 62

National Health Service Corps Scholarship Program

AGENCY: Public Health Service, HHS.

ACTION: Final regulations.

SUMMARY: These regulations set forth the requirements for the award of scholarships under the National Health Service Corps Scholarship Program to students receiving academic training in medicine, osteopathy, dentistry, and other health professions in order to assure an adequate supply of trained health professionals for the National Health Service Corps.

EFFECTIVE DATE: These regulations are effective August 20, 1980.

FOR FURTHER INFORMATION CONTACT: Mrs. Alice Swift, Associate Director for Planning, Evaluation, and Legislation, Division of Health Professions Training Support, Bureau of Health Manpower, Health Resources Administration, 3700 East-West Highway, Center Building, Room 9-50, Hyattsville, MD 20782 (telephone 301-436-6788).

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Health, Department of Health, Education, and Welfare, with the approval of the Secretary of Health, Education, and Welfare published in the **Federal Register** on September 27, 1978 (43 FR 43713), interim-final regulations revoking the existing Part 62 entitled "Public Health and National Health Service Corps Scholarship Training Program" and substituting a new Part 62 entitled "National Health Service Corps Scholarship Program." This new Part 62 establishes the National Health Service Corps Scholarship Program authorized by section 751 of the Public Health Service Act ("Act"), as amended by the Health Planning and Health Services Research and Statistics Extension Act of 1977 (Pub. L. 95-83), the Public Health Services Act Amendments of 1977 (Pub. L. 95-215), and Title II of Pub. L. 96-76.

Section 751 of the Act (42 U.S.C. 294t) authorizes the Secretary to enter into contracts with students who are enrolled in courses of study leading to degrees in medicine, osteopathy, dentistry, or other health professions. Students who enter into the contracts agree to serve 1 year for each year of scholarship support they receive or 2 years, whichever is greater, as members of the National Health Service Corps ("NHSC") providing full-time clinical services in health manpower shortage areas designated under section 332 of the Act and its implementing regulations (42 CFR Part 5).

These regulations were published as interim-final regulations with no proposed rulemaking procedures because of the need to award scholarships for the 1978-79 academic year. However, all interested persons were invited to submit written comments on the interim-final regulations not later than November 27, 1978. All public comments received not later than that date have been considered in the preparation of these final regulations. The Department received comments from private citizens, professional health organizations, universities, and government agencies. The comments and the Department's response to the comments are discussed below. For clarity, the comments and responses are arranged according to the section numbers and titles of the interim-final regulations to which they pertain.

§ 62.2 Definitions.

Section 62.2 of the regulations defines the term "school", in part, as meaning a school of medicine, osteopathy, dentistry or other health profession which provides training leading to a degree of doctor of medicine, osteopathy, dentistry or an appropriate degree for a particular health profession.

With respect to this definition of "school" one commenter noted that not all health professionals receive degrees upon the completion of their academic training and recommended that this definition be revised to read "training leading to a degree of doctor of medicine, osteopathy, dentistry or an equivalent credential for a particular health profession."

The Secretary agrees with the commenter's recommendation and has changed the regulations accordingly.

§ 62.3 Who is eligible to apply for a Scholarship Program award?

Section 62.3 has been amended by adding a new paragraph (c) which provides that individuals who receive scholarship awards under the Indian Health Service Scholarhip Program (section 757 of the Act) or the Scholarship for First-Year Students of Exceptional Financial Need Program (section 758 of the Act) are ineligible to participate in the National Health Service Corps Scholarship Program ("Scholarship Program") while receiving awards under section 757 or 758 of the Act.

This amendment makes explicit the current Scholarship Program policy concerning this matter. It is the Secretary's view that Federal funds appropriated under the three separate programs (sections 757, 758, and the Scholarship Program) should be used effectively and efficiently in assuring the greatest number of health professionals to provide health services in health manpower shortage areas.

§ 62.6 How will individuals be selected to participate in the scholarship program?

Section 62.6(a) sets forth a general description of the procedures which will be used in selecting Scholarship Program participants. That section provides that all applications will first be placed in priority categories described in § 62.6(b) of the regulations, and that these applications will then be evaluated on the basis of the criteria in § 62.6(c) giving special consideration to (1) medical and osteopathic students intending to engage in family practice, internal medicine, pediatrics, or osteopathic general practice residencies following graduation and (2) dentists who intend to undertake general practice training following graduation or who have no plans for post-graduate training.

Three commenters objected to the special consideration provision in § 62.6(a) because in their view it is inflexible and may preclude the NHSC from giving special consideration to health specialties other than those listed (e.g. psychiatry) if it determines that there is a need for these additional health specialties.

The Secretary recognizes the commenter's concern in this instance and has amended the regulations to provide that special consideration will also be given to those applicants who intend to pursue other types of clinical practices or specialized training for which the NHSC has a particular need. These other specialties or clinical practices to be given special consideration will from time-to-time be published in the **Federal Register** and made available to applicants for scholarships.

Section 62.6(c) of the regulations provides that the selection of Scholarship Program participants will be made on the basis of the following criteria: (1) work experience, (2) community background, (3) career goals, (4) faculty recommendation and (5) academic performance. With respect to these selection criteria, one commenter suggested that since the "special consideration" provision in § 62.6(a) is an additional criterion for selection, this provision should be included in the list of criteria set forth in § 62.6(c) of the regulations. In response to this commenter's concern the regulations have been amended to include the special consideration provision under § 62.6(c).

Three commenters stated that the order in which the selection criteria were listed implies that these criteria have weighted values with the greatest weight being assigned to the first listed criteria, and lesser weights being assigned to the remaining factors in descending order.

The Secretary in listing the selection criteria did not intend to suggest that the order of this listing was made on a weighted value basis, but rather intended that the selection criteria be examples of the types of factors which the Secretary will take into consideration in determining which scholarship applications to approve. To clarify the Secretary's intent with respect to the selection of participants in the Scholarship Program, § 62.6(c) has been amended to provide that the Secretary will take into consideration those factors, including work experience, community background, career goals, faculty recommendation, and academic performance which he or she determines necessary to assure effective participation in the Scholarship Program.

Another commenter objected to the implication that continuation awards would be subject to the selection criteria listed in § 62.2(c). In response to this comment, a new § 62.6(e) entitled "Continuation Awards" has been added and § 62.6(a) has been amended to provide that these continuation awards will not be subject to the evaluation and selection criteria in that section.

§ 62.7 What will an individual be awarded for participating in the scholarship program?

One commenter noted that the regulations make no provision for the payment of tuition on or before its due date.

The regulations have not been amended in response to the commenter's notation. It is the Secretary's view that since the payment of tuition will routinely be made following the acceptance of the participant in the NHSC Scholarship Program and the receipt from the school in which the participant is enrolled of a bill for the amount of the tuition, there is no reason for the regulations to specify the timing of the payment.

§ 62.8 What does an individual have to do in return for the scholarship program award?

One commenter suggested that the regulations should include a statement on the minimum salary guaranteed Scholarship Program participants and the option of becoming a "precommissioned" officer in the Commissioned Corps of the Public Health Service.

The Secretary believes that these regulations are not an appropriate mechanism to list the minimum salary levels for Scholarship Program participants while they are fulfilling their service obligations because these levels change yearly for both the Commissioned Corps and the Civil Service and reflect varying degrees of training and experience possessed by Scholarship Program participants. The Secretary notes, however, that the approximate salary levels will be distributed each year in the applicant packets for each eligible health discipline.

With respect to the commenter's second suggestion that the regulations be amended to provide that Scholarship Program participants have the option of

becoming "precommissioned" officers in the Commissioned Corps of the Public Health Service, the Secretary notes that since the authority to appoint officers to the Commissioned Corps is set forth in section 203 of the Act and its implementing regulations (42 CFR Part 21), the regulations need not be amended to supplement this authority.

Section 62.8 of the regulations has been changed to clearly indicate that a participant's period of obligated service under the Scholarship Program will begin when he or she begins providing health services in the health manpower shortage area to which he or she is assigned by the Secretary.

Another commenter requested that the rules and regulations governing the release from service obligations under section 753 of the Act be clearly and completely explained to all scholarship participants.

The Secretary is currently developing policy and programmatic guidelines for implementation of section 753. All scholarship recipients will be provided with these guidelines in the near future.

Section 62.8(f) of the regulations provides that any participant who demonstrates exceptional promise for medical research may perform his or her Scholarship Program service obligation by participating in the National Research Service Award ("NRSA") Program for individual Postdoctoral Fellows (section 472 of the Act). This section also provides that any individual who participates in this NRSA Program will receive credit toward satisfying the service obligation owed under the Scholarship Program for the period of time he or she is engaged in activities meeting the service requirements of the NRSA Program. In addition, any individual whose time served under the NRSA Program is less than his or her total Scholarship Program obligation must serve the remainder of this total Scholarship Program obligation as a member of the NHSC.

This section of the regulations has been amended to provide that any individual whose period of service under the NRSA Program is less than the total service obligation owed under the Scholarship Program may complete the remainder of his or her Scholarship Program service obligation (1) by engaging in research activities which meet the service criteria of the NRSA Program, or (2) as a member of the NHSC providing health services in the full-time clinical practice of his or her profession. This amendment gives the Secretary the flexibility of allowing an individual whose Scholarship Program service obligation is greater than the period of time served under the NRSA Program to engage in approved research activities for the remainder of his or her Scholarship Program service obligation.

§ 62.9 Under what circumstances can the period of obligated service be deferred to complete approved graduate training?

Three commenters objected to the three-year limitation on the period of time for which the obligated service of a physician may be deferred to complete graduate training, noting that physicians require a longer post-graduate training period to become fully trained psychiatrists. Two other commenters suggested that the regulations be amended to allow deferment for any period of time necessary to complete specialty training.

Section 752(b)(5)(A) (as in effect on September 28, 1979) authorized the Secretary to defer, upon request of a participant receiving a degree from a school of medicine, osteopathy, or dentistry, the beginning of that participant's service obligation "until the end of the period of time (not to exceed three years) required to complete an internship, residency or other advanced clinical training." However, on September 29, 1979, section 752(b)(5)(A) of the Act was amended by Title II, section 202 of Pub. L. 96-76 to provide that the period of the ferment to complete internship, residency or other advanced clinical training for participants receiving degrees from schools of medicine, osteopathy or dentistry may not exceed three years or "such greater period as the Secretary, consistent with the needs of the Corps, may authorize." This amendment also provides that participants who receive degrees from schools of veterinary medicine, optometry, podiatry or phamacy will, upon request, receive a deferment to complete internship, residency or other advanced clinical training for a period "not to exceed one year or such greater period as the Secretary, consistent with the needs of the Corps, may authorize." Thus, this amendment creates a new category of participants whose service obligations may be deferred upon request (veterinarians, optometrists, podiatrists, and pharmacists) and authorizes the Secretary to extend the period of deferment for this new category as well as the existing category of physicians, osteopaths, and dentists, if the Secretary determines that this extension is consistent with the needs of the NHSC. Sections 62.9 and 62.2 (definition of approved graduate training) of the regulations have been changed to reflect these statutory amendments.

Section 62.9(a) of the regulations provides that any Scholarship Program recipient who receives a degree in medicine or osteopathy and who does not intend to enter an approved graduate training program under section 752(b)(5)(A) of the Act, as amended, must complete at least one year of approved graduate training relating to primary care before beginning his or her period of obligated service. Specifically, the regulations provide that this one year of primary care training must be in (1) an allopathic flexible first-year program whose sponsorship includes approved residencies in family practice, internal medicine, or pediatrics, or a categorical first-year program in family practice, internal medicine or pediatrics, or (2) a rotating internship in osteopathic medicine.

The purpose of this requirement is to assure that physicians who begin their service obligations will be qualified to engage in the delivery of primary care in the NHSC. The Secretary notes, however, that since medical residencies are evolving in nature, there may be training programs other than those described in § 62.9(a) which provide in their first year the experience necessary to assure that physicians are qualified to deliver health services in the NHSC. Thus, the regulations have been changed to provide that in addition to the programs described in § 62.9(a) this required one year training can be in "such other programs as the Secretary determines provides comparable experience."

§ 62.10 What will happen if an individual does not comply with the terms and conditions of participating in the scholarship program?

One commenter noted that the two-year period of repayment under section 62.10(b) for participants who fail to maintain an acceptable level of academic training, are dismissed from school for disciplinary reasons, or voluntarily terminate their course of study, is unreasonable because it places an undue hardship upon an individual who is no longer in school and who presumably does not have the financial resources to repay the default penalty.

The Secretary recognizes the commenter's concern and has amended the period of repayment under § 62.10(b) from 2 to 3 years.

One commenter noted that the $1,500 liquidated damage penalty in section 754(a) of the Act for failure to accept payment of the scholarship award places the applicant at a severe disadvantage, and suggested that any individual whose application for a scholarship is approved should be given a ten day grace period following the notification of acceptance in the Scholarship Program to reject the scholarship award without penalty. The Secretary believes that the suggested change is not necessary because consistent with the statutory scheme of the Scholarship Program authority each individual whose application for participation is approved by the Secretary will be notified of this approval and given an opportunity to accept this offer of participation before the Secretary signs his or her Scholarship Program contract. The specific amount of time to be allowed for acceptance of the offer will be published in the application materials.

One respondent objected to the "exorbitant" default penalty in section 754(c) of the Act which requires, in part, that any participant who fails to begin his or her service obligation must repay an amount equal to three times the total scholarship award (including interest). The Secretary notes that Congress adopted the substantial default penalty in section 754(c) in order to emphasize that the purpose of the Scholarship Program is to obtain health services for health manpower shortage areas and not to "subsidize health professional education". Thus, in light of this clear congressional intent and the statutory language in section 754(c), the regulations have not been changed in response to the commenter's objection.

Finally, the Department has made a number of editorial changes to clarify the regulations. Accordingly, the existing Part 62 of 42 CFR is revoked and a new Part 62 is adopted to read as set forth below.

Dated: April 8, 1980.

Charles Miller,

Acting Assistant Secretary for Health.

Approved: August 7, 1980.

Patricia Roberts Harris,

Secretary.

PART 62—NATIONAL HEALTH SERVICE CORPS SCHOLARSHIP PROGRAM

Sec.

62.1 What is the scope and purpose of the National Health Service Corps scholarship program?
62.2 Definitions.
62.3 Who is eligible to apply for a scholarship program award?
62.4 To whom will scholarship program awards be available in addition to those individuals pursuing courses of study leading to degrees in medicine, osteopathy or dentistry?
62.5 How is application made for a scholarship program award?
62.6 How will individuals be selected to participate in the scholarship program?
62.7 What will an individual be awarded for participating in the scholarship program?
62.8 What does an individual have to do in return for the scholarship program award?
62.9 Under what circumstances can the period of obligated service be deferred to complete approved graduate training?
62.10 What will happen if an individual does not comply with the terms and conditions of participating in the scholarship program?
62.11 When can a scholarship program payment obligation be discharged in bankruptcy?
62.12 Under what circumstances can the service or payment obligation be canceled, waived, or suspended?
62.13 What are the limitations on the receipt of concurrent benefits?
62.14 What are the special provisions relating to recipients of awards under the PH/NHSC scholarship training program who will also receive awards under the scholarship program?

Authority: Sec. 215 of the Public Health Service Act, 58 Stat. 690, as amended, 63 Stat. 35 (42 U.S.C. 216); Sec. 751 of the Public Health Service Act, 90 Stat. 2281 (42 U.S.C. 294t).

§ 62.1 What is the scope and purpose of the National Health Service Corps scholarship program?

These regulations apply to the award of scholarships under the National Health Service Corps Scholarship Program authorized by section 751 of the Public Health Service Act (42 U.S.C. 294t) to students receiving academic training in medicine, osteopathy, dentistry, and other health professions. The purpose of this program is to assure an adequate supply of trained health professionals for the National Health Service Corps which is used by the Secretary to improve the delivery of health services in health manpower shortage areas.

§ 62.2 Definitions.

As used in this part:

"Acceptable level of academic standing" means the level at which a full-time student retains eligibility to continue in attendance in school under the school's standards and practices.

"Act" means the Public Health Service Act, as amended.

"Approved graduate training" means those programs of graduate training in medicine, osteopathy, dentistry or other health professions which (a) lead to eligibility for board certification or which provide other evidence of completion, and (b) have been approved by the appropriate health professions body as determined by the Secretary.

"Full-time student" means an individual pursuing a course of study leading to a degree in medicine, osteopathy, dentistry or an equivalent credential for a particular health profession who is enrolled for a sufficient number of credit hours in any academic term to complete the course of study within not more than the number of academic terms normally required at the school. If an individual is enrolled in a school and is pursuing a course of study which is designed to be completed in more than 4 years, the individual will be considered a full-time student for only the last 4 years of the course of study.

"Health manpower shortage area" means the geographic area, the population group, the public or nonprofit private medical facility, or other public facility which has been determined by the Secretary to have a shortage of health manpower under section 332 of the Act and its implementing regulations (42 CFR Part 5).

"National of the United States" means a citizen of the United States or a person who, though not a citizen of the United States, owes permanent allegiance to the United States.

"Public Health and National Health Service Corps Scholarship Training Program", or "PH/NHSC Scholarship Training Program", means the program authorized by section 225 of the Act as in effect on September 30, 1977, and repealed on October 1, 1977.

"Scholarship Program" means the National Health Service Corps Scholarship Program authorized by section 751 of the Act (42 U.S.C. 294t).

"Scholarship Program participant" or "participant" means an individual whose application to the Scholarship Program has been approved and whose contract has been accepted and signed by the Secretary.

"School" means a school of medicine, osteopathy, dentistry, or other health profession which (a) provides training leading to a degree of doctor of medicine, doctor of osteopathy, doctor of dentistry, or an equivalent credential for a particular health profession, and (b) which is accredited by a body or bodies recognized for accreditation purposes by the Secretary of Education.

"School year" means all or part of the 12-month period from July 1 through June 30 during which an applicant is enrolled in a school as a full-time student.

"Service" means the United States Public Health Service.

"Secretary" means the Secretary of Health and Human Services and any other officer or employee of the Department of Health and Human Services to whom the authority involved has been delegated.

"State" means one of the several States, the District of Columbia, the

Commonwealth of Puerto Rico, the Northern Mariana Islands, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

§ 62.3 Who is eligible to apply for a scholarship program award?

(a) To be eligible for a scholarship under this part an applicant must:

(1) Be accepted for enrollment, or be enrolled, as a full-time student in a school located in a State;

(2) Be pursuing a course of study or program offered by the school leading to a degree in medicine, osteopathy, dentistry, or an equivalent credential for a particular health profession;

(3) Be eligible for, or hold, an appointment as a commissioned officer in the Regular or Reserve Corps of the Service or be eligible for selection for civilian service in the National Health Service Corps;

(4) Be a National of the United States; and

(5) Submit an application to participate in the Scholarship Program together with a signed contract as described in section 751(f) of the Act.

(b) Any applicant who owes an obligation for professional practice to a State or other entity under an agreement entered into before filing an application under this part is ineligible for an award unless a written statement satisfactory to the Secretary is submitted from the State or entity that (1) there is no potential conflict in fulfilling the service obligation to the State or entity and the Scholarship Program, and that (2) the Scholarship Program service obligation will be served before the service obligation for professional practice owed to the State or entity.

(c) Any individual who receives a scholarship under the Indian Health Service Scholarship Program (section 757 of the Act) or the Scholarship Program for First-Year Students of Exceptional Financial Need (section 758 of the Act) is ineligible to participate in the Scholarship Program during the School year(s) for which the scholarships under sections 757 or 758 of the Act were awarded.

§ 62.4 To whom will scholarship program awards be available in addition to individuals pursuing courses of study leading to degrees in medicine, osteopathy, or dentistry?

The Secretary will, from time-to-time, publish in the **Federal Register** a list of those health professions in addition to medicine, osteopathy, and dentistry for which the National Health Service Corps has need and for which support is available. The Secretary will also publish any other eligibility criteria, in addition to those in § 62.3, that may be required to assure that participants can be utilized during their periods of obligated service in a manner that will best meet the needs of the National Health Service Corps.

§ 62.5 How is application made for a scholarship program award?

Each individual desiring a scholarship under this part must submit an application (including a signed contract as required under section 751(f) of the Act) in the form and at the time prescribed by the Secretary.

62.6 How will individuals be selected to participate in the scholarship program?

(a) *General.* In deciding which applications for participation in the Scholarship Program will be approved, the Secretary will place the applications into categories based upon the selection priorities described in paragraph (b) of this section. Except for continuation awards (see paragraph (e) of this section) the Secretary will then evaluate each applicant under paragraph (c) of this section.

(b) *Priorities.* (1) First priority will be given to individuals who have previously received a scholarship under the PH/NHSC Scholarship Training Program, a scholarship under this Scholarship Program, or a scholarship under section 758 of the Act, authorizing scholarships for first-year students of exceptional financial need. (2) Second priority will be given to applicants who are entering their first year of study.

(c) *Selection.* (1) In selecting participants, the Secretary will take into consideration those factors which he or she determines necessary to assure effective participation in the Scholarship Program. These factors may include, but not be limited to (i) work experience, (ii) community background, (iii) career goals, (iv) faculty recommendation, and (v) academic performance.

(2) Special consideration will be given to (i) medical and osteopathic students who indicate their intention to enter family practice, internal medicine, pediatrics, or osteopathic general practice residencies, (ii) dental students who indicate their intention to undertake general practice training following graduation or who plan no postgraduate training, and (iii) those individuals who indicate an intent to pursue other types of clinical practice or specialized training for which the National Health Service Corps has a particular need.

(d) *Duration of Scholarship award.* Subject to the availability of funds for the Scholarship Program, the Secretary will award a participant a scholarship under this part for a period of 1 school year.

(e) *Continuation awards.* Subject to the availability of funds for the Scholarship Program, the Secretary will award a continuation scholarship if (1) the participant requests a continuation, (2) the award will not extend the total period of Scholarship Program support beyond 4 years, and (3) the participant is eligible for continued participation in the Scholarship Program.

§ 62.7 What will an individual be awarded for participating in the scholarship program?

(a) *Amount of Scholarship.* (1) A scholarship award for each school year will consist of (i) tuition, (ii) reasonable educational expenses, including required fees, books, supplies, and required educational equipment, and (iii) a monthly stipend for the 12-month period beginning with the first month of each school year in which the individual is a participant. For purposes of this section "required fees" means those fees which are charged by the school to all students pursuing a similar curriculum and "required educational equipment" means educational equipment which must be rented or purchased by all students pursuing a similar curriculum at that school.

(2) The Secretary may enter into a contract with the school in which the participant is enrolled for the direct payment of tuition and reasonable educational expenses in the participant's behalf.

(b) *Payment of Scholarship: leave-of-absence; repeated course work.* The Secretary will suspend scholarship payments to or on behalf of a participant if the school (1) approves a leave-of-absence for the participant for health, personal, or other reasons, or (2) requires the participant to repeat course work for which the Secretary has previously made scholarship payments under § 62.7. However, if the repeated course work does not delay the participant's graduation date, scholarship payments will continue except for any additional costs relating to the repeated course work. Any scholarship payments suspended under this paragraph will be resumed by the Secretary upon notification by the school that the participant has returned from the leave-of-absence or has completed the repeated course work and is pursuing as a full-time student the course of study for which the scholarship was awarded.

§ 62.8 What does an individual have to do in return for the scholarship program award?

(a) *General.* Except as provided in paragraphs (d), (f), and (g) of this section, each participant is obligated to (1) become a member of the National Health Service Corps employed as a Commissioned Officer in the Regular or Reserve Corps of the Service or as a Federal civilian in the full-time clinical practice of the participant's profession and (2) serve in the health manpower shortage area to which the participant is assigned by the National Health Service Corps.

(b) *Beginning of Service.* (1) The period of obligated service will begin when the Scholarship Program participant begins to provide services in the health manpower shortage area to which he or she is assigned by the Secretary. Except for those participants who receive a deferral under § 62.9 (a) or (b), this assignment will be made by the Secretary as soon as possible following: (i) the completion of the participant's course of study leading to a degree in medicine, osteopathy, dentistry, or an equivalent credential for a particular health profession, and (ii) appointment of the participant as a Commissioned Officer in the Regular or Reserve Corps of the Service or as a civilian member of the National Health Service Corps.

(2) For purposes of this paragraph, "appointment" means only those appointments as Commissioned Officers in the Regular or Reserve Corps of the Service or as civilian members of the National Health Service Corps made specifically for the purpose of serving a participant's period of obligated service.

(c) *Duration of service.* Except as provided in § 62.14(b)(1), the period for which the Scholarship Program participant is obligated to serve is equal to 1 year for each school year for which the participant receives a scholarship award under this part, or 2 years, whichever is greater.

(d) *Service by detail.* If the Secretary determines that there is no need in a health manpower shortage area for a member of the profession in which the Scholarship Program participant is obligated to provide service, the Scholarship Program participant may be detailed to serve the period of obligated service as a full-time member of the profession for which the participant has been trained, in any unit of the Department of Health and Human Services as the Secretary may determine.

(e) *Creditability of approved graduate training.* Except as provided in § 62.14(b)(2), no period of approved graduate training will be credited toward satisfying the period of obligated service incurred under the Scholarship Program.

(f) *Service under the National Research Service Award Program.* (1) A Scholarship Program participant who demonstrates exceptional promise for medical research may perform the period of obligated service owed under this section by participating in the National Research Service Award Program for individual postdoctoral fellows authorized under section 472 of the Act.

(2) Exceptional promise for medical research will be demonstrated if the participant applies for a National Research Service Award for individual postdoctoral fellows, is selected to participate in this research program, and accepts the offer of participation. A Scholarship Program participant in the National Research Service Award Program will receive credit toward satisfying the period of obligated service incurred under this section for any period of time he or she is engaged in activities which meet the service requirements of the National Research Service Award Program.

(3) If the time served under the National Research Service Award Program is less than the total period of obligated service owed under the Scholarship Program, the participant will serve the remainder of the Scholarship Program service obligation (i) in activities which meet the criteria for service under the National Research Service Award Program, as approved by the Secretary or (ii) as a member of the National Health Service Corps providing health services in the full-time clinical practice of his or her health profession. A participant who fails to begin or complete the service requirements under the National Research Service Award Program may be subject to the default penalty under § 62.10(c) of this part and the default penalties under the National Research Service Award Program.

(g) *Release from service obligation to engage in private practice.* The Secretary will release a participant from all or part of the service obligation if the participant applies for a release under section 753 of the Act and agrees in writing to engage for a period equal to the remaining period of the participant's service obligation in the full-time private clinical practice of the participant's health profession, under the requirements of section 753 of the Act.

§ 62.9 Under what circumstances can the period of obligated service be deferred to complete approved graduate training?

(a) *Requested Deferment.* Upon the request of any participant receiving a degree from a school of medicine, osteopathy, or dentistry, veterinary medicine, optometry, podiatry or pharmacy, the Secretary will defer the beginning date of the obligated service to allow the participant to complete an approved graduate training program. The period of this deferment may not exceed (1) three years for any participant receiving a degree from a school of medicine, osteopathy or dentistry, or (2) one year for any participant recieving a degree from a school of veterinary medicine, optometry, podiatry or pharmacy. The Secretary may, however, extend this period of deferment if the Secretary determines that the extension is consistent with the needs of the National Health Service Corps.

(b) *Required Deferment.* Each participant receiving a degree in medicine or osteopathy who does not intend to enter training which can be completed within the deferment period granted under paragraph (a) of this section must complete at least one year of approved graduate training before beginning the period of obligated service. This one year of training must be in (1) an allopathic flexible first-year program whose sponsorship includes approved residencies in family practice, internal medicine, pediatrics, or a categorical first-year program in family practice, internal medicine, or pediatrics; (2) a rotating internship in osteopathic medicine; or (3) such other programs as the Secretary determines provides comparable experience. Any participant receiving a degree in medicine or osteopathy who fails to complete the one year of required training or an approved graduate training program for which a deferment was granted under paragraph (a) of this section will be subject to the default penalties of § 62.10(c).

(c) *Altering Deferment.* Before altering the length or type of approved graduate training for which the period of obligated service was deferred under paragraphs (a) or (b) of this section, the participant must request and obtain the Secretary's approval of the alteration.

(d) *Additional Terms of Deferment.* The Secretary may prescribe additional terms and conditions for deferment under paragraphs (a), (b), and (c) of this section as necessary to carry out the purposes of the Scholarship Program.

(e) *Beginning of Service After Deferment.* Any participant whose period of obligated service has been

deferred under paragraphs (a) or (b) of

complete the period of obligated service,

which so intrude on the participant's

scholarship under the PH/NHSC

FEDERAL EMERGENCY

purchase flood insurance at rates made

deferred under paragraphs (a) or (b) of this section must begin the obligated service when the participant begins to provide health services in the health manpower shortage area to which he or she is assigned by the Secretary. This assignment will be made by the Secretary as soon as possible following (1) the completion of the requested or required graduate training for which the deferment was granted, and (2) appointment as a Commissioned Officer in the Regular or Reserve Corps of the Service or as a civilian member of the National Health Service Corps.

§ 62.10 What will happen if an individual does not comply with the terms and conditions of participating in the scholarship program?

(a) If a participant, other than one described in paragraph (b) of this section, fails to accept payment or instructs the school not to accept payment of the scholarship provided by the Secretary, the participant must, in addition to any service or other obligation incurred under the contract, pay to the United States the amount of $1,500 liquidated damages. Payment of this amount must be made within 30 days of the date on which the participant fails to accept payment of the scholarship award or instructs the school not to accept payment.

(b) When a participant fails to maintain an acceptable level of academic standing, is dismissed from the school for disciplinary reasons, or voluntarily terminates the course of study or program for which the scholarship was awarded before completing the course of study or program, the participant must, instead of performing any service obligation, pay to the United States an amount equal to all scholarship funds awarded under § 62.7. Payment of this amount must be made within 3 years of the date the participant becomes liable to make payment under this paragraph.

(c) If a participant fails to begin or complete the period of obligated service incurred under § 62.8, including failing to comply with the applicable terms and conditions of a deferment granted by the Secretary, the participant must pay to the United States an amount determined by the formula set forth in section 754(c) of the Act. Payment of this amount shall be made within 1 year of the date that the participant failed to begin or complete the period of obligated service, as determined by the Secretary.

§ 62.11 When can a scholarship program payment obligation be discharged in bankruptcy?

In accordance with section 754(d)(3) of the Act, any payment obligation incurred under § 62.10 may not be discharged in bankruptcy under Title XI of the United States Code until 5 years after the date on which the payment obligation is due.

§ 62.12 Under what circumstances can the service or payment obligation be canceled, waived or suspended?

(a) Any obligation of a participant for service or payment will be canceled upon the death of the participant.

(b)(1) A participation may seek a waiver or suspension of the service or payment obligations incurred under this part by written request to the Secretary setting forth the bases, circumstances, and causes which support the requested action. The Secretary may approve a request for a suspension for a period of 1 year. A renewal of this suspension may also be granted.

(2) The Secretary may waive or suspend any service or payment obligation incurred by a participant whenever compliance by the participant (i) is impossible, or (ii) would involve extreme hardship to the participant and if enforcement of the service or payment obligation would be against equity and good conscience.

(c) Compliance by a participant with a service or payment obligation will be considered impossible if the Secretary determines, on the basis of information and documentation as may be required, that the participant suffers from a physical or mental disability resulting in the permanent inability of the participant to perform the service or other activities which would be necessary to comply with the obligation.

(d) In determining whether to waive or suspend any or all of the service or payment obligations of a participant as imposing an undue hardship and being against equity and good conscience, the Secretary, on the basis of information and documentation as may be required, will consider:

(1) The participant's present financial resources and obligations;

(2) The participant's estimated future financial resources and obligations; and

(3) The extent to which the participant has problems of a personal nature, such as physical or mental disability, terminal illness in the immediate family which so intrude on the participant's present and future ability to perform as to raise a presumption that the individual will be unable to perform the obligation incurred.

§ 62.13 What are the limitations on the receipt of concurrent benefits?

Under section 741(f) or 836(h) of the Act, the Secretary may agree to repay a portion of an individual's educational loans in return for the individual's agreement to practice his or her profession in an area in need of health manpower. However, a Scholarship Program participant may not enter into an agreement with the Secretary under section 741(f) or 836(h) of the Act, until either (1) the participant has completed the service obligation under the Scholarship Program, (2) the Secretary has recovered from the participant an amount determined under § 62.10, or (3) any service or payment obligation has been waived under § 62.12. In no case shall a scholarship received under these regulations be considered an educational loan for the purposes of section 741(f) or 836(h) of the Act.

§ 62.14 What are the special provisions relating to recipients of awards under the PH/NHSC scholarship training program who will also receive awards under the scholarship program?

(a) Except as provided in paragraph (b) of this section, if a participant has previously received an award under the PH/NHSC Scholarship Training Program and also receives an award under the Scholarship Program, the terms and conditions of these regulations will apply to the participant's entire obligation incurred under both the PH/NHSC Scholarship Training Program and the Scholarship Program.

(b) If a participant has received an award under the PH/NHSC Scholarship Training Program and also receives an award under the Scholarship Program, the following conditions apply:

(1) *Period of obligated service—carry over.* The period of obligated service owed by the participant is equal to the total number of school years for which scholarship support was awarded under both the PH/NHSC Scholarship Training Program and the Scholarship Program without regard to either Program's minimum support requirement under 42 CFR 62.7(a) (1976) as adopted on May 22, 1974 (see 39 FR 17962), and under § 62.8(c) of this part.

(2) *Credit for internship and residency training.* (i) If a participant received a scholarship under the PH/NHSC Scholarship Training Program for any school year beginning before October 12, 1976, the participant will receive credit toward satisfying the periods of obligated service incurred under the PH/NHSC Scholarship Training Program and under § 62.8 of this part for any periods of internship or residency training served in a Service or National Health Service Corps facility.

(ii) If a participant received a scholarship for the first time during the 1977–78 school year under the PH/NHSC Scholarship Training Program, the participant will only receive 1 year of credit toward satisfying the period of obligated service incurred under the PH/NHSC Scholarship Training Program for internship or residency training served in a Service or National Health Service Corps facility.

(3) *Default penalties.* The PH/NHSC Scholarship Training Program default penalty will apply to a participant who fails to begin or complete the active duty service obligation incurred under that Program, and the § 62.10 default penalties will apply to a participant who fails to begin or complete the service obligation incurred under § 62.8 of these regulations. In determining which default penalty to apply when an individual who has received a Scholarship award under both the PH/NHSC Scholarship Training Program and the Scholarship Program fails to begin or complete his service obligation, the service obligations will be considered to have been served in the order in which they were incurred.

[FR Doc. 80-24838 Filed 8-19-80; 8:45 am]

BILLING CODE 4110-83-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 5876]

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fifth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638–8620.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, (202) 426–1460 or Toll Free Line 800–424–8872, Room 5150, 451 Seventh Street, SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Federal Insurance Administrator has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

OMB Circular A–95 regarding State and local clearinghouse review of Federally assisted programs and projects is applicable.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

§ 64.6 List of eligible communities.

State	County	Location	Community No.	Effective date of authorization of sale of flood insurance for area	Hazard area identified
Colorado	Otero County	Rock Ford, city of	080135	750527 emerg., 800603 reg	740405

Issued: August 4, 1980.

Gloria M. Jimenez,

Federal Insurance Administrator.

[FR Doc. 80-24697 Filed 8-19-80; 8:45 am]

BILLING CODE 4210-23-M

44 CFR Part 64

[Docket No. FEMA 5078]

Suspension of Community Eligibility Under the National Flood Insurance Program

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities where the sale of flood insurance, as authorized under the National Flood Insurance Program (NFIP), will be suspended because of noncompliance with the flood plain management requirements of the program.

EFFECTIVE DATES: The third date ("Susp.") listed in the fifth column.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 et seq.). Accordingly, the communities are suspended on the effective date in the fifth column, so that as of that date subsidized flood insurance is no longer available in the community.

In addition, the Federal Insurance Administrator has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), as amended, provides that no direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP, with respect to which a year has elasped since identification of the community as having flood prone areas, as shown on the Office of Federal Insurance and Hazard Mitigation's initial flood insurance map of the community. This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table

§ 64.6 List of suspended communities.

State	County	Location	Community No.	Effective dates of authorization/ cancellation of sale of flood insurance in community	Special flood hazard area identified	Date [1]

BILLING CODE 6718-03-M

44 CFR Part 65

[Docket No. FEMA 5877]

List of Communities With Special Hazard Areas Under the National Flood Insurance Program

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: This rule identifies communities with areas of special flood, mudslide, or erosion hazards as authorized by the National Flood Insurance Program. The identification of such areas is to provide guidance to communities on the reduction of property losses by the adoption of appropriate flood plain management or other measures to minimize damage. It will enable communities to guide future construction, where practicable, away from locations which are threatened by flood or other hazards.

EFFECTIVE DATES: The effective date shown at the top right of the table or September 19, 1980, whichever is later.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert G. Chappell, National Flood Insurance Program, (202) 426–1460 or Toll Free Line 800–424–8872, Room 5150, 451 Seventh Street, SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The Flood Disaster Protection Act of 1973 (Pub. L. 93–234) requires the purchase of flood insurance on and after March 2, 1974, as a condition of receiving any form of Federal or federally related financial assistance for acquisition or construction purposes in an identified flood plain area having special flood hazards that is located within any community participating in the National Flood Insurance Program.

One year after the identification of the community as flood prone, the requirement applies to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction in these areas unless the community has entered the program. The prohibition, however, does not apply in respect to conventional mortgage loans by federally regulated, insured, supervised, or approved lending institutions.

This 30 day period does not supersede the statutory requirement that a community, whether or not participating in the program, be given the opportunity for a period of six months to establish that it is not seriously flood prone or that such flood hazards as may have existed have been corrected by floodworks or other flood control methods. The six months period shall be considered to begin September 19, 1980, or the effective date of the Flood Hazard Boundary Map, whichever is later. Similarly, the one year period a community has to enter the program under section 201(d) of the Flood Disaster Protection Act of 1973 shall be considered to begin September 19, 1980, or the effective date of the Flood Hazard Boundary Map, whichever is later.

This identification is made in accordance with Part 64 or Title 44 of the Code of Federal Regulations as authorized by the National Flood Insurance Program (42 U.S.C. 4001–4128).

Section 65.3 is amended by adding in alphabetical sequence a new entry to the table:

BILLING CODE 6718-03-C

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development

elevations are listed below for selected locations in the nation.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives

Final Base (100-Year) Flood Elevations—Continued

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968); effective Jan. 28, 1969 (33 F.R. 17804, Nov. 28, 1968), as amended, 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator)

Issued: August 4, 1980.

Gloria M. Jimenez,

Federal Insurance Administrator.

[FR Doc. 80-24694 Filed 8-19-80; 8:45 am]

BILLING CODE 6718-03-M

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the nation.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required either to adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, (202) 426–1460 or Toll Free Line (800) 424–8872 (In Alaska and Hawaii call Toll Free Line (800) 424–9080), Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determination of flood elevation for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 67). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

The final base (100-year) flood elevations for selected locations are:

Final Base (100-Year) Flood Elevations

State	City/town/county	Source of flooding	Location	#Depth in feet above ground *Elevation in feet (NGVD)
Alabama	City of Brownville, Jefferson County (FEMA–5817).	Unnamed Creek 45	Just upstream of Avenue K	*526
			Just upstream of Louisville & Nashville Railroad	*539
	Maps available for inspection at City Hall, 2120 Avenue K, Brownville, Alabama 35020.			
Alabama	City of Midfield, Jefferson County (FEMA–5817).	Valley Creek	Just upstream of Midfield Road	*509
		Unnamed Creek	Just upstream of Collier Drive	*506
			Just downstream of Short Street	*511
	Maps available for inspection at City Hall, 390 Midfield Street, Midfield, Alabama 35228.			
Arizona	Peoria, City, Maricopa county (FEMA–5798).	New River	Northern Avenue	*1,080
			99th Avenue	*1,092
			Mountain View Road	*1,198
			Peoria Avenue	*1,112
			Atchison, Topeka and Sante Fe Railroad	*1,140
			Upstream side of Thunderbird Road	*1,155
			5,400' downstream of Bell Road	*1,175
			Bell Road	*1,204
			Union Hill Drive	*1,230
			Beardsley Road	*1,253
			Deer Valley Road	*1,282
			Pinnacle Peak Road	*1,311
		Agua Fria River	Bell Road (Extended)	*1,162
			Beardsley Road (Extended)	*1,188
		Skunk Creek	Confluence with New River	*1,167
			83rd Avenue	*1,180
			Greenway Road	*1,184
			Arizona Canal	*1,205
			Upstream Corporate Limits	*1,210
	Maps available at the City Hall Complex, 8355 West Peoria Avenue, Peoria, Arizona.			
California	Whittier (City), Los Angeles County, FEMA–5817.	Turnbull Canyon	50 feet northeast of the intersection of Painter Avenue and Camilla Street.	*418
			Intersection of Sycamore Drive and Broadway	#1
		Savage Creek	150 feet north of intersection of Vista Street and York Avenue	*380
		San Gabriel River	Area bounded between Durfee Avenue and Siphon Road	*220
	Maps available at City Hall, 13230 Penn Street, Whittier, California			
Connecticut	Deep River, Town, Middlesex County (Docket No. FEMA–5725).	Deep River	Connecticut Valley Railroad (Upstream side)	*11
			Dam No. 1 (Downstream side)	*19
			Dam No. 1 (Upstream side)	
			State Route 9A (Upstream side)	*21
			Dam No. 3 (Downstream side)	*29
			Dam No. 3 (Upstream side)	*39
			Bridge Street (Upstream side)	*41
			Dam No. 4 (Downstream side)	*43
			Dam No. 4 (Upstream side)	*45
			Middle crossing of Elm Street (Upstream side)	*47
			State Route 9 Northbound (Downstream side)	*57
			State Route 9 Southbound (Upstream side)	*62
			Upstream crossing of Elm Street (Upstream side)	*73

Final Base (100-Year) Flood Elevations—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground *Elevation in feet (NGVD)
			Dam No. 5 (Downstream side)	*78
			Dam No. 5 (Upstream side)	*83
			Dam No. 6 (Downstream side)	*115
			Dam No. 6 (Upstream side)	*129
		Connecticut River	Entire length within community	*11
	Maps available at the Town Hall, Deep River, Connecticut.			
Connecticut	Stamford (City), Fairfield County, FEMA–5815.	Mianus River	50 feet upstream from center of Merribrook Lane	*103
			Intersection of river and center of Farms Road	*193
		Rippowan River	Intersection of Green Place and Renwick Street	*22
			100 feet upstream from center of Cold Spring Road	*41
			Intersection of Black Road and Wire Mill Road	*137
		Noroton River	Intersection of river and center of Glen Terrace	*41
			Intersection of river and center of Camp Avenue	*75
		Toilsome Brook	25 feet upstream from intersection of brook and center of West Lane	*56
		Laurel Brook	25 feet upstream from intersection of brook and center of Reservoir Lane.	*280
		Long Island Sound	Intersection of Tupper Drive and Carter Drive	*12
			Intersection of Flying Cloud Road and Dolphin Cove Way	*12
	Maps available at City Clerk's Office, 175 Atlantic Street, Stamford, Connecticut.			
Delaware	Bethel, Town, Sussex County (Docket No. FEMA–5815).	Chesapeake Bay (Broad Creek)	Entire shoreline within Bethel	*6
	Maps available at the Bethel Methodist Church, Bethel, Delaware.			
Delaware	Blades, Town, Sussex County (Docket No. FEMA–5815).	Chesapeake Bay	Entire shoreline within community	*6
	Maps available at the Blades Town Hall, 4th Street, Blades, Delaware.			
Delaware	Laurel, Town, Sussex County (Docket No. FEMA–5815).	Broad Creek	Downstream Corporate Limits	*6
			Downstream side of Willow Street	*7
			Upstream Corporate Limits	*12
		Rossakatum Branch	Confluence with Broad Creek	*7
			Downstream West 6th Street	*9
			Upstream West 6th Street	*12
			Upstream Corporate Limits	*14
			Approximately 790 feet upstream of Oaklane Drive	*15
		Georgetown Road Branch	Confluence with Records Pond	*12
			Approximately 100 feet downstream of Delaware Avenue	*17
			Upstream Delaware Avenue	*25
			Upstream Corporate Limits	*27
	Maps available at the Laurel Town Hall, Laurel, Delaware.			
Florida	Wakulla County, unincorporated areas, FEMA–5815.	Sopchoppy River	Interstate of River and State Highway 22	*13
		Lost Creek	100 feet upstream from intersection of River and State Highway 374	*22
			200 feet upstream from intersection of River and State Highway 368	*31
		Buckhorn Creek	150 feet upstream from intersection of Creek and U.S. Highway 319 and State Highway 375.	*21
		West Branch Buckhorn Creek	200 feet upstream from intersection of Creek and U.S. Highway 319 and State Highway 375.	*23
		Ochlockonee River	Intersection of River and U.S. Highway 319 and State Highway 377	*11
		Gulf of Mexico	Intersection of State Highway 372B and State Highways 30, 61 and U.S. Highway 98 near Panacea Park.	*10
			Intersection of State Highway 365 and State Highway 30 and U.S. Highway 98 at Newport.	*12
	Maps available at Wakulla County Courthouse, Church Street, Crawfordville, Florida.			
Illinois	(V), Broadview, Cook County (Docket No. FEMA–5817).	Addison Creek	Southern corporate limit	*620
			Just downstream Indiana Harbor Belt Railroad	*623
			Just upstream Illinois Central Gulf Railroad	*625
			Just downstream of Eisenhower Expressway	*627
		Salt Creek	About 740 feet upstream confluence with Addison Creek	*620
			South West corporate limits	*622
	Maps available at the City Clerk's Office, Village Hall, 1600 Roosevelt Road, Broadview, Illinois 60153.			
Illinois	(C), Champaign, Champaign County (Docket No. FEMA–5815).	Boneyard Creek	Downstream corporate limits	*720
			About 175 feet upstream of Springfield Avenue	723
			Just downstream of Conrail	*729
			About 50 feet downstream of Illinois Central Gulf Railroad	*731
			Just upstream of Illinois Central Gulf Railroad	*733
		Upper Boneyard Creek	About 100 feet downstream of Neil Street	*736
			Just downstream of Bloomington Road	*747
		Third Street Boneyard Creek Tributary.	At confluence with Boneyard Creek	*722
			About 700 feet upstream of confluence with Boneyard Creek	723
		Copper Slough	About 950 feet downstream of Kirby Avenue	*712
			About 150 feet downstream of William Street	*720
			Just downstream of Springfield Avenue	*724
			Just downstream of Parkland Way Road	*744
			Just upstream of Conrail	*750

Final Base (100-Year) Flood Elevations—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground *Elevation in feet (NGVD)
Illinois	(C), Champaign, Champaign County (Docket No. FEMA–5815).	Copper Slough	About 1,000 feet upstream of Kirby Avenue	*736
			About 1,000 feet upstream of Bradley Avenue	*744
			About 1,000 feet upstream of Springfield Avenue	*750
			About 1,000 feet upstream of Parkland Way Road	*760
			Just upstream of Conrail	*766
	Maps available at the City Building, 102 North Neil Street, Champaign, Illinois.			
Illinois	(V), Hanover Park, Cook County (Docket No. FEMA–5817).	Unnamed Creek	Just upstream of Lake Street	*722
			Just upstream of Irving Park Road	*732
			Just upstream of Chicago, Milwaukee, St. Paul and Pacific Railroad	*736
			Just upstream of Barrington Road	*744
			Just upstream of Devon Avenue	*750
	Maps available at the Village Hall, 1515 Irving Park Road, Hanover Park, Illinois.			
Illinois	(V), Lombard, DuPage County (Docket No. FEMA–5817).	Unnamed Creek	Just upstream of Lombard Avenue	*690

BILLING CODE 6718-03-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1056

[Ex Parte No. MC-19 (Sub-No. 34)]

Household Goods Transportation; (Storage-in-Transit Charges)

AGENCY: Interstate Commerce Commission.

ACTION: Notice of final rule.

SUMMARY: The Commission is adopting a rule which will change the way that storage-in-transit (SIT) charges are assessed on household goods moving in interstate or foreign commerce. Assessment of SIT charges on a daily rather than 30-day basis will be required.

DATES: The rule will become effective November 17, 1980. Comments addressing our jurisdiction to prescribe the SIT rule are due on or before September 18, 1980.

ADDRESS: Send comments and 10 copies, if possible, to: Secretary, Room 5356, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Martin E. Foley (202) 275–7348. Copies of the complete decision are available from the Secretary, Interstate Commerce Commission, Washington, DC 20423.

SUPPLEMENTARY INFORMATION: This proceeding was instituted by a notice of proposed rule (NPR) published in the **Federal Register** on May 25, 1979 (44 FR 30387, revised at 44 FR 75194), to consider the propriety of the practice of motor carriers and freight forwarders of household goods moving in interstate or foreign commerce of assessing charges for SIT in increments of 30 days. A rule was proposed which would require that SIT charges be assessed on a daily basis.

As indicated in our NPR, we receive complaints in which complainants state that the present practice of charging for SIT is unfair. In this rulemaking we sought justification for the continuation of the present practice and comments concerning the proposed rule.

After reviewing all the comments and the justification furnished we concluded that the present practice of charging for SIT on a 30-day basis was unreasonable. We decided that adoption of the proposed rule is a reasonable alternative to the present practice. While no provision was made in the proposed rule for SIT of less than one full day, the proposed rule has been modified to require that charges for SIT must be based on an amount per day or fraction thereof.

Our revised notice in this proceeding corrected an inadvertent omission of the citations of the legal authorities under which the rule was proposed by including reference to 5 U.S.C. 553 and 49 U.S.C. 10321. However, a comment was received which contends that the revised notice still failed to give proper reference to the appropriate legal authority, as required by the Administrative Procedure Act. It was also submitted that the Commission does not have the legal authority to adopt the proposed rule, however, no argument supporting this submission was offered.

It has been clear from the outset of this proceeding that the Commission had doubts about the reasonableness of the practice of assessing a standard 30-day rate for storage-in-transit and was considering promulgating a rule requiring storage-in-transit charges to be based on the actual number of days goods remain in storage. Thus, it should have been obvious that we were proceeding under 49 U.S.C. 10701(a) and 10704(a)(1) in conducting this investigation, and our failure to specifically refer to those sections should not have precluded parties from effectively challenging our exercise of jurisdiction. However, because those sections were not specifically set forth in our notice of rulemaking (which we regard as a purely technical defect which would not invalidate the notice) and out of an abundance of caution, we will permit all parties desiring to do so to file comments, within 30 days of the date of this notice, addressed to our jurisdiction to prescribe the subject SIT regulation. All material received will be considered, and we will enter a judgment concerning the statutory authority issue. Appropriate revisions in the rule or a stay of its effective date will be published, if necessary. Unless revised or stayed, the rule shown below will become effective November 17, 1980.

Accordingly, § 1056.3(b) of Chapter X of Title 49 of the Code of Federal Regulations is revised to read:

§ 1056.3 Accessorial or terminal services; tariffs providing therefor; containers, packing, and unpacking charges.

* * * * *

(b) The separate tariff charges so established for containers, packing, and unpacking shall provide for separate charges for containers, for packing, and for unpacking stated in amounts per container. Charges for other services shall be separately stated on a unit or hourly basis, whichever is appropriate.

V 45 AG 2080 UMI

Charges for storage-in-transit shall be stated in an amount per 100 pounds per day or fraction thereof. Tariffs may state an hourly labor charge applicable to miscellaneous labor service performed at the request of a shipper in connection with the transportation, when a rate is not separately stated in the tariff for the service so requested.

This action will not significantly affect either the quality of the human environment or conservation of energy resources.

The rule adopted in this proceeding was promulgated under authority contained in 5 U.S.C. 553, 49 U.S.C. 10321, 10721(a), and 10704(a)(1).

Dated: July 17, 1980.

By the Commission, Chairman Gaskins, Vice Chairman Gresham, Commissioners Stafford, Clapp, Trantum, Alexis and Gilliam.

Agatha L. Mergenovich,

Secretary.

Proposed Rules

Federal Register

Vol. 45, No. 163

Wednesday, August 20, 1980

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

10 CFR PART 212

[Docket No. ERA-R-80-26]

Maximum Lawful Selling Price for Unleaded Gasoline; Change in Hearing Schedule

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of change in hearings schedule.

SUMMARY: On August 8, 1980 the Economic Regulatory Administration of the Department of Energy issued a Further Notice of Proposed Rulemaking and Public Hearing (45 FR 54694, August 15, 1980) concerning several methods for imputing the May 15, 1973 selling price for unleaded gasoline. Two public hearings were announced in the Notice, one is Los Angeles, California, on September 5, 1980, and one in Washington, D.C., on September 11, 1980, and are hereby changed.

DATES: Hearing dates: Los Angeles, California, September 18, 1980; Washington, D.C., September 24, 1980. Requests to speak by 4:30 p.m., September 11, 1980, for Los Angeles hearing; September 17, 1980, for Washington, D.C.

HEARING LOCATIONS: Los Angeles hearing: Los Angeles Convention Center, 1201 South Figueroa Street, Room 212–A, Los Angeles, California, 90015. Washington hearing: Room 2105, 2000 "M" Street, N.W., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

William Webb (Office of Public Information), Economic Regulatory Administration, Room B–110, 2000 M Street, N.W., Washington, D.C. 20461, (202) 653–4055.

Lorraine Hall (Office of Public Hearings), Economic Regulatory Administration, Room B–210, 2000 M Street, N.W., Washington, D.C. 20461, (202) 653–3971.

Chuck Boehl (Office of Regulations and Emergency Planning), Economic Regulatory Administration, Room 7108, 2000 M Street, N.W., Washington, D.C. 20461, (202) 653–3220.

SUPPLEMENTARY INFORMATION: If you have any interest in the matters to be discussed or represent a group or class of persons that has an interest, you may request an opportunity to make an oral presentation by 4:30 p.m. on September 11, 1980, for the Los Angeles hearing and September 17, 1980, for the Washington, D.C. hearing. You should also provide a phone number where you may be contacted through the day before the hearing. If you are selected to be heard, you will be notified before 4:30 p.m. on September 15, 1980, for the Los Angeles hearing and September 19, 1980, for the Washington, D.C. hearing, and are requested to submit one hundred copies of your statement to the hearing location by 8:30 on the morning of the hearing.

Issued in Washington, D.C., August 15, 1980.

F. Scott Bush,

Assistant Administrator, Regulations and Emergency Planning, Economic Regulatory Administration,

Powerplant and Industrial Fuel Use Act of 1978; Cogeneration Exemption; Public Hearing Locations

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Public hearing locations.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby announces the locations for the public hearings on its proposed rule to implement provisions of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C.A. § 8301 et seq. (FUA or the Act) regarding cogeneration. Notice of the public hearings on cogeneration was published in the **Federal Register** (45 FR 53368, August 11, 1980).

DATES: Public hearings for cogeneration will be held on September 25, 1980, and, if necessary, September 26; October 6, 1980, and, if necessary, October 7; and, October 9, 1980, and, if necessary, October 10.

ADDRESSES: The hearings will be held at the following locations:

City, Hearing Date, Location, and Request to Speak

San Francisco, CA. Thursday, Sept. 25, 1980. Ramada Inn, 590 Bay Street, Leland Stanford Rm., San Francisco, CA. Dept. of Energy, 333 Market Street, 6th Floor, San Francisco, CA 94105, (415) 764–7027. Contact: Ms. Terry Osborn.

Boston, Ma. Monday, Oct. 6, 1980. John W. McCormack, Post Office and Courthouse Bldg., 1 Post Office Sq., Room 208, Boston, MA. Dept. of Energy, 150 Causeway Street (Room 700), Boston, MA 02114. Contact: Mr. Bob Ruttenberg.

Houston, TX. Thursday, Oct. 9, 1980. Allen Park Inn, 2121 Allen Parkway, Steamboat Room, Houston, TX. Dept. of Energy, 2626 W. Mockingbird Lane, P.O. Box 35228, Dallas, TX 75235, (214) 767–7745. Contact: Mr. Mac Lacefield.

BILLING CODE 6450-01-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 107

Proposed Changes to Regulations Governing the Small Business Investment Company Program

AGENCY: Small Business Administration.

ACTION: Proposed rulemaking.

SUMMARY: This proposal would amend 13 CFR § 107.101(d)(1)(i), and 107.101(d)(2)(i).

The amendment to § 107.101(d)(1)(i) is merely editorial, deleting a reference to Private Capital of $150,000 which since October 1, 1979, has been obsolete. The minimum Private Capital required by the Small Business Investment Act (Act) since that date has been $500,000.

The amendment to § 107.101(d)(2)(i) reflects an obligation imposed upon SBA by amendments to the Economic Opportunity Act of 1964, to entertain License applications submitted by entities capitalized entirely with nonprivate funds granted by the Community Services Administration.

DATES: A sixty (60) day comment period (October 20, 1980) will exist for submission of comments on these proposed rules.

ADDRESS: Comments should be submitted to Peter F. McNeish, Deputy Associate Administrator for Investment, 1441 L Street, NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Mr. McNeish at the above address, Tel. 202/653–6584.

SUPPLEMENTARY INFORMATION: The proposed amendment of § 107.101(d)(1)(i) is self-explanatory. Every licensee has, since October 1, 1979, been required to have not less than $500,000 of Private Capital.

The Economic Opportunity Act of 1964, as amended by Pub. L. 95–468, has been interpreted to require SBA to accept as Private Capital the entire amount of any grant made by the Community Services Administration to a "community development corporation" (as defined in 42 U.S.C. 2981a and implementing regulations) for the purpose of capitalizing a section 301(d) Licensee, even though the grant proceeds may constitute the entire capitalization of the applicant-Licensee. In other words, SBA may not, in the case of a Licensee application submitted by a corporate subsidiary of a community development corporation, require that the applicant have any truly private funds in its capitalization; or impose any such requirement as a condition precedent to SBA funding. The proposed amendment to § 107.101(d)(2)(i) merely reflects this interpretation of the Economic Opportunity Act, as amended.

Accordingly, pursuant to the authority contained in section 308 of the Small Business Investment Act, as amended, 15 U.S.C. 661, it is proposed to amend Part 107 of Title 13 of the Code of Federal Regulations as follows:

1. Section 107.101(d)(1)(i) would be amended to read as follows:

§ 107.101 Operational requirements.

* * * * *

(d) *Minimum Capital*—(1) *General.* Every Licensee shall have:

(i) Private Capital of at least $500,000 (for consideration for issuance of Licensee's securities see § 107.805(a)).

* * * * *

2. Section 107.101(d)(2)(i) would be amended to read as follows:

§ 107.101 Operational requirements.

* * * * *

(d) * * *

(2) *Nonprivate funds for Licensees.* (i) Funds directly or indirectly granted to a Licensee by a Federal or State agency, authority, or instrumentality pursuant to a statutory authorization may be included in a Licensee's Private Capital for purposes of sections 302(a), 303(c) and 306 of the Act: *Provided, however,* That, except in the case of funds granted by the Community Services Administration to a community development corporation (as defined in 42 U.S.C. 2981a), the minimum capital of $500,000 specified by section 302(a)(1) of the Act may not include nonprivate funds.

Dated: August 11, 1980.

William H. Mauk, Jr.,

Acting Administrator.

[FR Doc. 80-25332 Filed 8-19-80; 8:45 am]

BILLING CODE 8025-01-M

13 CFR Part 124

Clarification of Eligibility for Section 8(a) Program

AGENCY: Small Business Administration.

ACTION: Proposed rule.

SUMMARY: This proposal would amend 13 CFR 124.1–1(c)(2)(iii) to specify that Community Development Corporations (CDC's) as defined in 42 U.S.C. 2981a, and implementing regulations promulgated thereunder, may own more than a 49 percent interest in a concern applying for admission to the section 8(a) program, pursuant to some specified restrictions. This proposed regulation alters and amplifies upon the present § 124.1–1(c)(2)(iii) which presently prescribes the ability of certain entities to maintain ownership interest in applicants for the section 8(a) program.

DATES: A sixty (60) day comment period from the date of publication (October 20, 1980) will exist for this proposal.

ADDRESS: Comments should be submitted to William A. Clement, Jr., Associate Administrator for Minority Small Business and Capital Ownership Development, 1441 L Street, NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: William A. Clement, Jr., at the above address, Tel. 202/653–6407.

SUPPLEMENTARY INFORMATION: Pursuant to a Department of Justice interpretation of section 742(a)(2) of the Economic Opportunity Act, as amended, 42 U.S.C. 2985(a)(2) and a court order, the Small Business Administration (SBA) has been required to promulgate proposed regulations which would insure the availability of the section 8(a) program to community development corporations (CDC's) and businesses which CDC's own and/or control. The following proposed regulations seek to implement both the interpretation and the court order.

In this regard, SBA will consider a concern applying for admission to the section 8(a) program which is more than 49 percent owned by a CDC to be eligible for the program pursuant to certain conditions which SBA feels are necessary to protect the integrity of the program and to uphold the spirit and letter of 15 U.S.C. 637(a)(4).

The proposed regulation requires that the socially and economically disadvantaged managers of the applicant must retain practical day-to-day control of the business. Also, the same socially and economically disadvantaged individuals must obtain ownership and control of more than 50 percent interest in the concern after a period of no more than five years. In this manner, the purposes of both the Economic Opportunity Act and the Small Business Act will best be served. Accordingly, 13 CFR 124.1–1(c)(2)(iii) is proposed to be amended to read as follows:

§ 124.1–1 The section 8(a) program.

* * * * *

(c) * * *

(2) * * *

(iii) Pursuant to 42 U.S.C. 2985a(a)(2), a community development corporation, as defined in 42 U.S.C. 2981(a), and implementing regulations promulgated thereunder, may own more than a 49 percent interest in an applicant section 8(a) business concern, provided that:

(A) Prior to the admission of such an applicant section 8(a) business concern into the section 8(a) program, the community development corporation which owns more than a 49 percent interest in the applicant concern must transfer by contract, voting truat, cumulative voting agreement, proxy, power of attorney or other appropriate vehicle to the socially and economically disavantaged individuals who manage the applicant section 8(a) business concern all control over the activities of the concern which accrues to the community development corporation as a result of its ownership interest. Such transfer must be approved by the AA/MSB–COD prior to and as a condition of admission of the applicant section 8(a) concern into the section 8(a) program.

(B) In addition to paragraph (c)(2)(iii)(A) of this section, a written divestiture agreement between the community development corporation and the applicant section 8(a) concern, must be executed prior to admission of the concern into the section 8(a) program. Such agreement must be approved by the AA/MSB–COD as a condition of the concern's admission into the program. Such divestiture agreement must result in the ownership interest of the community development corporation in the applicant section 8(a) concern being reduced to less than 50 percent over a period not to exceed five years. One condition of such divestiture agreement must be a provision allowing purchase of the community development corporation's interest by the section 8(a) concern at a prescribed price at some time during the term of the divestiture agreement.

* * * * *

Dated: August 11, 1980.

William H. Mauk, Jr.,

Acting Administrator.

BILLING CODE 8025-01-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Ch. I

Contract Market Rules and Practices Governing the Imposition and Maintenance of Price Limits; Advance Notice of Proposed Rulemaking; Public Comment

AGENCY: Commodity Futures Trading Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Commodity Futures Trading Commission is announcing its intent to consider engaging in rulemaking which would affect contract market rules and practices governing the imposition and maintenance of price limits. Price limits establish ranges within which daily prices of futures contracts are permitted to fluctuate, thereby limiting short term price volatility. In doing so, however, price limits may potential artificially prevent futures markets from reflecting the fair market value of the futures contracts to which price limits apply. The Commission requests comment on the function of current price limit rules and practices of the designated contract markets and on whether rulemaking by the Commission concerning price limits would promote the purposes of the Commodity Exchange Act. The Commission believes that consideration of whether to engage in rulemaking affecting contract market methods for imposing price limits is appropriate at this time in view of the substantial legal and economic policy issues summarized below.

DATE: Comments must be received on or before November 18, 1980.

ADDRESS: Interested persons should submit comments to: Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Attention: Office of the Secretaries; Telephone: (202) 254–6314.

FOR FURTHER INFORMATION CONTACT: Christine A. Rock, Esq., Division of Trading and Markets, 2033 K Street, NW., Washington, D.C. 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION: The Commodity Futures Trading Commission ("Commission") is reviewing the extent to which price limits serve a beneficial regulatory purpose in the futures industry. Price limits establish a range within which the daily price of a futures contract in a particular month is permitted to fluctuate. Trading is prohibited at any price outside of the applicable price range, which is based on the closing price or clearinghouse settlement price of the previous business day plus or minus a specified amount set by the exchange for each futures contract.[1]

Some futures contracts trade without price limits in the spot month. For example, the current month in the financial instrument futures contracts and the metal futures contracts trade on the Chicago Board of Trade ("CBT") without price limits. The current month in each futures contract on the Commodity Exchange, Inc. ("Comex") trades without price limits.[2] This procedure allows market participants to trade in at least one contract month where futures prices will be able to reflect prices in the cash market.

Generally, exchanges have sought and received Commission approval to expand price limits and establish variable price limit systems when confronted with periods of extended price volatility. While the Commission has not adopted a formal policy governing price limits, it has encouraged exchanges to adopt variable limits.[3]

Many exchanges have variable price limit provisions which automatically expand price limits based on some combination of limit and less-than-limit settlement prices on prior days. For example, the CBT has a variable price limit rule under which price limits for all months of a grain contract are automatically increased by 150 percent when three or more delivery months of one crop year of a given contract move limit up or down respectively in three successive trading sessions. [4]

The Chicago Mercantile Exchange ("CME") has implemented a price limit approach which permits a closer relationship between prices in the cash

[1] For example, if the November soybeans contract closes at $5.64 and the limit is 30 cents, that futures contract may be traded only within the range of $5.34 and $5.94 on the following day. For soybeans contracts these price limits do not apply on or after the first notice day of the expiring contract.

[2] *See e.g.,* Chicago Board of Trade regulations 1008.01, 1508.01 and X1508.01 and Commodity Exchange, Inc. copper rule 5, silver rule 5, gold rule 5 and zinc rule 5. The CBT, in its submission concerning the elimination of price limits in current months in its gold and silver contracts, stated that "these amendments are necessary in order that there is (sic) always a month which is allowed to reflect the cash market and to stay competitive in the metals futures markets." Letter from Thomas R. Donovan, Secretary, Chicago Board of Trade to the Executive Secretariat of the Commission dated August 28, 1978.

[3] Commission meeting on August 29, 1978.

[4] CBT regulation 1007.01B. The limits would remain at 150 percent for successive periods of three business days until three or more contracts in a crop year do not close at the limit on one day during that period. When three or more contract months do not close at the limit, the price limits would revert to their original levels at the end of that three day period.

forward and futures markets in foreign currencies by allowing price limits to be removed for one day whenever a contract month closes at the daily price limit in the same direction for four successive business days. After one day of trading without limits, the normal limits again become effective on the sixth trading day. In addition, the Commission has approved, pursuant to section 5a(12) of the Act,[5] the proposal of the New York Futures Exchange, Inc. ("NYFE") to trade its foreign currency contracts without any price limits.[6]

The Commission has the responsibility for reviewing and approving exchange rules pursuant to section 5a(12) of the Act, the authority to engage in rulemaking pursuant to section 8a(5) of the Act,[7] and the authority to alter or supplement contract market rules pursuant to section 8a(7) of the Act.[8] Traditionally, the Commission has deferred to the discretion of the respective exchanges on whether or not to impose price limits and at what level. The Commission's ultimate decision of whether to adopt rules altering exchange methods of imposing price limits will involve a balancing of the legal and economic policy issues which are discussed below.

Arguments for Price Limits

The primary argument supporting price limits appears to be that such limits restrict intra-day price movements and, thus, limit the extent to which market participants may overreact to daily news events. In this manner, limits potentially diminish price volatility by providing the market with a cooling off mechanism in emotional situations caused by newsworthy events such as severe weather conditions, political upheaval or other occurrences of national or international significance. Such restriction of daily price movements results in a number of other benefits which have been cited by supporters of price limits.

First, price limits provide a form of financial protection for clearing members, futures commission merchants ("FCMs") and customers in cases of sudden unidirectional price moves. For FCM's the financial protection provided by price limits acts as a safety net, particularly during periods where risk exposure of their proprietary and customer positions is increased due to the market volatility.[9] Clearing members can be assured that the amount of margin they might have to submit to the clearinghouse on any one day will not exceed the value represented by an adverse limit move.[10] Customers also are assured that the amount of reduction in their accounts on any one day will be limited to the value represented by an adverse limit move.

The Commodity Futures Trading Commission Advisory Committee on the Economic Role of Contract Markets ("Advisory Committee") felt that the purpose underyling price limits was to protect the financial integrity of member firms and clearinghouses;[11] that is, price limits place a ceiling on the risk confronted by member firms and clearinghouses and provide member firms and clearinghouses with an opportunity to collect additional funds in an orderly and unburdensome manner prior to the next day's trading. To the extent that price limits permit persons to commit funds to the futures markets in a more orderly manner and prevent sudden, excessive payments of maintenance margin or payouts of excess margin over short periods of time, they may reduce the risks borne by clearing members and clearinghouses and thereby benefit the public and the industry.

Furthermore, price limits are frequently cited as justifying the establishment or maintenance of lower margin requirements, which are viewed as promoting market liquidity.[12] Since price limits place a daily ceiling on the risk confronted by member firms and clearinghouses and provide member firms and customers with the opportunity to submit funds in orderly limited installments, lower margin requirements may be justified.[13] One result of eliminating or liberalizing price limits would be that FCMs, clearinghouses and exchange might feel compelled to increase margin requirements to offset the additional risks involved in trading.[14]

Arguments for Altering Methods of Imposing Price Limits

Price limits directly interfere with free market price determination, which is one of the key economic purposes of future trading.[15] Futures markets provide a forum in which trading is conducted by open outcry and from which news of transactions is immediately disseminated worldwide. These prices are estimates of the future value of commodities. To the extent that futures markets quickly and accurately assess changes in supply and demand forces the futures prices quoted are useful in guiding production and consumption decisions throughout the world.[16]

[5] 7 U.S.C. 7a(12) (1978), as amended by the Futures Trading Act of 1978, Pub. L. No. 95-405, section 12, 92 Stat. 871 (1978).

[6] The NYFE, in its contact market designation submission to the Commission, referred to the price volatility in foreign exchange markets and the absence of daily price limits in the cash or forward market to justify its proposal. The Commission noted that the absence of price limits would permit the futures market to serve its economic purpose at all times, regardless of volatile movements in the cash market. To the extent that the cash market in currencies acts as the primary price discovery vehicle, price limits in the futures market would inhibit the ability of the futures market to reflect the economic realities of the cash market. Letter from Frank J. Jones, Senior Vice President, New York Futures Exchange, Inc. to the Office of the Secretariat of the Commission dated April 3, 1980.

[7] 7 U.S.C. 12a(5) (1978).

[8] 7 U.S.C. 12a(7)(1978).

[9] The safety net provided by price limits, however, only limits the risk in the short-term and does not decrease the long-term effects of a sustained price movement, which may necessitate that FCMs infuse additional capital. As noted above, however, price limits allow firms to infuse such capital as necessary in a more orderly manner.

[10] This is known as a variation margin call. This amount is applied to the settlement for the day and does not go into the standing or initial margin account.

[11] Commodity Futures Trading Commission Report of the Advisory Committee on the Economic Role of Contract Markets, Gary L. Seevers, Chairman, (July 17, 1978) at 43 (hereinafter cited as Advisory Committee Report).

[12] *Id.* at 44. However Messrs. Jiler and Scheu, members of the Advisory Committee, commented that the impact of price limits on market liquidity, price discovery and clearinghouses viability should be carefully evaluated over time. *Id* at 45.

[13] Futures exchanges set the minimum initial margin requirements that members must charge customers. Individual commission houses set margin requirements for customers which may be above the exchange's minimum levels.

[14] For example, in determining to trade its foreign currency contracts without price limits, the NYFE stated its belief that: the advantages to be derived from trading without price limits are greater than the disadvantages of higher margins, and in particular cases, higher margins may be desirable, in that they may discourage excessive speculation by small, less well-financed traders. To some extent, the clearing organization and clearing members may use tools other than higher margins, as discussed below, to assure protection.

The NYFE represented to the Division of Trading and Markets, that it will set margins for the foreign currency contracts "on the basis of actual, past and expected futures price movements, presumbably at a level equal to a fraction, probably quite high, of experienced daily price movements."

Letter from Frank J. Jones, Senior Vice President, the New York Futures Exchange, Inc. to the Office of the Secretariat of the Commission dated April 3, 1980.

[15] Section 3 of the Act, 7 U.S.C. 5 (1976), provides in pertinent part that: Transactions in commodities involving the sale thereof for future delivery as commonly conducted on boards of trade and known as "futures" are affected with a national public interest; that such transactions are carried on in large volume by the public generally and by persons engaged in the business of buying and selling commodities and the products and byproducts thereof in interstate commerce; that the prices involved in such transactions are generally quoted and disseminated throughout the United States and in foreign countries as a basis for determining the prices to the producer and the consumer of commodities in interstate commerce.

[16] The Advisory Committee Report noted that futures exchanges provide an institutional framework around which and through which a variety of marketing functions could be organized. These included pricing, hedging, price discovery, resource allocation and information collection and dissemination. Dr. Ferguson stated the following: I

Footnotes continued on next page

Section 5 of the Act [17] sets forth in broad terms the test for designation as a contract market, including a requirement that any board of trade seeking designation demonstrate that transactions for future delivery in the commodity for which designation is being sought will not be contrary ot the public interest. Section 6 of the Act [18] requires any board of trade seeking designation to provide the Commission with "a sufficient assurance" that it will continue to comply with the requirements of sections 5 and 5a, among other sections of the Act. Moreover, section 6b of the Act [19] and Commission regulation 1.50 [20] require a board of trade, after designation to demonstrate continued compliance with the requirements, *inter alia*, of sections 5 and 5a of the Act. Guideline 1 [21] sets forth the particular findings an exchange must make to justify its initial and continued designation, consistent with section 5 of the Act. For example, it is necessary for the contract market to meet the test of "economic purpose." Thus, any board of trade must provide evidence that: [22]

1. The prices involved in transactions for future delivery in the commodity for which such designation is sought are, or reasonably can be expected to be, generally quoted and disseminated as a basis for determining prices to producers, merchants, or consumers of such commodity or the products or byproducts thereof, or

2. Such transactions are, or reasonably can be expected to be, utilized by producers, merchants, or consumers engaged in handling such commodity (including the products, byproducts or source commodity thereof) in interstate (including foreign) commerce as a means of hedging themselves against possible loss through fluctuations in price.[23]

The Commission's Advisory Committee believed that efficient price relationships would not be achieved if futures markets do not function properly.[24] For example, improperly drawn contract specifications such as price limit rules could impede the discovery of competitive prices which best represent the weighted opinion of what traders believe prices should be in the future, given today's information.

Futures markets provide a reference for use in arranging commercial transactions at competitively determined prices. The widespread dissemination of exchange-generated prices fosters competition in the establishment of current cash values for commodities in many localized markets as well as aiding the establishment of market values of productive services such as storage, transportation and processing.[25]

Accordingly, section 5 of the Act conditions the designation of any board of trade as a "contract market" on the finding that the futures contracts traded on it would be located at a terminal market where cash transactions occur in sufficient volume to accurately reflect the general value of the commodity.

The imposition of price limits on futures contracts restricts the establishment of futures prices which fairly reflect the value of underlying commodities. While price limits thus place a daily ceiling on the risk exposure of clearinghouses, member firms and customers, their existence over a prolonged period of time where significant price movements have occurred merely serves to delay the adjustment of futures contract prices to economically realistic price levels.[26]

Further, under section 4c(a)(C) of the Act,[27] it is unlawful for any person to offer to enter into, to enter into or to confirm the execution of any transaction for hedging, determining basis or delivery purposes "if such transaction is used to cause any price to be reported, registered, or recorded which is not a true and bona fide price." This section expresses a Congressional intent to require that futures prices reflect actual supply and demand forces rather than artificial forces. To the extent that price limits artificially affect futures prices, fair, true and bona fide futures prices cannot be established.

The influx of temporary emergency rules and amendments to price limit rules from exchanges to the Commission in response to recent price fluctuations demonstrates that price limits may at times substantially impede the reflection of supply and demand forces on futures prices. For example, the New York Coffee, Sugar and Cocoa Exchange, Inc. recently adopted wider price limit rules in sugar after narrowing price limits in sugar only two years ago.[28] The expanded price limit rules were adopted in response to what the Exchange cited as "the recent [price] increases in both the Sugar No. 11 and Sugar No. 12 Contracts and the corresponding increased probability [of limit moves] in these markets which have made currently daily price limits unrealistic."[29]

Further, on October 22, 1979, the Board of Directors of the Chicago Board of Trade adopted a temporary emergency rule which expanded price limits for its contracts in financial instruments.[30] The Board of Trade justified its action by stating:

Footnotes continued from last page

concur with the finding that the operation of the markets in futures contracts does generate benefits to the general public by making the economy somewhat more efficient than would otherwise be the case. In order to achieve the kinds of public benefits that effectively operating markets in commodity futures can provide to the public, the CFTC should seek to assure as nearly as possible unrestricted participation in the markets to avoid all constraints upon the free play of competition, the minimization of transactions costs and the dissemination of the maximum of public information.

[17] 7 U.S.C. 7(a) (1976), which provides in pertinent part that: The Commission is hereby authorized and directed to designate any board of trade as a "contract market" when, and only when, such board of trade complies with and carries out the following conditions and requirements:

(a) When located at a terminal market where any cash commodity of the kind specified in the contracts of sale of commodities for future delivery to be executed on such board is sold in sufficient volumes and under such conditions as fairly to reflect the general value of the commodity and the differences in value between the various grades of such commodity.

[24] To the extent that futures markets are efficient markets (i.e. markets which accurately reflect all relevant public information) futures markets properly perform their price discovery function. Price limits, however, by their nature inhibit the markets from operating in the most efficient manner and may deter the use of futures markets as a price discovery vehicle.

[25] Advisory Committee Report, *supra* at 12 and 13.

[26] In order to obtain a true picture of the financial condition of FCMs during the recent silver situation, the Commission, exchanges and clearinghouses found it necessary to adjust the value of FCMs' proprietary and customer positions in distant months to reflect their value marked to the spot month price.

[27] 7 U.S.C. 6c(a)(C) (1976).

[28] New York Coffee, Sugar and Cocoa Exchange, Standing Resolution R-34 and new Standing Resolution of the Board of Managers of the Coffee, Sugar and Cocoa Exchange. The variable daily price limit rule, as amended and approved by the Commission, pursuant to section 5a(12) of the Act, on May 15, 1980, provides for maximum daily price limits to increase at intervals of 50 points from the normal limit of 50 points to a maximum of 200 points, whenever the settlement prices for the first three trading months following the spot month move the applicable limit for three successive days in the same direction. Reduction of price limits occurs in stages until the price limit returns to 50 points.

In June 1978, the Exchange adopted amendments to the Standing Resolutions which reduced limits of one cent per pound above or below the settlement price of the preceding day to one-half cent per pound.

[29] Letter from Laurence S. Yowell, Vice President and Secretary, New York Coffee, Sugar & Cocoa Exchange, Inc. to Jane K. Stuckey, Executive Secretariat of the Commission dated March 26, 1980.

[30] Five days earlier the CBT submitted to the Commission permanent changes in the price limit rules for its 30-Day and 90-Day commercial paper contracts. The CBT justified the amendments by stating that although price limits prevent

Footnotes continued on next page

The effect of increasing the daily trading limits in these contracts will be to allow the Commission granted approval of amendments to the Comex permanent avoid the adverse consequences of locked limit market situations,

Consideration of Alternative Price Limit Measures; Request for Comments

are traded under a system of variable limits which establish, in advance, the reflect the fair market value of a commodity or are otherwise deficient

The effect of increasing the daily trading limits in these contracts will be to allow the cash futures basis to be more accurately reflected. The wider trading limits will stop large price movements from preventing futures markets from fulfilling their hedging and price determining roles. Without these changes, cash market participants would be unable to transfer risk through futures trading at a time when the desire to hedge is at its greatest. Also, these changes will enhance intermarket spreading; thus, providing further stability to these markets.[31]

The recent fluctuations in the price of silver further demonstrate that current price limit rules often make it difficult for futures prices to reflect spot prices. On September 4, 1979, the Commodity Exchange Inc. adopted an emergency rule which doubled the maximum permissible price limits in silver.[32] On November 15, 1979, the Commission approved, under section 5a(12) of the Act, a permanent change in the Comex silver price limit rule which thereafter set the price limit at forty cents per ounce.[33] On the same day, the Commission granted approval of amendments to the Comex permanent price limit rules for 90-Day U.S. Treasury bills, copper and zinc as well as silver.[34] These changes were designed to mitigate the effects of locked limit markets.

Price limits may also deny participants the opportunity to establish or liquidate futures positions when prices are at the applicable limits and exacerbate the misalignment of cash and futures prices. For example, when the price of a futures contract reaches its daily limit, either up or down, no further trades in that contract month can be made beyond the limit on that day. Further trading, however, may take place that day at the limit price or within the permitted price range established for that trading day. If prices should reach the limit down, and if there are no bids to buy at this price, a trader with a long position in the market and wishing to sell cannot liquidate his position through a direct transaction. Under such circumstances, a trader can be literally "locked in" a market, unable to liquidate his position unless there is another trader willing to buy or sell, as the case may be, at the limit price, or he is willing to engage in a spread transaction designed to liquidate the position in the month locked at the limit.[35]

Fear of being locked in the market may inhibit potential market participants from using the futures markets (*e.g.*, diminish the potential use of futures markets for hedging) and may add to the adverse consequences resulting from the potential misalignment of prices.[36] In an effort to avoid the adverse consequences of locked limit market situations, exchanges have adopted other rules which do not appear to serve any inherent economic or financial purpose other than to mitigate the effects of price limits. Many exchanges have rules which allow traders to effect transactions in months that are locked limit by executing spread transactions.[37] This practice, however, artificially inflates the apparent volume of futures trading, requires the trader to incur additional transaction costs and leaves the trader exposed to changes in spread relationships which represent more risk than if he were to liquidate the position in the locked month through a single outright transaction.

For example, on September 8, 1979, the Chicago Board of Trade adopted a temporary emergency rule which provides that when either or both contract months involved in a spread transaction are trading at the limit price, one contract month or leg of the spread may be priced within the daily permissible range (the range of trading permitted by applicable price limits), with the other leg priced within the actual price range (the range of actual transaction prices occurring in a particular contract month on that day).[38] By permitting one leg to be priced within the permissible range, an economically realistic price differential could be achieved between a freely trading month and a month subject to price limits, thereby facilitating the liquidation of a position in a month subject to limits.[39]

Footnotes continued from last page

speculative excesses and maintain orderly markets, the presence of price limits directly curtails the free movement of futures prices. "The current price fluctuation limits make it difficult for the commercial paper contract to reflect accurately the price movements in the cash market * * * Additionally, the narrow limits do not allow [traders] sufficient flexibility for arbitrage trading between these contracts and (contracts of) other financial instruments. This causes the arbitrage relationship to not reflect the true market [price] differences." Letter from Thomas R. Donovan, Vice President and Secretary, Chicago Board of Trade to Jane K. Stuckey, Executive Secretariat of the Commission dated October 17, 1979.

[31] Letter from the Chicago Board of Trade to the Commission dated October 29, 1979.

[32] The price limits were increased from $.20 per ounce to $.40 per ounce. As a partial explanation for its emergency action of September 4, 1979, Comex noted that the $.20 daily price limit had been established 5½ years earlier at a time when silver was trading for 60% of its then-current price of $10.61 per ounce.

[33] Further, on November 27, 1979, the Commission granted approval to the Comex to increase, on a permanent basis, the daily price limit for silver from forty cents to fifty cents per ounce. These changes in the price limits were designed to permit silver to trade within daily price limits which more realistically reflected supply and demand forces in silver.

On September 5, 1979, the Board of Governors of the Chicago Board of Trade, using its emergency powers, amended its daily maximum price fluctuation limits in silver. In support of this amendment, the CBT noted that the September and October contracts had reached their price limits on at least one-third of the days between August 1 and September 5, 1979. On October 5, 1979, the Commission approved, pursuant to section 5a(12) of the Act, permanent rules proposed by the CBT setting forth new price limits in silver. The Exchange supported its proposal for these price limits by stating the following: Since September 1979, silver prices have become even more volatile and it is becoming increasingly more important to have appropriate, increased trading limits in order that the silver market may accurately reflect the cash market.

Letter from Thomas R. Donovan, Vice President and Secretary, Chicago Board of Trade to Jane K. Stuckey, Executive Secretariat of the Commission dated September 26, 1979.

[34] As amended, Comex rules 5 and 6 provide that, if any day on which either the 150% or the 200% expanded price limit is in effect is not a limit day, the same expanded price limit shall remain in effect for the following business day. If, on the following business day, one or more contract months again do not close at the limit, the daily price limit will revert to either 150% of the normal, or the normal price limit, depending on the level of expanded price limits in effect at the time.

[35] Most commodities traded in London, *e.g.* cocoa, coffee, sugar, and the metals, either have no limits or temporarily close for trading when the limits are reached, and then reopen at the same session without limits. These trading pauses allow all orders to be matched and permit the dissemination of price information. For this reason, U.S. traders who are locked in the domestic markets may be encouraged by price limits to establish an opposite position in the same commodity on a foreign market.

[36] Regarding locked in market situations, Messrs. Jiler and Scheu, members of the Commission's Advisory Committee, commented as follows: A step in the right direction would be to have one contract (prior to first notice day) open at all times—hence market participants would never have to worry about being 'locked in.' One could always get out through the 'open' contract. Margin requirements could be set appropriately higher in the 'open' contract to satisfy clearinghouse objections, while reduced margins could be kept in those months still subject to 'limit' moves. The 'open' contract, itself, could well act as a stabilizing influence on overly-excited markets for pyschological reasons. Moreover, any resultant increased liquidity would act to further stabilize price movements.

Mr. Scheu especially advocated consideration of the London approach, referred to in the preceeding footnote. Advisory Committee Report, *supra* at 45.

[37] A spread or straddle is defined herein as the simultaneous sale of one futures delivery month against the purchase of another futures delivery month of the same commodity. In a locked limit market situation one can liquidate his position by estabishing an opposite position in a deferred month which is not trading at the limit and executing a spread transaction. For example, if a trader has a long position in November soybeans, he can establish a short position in January soybeans and simultaneously execute a liquidating spread in those months.

[38] The CBT later proposed permanent adoption of this temporary emergency rule and on February 26, 1980, the Commission approved that rule change.

[39] In recent months, increased market volatility has prompted exchanges to submit similar amendments to spread pricing rules, pursuant to

Footnotes continued on next page

Consideration of Alternative Price Limit Measures; Request for Comments

In view of the concerns discussed above, the frequent volatility of futures prices and the absence of price limits in the cash and forward markets (as well as the absence of price limits in many competing foreign futures markets), the Commission invites interested persons to analyze existing exchange rules which impose price limits and to consider whether such rules, and the price limit procedures which they implement, should be modified or whether alternative procedures might better achieve the objectives of the Act. The Commission would welcome comment on the benefits and deficiencies of the current exchange rules, as well as a discussion of specific alternative measures which commentators believe might address particular shortcomings in the current rules and procedures. In this regard, commentators should address whether changes in the current price limit rules and practices of the exchanges might require exchanges, clearinghouses, or FCM's to modify their existing margin policies, or any other rules, and what form such modifications might take in order to better achieve the objectives of the Act.

Commentators who believe that the various existing price limit rules and procedures which the exchanges have adopted represent an acceptable regulatory program, should address: (1) Whether a more uniform approach to price limits currently set by exchanges would reduce regulatory burdens by alleviating possible confusion among customers and exchange member firms; (2) whether possible regulatory or other problems might arise from a Commission determination to pursue one or more of the other alternatives discussed in this Notice, including the elimination of price limits after one or more days of limit moves in a contract month; and (3) whether specific modifications to existing exchange rules and procedures might better achieve the objectives of the Act.

In this latter regard, the Commission notes that a number of futures contracts are traded under a system of variable limits which establish, in advance, the extent of gradually increasing limits during periods of increased volatility.[40]

For example, the price limit rules applicable to gold, copper, U.S. Treasury bills and U.S. silver coins traded on the Chicago Mercantile Exchange and all commodities, except potatoes, traded on the New York Mercantile Exchange provide that when one delivery month in a particular commodity moves up or down the regular limit in the same direction for two consecutive days, on the third day the limit is expanded to 150 percent of the regular limit for all contract months for the commodity. On the third day of trading with the expanded limit, if a contract month continues a limit move in the same direction, the fourth day's limit is increased to 200 percent of the regular limit. The limit remains at 200 percent, provided limit moves in the same direction occur, until one month does not move the limit. Then on the following day (regarding of whether the limit was 150 percent or 200 percent), the limit reverts to the original limit.[41]

Commentators should address whether such a system for variable price limits would be appropriate for all futures contracts designated by the Commission and whether it might be appropriate, within the purposes of the Act, to provide a more accelerated schedule of expanding limits under a variable price limits scheme. For example, commentators may wish to address the feasibility of a variable price limit procedure which automatically doubles the applicable price limits on a day following a trading day where the price closed at the current limits.[42]

Commentators who believe that existing price limit rules and procedures do not adequately permit the market to reflect the fair market value of a commodity or are otherwise deficient should address whether the Commission should consider the disapproval of existing price limit rules and the prohibition of the imposition of subsequent daily price limits or requiring contract markets to follow the "London" approach. These commentators should address what regulatory objectives, if any, would be achieved by providing for such free market trading. They should also address whether price limits, in one form or another, are necessary and valid and, if so, how such benefits might be incorporated in a market which trades without price limits.

Since the prevention of short term overreactions to market news appears to be a primary basis for the existence of price limits, commentators are also requested to address whether such concerns might be accommodated by the suspension of price limits on any day following one or more trading days where a limit move occurred. Such a temporary limit system might be patterned after the rules governing currency futures contracts on the Chicago Mercantile Exchange, which provide for the removal of limits on the fifth day, whenever after four successive days the settlement price reaches the daily price limit in the same direction. Commentators should consider, however, whether a shorter period of time (one, two or three consecutive days of limit moves) would be a more appropriate "trigger" period for the suspension of price limits. Under such a plan, any futures contract which trades at a price limit adopted by an exchange for the prescribed time period would be free to trade without a price limit for at least one day thereafter before the normal exchange price limits were reimposed.

In view of the foregoing, the Commission hereby gives advance notice of its intent to consider engaging in rulemaking which may affect contract market rules governing the imposition and maintenance of price limits.[43]

Issued in Washington, D.C., on August 13, 1980.

Jane K. Stuckey,

Secretary of the Commission.

[FR Doc. 80-25305 Filed 8-19-80; 8:45 am]

BILLING CODE 6351-01-M

Footnotes continued from last page

section 5a(12) of the Act, to facilitate spread trading in locked in market situations. *See* CME rule 542, approved by the Commission on June 24, 1980; New York Mercantile Exchange rules 90.13, 100.13 and 110.13, approved by the Commission on April 17, 1980 and MidAmerica Commodity Exchange rule 407C, approved by the Commission on February 26, 1980.

[40] The New York Mercantile Exchange and the CME have devised a system of variable price limits for commodities traded on their exchanges that differs somewhat from the variable limit system used on the CBT which was discussed above. Variable price limits apply to all futures contracts traded on the CBT and the New York Mercantile Exchange; coffee and sugar futures contracts traded on the New York Coffee, Sugar & Cocoa Exchange; cotton futures contracts traded on the New York Cotton Exchange; and all futures contracts (including U.S. Treasury bills, silver coins, copper and gold) traded on the CME.

[41] CME rules 3407, 3308, 3208 and 3108. New York Mercantile Exchange rules 70.08, 80.06, 90.06, 100.06, 110.06, 120.06, 130.06 and 150.07.

[42] For example, if on Monday a particular commodity advanced to the applicable price limit, the trading range on Tuesday would be 200% of the range applicable on Monday. If the price advanced to the expanded limit on Tuesday, the trading range on Wednesday would be doubled again, to 400% of the normal trading range.

[43] Sections 8a(5) and 8a(7) of the Act provide the Commission with authority to engage in rulemaking of general or specific applicability.

V 45 AG 20 80 UMI

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 123

Customs Relations With Canada and Mexico; Proposed Amendments To Customs Regulations, Relating to United States and Canada In-Transit Truck Procedures

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed rule.

SUMMARY: Trucks proceeding between points in the United States may cross the United States-Canada border, use Canadian highways, and then reenter the United States and proceed to their destination. This document proposes to amend the Customs Regulations to require the driver of a truck carrying merchandise between points in the United States, via Canada, to present a manifest (an itemized listing of the shipment) for validation by U.S. Customs at the United States port of departure. The driver would then be required to present the validated manifest to Canadian Customs at the Canadian ports of entry and exit and to U.S. Customs at the port of reentry into the United States. At present, the manifest is required to be presented at the United States port of reentry but not at the port of departure. This change would enable U.S. Customs at the port of departure to verify the contents of shipments covered by the manifest so as to ensure the payment of duties and taxes and compliance with applicable laws and regulations when the truck reenters the United States. Conforming amendments also are proposed because of similar changes in Canadian Customs procedures concerning truck shipments proceeding between points in Canada via the United States. The amendments are considered to be significant.

DATES: Comments must be received on or before October 20, 1980.

ADDRESS: Comments (preferably in triplicate) may be addressed to the Commissioner of Customs, Attention: Regulations and Research Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2335, Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Legal Aspects: Benjamin H. Mahoney, Entry Procedures and Penalties Division (202–566–5778); Operational Aspects: J. Bradley Lund, Inspection and Control Division, (202–566–5354), U.S. Customs Service, 1301 Constitutional Avenue, NW., Washington, D.C. 20229.

SUPPLEMENTARY INFORMATION:

Background

Because of the geographic, highway, and climatic conditions along the United States-Canadian border, use of a Canadian route to transport merchandise by truck between points in the United States is a common occurrence. In these circumstances, the merchandise merely is being transported through Canada; there is no intent to export it from the United States. To process this type of movement, § 123.41, Customs Regulations (19 CFR 123.41), provides a simplified Customs procedure which allows for the reentry of merchandise into the United States without filing a Customs entry and paying duty, while at the same time protecting the revenue of the United States.

Under present procedures, a manifest on United States-Canada Transit Manifest, Customs Form 7512–B Canada 8½, an itemized list of merchandise being transported, is presented to Canadian Customs officers at the Canadian port of arrival by the driver of a truck carrying shipments of merchandise between points in the United States through Canada. Upon compliance with Canadian Customs regulations, the shipment is sealed, unless sealing is waived by Canadian Customs, and the driver is allowed to proceed through Canada. At the Canadian port of exit, the driver presents the manifest to Canadian Customs officers to verify that the seals are intact or, if sealing has been waived, that there are no irregularities. This ensures that no changes have been made in the shipment. After verification and certification of the manifest, the driver is allowed to proceed to the United States port of reentry where he presents the certified copy of the manifest to U.S. Customs officers. If they are satisfied that the shipment contains only merchandise which moved on the truck from the United States through Canada, the truck is allowed to reenter the United States without filing a Customs entry and paying duty.

This procedure, which was implemented with the cooperation of Canadian Customs and is similar to the procedure they use for truck shipments proceeding between points in Canada via the United States, was designed to protect the revenue of both countries while not delaying unnecessarily the transportation of merchandise.

However, it has come to the attention of U.S. Customs that, in certain circumstances, the revenue may not be protected because foreign merchandise may be imported into the United States without duty being paid. For example, under § 123.31, Customs Regulations (19 CFR 123.31), merchandise may be transported in transit across the United States between Canada and Mexico under the procedures set forth in Part 18, Customs Regulatins (19 CFR Part 18), for merchandise entered for transportation and exportation. Using these procedures, a shipment of foreign merchandise from Mexico destined for Canada may be transported under bond on a Transportation and Exportation Entry (T & E) by truck through the United States and exported to Canada. Because the merchandise is not entering the commerce of the United States, the truck driver need not file a formal U.S. Customs entry and pay duty. However, it has been found that after the T & E is closed by U.S. Customs officers at the United States port of exit and the bond cancelled, some truck drivers then have presented a manifest on Customs Form 7512–B Canada 8½ to Canadian Customs at a Canadian port of arrival. By following the procedures under § 123.41, foreign merchandise transported through the United States from Mexico to Canada is shown on the manifest as merely being transported by truck from point to point in the United States through Canada and then is reentered into the United States without an entry having been filed and duty paid. In addition to creating a situation that allows the United States to be deprived of the revenue due on this foreign merchandise, the present wording of § 123.41 may allow persons to bring narcotics and other contraband into the United States.

Accordingly, on December 9, 1976, a notice was published in the **Federal Register** (41 FR 53810) of a proposal to amend § 123.41(a) to require the driver of a truck carrying shipments of merchandise between points in the United States through Canada to present a manifest on Customs Form 7512–B Canada 8½ to U.S. Customs officers at the United States port of departure. This would allow U.S. Customs officers there to validate the manifest for shipments of merchandise transiting Canada by truck from point to point in the United States. A manifest on Customs Form 7512–B Canada 8½ would not be presented for validation if the merchandise covered by the manifest arrives at the United States port of departure for export. Without a validated manifest, Canadian Customs officers at the Canadian port of entry would not permit the truck shipment to transit Canada from point to point to return to the United States. This procedure would ensure that foreign merchandise is not reentered into the United States without the filing of an entry and payment of duties.

Interested parties were given until January 10, 1977, to submit data, views or arguments regarding this proposal. A discussion of the substantive comments received in response to that notice follows.

Discussion of Comments

1. While stating that it agreed with the purpose of the proposed amendment, a United State-Canada bonded carrier noted that shipments often are tendered for movement on short notice after regular office hours. It stated that if the proposal were adopted, manifests would have to be prepared in its terminal office and sent by courier to the place where the truck would be waiting at the United States-Canada border with the shipment. It stated that this delay would cause an additional expense that would have to be absorbed by the carrier.

As an alternative, this commenter suggested that U.S. Customs at the United States port of departure could validate the driver's bill of lading rather than the Customs Form 7512–B Canada 8½. It further suggested that the bill of lading be sealed in a special envelope to be opened and reviewed by U.S. Customs at the port of reentry into the United States. It suggested that if a truck were not inspected by U.S. Customs at the port of departure, it could be refused subsequent reentry to the United States.

Customs believes that this carrier's logistical problem of getting the Customs Form 7512–B Canada 8½ from its terminal to the driver could be solved with appropriate planning. As to its suggested alternative, additional problems could be creatd by requiring a bill of lading to be presented to Customs for validation because it is not an official Customs document.

It is also noted that Canadian Customs is planning to adopt similar procedural changes for truck shipments proceeding between points in Canada via the United States. Customs does not believe a change as suggested would be beneficial to continued cooperation of United States and Canadian Customs in this matter.

2. Another commenter suggested that the proposed requirement—that trucks transiting Canada while proceeding between points in the United States stop at the United States port of departure—be extended to include all trucks departing from the United States. It claimed that this extension would assist in preventing truck drivers from neglecting to file with U.S. Customs documentation relating to the exportation of articles temporarily imported into the United States under bond. The commenter believes that this change would eliminate claims for liquidated damages assessed against importers for failure to cancel temporary importation bond entries when the claim is assessed merely for the failure of the driver to file the necessary documentation for cancellation of the bond at the port of departure.

Customs believes that to require all trucks to stop at United States ports of departure would create traffic problems at the Canadian border that would not be justified by the limited benefits to be derived.

3. Another carrier expressed concern that because the proposed § 123.41(a) refers to "sealable truckload" shipments, it could be inferred that open exposed flatbed or low side flatbed trucks could not utilize the procedures in this section of the regulations. However, Subpart E of Part 123, Customs Regulations, is applicable to truck shipments transiting Canada and truck shipments transiting the United States regardless of whether the truck is sealable or non-sealable. Accordingly, all trucks with merchandise transiting Canada from point-to-point in the United States and all trucks with merchandise transiting the United States from point-to-point in Canada may utilize this procedure. Under the proposal, the driver of each truck transiting Canada, whether sealable or non-sealable, would be required to present the manifest to U.S. Customs at the United States port of departure for review and validation prior to entry into Canada. The language in the initial proposal has been revised to clarify this point.

Other Changes

After consideration of all the comments and further review of this matter with representatives of Canadian Customs, it has been determined that adoption of the proposed amendments would be in the best interests of protecting the revenue and in preventing the unlawful importation of narcotics and other contraband. However, adoption of the amendments would necessitate certain changes in the procedures followed by U.S. Customs officers concerning presentation of Customs Form 7512–B Canada 8½ which were not included in the proposal to amend § 123.41. Furthermore, it also would be necessary to make conforming amendments to § 123.42, Customs Regulations (19 CFR 123.42), concerning the procedures used by Canadian Customs for truck shipments transiting the United States while proceeding between points in Canada.

Canadian Customs also is concerned with its present in-transit procedures and the potential loss of its revenue. Therefore, in cooperation with U.S. Customs, it plans to change its procedures to require the presentation of a United States-Canada Transit Manifest, Customs Form 7512–B Canada 8½, for validation by Canadian Customs at the Canadian port of departure for truck shipments transiting the United States from point-to-point in Canada. The change in Canadian Customs procedures would be effective on the same date as the changes in U.S. Customs procedures. Accordingly, it would be necessary to amend § 123.42 to reflect the changes in Canadian Customs requirements and procedures.

In addition to the above changes, a number of minor editorial and stylistic changes would be needed to clarify the regulations.

In view of the foregoing, a new notice is being issued to allow any interested party an opportunity to comment on the revised proposed amendments.

Drafting Information

The principal author of this document was Charles D. Ressin, Regulations and Research Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Comments

Before adopting this proposal, consideration will be given to any written comments submitted to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with § 103.3(b), Customs regulations (19 CFR 103.8(b)), during regular business hours at the Regulations and Research Division, Room 2335, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

Inapplicability of EO 12044

This document is not subject to the Treasury Department directive implementing Executive Order 12044, "Improving Government Regulations", because the proposal was in process before May 22, 1978, the effective date of the directive.

Authority

These amendment are proposed under the authority of R.S. 251, as amended, and sections 553, 554, 624, 46 Stat. 742, as amended, 743, 759 (19 U.S.C. 66, 1553, 1554, 1624).

Proposed Amendments

It is proposed to amend Part 123, Customs Regulations (19 CFR Part 123), in the following manner:

PART 123—CUSTOMS RELATIONS WITH CANADA AND MEXICO

Subpart E—United States and Canada In-Transit Truck Procedures

1. It is proposed to amend § 123.41 to read as follows:

§ 123.41 Truck shipments transiting Canada.

(a) *Manifest required.* Trucks with merchandise transiting Canada from point to point in the United States will be manifested on United States-Canada Transit Manifest, Customs Form 7512–B Canada 8½. The driver shall present the manifest in four copies to U.S. Customs at the United States port of departure for review and validation.

(b) *Procedure at United States port of departure.* The Customs officer receiving the manifest shall validate it by stamping each copy in the lower right hand corner to show the port name and date and by initialing each copy. All copies of the validated manifest then will be returned to the driver for presentation to Canadian Customs at the Canadian port of entry.

(c) *Procedure at Canadian ports of arrival and exit.* Truck shipments transiting Canada shall comply with Canadian Customs regulations. These procedures generally are as follows:

(1) *Canadian port of arrival.* The driver shall present a validated United States–Canada Transit Manifest, Customs Form 7512–B Canada 8–½, in four copies to the Canadian Customs officer, who shall review the manifest for accuracy and verify its validation by U.S. Customs. If the manifest is found not to be properly validated, the truck shall be required to be returned to the United States port of departure so that the manifest may be validated. If the manifest is validated properly and no irregularity is found, the truck will be sealed unless sealing is waived by Canadian Customs. The original manifest will be retained by Canadian Customs at the port of arrival, and the three copies will be returned to the driver for presentation to Canadian Customs at the Canadian port of exit.

(2) *Canadian port of exit.* The driver shall present the three copies of the validated manifest to the Canadian Customs officer at the Canadian port of exit for certification. That officer shall verify that the seals are intact if the vehicle has been sealed or, if sealing has been waived, that there are no irregularities. After verification and certification of the manifest, two certified copies will be returned to the driver (one to be presented to U.S. Customs at the United States port of reentry, the other for the carrier's records), and the truck will be allowed to proceed to the United States.

(d) *Procedure at United States port of reentry.* The driver of a truck reentering the United States after transiting Canada shall present a certified copy of the United States-Canada Transit Manifest, Customs Form 7512–B Canada 8–½, to the U.S. Customs officer. If this copy of the manifest does not bear the certification of a Canadian Customs officer at the Canadian port of exit, the driver will be allowed to return to that port to have it certified. The driver will be allowed to break any seals affixed by Canadian Customs upon presentation of a certified manifest. If sealing has been waived, the U.S. Customs officer shall satisfy himself that the truck contains only that merchandise covered by the manifest which moved on the truck from the United States through Canada.

(e) *Proof of exportation from Canada.* The certified copy of the manifest returned to the driver by Canadian Customs at the Canadian port of exit will serve as proof of exportation of the shipment from Canada.

2. It is proposed to amend § 123.42 to read as follows:

§ 123.42 Truck shipments transiting the United States.

(a) *Manifest required.* Trucks with merchandise transiting the United States from point to point in Canada will be manifested on United States-Canada Transit Manifest, Customs Form 7512–B Canada 8½. The driver, in accordance with Canadian Customs regulations, shall present the manifest in four copies to Canadian Customs at the Canadian port of departure for review and validation.

(b) *Procedure at Canadian port of departure.* The Customs officer receiving the manifest shall validate it by stamping each copy in the lower right hand corner to show the port name and date and by initialing each copy. All copies of the validated manifest then will be returned to the driver for presentation to U.S. Customs at the United States port of entry.

(c) *Procedure at United States port of arrival*— (1) *Presentation of manifest.* The driver shall present a validated United States-Canada Transit Manifest, Customs Form 7512–B Canada 8½, in four copies to the U.S. Customs officer, who shall review the manifest for accuracy and verify its validation by Canadian Customs. If the manifest is found not to be validated properly, the truck will be required to be returned to the Canadian port of departure so that the manifest may be validated in accordance with Canadian Customs regulations. If the manifest is validated properly and no irregularity is found, the truck will be sealed unless sealing is waived by U.S. Customs. The U.S. Customs officer shall note on the manifest over his initials the seal numbers or the waiver of sealing, retain the original, and return three copies of the manifest with the related Customs Form 7512–C (duplicate) to the driver for presentation to U.S. Customs at the United States port of exit.

(2) *Sealing or waiver of sealing.* Trucks transiting the United States will be sealed with red in-bond seals at the United States port of arrival unless sealing is waived in accordance with § 18.4 of this chapter. If a truck cannot be sealed effectively and sealing is deemed necessary to protect the revenue or to prevent violation of the Customs laws or regulations, the truck will not be permitted to transit the United States under bond.

(d) *Procedure at United States port of exit.* The driver shall present the three validated copies of the manifest and the related Customs Form 7512–C (duplicate) to the U.S. Customs officer at the U.S. port of exit. The Customs officer shall check the numbers and condition of the seals and record and certify his findings on all copies of the manifest, returning two certified copies to the driver (one to be presented to Canadian Customs at the Canadian port of reentry, the other for the carrier's records), and the truck will be allowed to proceed to Canada. The check of the seals shall be made as follows:

(1) If the seals are intact, they will be left unbroken unless there is indication that the contents should be verified.

(2) If the seals have been broken, or there is other indication that the contents should be verified, all merchandise will be required to be unladen and a detailed inventory made against the waybills.

If sealing has been waived, the Customs officer shall verify the goods against the accompanying waybills in sufficient detail to detect any irregularity.

(e) *Procedure at Canadian port of reentry.* The driver of a truck reentering Canada after transiting the United States shall present a certified copy of the United States-Canada Transit Manifest, Customs Forms 7512–B Canada 8½, to the Canadian Customs officer. If this copy of the manifest does not bear the certification of a U.S. Customs officer at the United States port of exit, the driver will be allowed to return to that port to have it certified.

(f) *Proof of exportation from United States.* The certified copy of the manifest returned to the driver by the U.S. Customs officer at the U.S. port of exit will serve as proof of exportation of the shipment from the U.S.

William T. Archey,
Acting Commissioner of Customs.

Approved: July 29, 1980.

Richard J. Davis,
Assistant Secretary of the Treasury.

BILLING CODE 4810-22-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Ch. VII

Reclamation and Enforcement; Public Disclosure of Comments Received From Federal Agencies on the Utah State Permanent Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), U.S. Department of the Interior.

ACTION: Announcement of public disclosure of comments on the Utah program from the Environmental Protection Agency (EPA), the Department of Agriculture (USDA), and other Federal agencies.

SUMMARY: Before the Secretary of the Interior may approve permanent State regulatory programs submitted under Section 503(a) of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), the views of certain Federal agencies must be solicited and disclosed. The Secretary has solicited comments of these agencies and is today announcing their public disclosure with regard to the Utah State permanent program.

ADDRESS: Copies of the comments received are available for public review during business hours at:

Office of Surface Mining, Reclamation and Enforcement, Brooks Towers, Room 5010, 1020 15th Street, Denver, Colorado 80202. Telephone (303) 837–5421.

Office of Surface Mining, Department of the Interior, Room 153, South Building, 1951 Constitution Avenue, NW., Washington, D.C. 20240.

Division of Oil, Gas and Mining, 1588 West North Temple, Salt Lake City, Utah.

FOR FURTHER INFORMATION CONTACT:

Mr. Donald Crane, Regional Director, Office of Surface Mining, Brooks Towers, 1020 15th Street, Denver, Colorado 80202; or

Mr. Carl C. Close, Assistant Director, State and Federal Programs, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, D.C. 20240. Telephone (202) 343–4225.

SUPPLEMENTARY INFORMATION: The Secretary of the Interior is evaluating the Utah permanent regulatory program submitted by Utah for his review on March 3, 1980. In accordance with Section 503(b)(1) of SMCRA and 30 CFR 732.13(b)(1), the Utah program may not be approved until the Secretary has solicited and publicly disclosed the views of the Administrator of the Environmental Protection Agency, the Secretary of Agriculture, and the heads of other Federal agencies concerned with or having special expertise relevant to the program as proposed. In this regard, the following Federal agencies were invited to comment on the Utah program:

Department of Agriculture
- USDA State Land Use Committee
- Soil Conservation Service
- Forest Service
- Farmers Home Administration
- Scientific and Educational Administration—Agricultural Research
- Agricultural Stabilization and Conservation Service

Advisory Council on Historic Preservation
Council of Environment Quality
Department of Labor
- Mine Safety and Health Administration

Reclamation and Enforcement; Public Disclosure of Comments Received From Federal Agencies on the New Mexico State Permanent Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), U.S. Department of the Interior.

ACTION: Announcement of public disclosure of comments on the New Mexico program from the Environmental Protection Agency (EPA), the Department of Agriculture (USDA), and other Federal agencies.

SUMMARY: Before the Secretary of the Interior may approve permanent State regulatory programs submitted under Section 503(a) of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), the views of certain Federal agencies must be solicited and disclosed. The Secretary has solicited comments of the agencies and is today announcing their public disclosure with regard to the New Mexico State permanent program.

ADDRESSES: Copies of the comments received are available for public review during business hours at:

Energy and Minerals Department, Division of Mining and Minerals, First Northern Plaza East, Room 200, Santa Fe, New Mexico 87501, Telephone (505) 827–5451.

Office of Surface Mining, Brooks Towers, Room 5010, 1020 15th Street, Denver, Colorado 80202, Telephone: (303) 837–5421.

Office of Surface Mining, Room 135, Interior South Building, 1951 Constitution Avenue, NW., Washington, D.C. 20240, Telephone: (202) 343–4728.

FOR FURTHER INFORMATION CONTACT:

Mr. Donald Crane, Regional Director, Office of Surface Mining, Brooks Towers, 1020 15th Street, Denver, Colorado 80202, Telephone: (303) 837–5421; or

Mr. Carl C. Close, Assistant Director, State and Federal Programs, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Ave., NW., Washington, D.C. 20240, Telephone: (202) 343–4225.

SUPPLEMENTARY INFORMATION: The Secretary of the Interior is evaluating the New Mexico permanent regulatory program submitted by New Mexico for his review on February 28, 1980. In

accordance with Section 503(b)(1) of

These comments are available for

business hours at the following

ENVIRONMENTAL PROTECTION AGENCY

40 CFR PART 52

[FRL 1578-8]

Proposed Revisions of the Delaware State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The State of Delaware has submitted amendments to its air pollution control regulations and has requested that they be reviewed and processed as revisions of the Delaware State Implementation Plan.The amendments consist of changes to Regulations I (Definitions), II (Registration and Permits), III (Ambient Air Quality Standards), IV (Particulate Emissions from Fuel Burning Equipment), VIII (Sulfur Dioxide Emissions from Fuel Burning Equipment), XII (Nitrogen Oxides Emissions from Fuel Burning Equipment—New Castle County), XIV (Visible Emissions), XV (Air Pollution Alert and Emergency Plan), and XVII (Source Monitoring, Record Keeping, and Reporting). The State has also submitted a request for variance which would allow the Getty Refining and Marketing Company's catalytic cracking operations to emit particulates in excess of the limitations established in Regulations V and XIV until September, 1980, after which time the unit would be brought into compliance.

DATE: The public is invited to submit comments on these SIP revisions by September 19, 1980.

ADDRESSES: All comments should be addressed to Glenn Hanson, Chief, WV, PA, and DE Section, Air Programs Branch, U.S. Environmental Protection Agency, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, PA 19106, ATTN: AH009/010DE

Copies of the materials submitted by the State of Delaware are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Curtis Building, Tenth Floor, Sixth and Walnut Streets, Philadelphia, PA 19106, Attn: Patricia Sheridan.

Public Information Reference Unit, EPA Library, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Mr. Harold A. Frankford (3AH12), AIr Programs Branch, U.S. Environmental Protection Agency, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, PA 19106, Telephone (215) 597-8392.

SUPPLEMENTARY INFORMATION:

Background

On March 12, 1980, the State of Delaware submitted to the Regional Administrator, EPA Region III, amendments to the State of Delaware Regulations Governing the Control of Air Pollution and requested that they be reviewed and processed as revisions of the Delaware State Implementation Plan (SIP). Delaware submitted proof that a public hearing on these amendments was held on December 11 and 12, 1979, in accordance with the requirements of 40 CFR 51.4.

The amendments submitted by Delaware consist of changes to Delaware's Regulations I, II, III, IV, VII, XII, XIV, XV, and XVII, and of a variance allowing the Getty Refining and Marketing Company's catalytic cracking operations to emit particulates in excess of the limitations of Regulations V and XIV until September, 1980, after which time the unit would be brought into compliance.

II. Amendments to Delaware Regulations

Delaware proposes to revise Regulations I, II, III, IV, VIII, XII, XIV, XV, and XVII as follows:

A. Regulation I

Delaware has revised the definitions in Regulation I as described below. New wording is underlined, deleted wording is enclosed by brackets.

1. Alteration: Delaware has deleted this definition and is using the definition of "Modification" as a substitute.

2. Construction, Installation, (or) Alteration *or Modification Permit:* Delaware has added "*or Modification*" to the list of types of permits defined.

The text of the definition remains the same.

3. Fuel Burning Equipment: Delaware has changed this definition to "*Each unit, or any combination of units discharging* to a common *stack* used for the burning of fuel or other combustible material for the primary purpose of utilizing the thermal energy released."

4. Modification: Delaware has amended the fourth sentence of this definition as follows: Conversion to coal required for energy consideration, as specified in (Section 114(d)(5)) *Section 113(d)(5)* of the Clean Air Act, shall not be considered a modification.

5. Sulfur Recovery Operation: Delaware has changed this definition to read: Any operation designed for the recovery of elemental sulfur, *including any upstream part of the operation designed to separate hydrocarbon sulfide from refinery gasses or water.*

B. Regulation II—Registration and Permits

Delaware has modified Regulation II in three ways. First, Delaware has amended Section 4.2 of the Regulation so that gasoline station storage tanks in New Castle County having a capacity of 2,000 gallons or more would no longer be exempt from Regulation II's requirements. Second, Delaware has modified Section 6 so that only an operating permit can be extended. Third, Delaware has modified Section 6 to exempt those holding open burning permits from the need to submit written requests for extensions.

C. Regulation III—Ambient Air Quality Standards

Delaware has made three changes in this regulation. First, Delaware has adopted EPA's recently promulgated ambient air quality standard for lead. Second, Delaware has amended its air quality standards for suspended particulates, sulfur dioxide, carbon monoxide, hydrocarbons, and nitrogen dioxide to make them equivalent to EPA's standards. Third, Delaware has revised Section 1.6 by listing within it more recent sampling and analytical procedures for determining concentrations of contaminants in the air.

D. Regulation IV—Particulate Emissions From Fuel Burning Equipment

Delaware has submitted one minor change in Regulation IV. Delaware has modified Section 2.1, which reads "No person shall cause or allow the emission of particulate matter in excess of 0.3 pounds per million Btu heat input, maximum two hour average, from any unit of fuel burning equipment," by deleting the words "unit of."

E. Regulation VIII—Sulfur Dioxide Emission From Fuel Burning Equipment

Delaware has amended Regulation VIII by including in Section 2 a specification of the sampling and analysis techniques that must be used to determine the sulfur content of oil.

F. Regulation XII—Nitrogen Oxide Emissions

Delaware has requested that Regulation XII be deleted from the SIP.

G. Regulation XIV

Delaware has amended Regulation XIV by adding to it two additional sections called Sections 3 and 4. Section 3 allows Delaware to make case-by-case modifications of its opacity requirements. Delaware is able to establish more stringent opacity requirements for a source if it determines that the source when in compliance with an applicable mass emission rate has emissions with an opacity more restrictive than Delaware's usual requirements. In addition, Delaware is able to relax its standard opacity requirements whenever a source can demonstrate that it is in compliance with an applicable mass emission standard yet can not meet the standard opacity requirement. Section 4 makes it necessary for determinations of compliance with opacity standards to be made in accordance with Section 1.5(c) of Regulation XX.

H. Regulation XV—Air Pollution Alert and Emergency Plan

Delaware has redefined the air quality levels at which alert stages I, II, and emergency are declared. Delaware has defined alert causing 24 hour concentrations of TSP in ug/m^3 rather than in parts per million COHS. Also, Delaware has defined SO_2 in ug/m^3 rather than in parts per million in those cases where TSP and SO_2 levels must be multiplied to establish if an alert is required.

I. Regulation XVII—Source Monitoring, Record Keeping and Reporting

Delaware has added a new subsection 1.6 to this regulation. This subsection states that, "The reference methods used to determine compliance with the standards prescribed in Regulation No. IV; V; VII; 3.1; IX and XIV shall be those set forth in Section 1.5, Regulation XX or such other method approved by the Department."

III. Variance Request for the Getty Refining and Marketing Company.

In addition to requesting EPA approval of the regulatory changes described above, Delaware has requested that EPA approve a variance for the Getty Refining and Marketing Company's Delaware City refinery. The variance would allow the refinery's catalytic cracking unit to continue to operate despite mechanical problems which have caused its particulate emissions to increase above the levels permitted by Regulations V and XIV. The variance would be in effect until Getty could correct the problems causing excess particulate emissions by making repairs during a routine shutdown scheduled for September, 1980. The variance would be terminated earlier if Getty is able to bring the cracking unit into compliance with Regulation V earlier than September 30, 1980.

Delaware's Department of Natural Resources and Environmental Control (the Department) has included a number of conditions in the variance. These conditions are:

1. The Company shall continue its efforts to determine and to resolve the exact cause of the excessive catalyst emission problem as expeditiously as practicable. The Company shall summarize the results of these efforts in a written report to the Department at three-month intervals.

2. The Company shall measure the quantity of particulate emissions from the cracking unit stack at intervals acceptable to the Department and shall report the results of such tests promptly to the Department. The cracking unit shall be considered in compliance with Section 5.1, Regulation No. V when so indicated by two consecutive stack tests.

3. The Company shall measure and record the opacity of emissions from the cracking unit on a continuous basis during the variance period and provide a summary of the results of such monitoring to the Department at three-month intervals.

4. The Company shall disseminate to the news media and otherwise make available to the public a report at three-month intervals of the results of opacity and mass emissions tests and such other information pertaining to the Company's progress in resolving the excess emissions problems.

Delaware has given three reasons for allowing Getty to wait until the scheduled shutdown date of the catalytic cracking unit before requiring its repair. First, immediate shutdown of the cracking unit would lead to large cuts in fuel production. This would

occur because immediate shutdown of the unit would not preclude the need for

Station emits sulfur dioxide in excess of the interstate pollution requirement of

therefore, extending the public comment period until September 3, 1980.

SUPPLEMENTARY INFORMATION: On April 30, 1980 the Environmental Protection

percent sulfur content fuel oil will not result in the contravention of any

approval or disapproval of this proposed plan revision will be based on whether

occur because immediate shutdown of the unit would not preclude the need for or alter the length of the scheduled shutdown in September, 1980. Second, Getty now has three major environmental projects under construction, a stack gas scrubber, a sour water stripper, and a waste water treatment plant. In order to repair the cracking unit immediately, manpower resources might have to be shifted from these projects, causing their completion to be delayed. Third, air quality modeling shows that the cracking unit should cause no violations of ambient air quality standards during the period of the variance. Thus, the health of the public should not be adversely affected by granting the variance.

IV. EPA Actions

The Administrator is proposing to approve the amendments to Delaware's regulations and the variance described above. EPA invites the public to submit comments to the address given above on whether EPA should proceed to approve these amendments and this variance as revisions of the Delaware SIP.

The Administrator's decision to approve or disapprove the proposed revisions will be based on the comments received and on a determination of whether the amendments to Delaware's Air Pollution Control regulations, as well as the variance for Getty's Delaware City refinery, meet the requirements of Section 110(a)(2) of the Clean Air Act and 40 CFR Part 51, Requirements for Preparation, Adoption, and Submittal of State Implementation Plans.

(42 U.S.C. 7401–642)

Dated: July 24, 1980.

Alvin R. Morris,

Acting Regional Administrator.

[FRL 1574-2]

Interstate Pollution Abatement; Proceedings Under Section 126 of the Clean Air Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of extension of the closing of the record of proceedings under section 126 of the Clean Air Act.

SUMMARY: At Jefferson County's request, EPA is extending, until September 3, 1980, the comment period on their petition under section 126 of the Clear Air Act concerning the issue of whether the Public Service Indiana Gallagher Station emits sulfur dioxide in excess of the interstate pollution requirement of the Clean Air Act.

DATE: Deadline for submission of written materials and closing of the public hearing record is September 3, 1980.

ADDRESSES: Copies of the docket, #5A–80–9, for this section 126 petition are on file at:

The Central Docket Section, West Tower Lobby, Gallery 1, 401 M Street, S.W., Washington, D.C. 20460.

Library, Region IV, U.S. Environmental Protection Agency, 345 Courtland Street, N.E., Atlanta, Georgia 30308.

Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 S. Dearborn Street, Chicago, Illinois 60604.

Essentially similar material is available for public inspection at:

Air Pollution Control District of Jefferson County, 914 E. Broadway, Louisville, Kentucky 40204.

Air Pollution Control Division, Indiana Board of Health, 1330 W. Michigan Street, Indianapolis, Indiana 46206.

Division of Air Pollution Control, Kentucky Department for Natural Resources and Environmental Protection, W. Frankfort Office Complex, U.S. 127 South Frankfort, Kentucky 40601.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Miller, Air Programs Branch, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886–6031.

Mr. Barry Gilbert, Air Programs Branch, U.S. Environmental Protection Agency, Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30308, (404) 881–3286.

SUPPLEMENTARY INFORMATION: In a notice dated March 17, 1980, 45 FR 17048, EPA announced that a hearing would be held on April 17, 1980 in Louisville, Kentucky to initiate proceedings under section 126 of the Clean Air Act on the issue of whether the Public Service Indiana Gallagher Stations emits sulfur dioxide in violation of section 110(a)(2)(E)(i) of the Clean Air Act. The hearing was held, at which time it was announced that the public comment period would be kept open until 30 days from the date of the hearing. On May 2, 1980 the EPA extended the public comment period to May 19, 1980 (45 FR 29313).

On May 15, 1980, the Air Pollution Control District of Jefferson County requested an extention of the comment period for the purpose of reviewing the transcript of the hearing. The EPA is, therefore, extending the public comment period until September 3, 1980.

Dated: August 8, 1980.

John McGuire,

Regional Administrator.

BILLING CODE 6560-01-M

40 CFR Part 52

[FRL 1578-7]

Approval and Promulgation of Implementation Plans; Proposed Revision to the New York State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This proposal announces receipt of a request from the State of New York to revise its State Implementation Plan (SIP). If approved by the Environmental Protection Agency, this revision will have the effect of continuing a temporary relaxation in the sulfur content limitation applicable to fuel burning sources with a capacity less than 250 million BTU per hour located in parts of the Southern Tier East, Central New York and Champlain Valley (Northern) Air Quality Control Regions. These relaxations, called "special limitations," would allow these sources to continue the use of fuel oil with a maximum sulfur content of 2.8 percent, by weight, until December 31, 1982.

DATES: Comments must be received by October 20, 1980.

ADDRESSES: All comments should be addressed to: Charles S. Warren, Regional Administrator, US. Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10278.

Copies of the proposal are available for public inspection during normal business hours at:

U.S. Environmental Protection Agency, Air Programs Branch, Room 908, Region II Office, 26 Federal Plaza, New York, New York 10278.

U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460.

New York State Department of Environmental Conservation, 50 Wolf Road, Albany, New York 12233.

FOR FURTHER INFORMATION CONTACT:

William S. Baker, Chief, Air Programs Branch, U.S. Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10278, 212–264–2517.

SUPPLEMENTARY INFORMATION: On April 30, 1980 the Environmental Protection Agency (EPA) received a proposed revision to the New York State Implementation Plan (SIP). This revision provides for the continuation of a State initiated fuel oil sulfur content relaxation ("special limitation") affecting certain fuel burning sources in certain areas of the State. The submittal requests that this "special limitation," which was previously approved by EPA (42 FR 56607, October 27, 1977) and which expired December 31, 1979, be renewed and extended through December 31, 1982.

"Special limitations" are authorized by Part 225.2 of Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York and can allow individual sources or groups of sources to use a fuel of a different sulfur content than the prevailing regulation. The State's proposed extension of the "special limitation" would continue to relax (unless otherwise constrained by a Prevention of Significant Deterioration (PSD) permit) to a maximum of 2.8 percent sulfur, by weight, the sulfur-in-fuel-oil limitation applicable to sources which do not have a total heat input in excess of 250 million BTU per hour located in the following areas:

1. The Southern Tier East Air Quality Control Region (AQCR), with the exception of all sources in Broome County.

2. The Central New York AQCR, with the exception of the Oswego Facilities Trust Company in Oswego County and all sources in Onondaga County.

3. The Champlain Valley (Northern) AQCR, with the exception of all sources in the City of Glens Falls and sources with a total heat input greater than 100 million BTU per hour in the Town of Queensbury.

The State's SIP revision submittal consists of:

1. A technical support document evaluating the air quality impact of the special limitations.

2. Public hearing documents relating to the proposed rule changes.

3. Copies of letters sent to the States of New Jersey, Connecticut, Vermont, Pennsylvania and to local air pollution control agencies.

The State's SIP revision request was submitted in accordance with all EPA requirements under 40 CFR Part 51. These include the need for a public hearing, which was held by the State on November 27, 1979.

In order for EPA to be able to find the State's "special limitation" approvable as a revision to the New York SIP, it must be demonstrated that the use of 2.8 percent sulfur content fuel oil will not result in the contravention of any national ambient air quality standard or violate any applicable PSD increment.

It should be noted that the objective of the PSD program, as discussed in Part C, Sections, 160–169, of the Clean Air Act of 1977, is to protect areas with air quality cleaner than the national ambient air quality standards. The program is designed to insure that economic growth can occur in a manner consistent with the preservation of existing clean air resources. Pursuant to the PSD regulations promulgated on August 7, 1980 (45 FR 52676), the baseline date is defined as the date after August 7, 1977 on which the first complete application if filed with the appropriate reviewing authority by a source subject to the PSD regulations. Since there have not been any complete applications filed to date in the three AQCRs affected by today's proposal, the baseline date has not been set in the AQCRs. Therefore, these revisions to the New York SIP do not consume increment and do not need to be evaluated in terms of increment consumption.

EPA has reviewed the technical material submitted by New York State Department of Environmental Conservation and proposes to approve the renewal of the "special limitation" in the three AQCR's. EPA concurs with the State's determination that no national ambient air quality standard or PSD increment will be contravened.

Interested persons are invited to comment on any element of the subject revision and on whether or not the proposed New York SIP revision meets Clean Air Act requirements. Comments received by (60 days following publication) will be considered in EPA's final decision. All comments received will be available for inspection at the Region II Office of EPA at 26 Federal Plaza, Room 908, New York, New York 10278.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. I have reviewed this package and determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

This notice is issued as required by Section 110 of the Clean Air Act, as amended, to advise the public that comments may be submitted as to whether the proposed revision to the New York State Implementation Plan should be approved or disapproved. The Administrator's decision regarding approval or disapproval of this proposed plan revision will be based on whether it meets the requirements of Section 110 (a)(2)(A)–(K) of the Clean Air Act and EPA regulations in 40 CFR Part 51.

(Sec. 110, 301 Clean Air Act, as amended (42 U.S.C. 7410, 7601))

Dated: July 21, 1980.

Charles S. Warren,

Regional Administrator.

BILLING CODE 6560-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-5883]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, (202) 426–1460 or Toll Free Line (800) 424–8872 (In Canada and Hawaii call Toll Free Line (800 424–9080), Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR 67.4 (a)).

These elevations, together with the

Proposed Base (100-Year) Flood Elevations—Continued

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or Regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

BILLING CODE 6718-03-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[Docket No. 21310; RM-1847; RM-1984; and RM-2742]

FM Quadraphonic Broadcasting

AGENCY: Federal communications Commission.

ACTION: Prosposed rule making and memorandum opinion and order.

SUMMARY: Commission proposes specific standards for broadcasting compatible discrete and semi-discrete quadraphonic systems while it simultaneously asks for comments regarding the efficacy and practicality of adopting general standards. Denies CBS's petition for 4-2-4 quadraphonic standards as unnecessary and unenforceable.

DATES: Comments must be received on or before November 10, 1980, and reply comments must be received on or before January 9, 1981.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Albert S. Jarratt, Sr., Broadcast Bureau, (202) 653-7275.

SUPPLEMENTARY INFORMATION:

Adopted: July 17, 1980.

Released: August 14, 1980.

By the Commission.

Introduction

1. A *Further Notice of Inquiry* was released in this proceeding on January 10, 1979 (FCC 79-1, FR 44 FR 3732). The primary purpose of the *Further Notice* was to obtain additional information concerning the impact that the adoption of quadraphonic broadcasting standards would have on the possibility of reducing the channel spacing in the FM broadcast band.

Background

2. Earlier, the Commission had adopted a *Notice of Inquiry* on June 22, 1977 (FCC 77-44, FR 42 FR 34913) as a result of three petitions [1] which proposed rules and strandards for FM quadraphonic broadcasting. The objective of that *Notice* was to determine the degree of interest in quadraphonic broadcasting and, if sufficient interest was indicated, to develop a record to assist the Commission in formulating standards for the service.

3. Over 2,000 comments were received in response to the *Notice of Inquiry*. With few exceptions these favored some form of quadraphonic broadcasting. In general the comments equally favored 4-2-4 and 4-4-4 quadraphonic systems.[2] Broadcasters were also split in their preference for 4-2-4 and 4-4-4 systems. After analysis and review of the comments, the Commission concluded that there was substantial interest in FM quadraphonic broadcasting. Additionally, the commission detrermined from the technical data, that 4-4-4/4-3-4 quadraphonic systems can be accommodated within the present frequency assignment plan without objectional degradation to monophonic and sterophonic radio service. However, some doubt existed as to the feasibility of later reducing the channel spacing if quadraphonic standards were adopted.

4. Consequently, the Commission, in a meeting on September 14, 1978, determined that additional information was needed before standards could be proposed. Therefore, on January 2, 1979, the Commission adopted a *Further Notice of Inquiry ("FNOI")* to obtain information concerning the impact that the adoption of quadraphonic broadcasting standards would have on the possibility of later reducing the channel spacing in the FM broadcast band to 150 kHz or 100 kHz. In addition, the *FNOI* sought to explore the feasibility of operation of the various proposed quadraphonic systems within narrower channel spacings.[3] The *FNOI* explained that it may be necessary with 150 kHz channel spacing to restrict all baseband signals to within 75 kHz. It was acknowledged that such a reduction could preclude some of the proposed quadraphonic systems as well as affect present stereo and Subsidiary Communications Authorization (SCA) operations. The *FNOI* therefore requested comments concerning the effects on co-channel and adjacent channel protection ratios due to the operation of 4–2–4, 4–3–4, and 4–4–4 quadraphonic systems and SCA transmissions if FM channel separations were reduced to 150 kHz or 100 kHz. The Commission further stated that pending a determination regarding the efficacy of reducing FM channel spacings, it would consider adoption of quadraphonic broadcasting standard(s) only for such system(s) as could be clearly demonstrated to not preclude possible future reductions in channel spacing.

Discussion

5. Although there were many comments received by the Commission relative to the FM channel spacing, the vast majority simply expressed disapproval of any change in channel spacing. Only a few addressed the primary question asked in the *FNOI*. Technical data was received from QSI, however, that indicated the transmission of a discrete four channel (4–4–4) quadraphonic signal does not create greater adjacent channel interference than presently permitted monophonic or stereophonic transmissions. Under certain conditions monophonic transmissions could be shown to create greater adjacent channel interference than the quadraphonic systems under consideration. The QSI data also indicated that the receiver characteristics determine the required FM signal strength ratio (protection ratio) for a given audio signal to interference ratio. This was corroborated by comments submitted by RCA. By extrapolating the National Quadraphonic Radio Committee (NQRC) [4] test data, RCA stated, it could

[1] Petitions were submitted by Pacific FM, Inc., [later changed to Quadracast Systems, Inc., (QSI)], RM-1847, General Electric Company, (GE), RM-1984, and CBS, Inc., (CBS), RM-2742.

[2] Qradraphonic systems which have been proposed to date fall into three general categories, 4-2-4, 4-3-4, and 4-4-4. Where four independent or discrete audio sources are encoded by a "mattrix" into two composite signals transmitted as compatible left and right stereo signals to be later decoded back into four audio signals, the system has been designated as a 4-2-4 system. Where the four independent or discrete audio sources are combined in a composite siginals and transmitted as a main channel plus either 2 or 3 subchannels, all to be later converted back into 4 (discrete in the case of 4-4-4) audio signals, the systems are designated as 4-3-4 or 4-4-4, respectively.

[3] Narrower channel spacings were suggested by a report issued by the Commission's Office of Chief Engineer entitled "FM Broadcast Channel Frequency Spacing" (FCC/OCE RS 75-08).

[4] In 1972 the Electronic Industries Association sponsored the National Quadraphonic Radio Committee whose objective was to report to the Commission its conclusions regarding quadraphonic FM broadcasting standards. In November, 1975, the

Footnotes continued on next page

be shown ". . . that equally detrimental effects occur when narrowing channel spacings for FM quadraphonic systems as [compared] with currently authorized FM broadcast services". Quadraphonic transmissions would therefore be on an equal footing with existing FM broadcast services should narrower channel spacings be considered. This, RCA maintained, permitted the Commission to initiate the FM quadraphonic standards selection process without undue concern about particular compatibility situations. These views were supported by a number of other comments and were not disputed in any meaningful comments. RCA also commented that while the first order sidebands from a 4–4–4 transmission do not enter into the stereo subchannel of an adjacent FM channel with 150 kHz channel spacing, they may disturb the SCA operation or 4–4–4 reception on an adjacent FM channel. Comments on the importance of this problem are requested. Overall, these comments may be summarized as stating that (a) a reduction in channel spacing would not be precluded by adoption of quadraphonic standards, and (b) a reduction in the channel spacing would affect stereophonic broadcasting as well as quadraphonic transmissions.

6. From the data submitted, the Commission is persuaded that further consideration should be given to quadraphonic broadcasting standards. Our data analysis confirms the QSI and RCA comments regarding the minimal impact adoption of quadraphonic standards would have on the possibility of reducing the FM channel spacing. We are further persuaded that a reduction of the channel spacing would affect quadraphonic, stereophonic, and SCA transmissions similarly. In view of this we believe adoption of quadraphonic standards would not foreclose the possibility of exploring a reduction in the FM channel spacing in a future proceeding.[5] Consequently, we are proposing to amend our rules to permit quadraphonic broadcasting.

7. The FCC has reviewed the formal proposals for quadraphonic broadcast systems made by QSI, General Electric (GE), and CBS, Inc. (CBS). In addition, we have examined those submitted by Cooper-UMX, NRDC, Zenith Radio Corporation (Zenith), Sansui, and RCA Corporation (RCA). The following objectives, outlined in the *Further Notice of Inquiry*, were used in our review of the different systems suggested:

a. any standards established must be compatible with the present monophonic and stereophonic broadcasting service,

b. any system proposed should be capable of providing the highest quality service at reasonable cost, and

c. any standards established should be as broad as practical to permit the marketplace (broadcasters and listening public) to influence the selection between competing systems.

The FCC has identified two alternative approaches for providing standards for quadraphonic broadcasting, both of which appear to be consistent with these objectives. The first set of standards ("specific standards") would provide for a compatible 4–3–4/4–4–4 system of quadraphonic broadcasting similar to the systems proposed by QSI and RCA. Compatibility between the 4–3–4 and 4–4–4 modes will permit 4–4–4 transmissions to be received in either the 4–4–4, 4–3–4, stereophonic, or monophonic format. Transmissions in the 4–3–4 mode will be capable of reception in either the 4–3–4, stereo, or monophonic format. The Commission anticipates receivers will be produced that will have the capability to automatically detect and adjust for transmissions to either the 4–4–4 or 4–3–4 modes. This proposal for specific standards would permit licensees the flexibility to choose the quadraphonic mode best suited for their individual needs. It would provide listeners with a quadraphonic signal that is compatible with present stereo transmissions that may be decoded for high quality discrete quadraphonic reproduction (assuming transmissions in the 4–4–4 mode). It further could be decoded for slightly lower quality 4–3–4 quadraphonic reproduction in marginal signal areas (again assuming 4–4–4 transmissions). In areas where quadraphonic reception is not possible, the quadraphonic signal may be decoded in either the stereophonic or monophonic format.

8. Under the specific standards being proposed, further consideration would not be given to the systems proposed by Cooper-UMX, NDRC, GE, and Zenith. Commission concerns with certain characteristics of these systems were noted in the *FNOI*. These dealt with the complexity and/or performance deficiencies of these systems as compared to the QSI and RCA systems. None of the comments received in response to the *FNOI* have altered the Commission's findings with respect to them. Therefore, for the specific standards proposal, we find no reason to examine these systems further. Instead, this proposal focuses solely on the RCA and QSI systems and the possibilities they offer for a compatible hierarchy of quadraphonic broadcasting options.

9. Even greater flexibility would be afforded licensees and listeners under the alternative to the "specific standards" approach outlined above. This proposal is termed the "general standards" approach and would rely totally on the marketplace to determine which quadraphonic systems would be used. Only the minimum standards necessary to protect the existing allocation structure and insure the compatibility of the transmitted signal with existing receivers would be adopted. The operation of any quadraphonic transmission system that meets the general standards would be permitted under this approach. This includes those systems excluded from further consideration under the specific standards approach and any others which might be developed at a later date. Further discussion of this option is contained in paragraph 14. Under either approach, standards are not being proposed for the 4–2–4 system submitted by CBS, or for any other 4–2–4 system (such as Sansui). Further discussion of this decision is contained in paragraph 19.

10. The specific standards being proposed are based on the RCA and QSI system proposals. The similarities between them were noted in the *FNOI*. The RCA system emphasis is on the compatible 4–3–4/4–4–4 aspect while the QSI system emphasis in on a 4–4–4 system. However, the QSI proposal includes a 4–3–4 option that is almost identical with the proposed RCA system. Both systems use 76 kHz for a third quadraphonic subcarrier. The RCA proposal specifies that the front minus back signal modulate the second quadraphonic subcarrier and the diagonal or criss-cross signal modulate the third quadraphonic subcarrier. The QSI proposal specifies that the diagonal signal modulate the second quadraphonic subcarrier and the front minus back signal modulate the third quadraphonic subcarrier. However, during the NQRC tests the signals on these two subcarriers were switched by QSI to agree with that suggested by RCA. RCA proposes a second pilot subcarrier in phase quadrature at 76 kHz to control receiver mode switching. Also RCA suggests that the presence of a signal modulating the 38 kHz quadrature subcarrier could be used to indicate 4–3–4 quadraphonic transmission. QSI suggests that the 19 kHz pilot be used for the freq/phase reference of all subcarriers including SCA. Although QSI mentions that a second pilot may be inserted for mode indication, it states that such an insertion may increase overall intermodulation and multipath susceptability. Therefore, QSI suggests that the presence of quadraphonic information may be used to automatically switch quadraphonic receiving modes and to indicate quadraphonic presence.

11. The Commission's preference for switching and mode indication techniques that minimize the use of additional pilot tones was noted in the FNOI. Comments indicate that additional pilot tones (except for the possibility of submerged tones) are both unnecessary and undesirable. Informal comments to the Commission indicate that a submerged switching tone (more than 60 decibels below 90 percent modulation of the main carrier) in the vicinity of 16 to 17 kHz may be practical to indicate which quadraphonic mode is being transmitted and to provide automatic receiver mode switching as well as accomplish other functions such as to indicate the operation of noise reduction circuitry. The Commission is aware that QSI has been demonstrating a custom receiver that requires no switching tones, being actuated by the presence of subchannel information. However, the Commission does not know at this time if automatic mode switching without submerged tones will be satisfactory in marginal signal areas or if it will be necessary for the listener to make a manual adjustment. This may be a function of the design of the receiver. Further comments in this regard are requested. Comments were requested in the FNOI regarding this matter but few were received. Comments are also solicited on whether the Commission should require any submerged tones and how that might affect the introduction of new systems not now before the Commission.

12. The specific standards we are proposing will allow licensees to select the particular transmission mode which best suits their needs as well as those of their particular listening audience. The primary considerations of the proposed quadraphonic modes that would be available to broadcasters are as follows:

4–4–4. Stations presently equipped for stereo face greater expense to implement this service than would be encountered in implementing 4–2–4 service and quadraphonic station coverage may be reduced somewhat. However, many commenting parties expressed the view that 4–4–4 provides the best overall quadraphonic performance. Existing SCA operations would have to be changed when tranmitting in this mode.

4–3–4. Stations opting for this mode would face expenses similar to those required for 4–4–4. However, potential loss of quadraphonic coverage is reduced and existing SCA operations would be unaffected. The 4–3–4 mode is considered to have many of the desirable characteristics of the 4–4–4 mode. Although some believe that 4–3–4 has certain inherent limitations, others believe it has advantages. Since 4–3–4 and 4–4–4 transmissions are compatible a single decoder can decode either transmission mode.

13. The Commission desires to permit competition in the marketplace to influence to the greatest extent practical, feasible and consistent with the public interest, the quadraphonic choices available to the FM station licensee and its listeners. The specific standards approach permits the station licensee the flexibility of free choice between the major quadraphonic modes. If the station, transmitting in stereo, with or without SCA, elects to make no changes or to transmit 4–2–4 quad, so be it. If the station elects to transmit a 4–3–4 version of quad while retaining its usual SCA operation it may do so, incurring some expense to convert its studio equipment to 4 channels and suffering an almost insignificant loss of station coverage. However, if the station elects to transmit a 4–4–4 mode of quad while incurring the similar expenses of 4–3–4 with some additional loss of station coverage plus the requirement of either moving any SCA operation to 95 kHz (see paragraph 22) or otherwise discontinuing the SCA operation, it may do so. Likewise, the listener would also have the flexibility of choosing between stereo, 4–3–4, or 4–4–4 if the station is transmitting in a 4–4–4 mode. In marginal signal areas the listener may prefer to listen in a 4–3–4 mode although the station is transmitting in a 4–4–4 mode. The compatibility between the 4–3–4 and 4–4–4 modes will permit this receiving choice.

14. As an alternative to the adoption of specific quadraphonic transmission standards, the Commission requests comments on the desirability of adopting general standards. Under this proposal the transmission of *any* quadraphonic signal that meets a general set of standards would be permitted. These standards would require the quadraphonic signal to be compatible with the existing allocation structure and existing monophonic and sterophonic receivers. No minimum performance requirement for the quadraphonic systems would be established under this proposal. For example, no minimum separation requirement would be specified between front and rear channels or between left and right rear channels. The present stereo performance standards would be retained but comparable standards for quadraphonic broadcasting would not be adopted. No general standards are contained in the appendix. Rather, we request comments on the practicality of such an approach and on the minimum standards necessary to safeguard our present allocation structure and permit continued use of existing receivers.

15. One alternative which is not recommended or set forth in this item is that the Commission could choose only one of the systems to the exclusion of any other *i.e.*, specifying only the 4–4–4 mode, or only the 4–3–4 mode. Since the quadraphonic systems included in the specific standards proposal are compatible with each other and with existing monophonic and sterophonic systems, such a limitation on the choices of broadcasters and listeners has virtually no benefits but would prevent the accural of the many benefits as identified below which would derive from having several systems authorized. Therefore, even the more limiting specific standards which are being proposed allow a range of options over which those affected may choose.

16. There are two basic differences between the general and specific standards as proposed. One difference is that, under the specific standards approach, only systems which have at least the minimum standards of existing systems will be acceptable to the Commission. Thus, if a new system of quadraphonic broadcasting is developed which has vastly improved separation characteristics but offers this advantage only with slightly reduced frequency response, it would not be acceptable for use under the specific standards. On the other hand, the general standards would insure that the Commission's concerns regarding interference and international agreements were adequately covered but would not set forth minimum limits

---

Footnotes continued from last page

NQRC submitted its report and conclusions. This report consists of two volumes, of which Volume One is a summary of the tests and conclusions and Volume Two, consisting of 5 Parts, includes the various tests on receivers, interconnecting facilities, transmitters, field tests, and compatibility tests. This report was made a part of the record in this proceeding.

[5] However, the investment in FM quadraphonic equipment added to that of existing stereo and mono equipment, all of which would be adversely affected by reduced channel spacing, would increase the cost associated with an action which would reduce such spacing. Would the economic and political arguments which could be raised against a reduction in channel spacing thus be significantly strengthened? Comments are requested on the importance of this aspect of adopting standards for FM quadraphonic broadcasting.

on performance characteristics which are of interest to listeners.

17. The other difference is that the general standards would allow the use of any quadraphonic systems which protected the Commission's concerns regarding interference, compatibility with existing receivers, and international agreements even though such systems might be incompatible with other quadraphonic systems available or already in use. The advantages attached to the general standards and to a somewhat lesser extent to the specific standards are essentially that:

(1) the technology of quadraphonic broadcasting continues to be free to develop within confines which protect Commission concerns, and

(2) broadcasters and listeners choose which quadraphonic system is more appropriate for their needs, e.g., a system with greater coverage but poorer frequency response may be best for one station while another station may opt for superior frequency response with a concomitant loss of coverage area. Indeed, as described above, there are several significant differences ranging from subcarrier use to performance characteristics in the currently known systems.

18. In order to enhance the ability of the Commission to choose among the alternatives for rulemaking, several pieces of economic information are sought. Specifically:

(1) What is the expected selling price and cost of installation (including any necessary modification to existing equipment) for each of the proponents' systems?

(2) What is the added cost to the consumer of receiving equipment which has each system's quadraphonic reception capability? (Presumably, this estimate will be the incremental cost to existing stereo receivers.)

(3) Is it possible to design systems which will enable reception of all or more than one of the proposed quadraphonic transmission methods?

(4) If a universal receiver (one which will decode all known quadraphonic systems) is possible, what would be the additional cost to the consumer of purchasing such a receiver? (The incremental cost information sought is the cost of adding this feature to a quadraphonic receiver designed to receive only one type of quadraphonic broadcast.)

(5) What are manufacturers' attitudes toward manufacturing and marketing multi-system equipment?

(6) If you think specific standards which narrow the acceptable range of technology should be adopted, do you base the conclusion on some unique aspect of the radio market or do you think that, as a general proposition, the government should select particular technologies for universal use?

(7) Is FM quad sufficiently advanced in its state of the art to enable the Commission to make a choice which would narrow the technological focus or should open technological development be allowed to continue?

(8) If the technology is to be narrowed to one or a few methods of producing FM quad, is the Commission the appropriate entity to make a selection or is there a better alternative?

(9) Would either specific or general standards adversely affect the degree of competition domestically or internationally?

(10) If the Commission should narrow the technological choices available to FM broadcasters, what criteria should it use to do so and how should they be weighted, namely, what factors do broadcasting and listeners value more highly and which less highly in the systems' characteristics?

19. Concerning the 4–2–4 system submitted by CBS, the Commission finds that adoption of standards for this system (or for any other 4–2–4 system) under either the specific or general approach is unnecessary. This type of quadraphonic broadcasting may be transmitted under present stereophonic standards. On August 9, 1972, the Commission issued a Public Notice (Mimeo No. 7599), concerning 4–2–4 transmission methods, which stated:

"The Commission said that the four-channel stereo systems being sold today are 'pseudo-enhancement devices relying on a phase-differential principle to achieve four-channel audio effects, and may be used within the FCC's present FM stereo transmission standards without specified authorization."

The Commission at this time reaffirms its policy as set forth in this Public Notice. As a practical matter it would be difficult for the Commission to enforce any 4–2–4 quad standards, as stations may unknowingly or inadvertently transmit such programming material. By declining to establish 4–2–4 quad standards, the Commission is permitting a flexibility that would be curtailed if any 4–2–4 quad standards were imposed. Therefore, the Commission finds no reason to adopt CBS's proposed standards since this quadraphonic mode is permitted at the present time and will continue to be.[6]

[6] As part of it's petition, CBS proposed an "identification signal" at 57 kHz phase locked to the 19 kHz pilot and at a modulation level of 2 to 3%.

Other considerations

20. Many comments were received from background music business companies and from blind or otherwise handicapped persons concerning the impact the adoption of quadraphonic broadcasting standards would have on present SCA services. These responses had many similarities. Most expressed a concern that the adoption of quadraphonic standards would mean the end of such services. Although this, in fact, is not true, some were very disturbed at such a possibility. These comments were made without a distinction between the various quadraphonic modes. As stated earlier in this document, only the specifically proposed 4–4–4 mode would have an adverse impact on any existing SCA services. If a licensee desires to transmit an existing SCA under the specific rules being proposed, it may do so by limiting its quadraphonic transmission to the 4–2–4 or 4–3–4 modes. Additionally, one of the quadraphonic systems which has been studied is capable of transmitting 4–4–4 without requiring changes to the 67 kHz SCA. However, in recognition of the impact the specific 4–4–4 quadraphonic broadcasting standards would have on SCA operation, we are proposing to permit subcarriers on the FM baseband up to and including 95 kHz. This subcarrier option is also available under the general standards for other 4–4–4 modes requiring SCA movement. As explained further in paragraphs 22 and 25, this expanded limit would also provide an opportunity for stations transmitting stereo, 4–2–4, or 4–3–4 quad, to operate a subcarrier at 95 kHz in addition to the one at 67 kHz.

21. It is expected that use of a 95 kHz subcarrier operation may require a low-pass audio filter having a cut-off frequency slightly lower than that presently used with existing SCA equipment. Present practice in most SCA operations is to roll-off the higher audio frequencies above 4 or 4.5 kHz and to limit the subcarrier deviation to ±4 kHz while simultaneously transmitting stereo. It appears from test data that a roll-off of audio frequencies above 3.5 kHz and a limit of the subcarrier deviation to ±2.5 or 3 kHz may be necessary to give an acceptable crosstalk performance from a 95 kHz subcarrier. QSI proposed SCA standards at 95 kHz similar to those in use today,[1] but RCA suggested that at 95 kHz the subcarrier be limited to a maximum modulating frequency of 2 kHz, an injection level of 5% and a deviation of ±2 kHz.

[1] The purpose of the tone was to actuate a signal lamp on the receiver to indicate the transmission of CBS's SQ version of 4–2–4 quadraphonic broadcasting. Comments received in response to the *FNOI* indicated that additional pilot tones are both unnecessary and undesirable. There are other less obtrusive techniques available for quadraphonic mode indication. Furthermore, there is evidence that additional pilot tones cause an increase in intermodulation and multipath problems. The use of submerged tones appears practical and feasible for indicating transmission modes or for other purposes without causing problems associated with pilot tones. See paragraph 11 for more discussion.

22. With the following exception, the Commission is not proposing new standards for SCA operation. We shall, however, permit the operation of subcarriers up to and including 95 kHz with instantaneous sidebands to 99 kHz. Section 73.319(b) presently limits subcarriers and sidebands to a maximum of 75 kHz. The Commission will continue the present limit of 10% injection of any SCA subcarriers below 75 kHz simultaneous with stereo (and 4–3–4 quad) (Section 73.319(c)). It is proposing a 10% limit for all SCA subcarriers above 75 kHz regardless of the operating mode (monophonic, stereophonic or quadraphonic). Likewise the Commission will continue the existing emission limitations as specified in Section 73.317(a), (12) through (14) and will continue the present limit for SCA crosstalk [Section 73.319(e)] to no greater than —60 db into the monophonic, stereophonic or quadraphonic channels.

23. The Commission is aware that a shift in the SCA subcarrier from 67 to 95 kHz will cause expenditures and/or inconvenience on the part of the SCA lessor. However, the moving of the subcarrier does not mean the end of SCA services as some comments have indicated. An informal study by the Commission has revealed that, except for some early receivers, the change to a new subcarrier frequency is a relatively simple operation and can be accomplished without great expense and certainly does not mean the obsolescence of modern receivers. If the Commission proceeds as proposed in this rulemaking to allow a subcarrier at 95 kHz, this will permit an orderly shift of receivers from 67 to 95 kHz without any disruption of service for those licensees desiring to transmit in a 4–4–4 mode requiring SCA movement. This could be accomplished before any commencement of 4–4–4 quadraphonic trasmission (if that mode is desired) by the operation of two SCA subcarriers until a systematic change to the new frequency is completed.

24. In paragraphs 12 and 13 of this document, we discussed our belief that the marketplace (station licensee, station advertisers including SCA lessors and listeners, etc.) should influence the selection between the monpohonic/stereophonic/quadraphonic operating modes. Likewise, we feel that a local decision should determine whether a station continues with an existing 67 kHz SCA operation or elects to move the subcarrier to 95 kHz. As was pointed out earlier, if only general quadraphonic standards are adopted, this could include a decision to use a 4–4–4 system not requiring a change in SCA frequency. This local decision should permit the station to better serve its listeners and advertisers. As the Commission has never required any station to change from monophonic operation to stereophonic operation, it is not envisioned that quadraphonic broadcasting will someday become mandatory of use of an SCA at 67 kHz prohibited.

25. Although not mentioned in the Commission's earlier proceedings on quadraphonic broadcasting standards, or in comments thereto, our proposal for quadraphonic standards presents an opportunity for the FM station licensee to have an additional SCA channel simultaneous with stereo or 4–3–4 quad. By permitting subcarrier frequencies up to and including 95 kHz, this will permit a licensee with a 67 kHz subcarrier to add a subcarrier at 95 kHz using 10% injection at 95 kHz. We note that it may be desirable to phase-lock the 95 kHz subcarrier to the fifth harmonic of the 19 kHz pilot.

26. The frequency of the third quardraphonic subcarrier and other subcarriers above 75 kHz being proposed herein exceeds the 75 kHz baseband limitation specified in the Mexican-U.S. FM Broadcasting Agreement. Consequently, the 4–4–4 quadraphonic mode and SCA operations using frequencies above 75 kHz may not be used when the transmitting station is located within 199 miles of the U.S.-Mexican border pending further agreement with the Mexican government. The U.S.-Canada FM working agreement dues not, however, preclude such operation near the Canadian border.

27. The Commission will address the matter of quadraphonic modulation monitors at a later time. Also, the Commission is studying the desirability of requiring quadraphonic generators to be type-accepted. Type accepting generators may facilitate the substitution or addition of quadraphonic generators to existing tramitters.

28. Accordingly, pursuant to authority found in Section 4(i) and 303(g) and (r) of the Communications Act of 1934, as amended, it is proposed to amend Part 73 of the Commission's Rules and Regulations as set forth in the attached Appendix.

29. Further, it is ordered, That the petition, RM–2742, submitted by CBS is denied.

30. Pursuant to applicable procedures set forth in Section 1.415 of the Commission's Rules, interested persons may file comments on or before November 10, 1980 and reply comments on or before January 9, 1981. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding.

31. In accordance with Section 1.419 of the Commission's Rules and Regulations, an original and five copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission. Members of the general public who wish to participate informally in the proceeding may submit one copy of their comments, specifying docket number 21310.

32. All filings made in this procedure will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

33. For further information concerning this proceeding contact Albert S. Jarratt, Sr., Broadcast Bureau, (202) 653–7275. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration or court review, *ex parte* contacts presented to the Commission in proceedings such as this one will be disclosed in the public docket file.

34. We have determined that this proceeding is not one involving "conflicting private claims to a valuable privilege" in which *ex parte* contacts should be prohibited. *See Sangamon Valley Television Corp.* v. *U.S.*, 269 F.2d 211, 224 (D.C. Cir. 1959); *Action for Children's Television* v. *FCC*, 564 F.2d 458 (D.C. Dir. 1977). In this proceeding, even under the proposal that the Commission adopt specific rather than general standards for quadraphonic broadcasting systems, we do not believe that the Commission would be resolving "conflicting private claims to a valuable privilege in the sense that the *Sangamon* court intended in order for *ex parte* contracts to be strictly prohibited. All that is proposed in the rulemaking proceeding is the establishment of at least minimum technical standards of a quadraphonic system. Under both the specific and general approaches, any system that meets whatever standards

are adopted by the Commission will be permitted to operate. It is true that in

Appendix

caused by an electrical signal impressed on another transmission channel.

(b) The instantaneous frequency of SCA subcarreirs and sidebands shall at

subcarrier frequency shall be at 95 kHz and be phase locked to the fifth

and right back) signals exist shall be within ± 3.5% of unity at all levels of

are adopted by the Commission will be permitted to operate. It is true that in this rulemaking proceeding, as in many of our rulemaking proceedings, some persons or entities are likely to benefit economically more than others. But this does not alter the fact that in proceedings such as this one in which we are essentially establishing technical standards, we are not resolving "conflicting private claims" since anyone who can meet the standards established is not foreclosed from benefiting economically from our action.

35. We believe that the interests of the parties and the integrity of our processes will be fully protected if the procedures requiring public disclosure of *ex parte* contacts adopted recently in General Docket No. 78–167, *Policies and Procedures Regarding Ex Parte Communications During Informal Rule Making Proceedings*, FCC 80–334 (June 30, 1980) are followed. Especially in a proceeding such as this one where our final decision will depend so heavily on an understanding and assessment of complex technical data, we do not believe it would serve the public interest in the efficient dispatch of our business or the ends of justice to restrict completely *ex parte* presentations. *See* Section 4(j) of the Communications Act, 47 U.S.C. 154(i) and (j).

36. We are aware that in a somewhat similar rulemaking proceeding involving the adoption of technical standards to permit AM stereophonic broadcasting, In the Matter of *AM Stereophonic Broadcasting*, Docket No. 21313, FCC 78–638, October 19, 1978, we prohibited *ex parte* presentations. We believe that this approach may not have been compelled under *Sangamon* as a legal matter, and in future similar cases, we intend to follow the approach we are taking in this proceeding.

37. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentations requested by the Commission. If a member of the public does wish to comment on the merits of this proceeding in this matter, he or she should follow the Commission's procedures governing *ex parte* contacts in informal rule making. A summary of these procedures is available from the Commission's Consumer Assistance Office, FCC, Washington, D.C. 20554 (202–632–7000).

Federal Communications Commission.
William J. Tricarico,
Secretary.

Appendix

It is proposed that Part 73, Chapter I, Title 47 of the Code of Federal Regulations be amended as follows:

1. In § 73.297, the headnote and paragraphs (a) and (b) are amended to read as follows:

§ 73.297 Stereophonic and quadraphonic broadcasting

(a) FM broadcast stations may, without further authority, transmit stereophonic and quadraphonic programs in accordance with the technical standards set forth in § 73.322 and § 73.323 and upon installation of type accepted stereophonic or quadraphonic transmitting equipment and a type approved stereophonic or quadraphonic modulation monitor as appropriate. Prior to commencement of stereophonic or quadraphonic broadcasts, appropriate equipment performance measurements must be completed. Not that until such time as standards are established for thpe approval of quadraphonic modulation monitors and such monitors are available, a stereophonic modulation monitor is to be used.

(b) Each licensee or permittee engaging in stereophonic and quadraphonic broadcasting shall measure the pilot subcarrier frequency as often as necessary to ensure that it is kept at all time within 2 Hz of the authorized frequency. However, in any event, the measurement shall be made at least once each calendar month with not more than 40 days expiring between successive measurements.

2. In § 73.310, paragraph (c) is redesignated paragraph (d) and new paragraph (c) is added as follows:

§ 73.310. Definitions.

* * * * *

(c) *Quadraphonic broadcasting.*

FM Quadraphonic Broadcast: The transmission of a quadraphonic program by a single FM broadcast station utilizing the main channel and one or more quadraphonic subcarrier(s).

LF (RF, LB, RB) Signal: An audio signal component of a quadraphonic program intended to convey to the listener the intensity, time and location of sound predominantly to the left front (right front, left back and right back) of the center of the listener's area.

Quadraphonic Program: A program comprising four audio signals which are the LF signal, RF signal, LB signal and RB signal.

Channel: A transmission path.

Crosstalk: The electrical signal occurring in one transmission channel caused by an electrical signal impressed on another transmission channel.

Electrical Separation: The ratio of the intensity of the sum of the desired electrical signals present in a set of audio channel(s) to the intensity of the sum of the identical and undesired electrical signals present in another set of audio channel(s) when only the first set of audio channel(s) is energized.

LF (RF, LB, RB) Audio Channel: The transmission path of the LF (RF, LB, RB) signal.

Main Channel Signal: An audio signal consisting of the sum of the LF, LB, RB and RF signals which frequency modulates the main carrier.

Quadraphonic Subcarrier: A subcarrier used in FM quadraphonic broadcasting operating on a frequency which is a specified harmonic of the 19 KHz pilot subcarrier frequency and with a phase which has a specified relation to the phase of the 19 kHz pilot subcarrier.

Subchannel: A transmission path occupying a specified band of frequencies including the subcarrier and associated sidebands.

Quadraphonic Subchannel: A subchannel in which a quadraphonic subcarrier is modulated by a specified combination of the LF, RF, LB, and RB signals.

Quadrature: The relation between two sinusoidal functions of equal period when the phase difference between them is ¼ of a period.

Quadraphonic Baseband Signal: A signal which is composed of the main channel signal and the quadraphonic subcarrier signals and which frequency modulates the main carrier.

Composite Baseband Signal: A signal which is composed of all signals which frequency modulate the main FM carrier.

Positive Baseband Signal: At the instant when a positive (negative) composite baseband signal is aplied, the main carrier shall be modulated in the upward (downward) deviation from the center frequency.

Subchannel Signal Polarity: The contribution of a subchannel signal to the composite baseband signal is positive whenever the instantaneous subcarrier and its modulating signal have the same sign and is negative whenever the instantaneous subcarrier and its modulating signal have the opposite sign.

3. Section 73.319 is amended to read as follows:

§ 73.319 Subsidiary communications multiplex operations: engineering standards.

(a) Frequency modulation of SCA subcarriers shall be used.

(b) The instantaneous frequency of SCA subcarreirs and sidebands shall at all times be within the range 20 to 99 kHz: provided, however, that when the station is engaged in stereophonic and quadraphonic broadcasting pursuant to § 73.297, or § 73.597 and § 73.322 or quadraphonic broadcasting with two quadraphonic subcarriers pursuant to § 73.297 or § 73.597 and § 73.323(a), the instantaneous frequency of SCA subcarriers shall at all times be within the ranges 53 to 99 kHz, and that when the station is engaged in quadraphonic broadcasting with three quadraphonic subcarriers pursuant to § 73.297 or § 73.597 and § 73.323(b), the instantaneous frequency of SCA subcarriers shall at all times be within the range 91 to 99 kHz.

(c) The arithmetic sum of the modulation of the main carrier by all SCA subcarriers shall not exceed 30%: Provided however, that when a station is engaged in stereophonic broadcasting, pursuant to § 73.322 and § 73.297 or § 73.597 or quadraphonic broadcasting pursuant to § 73.297 or § 73.597 and § 73.323 the arithmetic sum of the modulation of the main carrier by the SCA subcarriers below 75 kHz shall not exceed 10%. Modulation of the main carrier by any SCA subcarrier above 75 kHz shall be limited to a maximum of 10% for all broadcasting modes.

(d) The total modulation of the main carrier, including SCA subcarriers, shall meet the requirements of § 73.1570.

(e) Frequency modulation of the main carrier caused by the SCA subcarrier operation shall, in the frequency range 50 to 15,000 Hz be at least 60 dB below 100% modulation: Provided however, that when the station is engaged in stereophonic or quadraphonic broadcasting pursuant to § 73.297, or § 73.597 and § 73.322 or quadraphonic broadcasting with two quadraphonic subcarriers pursuant to § 73.297 or § 73.597 and § 73.323(a) frequency modulation of the main carrier by the SCA subcarrier operation shall, in the frequency range 50 to 53,000 Hz, be at least 60 dB below 100% modulation, and that when the station is engaged in quadraphonic broadcasting with three quadraphonic subchannels pursuant to § 73.297 or § 73.597 and § 73.323(b), frequency modulation of the main carrier by the SCA subcarrier operation shall, in the frequency band 50 to 91,000 Hz, be at least 60 dB below 100% modulation.

(f) The center frequency of each SCA subcarrier shall be kept at all times within 500 Hz of the authorized frequency. However, when a station is engaged in quadraphonic broadcasting pursuant to § 73.323(b) the SCA subcarrier frequency shall be at 95 kHz and be phase locked to the fifth harmonic of the 19 kHz pilot subcarrier and shall cross the time axis in a steady state condition with a positive slope simultaneously with the crossing of the pilot subcarrier.

4. New § 73.323 is added to read as follows:

§ 73.323 Quadraphonic transmission standards.

(a) Quadraphonic transmission standards using the main channel and two subcarriers shall be in accordance with the following standards (4–3–4 mode):

(1) The modulating signal for the main channel shall consist of a signal which is the sum of the left front, left back, right front and right back signals.

(2) A pilot subcarrier at 19,000 hertz (Hz) ±2 Hz shall be transmitted and shall frequency modulate the main carrier between the limits of 8 and 10%.

(3) The first quadraphonic subcarrier shall be the second harmonic of the pilot subcarrier and shall cross the time axis with a positive slope simultaneously with each crossing of the time axis by the pilot subcarrier.

(4) The second quadraphonic subcarrier shall have the same frequency as the first quadraphonic subcarrier and shall be advanced by 90° with respect to the first subcarrier, thereby reaching positive maxima whenever the pilot subcarrier crosses the time axis.

(5) Amplitude modulation of the quadraphonic subcarriers shall be used.

(6) The quadraphonic subcarriers shall be suppressed to a level less than 1.0% modulation of the main carrier.

(7) The quadraphonic subcarriers shall be capable of being modulated by audio frequencies from 50 to 15,000 Hz.

(8) The modulating signal for the first quadraphonic subcarrier shall be a signal which is the difference between the sum of the two left signals and the sum of the two right signals.

(9) The modulating signal for the second quadraphonic subcarrier shall be a signal which is the difference between the sum of the two front signals and the sum of the two back signals.

(10) The pre-emphasis characteristics of the modulation applied to the quadraphonic subcarriers shall be identical with those of the main channel with respect to phase and amplitude at all audio frequencies.

(11) The ratio of peak deviation resulting from the main channel audio signal and peak deviation resulting from sidebands of the first quadraphonic subcarrier when only identical steady state left front and left back (right front and right back) signals exist shall be within ± 3.5% of unity at all levels of these signals and at all frequencies from 50 to 15,000 Hz.

(12) The phase difference between the zero points of the main channel signal and the envelope of the first quadraphonic subcarrier sidebands, when only identical steady state left front and left back (right front and right back) signals exist shall not exceed ± 3° for audio modulating frequencies from 50 to 15,000 Hz.

(13) The ratio of peak deviation resulting from the main channel audio signal and peak deviation resulting from the sidebands of the second quadrophonic subcarrier when only identical steady state left front and right front (left back and right back) signals exist shall be within ± 3.5% of unity at all levels of these signals and at all frequencies from 50 Hz to 15,000 Hz.

(14) The phase difference between the zero points of the main channel signal and the envelope of the second quadraphonic subcarrier sidebands, when only identical steady state left front and right front (left back and right back) signals exist shall not exceed ± 3° for audio modulating frequencies from 50 to 15,000 Hz.

Note.—If the quadraphonic separation between the sum of identical signals in the left front and left back (right front and right back) (left front and right front) (left back and right back) channels and the sum of signals in the right front and right back (left front and left back) (left back and right back) (left front and right front) is better than 29.7 dB at audio frequencies between 50 and 15,000 Hz it will be assumed that paragraphs (11), (12), (13), and (14) of this Section have been complied with.

(15) The sum of the sidebands of the first quadraphonic subcarrier shall not cause a peak deviation of the main carrier in excess of 45% of total modulation (excluding SCA subcarriers) when only identical left front and left back (right front and right back) signals exist; simultaneously in the main channel the deviation when only identical left front and left back (right front and right back) signals exist shall not exceed 45 percent of total modulation (excluding SCA subcarriers).

(16) The sum of the sidebands of the second quadraphonic subcarrier shall not cause a peak deviation of the main carrier in excess of 45% of total modulation (excluding SCA subcarriers) when only identical left front and right front (left back and right back) signals exist; simultaneously in the main channel the deviation when only identical left front and right front (left back and right back) signal exist shall

not exceed 45% of total modulation (excluding SCA subcarriers).

(17) The sum of the sidebands of the first and second (quadrature) subcarriers shall not cause a peak deviation of the main FM carrier in excess of 52.72 percent of the total modulation (excluding SCA subcarriers) when only a Left Front (Left Back, Right Front, Right Back) signal exists; simultaneously in the main channel the peak deviation of the main FM carrier when only a Left Front (Left Back, Right Front, Right Back) signal exists shall not exceed 37.28 percent of the total modulation (excluding SCA subcarriers).

Note.—If the modulation percentages of paragraphs (15) and (16) have been met, it will be assumed that paragraph (17) of this Section has been complied with.

(18) The main channel signal shall not cause a peak deviation of the main carrier in excess of 90%.

(19) The sum of the sidebands of the first quadraphonic subcarrier shall not cause a peak deviation of the main carrier in excess of 90%.

(20) The sum of the sidebands of the second quadraphonic subcarrier shall not cause a peak deviation of the main carrier in excess of 90%.

(21) Crosstalk into the main channel caused by modulation of the first and/or second quadraphonic subcarriers shall be at least 40 dB below 90% modulation.

(22) Crosstalk into either first or second subcarrier caused by any signals in the main channel shall be at least 40 dB below 90% modulation.

(23) Crosstalk into the in-phase (0°) subcarrier from the quadrature (90 degree) subcarrier shall be at least 40 db below 90% modulation.

(24) Crosstalk into the quadrature (90°) subcarrier from the in-phase subcarrier shall be at least 40 db below 90% modulation.

(25) Total modulation of the main carrier including the pilot subcarrier and SCA subcarriers shall meet the requirements of §73.268 or §73.568 with maximum modulation of the main carrier by all SCA subcarriers below 75 kHz limited to 10% according to §73.319.

(26) For required transmitter performance all of the requirements of § 73.254 or § 73.554 shall apply with the exception that the maximum modulation to be employed is 90% (excluding pilot subcarriers) rather than 100%.

(27) For electrical performance standards of the transmitter and associated equipment, the requirements of §73.317 (a) (2), (3), (4), and (5) shall apply to the main channel and quadraphonic subchannels alike, except that where 100% modulation is referred to, this figure shall include the pilot subcarriers.

(b) Quadraphonic transmission using the main channel and three subcarriers shall be in accordance with the following standards (4–4–4 mode):

(1) All standards for quadraphonic transmission using the main channel and three subcarriers in accordance with §73.323 (a) (1) through §73.323 (a) (27), except (a) (17), shall apply.

(2) The third quadraphonic subcarrier shall be the fourth harmonic of the pilot subcarrier and shall cross the time axis with a positive slope sumultaneously with each crossing of the time axis by the pilot subcarrier.

(3) Amplitude modulation of the third quadraphonic subcarrier shall be used.

(4) The third quadraphonic subcarrier shall be suppressed to a level less than 1.0% modulation of the main carrier.

(5) The third quadraphonic subcarrier shall be capable of being modulated by audio fequencies from 50 to 15,000 Hz.

(6) The modulating signal for the third quadraphonic subcarrier shall be a signal which is the difference between the sum of the left front and right back signal and the sum of the left back and right front signal.

(7) The pre-emphasis characteristics of the modulation applied to the third quadraphonic subcarrier shall be identical with those of the main channel with respect to phase and amplitude at all audio frequencies.

(8) The ratio of peak deviation resulting from the main channel audio signal and peak deviation resulting from the sidebands of the third quadraphonic subcarrier when only identical steady state left front and right back (right front and left back) signals exist shall be within ±3.5% of unity at all levels of these signals and at all frequencies from 50 Hz to 15,000 Hz.

(9) The phase difference between the zero points of the main channel signal and the envelope of the third quadraphonic subcarrier sidebands, when only identical steady state left front and right back (right front and left back) signals exist shall not exceed ±3° for audio modulating frequencies from 50 to 15,000 Hz.

Note.—If the quadraphonic separation between the sum of the signals in the left front and right back (right front and left back) channels and the sum of signals in the right front and left back (left front and right back) is better than 29.7 dB at audio frequencies between 50 and 15,000 Hz it will be assumed that paragraphs (8) and (9) of this Section have been complied with.

(10) The sum of the sidebands of the third quadraphonic subcarrier shall not cause a peak deviation of the main carrier in excess of 45% of total modulation (excluding SCA subcarriers) when only identical left front and right back (left back and right front) signals exist; simultaneously in the main channel the deviation when only identical left front and right back (right front and left back) signals exist shall not exceed 45% of total modulation (excluding SCA subcarriers).

(11) The sum of the sidebands of the first and second (quadrature) subcarriers shall not cause a peak deviation of the main FM carrier in excess of 37.28% of the total modulation (excluding SCA subcarriers) when only a left front (left back, right front, right back) signal exists; simultaneously in the main channel the peak deviation of the main FM carrier when only a left front (left back, right front, right back) signal exists shall not exceed 26.36% of the total modulation (excluding SCA subcarriers); simultaneously the sum of the sidebands of the third subcarrier shall not cause a peak deviation of the main FM carrier in excess of 26.36% of the total modulation (excluding SCA subcarriers) when only a left front (left back, right front, right back) signal exists.

Note.—If the modulation percentages of Sections 73.323(a)(15) and (16) and 73.323(b)(10) have been met, it will be assumed that paragraph (11) of this Section has been complied with.

(12) The sum of the sidebands of the third quadraphonic subcarrier shall not cause a peak deviation of the main carrier in excess of 90%.

(13) Crosstalk into the main channel caused by modulation of any quadraphonic subcarrier shall be at least 40 dB below 90% modulation.

(14) Crosstalk into either first, second or third subcarrier caused by and signals in the main channel shall be at least 40 dB below 90% modulation.

(15) Crosstalk into any one of the three quadraphonic subcarriers caused by the modulation of any other of the quadraphonic subcarriers shall be at least 40 dB below 90% modulation.

(16) For required transmitter performance all of the requirements of § 73.254 shall apply with the exception that the maximum modulation to be employed is 90% (excluding pilot subcarriers) rather than 100%.

(17) For electrical performance standards of the transmitter and associated equipment, the requirements of § 73.317(a), (2), (3), (4), and (5) shall apply to the main channel and quadraphonic subchannels alike, except that where 100% modulation is referred to, this figure shall include the pilot subcarriers.

5. Section 73.597, headnote and text are amended to read as follows:

§ 73.597 Stereophonic or quadraphonic broadcasting.

(a) Noncommercial educational FM broadcast stations may, without further authority, transmit stereophonic or quadraphonic programs in accordance with the technical standards set forth in §§ 73.322 and 73.323 and upon installation of type accepted stereophonic or quadraphonic transmitting equipment and a type approved stereophonic or quadraphonic modulation monitor as appropriate. Prior to commencement of stereophonic or quadraphonic broadcasts, appropriate equipment performance measurements must be completed. Note that until such time as standards are established for type approval of quadraphonic modulation monitors and such monitors are available, a stereophonic modulation monitor is to be used.

(b) Each licensee or permittee engaging in stereophonic or quadraphonic broadcasting shall measure the pilot subcarrier frequency as often as necessary to ensure that it is kept at all times within 2 Hz of the authorized frequency. In any event, however, the pilot subcarrier frequency shall be measured in accordance with the following schedule:

(1) For stations authorized to operate with transmitter power in excess of 10 watts, the pilot subcarrier frequency shall be measured at least once each calendar month with not more than 40 days expiring between successive measurements.

(2) For stations authorized to operate with transmitter power of 10 watts or less, the pilot subcarrier frequency shall be measured:

(i) When the pilot subcarrier generator is initially installed;

(ii) At any time the frequency determining elements of the pilot subcarrier generator are changed;

(iii) At any time the licensee may have reason to believe the pilot subcarrier frequency is not within the frequency tolerance prescribed by the FCC's rules.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Federal Administrative Law Judge Hearings—Statistical Report for 1976 to 1978

The Office of the Chairman of the Administrative Conference of the United States announces publication of a report: "Federal Administrative Law Judge Hearings—Statistical Report for 1976–1978." The report contains caseload statistics and data on closed cases for the 28 Federal agencies that employed administrative law judges in fiscal years 1976–1978. The statistics are annotated with citations to relevant statutes and regulations, and a chapter on the role of the administrative law judge is included.

The report is on sale through the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (Stock No. 052–049–00012–1) for $8.50.

The Office of the Chairman has a limited supply of copies for single copy distribution. To request a copy of the report, write to Administrative Conference of the U.S., Suite 500, 2120 L Street, NW., Washington, D.C. 20037, or telephone Sue Boley, Librarian, at 202–254–7020.

BILLING CODE 6110-01-M

CIVIL AERONAUTICS BOARD

[Docket No. 37497; Order 80-8-75]

Intra-Alaska Service Mail Rates of Alaska Airlines, Inc.; Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 14th day of August 1980.

By this order the Board proposes to establish new final service mail rates for the transportation of priority and nonpriority mail over the intra-Alaska routes of Alaska Airlines, Inc. on and after January 26, 1980.

Alaska petitioned the Board on January 23, 1980, to open its existing intra-Alaska service mail rates effective January 26, 1980, and to establish increased service mail rates per billed revenue ton-mile of $2.3628 for nonpriority mail and $2.5773 for priority mail. These rates would produce an estimated overall yield of $2.5191 per mail ton-mile and were based on operating data for the year ended September 30, 1979. Subsequently, on March 12, 1980, Alaska filed Amendment No. 1 to its petition containing revised economic justification and requested the Board to establish rates per billed ton-mile of $2.1045 for nonpriority mail and $2.2785 for priority mail resulting in an estimated overall yield of $2.2313 per mail ton-mile.

By letter dated January 31, 1980, the United States Postal Service requested that the date for submission of answers be extended until June 17, 1980, so that traffic density tests could be conducted in April. The request was granted.

The Postal Service filed its answer to Alaska's petition on June 13, 1980, setting forth the results of the density tests and proposing establishment of priority and nonpriority rates of $2.2835 and $2.0999 per billed great-circle ton-mile, respectively. Alaska authorized the Postal Service to state that it supports the rates and joins in the request of the Postal Service that these rates be established for Alaska's intra-Alaska service effective January 26, 1980. The Postal Service also requests that the order establishing the rates contain authority permitting Alaska to elect to transport mail between competitive points at a reduced rate equal to the rate then in effect for such service by any other carrier.

On Jule 18, 1980, Alaska filed a motion to file an otherwise unauthorized document endorsing the rates proposed by the Postal Service and requesting the Board to (1) take steps to finalize the new rates as quickly as possible in view of its weakened financial condition; (2) establish the new rates as final rates; and (3) provide for an automatic updating procedure to reflect subsequent cost changes.

Our review of the data submitted by the carrier in its petition, the Postal Service in its answer, and fuel data contained in C.A.B. Form 41 reports indicates that an increase in Alaska's intra-Alaska service mail rates is warranted. As discussed below, we are also adopting a procedure for updating the mail rates to reflect cost escalations and granting the Postal Service's request for a rate equalization provision. We tentatively find that the rates proposed by the Postal Service and agreed to be by Alaska fall within the zone of reasonableness and constitute fair and reasonable rates of compensation for Alaska's intra-Alaska mail services. Although the methodology used by the Postal Service to determine the rates varies slightly from the Board's usual methodology the resulting difference in *de minimis*. Consistent with past policy, we have given weight to the fact that both parties have agreed upon the rates. We also have taken into consideration the fact that Alaska is a subsidized carrier. Our analysis does not indicate that these rates will burden subsidy and, therefore, we can find no basis to declare the rates unreasonable.

In reaching this conclusion, we have confined our determination to the facts of this case and do not necessarily accept and/or completely agree with the methodology used by the Postal Service in arriving at these rates, nor do we intend that our determination in this instance be construed as a precedent for use of its slightly different methodology. Based on mail volumes for the year ended September 30, 1979, the proposed rates will result in an annual increase in Alaska's mail revenues of approximately $442,000 or about 70 percent. Alaska's current rates have been in effect since January 1, 1975.

Based on the foregoing, the Board tentatively finds and concludes that:

1. The fair and reasonable rates of compensation to be paid in their entirety by the Postmaster General pursuant to the provisions of Section 406 of the Federal Aviation Act of 1958, as amended, on and after January 26, 1980, to Alaska Airlines, Inc. for the transportation of mail by aircraft over its intra-Alaska routes, the facilities used and useful therefor, and the services connected therewith, shall be $2.2835 per great-circle ton-mile for priority mail and $2.0999 per great-circle ton-mile for nonpriority mail;

2. Alaska, by notice, may elect to transport mail between points for which rates here established are applicable at a reduced rate equal to the rate then in effect for such service between such points by any other carrier or carriers.

(a) An original and three copies of each notice of election and agreement shall be filed with the Board and a copy thereof shall be served upon the Postmaster General and each carrier providing service between the stated points. Such notice shall contain a complete description of the reduced charge being established, the routing over which it applies, how it is constructed and shall similarly describe the charge with which it is being equalized.

(b) Any rate established shall be effective for the electing carrier or carriers on the date of filing of the notice, or such later date as may be specified in the notice, until such election is terminated. Elections may be terminated by any electing carrier upon ten days notice filed with the Board and served upon the Postmaster General and each carrier providing service between the stated points.

3. The rates here established shall be adjusted semi-annually based on an update methodology similar to procedures established in the *Priority and Nonpriority Domestic Service Mail Rates Investigation*, Docket 23080–2 and the *Transatlantic, Transpacific and Latin American Service Mail Rates Investigation*, Docket 26487. See Orders 79–7–16 and 79–7–17, July 3, 1979.

Final future rates will be established every six months based on the latest available four-quarter Form 41 data projected forward to the midpoint of the prospective rate period. Thus, final mail rates for the period January 1, 1981, through June 30, 1981, will reflect the application of a cost escalation factor to the base period costs for intra-Alaska mail service. The cost escalation factor will be based on a comparison of FY 1979 costs with base period costs plus a factor for anticipatory costs through March 31, 1981, the midpoint of the period. The factor for anticipatory costs will assume a rate of change equal to the rate of change experienced from the base period to FY 1979. Unit costs will be determined by dividing total costs, excluding passenger and transport related items, by available ton-miles.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, particularly Sections 204(a), and 406, and the Board's Procedural Regulations promulgated in 14 CFR Part 302,

1. We grant the motion of Alaska Airlines, Inc. to file an otherwise unauthorized document.

2. We direct all interested persons, particularly Alaska Airlines, Inc. and the Postmaster General, to show cause why the Board should not adopt the foregoing findings and conclusions, and fix, determine and publish those rates to be effective as specified above.

3. We direct all interested persons having objections to the rates or to the tentative findings and conclusions proposed here to file with the Board a notice of objection within ten (10) days after the date of service of this order, and, if notice is filed, to file a written answer and any supporting documents within 30 days after service of this order.

4. If no notice is filed, or, if after notice, no answer is filed within the designated time, or if an answer timely filed raises no material issue of fact, we will deem all further procedural steps waived and we may enter an order incorporating the tentative findings and conclusions set forth here and fixing the final rates set forth in the attached Appendix.

5. We shall serve this order on the Postmaster General and Alaska Airlines, Inc.

We shall pubish this order in the **Federal Register.**

By the Civil Aeronautics Board.
Phyllis T. Kaylor,[1]
Secretary.

APPENDIX.—*Alaska Airlines, Inc. Summary of Costs Assigned To Mail Intra-Alaska Services*

[Year Ended Sept. 30, 1979]

	Priority mail	Nonpriority mail	Total
Total operating costs	$742,703	$247,758	$990,461
Return and tax markup	59,306	19,784	79,090
Total economic costs	$802,009	$267,542	$1,069,551
Billed ton-miles	351,212	127,406	478,618
Service mail rate per billed ton-mile	$2.2835	$2.0999	$2.2347

[Docket Nos. 38332, 38596]

Marco Island Airways, Inc.; Fitness Investigation and Order To Show Cause

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order to Show Cause, Docket 38332 and Fitness Investigation of Marco Island Airways, Inc. (Docket 38596).

SUMMARY: The Board is issuing an order in which it tentatively finds and concludes that it is consistent with the public convenience and necessity to grant the application of Marco Island Airways, Inc., for a certificate authorizing the air transportation of persons, property and mail between the terminal point Miami, Florida and the terminal point Marco Island, Florida. Certification is subject to a favorable determination of the applicant's fitness in the Marco Island Airways, Inc., Fitness Investigation (Docket 38596), instituted concurrently.

DATES: All interested persons having objections to the Board issuing an order making final the tentative findings and conclusions shall file by September 17, 1980, a statement of objections together with a summary of testimony, statistical data, and other material expected to be relied upon to support the stated objections. Such filings shall be served upon all parties listed below.

ADDRESSES: Objections to issuance of a final order should be filed in the Dockets Section, Civil Aeronautics Board, Washington, D.C. 20428, in Docket 38332, application of Marco Island Airways for a certificate of public convenience and necessity. In addition, copies of such filings should be served on Marco Island Airways, the Department of Transportation of the State of Florida, the Mayors of Miami and Marco Island, Florida, the Managers of Miami International Airport and Marco Island Airport and the Governor of Florida.

FOR FURTHER INFORMATION CONTACT: Lawrence R. Intravia, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428; (202) 673–6068.

Former Large Irregular Air Service Investigation and Universal Airlines, Inc. Fitness Investigation; Prehearing Conference

Notice is hereby given that a prehearing conference will be convened in the above-entitled matter on August 27, 1980, at 9:30 a.m. (local time), in Room 1003, Hearing Room A, Universal Building North, 1875 Connecticut Avenue, NW., Washington, D.C., with the undersigned presiding.

The Bureau of Domestic Aviation and the Bureau of Consumer Protection (the Bureaus), will serve on all parties on or before August 21, 1980, a statement of proposed issues, proposed stipulations, requests for information, and proposed procedural dates. The other parties to this proceeding will serve on each other and the Bureaus on or before August 26, 1980, a proposed statement of issues, proposed stipulations, requests for information, and proposed procedural dates, provided that the submissions of other parties are to be restricted to matters upon which they differ with the Bureaus' proposals. The parties are directed to adopt the Bureaus' lettering and numbering format to facilitate cross-referencing. Six copies of all submissions will be served on the administrative law judge promptly.

Dated at Washington, D.C., August 15, 1980.

Alexander N. Argerakis,
Administrative Law Judge.

DEPARTMENT OF COMMERCE

International Trade Administration

Countervailing Duties—Certain Iron-Metal Castings From India; Final Countervailing Duty Determination

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Final countervailing duty determination.

SUMMARY: This notice is to advise the public that the Department of Commerce has determined that the Government of India confers benefits upon the production or export of certain iron-metal castings which constitute subsidies within the meaning of the countervailing duty law. This case has been referred to the International Trade Commission for a determination regarding injury.

EFFECTIVE DATES: August 20, 1980.

FOR FURTHER INFORMATION CONTACT: Steven Morrison, Program Analyst, Office of Investigations, International Trade Administration, Department of Commerce, Washington, D.C. 20230 (202–377–3965).

SUPPLEMENTARY INFORMATION:

Background

On February 19, 1980, the Department of Commerce received a petition in satisfactory form from James Pinkerton, Jr. and Pinkerton Foundry, Inc., on behalf of Domestic manufactures of iron-metal castings, alleging that bounties or grants (subsidies) are being provided on the manufacture, production, or exportation of certain iron-metal castings from India. A "Notice of Initiation of Countervailing Duty Investigation" was published in the Federal Register on March 14, 1980 (45 FR 16521). A notice of "Preliminary

Countervailing Duty Determination" was published in the Federal Register on May 23, 1980 (45 FR 34945). The Department has afforded interested parties an opportunity to present oral views in accordance with § 355.35, Commerce Regulations (19 CFR 355.35, 45 FR 4946). In addition, written views and oral views have been received in accordance with § 355.34(a), Commerce Regulations (19 CFR 355.34(a), 45 FR 4946).

On January 1, 1980, Title I of the Trade Agreements Act of 1979 (93 Stat. 150) (the TAA) took effect. The TAA superseded section 303 of the Tariff Act of 1930 (the Act) for countervailing duty cases involving products of any country determined to be a "country under the Agreement" as defined in section 701(b) of the Act (19 Stat. 151, 19 U.S.C. 171(b)). The TAA also amended section 303 of the Act (19 U.S.C. 1303).

India is not presently a "country under the Agreement". This case is, therefore, governed by section 303 of the Act, as amended by section 103(b) of the TAA (19 Stat. 190, 19 U.S.C. 1303(b)). Cases under section 303 generally do not include an injury determination by the International Trade Commission. The only exception is merchandise that is not subject to normal Customs duties. Because iron-metal castings are not dutiable, this case will be referred to the Commission for a final determination of whether there is material injury to an industry in the United States by reason of the subsidized merchandise.

The iron-metal castings covered by this determination consist of manhole covers and frames, clean-out covers and frames and catch basin grates and frames which enter the United States under item number 657.09 of the Tariff Schedules of the United States (TSUS).

Nature of Industry

The Indian iron-metal castings industry is composed of "small scale" manufacturers with a captial investment of $125,000 or less. Iron-metal castings production is labor intensive. The materials used are supplied locally (i.e., are not imported).

All exporters of castings are required to belong to the Engineering Export Promotion Council (EEPC). Many of the manufacturers also belong to the Trade Development Authority (TDA). Both of these organizations assist in export promotion.

Programs Investigated

The petitioner has alleged that Indian exports of castings to the United States receive a variety of subsidies, most of which are direct export subsidies. The issues raised, and the reasons for our decision, are substantially similar to those dealt within our final determination, published in the Federal Register on July 21, 1980, in the case of Certain Industrial Fasteners from India (45 FR 48607).

As in the fasteners case, the major program involved is a system of cash compensatory supports for exports. Representatives of the Indian exporters and the Indian Government have argued that this program should be considered a rebate of indirect taxes which are not otherwise rebated to exporters and, therefore, payments made under it should not be considered subsidies. The other programs investigated are, in terms of benefit to the exporter, far less significant.

Programs Found to be Subsidies

Of the programs investigated, we have determined that the following constitute subsidies within the meaning of the countervailing duty law:

1. *Cash Compensatory Support on Export (CCS)*—The CCS program was introduced in 1966 and, since then, has been revised periodically. The Government of India has stated that the primary—but not the exclusive—purpose of the CCS program is to compensate exporters for various indirect taxes paid, and not otherwise rebated, on products that are exported. CCS payments are designed to support exports in a manner consistent with the competitive needs of Indian producers.

The CCS rate various depending upon the product exported. It is determined after taking into account the incidence of indirect taxes paid by producers of a particular product and not otherwise refunded, the existence of other disincentives to exports, and the competitive needs of the producers. There is no "right" to CCS payments; none are granted even where there are indirect taxes not otherwise rebated if the Government of India decides that the competitive need of a particular industry does not warrant CCS payments.

In the case of iron-metal castings exported to North America, the CCS rate was established, effective April 1, 1979, at 12.5% of the f.o.b. value of the merchandise exported. In October 1978 the Ministry of Commerce requested all Export Promotion Councils, including the EEPC (which represents the castings industry), to submit updated information on the indirect taxes levied on castings, and other matters affecting this export.

The Ministry stated that such information was needed to determine revised CCS payment levels. The CCS rate was established after the data submitted by the manufacturers and exporters of castings had been reviewed.

As we stated in our decision in the fastener case, the primary considerations in determining whether programs like the CCS program should be considered indirect tax rebates are (1) whether the program operates for the purpose of rebating indirect taxes; (2) whether there is a clear link between eligibility for payments on export and indirect taxes paid; and (3) whether the government has reasonably calculated and documented the actual indirect tax incidence borne by the product concerned and has demonstrated a clear link between such tax incidence and the amount paid on export.

In the fasteners case, a number of points were raised concerning the general structure of the CCS program (e.g., CCS payments were not made by the taxing authorities; industries do not have a right to CCS payments). However, our decision turned not on such general considerations but on specific analysis of the relationship between the level of CCS payments for fasteners exports and the incidence of indirect taxes borne by these exports. Our decision in this case also rests on specific analysis of the indirect tax/CCS payments relationship for the product involved. Several characteristics of this relationship convince us that the standards presented above have not been satisfied in this case.

We reviewed data on the actual indirect taxes paid by iron-metal castings producers that export to the United States and provided the Indian Government with information for purposes of fixing the level of CCS payments. In most cases total indirect taxes paid were considerably less than 12.5% of the value of the merchandise. Moreover, these tax calculations included several payments (i.e., a steel development surcharge, payments to an engineering goods export assistance fund, port congestion charges, and taxes on electricity and fuel) which we would *not* consider indirect taxes which may be rebated on export.

In addition to the difference in incidence of indirect taxes and the level of CCS payments, the manner in which the information on the tax levels was submitted to the Government of India and relied on raises, of itself, certain problems. The Commerce Ministry required the Export Promotion Council governing the castings sector to submit information relating to its indirect tax burden. Some individual company experiences were provided to the Ministry, but apparently without an appropriate aggregation showing the weighted average tax incidence for the

sector as a whole. In order to satisfy the question of whether export payments are made to remit indirect taxes, we require evidence demonstrating that the tax incidence of any given product sector has been determined quite precisely. In this case, there is no such satisfactory evidence. Counsel for the EEPC himself pointed out that calculations of indirect taxes paid by producers of castings varied from 4% to 13.6%. In the absence of evidence showing the average tax incidence on all the products at issue to have been near the high end of this range, counsel's characterization of this 12.5% figure as a "middle ground" is unconvincing.

Thus, the evidence in this case includes neither a satisfactory demonstration of the requisite linkage between the indirect tax incidence and the level of CCS payments, nor a showing that the actual indirect tax incidence has been reasonably calculated and documented. The CCS program, as applied to exports of iron-metal castings, does not appear to involve indirect tax rebates as much as it does a general export payment which, while undoubtedly compensating in some measure for indirect taxes not otherwise rebated, goes well beyond this purpose.

We have therefore concluded that, in this case, the CCS payments must be considered a subsidy program and have found the amount of subsidy to be 12.5% of the f.o.b. value of the exported merchandise.

Counsel representing Indian manufacturers of iron-metal castings has argued that, in the event we find that the CCS program as applied to exports of castings constitutes a subsidy, the amount of the subsidy should be offset by an export inspection fee in the amount of 1% of the value of the exported merchandise, which all castings exporters must pay. We have decided that such an offset would be inappropriate.

Counsel maintains that the export inspection fee should be considered "an application fee * * * paid in order to qualify for * * * the benefit of the subsidy" and, therefore, an allowable offset under section 771(b)(A) of the Act. However, it does not appear that the inspection fee is related to application for CCS payments. Export inspection, and payment of export inspection fees, are required for certain engineering product exports, whether or not the exports benefit from CCS payments. The inspection is meant to be a service that benefits the exporter by ensuring quality control over exports. The fee is payment for the service provided, not for CCS application.

Counsel has also argued that the benefit conferred by CCS payments should be calculated on an after tax basis—i.e., should be reduced by the "approximately 60% income tax rate" paid by "most casting firms". We have not accepted this argument.

The information we have received provides no basis for accurate calculation of extent to which CCS payments are taxed. The tax rate may vary from producer to producer. Moreover, the extent to which the payments are taxed will depend upon the extent to which the exporter has net income, after deductible expenses.

Because we have not been given a basis upon which accurately to gauge the real impact of taxation of CCS payments, we need not reach the underlying legal question of whether the limitations in the countervailing duty law prevent calculating the subsidy on an after tax basis. However, in facing this issue we would have to begin from the demonstrable intent of Congress to restrict offsets severely.

2. *Preferential Export Financing*—Packing credit loans are available to exporters of castings. These loans have a sliding scale interest rate which varies with the elapsed time that the loan is outstanding. The interest rate ranges from 11% for the first 90 days, 13% for the next 45 days and thereafter at negotiated commercial rates. Commercial credit is generally available to manufacturers and traders from rates of 13.5% to 15%.

The Government of India (through the Reserve Bank of India) apparently underwrites the lower interest rate of the packing credit loans by paying the lending bank an additional 1.5% interest rate without any charge to the exporter. There is a direct transfer of funds to support the loan from the Central Bank to the lending bank. Accordingly, we have found that packing credit loans involve a subsidy of 0.4% of the f.o.b. value of the exported merchandise.

3. *Tax Deductions*—The GOI has a program which allows for a special income tax deduction for export market development.

The Export Markets Development Allowance provides for a tax deduction of 133% of certain specific expenses. These include expenses incurred both before and after sale, although commissions normally are not an allowable deduction unless they are tied to other specific expenses. The claims made by the manufacturers for this special deduction normally exceed the amount eventually allowed for deduction by the tax authorities, if and when the tax returns of the companies are audited, sometimes by a substantial amount. Final settlement of the tax returns normally takes two to three years.

Because the kind of expenses allowed under the special deduction would be deductible in full if incurred in non-export business activities, the benefit to the manufacturers is limited to 33 percent of the allowed amount applied to the corporate tax rate. On this basis, we have determined that exporters of castings receive a subsidy in the following amounts:

	Percent of f.o.b. value
Uma Iron & Steel	3.6
RB Agarwalla	2.0
Basant Udyog	0.9
Kejriwal Iron & Steel	0.2
Kajaria Exports	0.0
All Others	0.4

4. *Market Development Assistance*—Under the Market Development Assistance program, grants have been provided for export promotion to the Engineering Export Promotion Council (EEPC) and the Trade Development Authority (TDA). These grants have been used by the EEPC and the TDA to operate overseas offices and organize exhibits designed to promote Indian exports generally. Firms which belong to these organizations pay dues which exceed any specific benefits they derive from EEPC and TDA activities. In addition, the firms are billed for all special services such as participation in trade shows, listing in directories, etc. We have, accordingly, decided that such market development assistance does not amount to a subsidy under the countervailing duty law.

However, apart from these services, special grants for export market study teams to travel to and sell in the United States were provided for the benefit of Uma Iron & Steel and Kajaria Exports. We have determined that such grants are subsidies. The benefit to Kajaria was de minimis (0.0001%). The grant to Uma Iron and Steel amounted to 0.3% of its f.o.b. export sales.

Programs Not Used

1. *Import Permits*—The Government of India provides import permits to manufacturers which export in order to allow them to replenish their stocks of imported inputs. The import permits are negotiable and therefore can have a market value. However, since manufacturers of castings use local materials, they receive no import permits and there is no question of possible subsidization.

2. *Kandla Free Trade Zone*—The petition alleged that benefits were received by manufacturers or exporters of castings based on their location within the Kandla Free Trade Zone. No castings manufacturer is located within the zone nor are castings exported to the U.S. from the zone. Thus, there is no question of any benefit that would constitute a subsidy within the meaning of the countervailing duty law.

3. *Post-Shipment Export Financing*—Documents were provided by the Reserve Bank of India which listed the categories of manufacturers eligible and those ineligible for post shipment financing. Castings manufacturers are listed as ineligible. Thus, no benefit has been conferred on castings manufacturers by this program.

4. *Subsidized Freight Rates*—The GOI submitted information indicating that a program to provide preferential freight rates for exports is no longer in effect.

Programs Found Not To Be Subsidies

1. *Tax Deductions for Capital Equipment and New Industrial Undertakings*—The Government of India allows income tax deductions for purchases of new capital equipment and establishment of new industrial enterprises. We have found that these deductions are generally available (i.e., they are not industry or enterprise specific) and therefore have concluded that they are not subsidies within the meaning of the countervailing duty law.

2. *Refund of Excise Taxes*—Under a "duty drawback" program, excise taxes collected under the Excise and Salt Tax Act on the sale of pig iron and scrap iron are refunded when products incorporating the iron ore are exported. The nonexcessive rebate of excise taxes is not a subsidy within the meating of the countervailing duty law. Pig iron and scrap iron is subject to an excise tax of 73.50 rupees per ton; it is rebated on export at a rate of 73.00 rupees per ton. Accordingly we find that there is no subsidy involved.

3. *Export Credit Insurance*—Petitioner has alleged that castings manufacturers and exporters receive preferential export insurance rates. Export Credit Guarantee Corporation (ECGC) is chartered by the GOI to insure export transactions against default. However, the ECGC does not receive funds from the GOI. It is a commerical entity which charges rates sufficient to cover its operating expenses and to provide profit. Accordingly we have determined that ECGC insurance does not amount to a subsidy.

Verification

The information relied upon in reaching this determination has been verified by Department officials through investigation of government documents, discussions with GOI, trade organization, and corporate officials, and corporate books and records.

Examples of the type of documents examined include official government reports and policies, announcements of government programs, letters from banks ledger sheets, and income tax reports.

Determination

I hereby determine that the Government of India provides bounties or grants (subsidies) within the meaning of section 303 of the Act and that the estimated aggregate net amount of these benefits equals the amount indicated in the table below.

Effective on August 20, 1980, and until further notice, deposit of estimated countervailing duties, bond or other security shall be required at the time of entry, or withdrawal from warehouse, for consumption. The amount to be deposited is the amount specified in the table below. Entry documents should state the manufacturer of the merchandise, as well as the identity of the exporter. If the shipper is not the manufacturer of specific merchandise, the higher of the indicated rates will be applicable.

	Percent of f.o.b. price
Uma Iron & Steel	16.6
R.B. Agarwalla & Co.	14.9
Basant Udyog	13.8
Kejriwal Iron & Steel Works	13.1
Karjaria Exports	12.9
All Other Companies	13.3

This notice is published pursuant to section 303 and 706 of the Act (19 U.S.C. 1303, 1671(e), and § 355.36 of the Department of Commerce Regulations (19 CFR 355.36).

Robert E. Herzstein,

Under Secretary for International Trade.

BILLING CODE 3510-25-M

National Technical Information Service

Marion Scientific; Intent To Grant Limited Exclusive Patent License

Notice is hereby given that the National Techincal Information Service (NTIS), U.S. Department of Commerce, proposes to grant to Marion Scientific, a division of Marion Laboratories, Kansas City, Missouri 64114, a limited exclusive right in the United States for the manufacture, use and worldwide sale of the products embodied in an invention on "Fecalator, an Apparatus and Method for Concentration of Parasite Eggs and Larvae," protected by U.S. Patent No. 4,081,356 (dated March 28, 1978).

This patent has been assigned to the United States of America, as represented by the Secretary of Health and Human Services. Custody of the right to license this invention has been transferred to the Secretary of Commerce.

Copies of the patent may be purchased from the Patent and Trademark Office, Washington, D.C. 20231, at a cost of fifty cents per copy.

Public announcements of the availability of this invention for licensing were published in the **Federal Register** on November 15, 1978 (43 FR 53056); in the NTIS publication *Government Inventions for Licensing* on November 14, 1978; and in the *Official Gazette* of the Patent and Trademark Office on December 12, 1978. To date, these and other promotional efforts have not resulted in any applications for, or the granting of, nonexclusive licenses under this patent. The Director of NTIS has therefore determined, in accordance with 41 CFR 101–4.103–3, that this invention is available for licensing on a limiting exclusive basis.

The limited exclusive license proposed to be granted will be a royalty-bearing license for a term of five years from the effective date of the license agreement. The license will be revocable in accordance with 41 CFR 101–4.104.5.

The proposed license will be subject to an irrevocable, nonexclusive, nontransferable, royalty-free right in the U.S. Government to make, use or sell the licensed invention throughout the world by or through contract on behalf of the U.S. Government or any foreign government pursuant to a treaty or agreement with the United States.

The proposed license will be granted by NTIS to Marion Scientific unless, on or before October 20, 1980, NTIS receives (1) an application for a nonexclusive license from a responsible U.S. applicant intending to practice the invention identified herein in the United States and NTIS determines that such applicant is likely to bring the invention to the point of practical application within a reasonable period of time under a nonexclusive license; or (2) written evidence and argument which establishes that it would not be in the public interest to grant the proposed

limited exclusive license to Marion Scientific.

Written data, inquiries, comments and objections relating to this proposed limited exclusive license should be submitted to the Office of Government Inventions and Patents, National Technical Information Service, Springfield, VA 22161. NTIS shall maintain and make available for public inspection a record of all decisions made in this matter and the basis therefor. This record shall contain copies of all written data, inquiries, comments and objections received by NTIS and pertaining to the proposed limited exclusive license.

Dated: August 8, 1980.

Melvin S. Day,

Director, National Technical Information Service.

BILLING CODE 3510-04-M

DEPARTMENT OF DEFENSE

Defense Nuclear Agency

Privacy Act of 1974; Deletions and Amendments of Systems of Records

AGENCY: Defense Nuclear Agency.

ACTION: Notice of deletions and amendments to systems of records.

SUMMARY: The Defense Nuclear Agency proposes to delete four and amend two systems of records in its inventory of records subject to the Privacy Act of 1974. The deletions are listed by system number and name with the reason for deletions following. The specific changes to the systems being amended are set forth followed by each system published in its entirety as amended.

DATES: Proposed actions shall be effective September 19, 1980, unless public comments result in a contrary determination requiring republication for further comments.

ADDRESS: Any public comments, including written data, views or arguments concerning the proposed actions should be addressed to the System Manager identified in the particular record system concerned.

FOR FURTHER INFORMATION CONTACT: Robert L. Brittigan, General Counsel, Defense Nuclear Agency, Washington, D.C. 20305, Telephone: 202-325-7681.

SUPPLEMENTARY INFORMATION: The Defense Nuclear Agency record system notices as prescribed by the Privacy Act of 1974, Public Law 93-579 (5 U.S.C. 552a) have been published in the Federal Register as follows:

FR Doc 77-28255 (42FR51073), September 28, 1977
FR Doc 78-25819 (43FR42472), September 20, 1978
FR Doc 79-37052 (44FR74431), December 17, 1979

The proposed actions are not within the purview of the provisions of 5 U.S.C. 552a(o) which requires the submission of a new or altered system report.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Services.

August 13, 1980.

SYSTEM NAME:

DNA001 Employee Assistance Program Case Record Systems

SYSTEM LOCATION:

Biomedical Effects Office, Occupational Health Unit, Defense Nuclear Agency, Washington, DC 20305. Also at the following subordinate commands: Civilian Personnel Office, Bldg. 2023A, Kirkland AFB, New Mexico, 87115, and Civilian Personnel Office, Armed Forces Radiobiology Research Institute, Bethesda, Maryland, 20014, Bldg 42, located on the grounds of the National Naval Medical Center.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All civilian employees in appropriated and non-appropriated fund activities who are referred by management for, or voluntarily request, counseling assistance.

CATEGORIES OF RECORDS IN THE SYSTEM:

Case records on employees which are maintained by counselors, supervisors, and civilian personnel offices and consist of information on condition, curent status, and progress of employees or dependents who have alcohol, drug, emotional, or other job performance problems.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Drug Abuse Office and Treatment Act of 1972, as amended by Public Law 93-282 (21 USC 1175); Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970, as amended by Public Law 93-282 (42 USC 4582); Subchapter A of Chapter I, Title 42, Code of Federal Regulatons; Chapter 43 of Title 5, USC.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Used by the counselor in the execution of the counseling function as it applies to the individual employee. With specific written authority of the employee selected informaion may be provided to and used by other counselors or medical personnel research personnel, employers, representatives such as legal counsel, and to other agencies or individuals when disclosure is to the employee's benefit, such as for processing retirement applications.

POLICIES AND PRACTICES FOR STORING, RETRIEVING ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Case records are stored in paper file folders.

RETRIEVABILITY:

Filed alphabetically by last name of individual.

SAFEGUARDS:

Buildings employ security guards. Records are maintained in locked security containers accessible only to pefsonnel who are properly screened, cleared and trained.

RETENTION AND DISPOSAL:

Records are purged of identifying information within five years after termination of counseling or destroyed when they are no longer useful.

SYSTEM MANAGER(S) AND ADDRESS:

Occupational Health Nurse, Occupational Health Unit, Biomedical Effects Office, Defense Nuclear Agency, Washington, DC 20305, for Headquarters Defense Nuclear Agency: Chief, Civilian Personnel, Armed Forces Radiobiolody Research Institute, Bethesda, Maryland, 20014, for Armed Forces Radiobiology Research Institute; Civilian Personnel Officer, Kirtland AFB, New Mexico, 87115, for Field Command, Defense Nuclear Agency.

NOTIFICATION PROCEDURE:

Information may be obtained from: Occupational Health Nurse, Occupational Health Unit, Biomedical Effects Office, Defense Nuclear Agency, Washington, DC 20305, Telephone: Area Code 202-325-7073 for Headquarters, Defense Nuclear Agency; Chief, Civilian Personnel, Armed Forces Radiobiology Research Institute, Bethesda, Maryland, 20014, Telephone: Area Code 301-295-1047, for Armed Forces Radiobiology Research Institute; or Civilian Personnel Officer, Bldg. 2023A, Kirtland AFB, New Mexico, 87115, Telephone: Area Code 505-264-9253, for Field Command, Defense Nuclear Agency. The letter should contain the full name and signature of the requester and the approximate period of time, by date, during which the case record was developed.

RECORD ACCESS PROCEDURES:

Requests from individuals should be addressed to same address as stated in the notification section above.

CONTESTING RECORD PROCEDURES:

The agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned may be obtained from the SYSMANAGER.

RECORD SOURCE CATEGORIES:

Counselors, other officials, individuals or practitioners, and other agencies both in and outside of Government.

SYSTEMS EXCEPTED FROM CERTAIN PROVISION OF THE ACT:

None.

HDNA 609-03

SYSTEM NAME:

Personnel Exposed to Radiation from Atmospheric Nuclear Tests.

SYSTEM LOCATION:

Biomedical Effects Office, Defense Nuclear Agency, Washington, DC 20305.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All DoD and DoD affiliated personnel military and civilian, who participated in the United States Government atmospheric nuclear test programs in the Pacific and at the Nevada Test Site.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personal information consisting of name, rank, service number, social security number, last known or current address, dates of test participation, exposure data, and unit of assignment.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Atomic Energy Act of 1954, 42 U.S.C. 2013 and Tasking Memorandum from Office of the Secretary of Defense to the Director, Defense Nuclear Agency dated 28 Jan 78, Subject: 'DoD Personnel Participation in Atmospheric Nuclear Weapons Testing'

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Department of Defense Components—For the purpose of preparing histories of atmospheric nuclear test participation and for use in litigation between test participants or their representatives and the Department of Defense.

Defense Nuclear Agency Contractors—For the purpose of assisting DoD components in preparation of histories of atmospheric nuclear test participation and responding to the inquiries and concerns of individuals who may have participated in the test programs and/or their representatives.

National Research Council and the Center for Disease Control—For the limited purpose of conducting epidemiological studies of the effects of ionizing radiation from the atmospheric nuclear weapons test on DoD participants in those tests.

Department of Energy—For the limited purpose of identifying AEC and AEC-contractor Personnel exposed to ionizing radiation during nuclear testing; and for conducting epidemiological studies of radiation effects of individuals so identified; and for use in litigation between the DoD and any of the individuals so identified.

Department of Transportation—For the limited purpose of identifying DOT and DOT-affiliated personnel exposed to ionizing radiation during nuclear testing and for use in litigation between the DOT and any of the individuals so identified.

Veterans Administration—For use in litigation between the VA and individuals and/or their representatives who are alleging service-connected disabilities as a result of said exposure.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders; computer magnetic tape disks and printouts in secure computer facility.

RETRIEVABILITY:

Paper records in file folders; computer magnetic tape disks and printouts in secure computer facility.

SAFEGUARDS:

Paper records are filed in folders stored in locked security safes. Mag tapes stored in vault in the computer area.

RETENTION AND DISPOSAL:

Paper records are retained until information is transferred to magnetic

tapes, then destroyed. Magnetic-tapes and disks are retained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant to the Director, Biomedical Effects, Defense Nuclear Agency, Washington, DC 20305

NOTIFICATION PROCEDURE:

Information may be obtained from the SYSMANAGER.

RECORD ACCESS PROCEDURES:

Requests should be addressed to the SYSMANAGER.

CONTESTING RECORD PROCEDURES:

Requests from individuals should be addressed to the same address as stated in the notification section above.

RECORD SOURCE CATEGORIES:

From DNA Form 10, searches of DoD records by other DoD components, and from individuals voluntarily contacting DNA by phone or mail.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

National Security Agency/Central Security Service

Privacy Act of 1974; Amendments to Systems of Records

AGENCY: National Security Agency/Central Security Service.

ACTION: Notification of amendment to systems of records.

SUMMARY: The National Security Agency/Central Security Service proposes to amend nine systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a). The specific changes to each system being amended is set forth, followed by a publication of each system in its entirety as amended.

DATES: The proposed amendments shall be effective September 19, 1980, unless contrary public comment result in a contrary determination requiring republication for further comment.

ADDRESS: Any public comment, including written data, views or arguments concerning the proposed actions should be addressed to the Systems Manager in the particular record system concerned.

FOR FURTHER INFORMATION CONTACT: Daniel C. Schwartz, General Counsel, National Security Agency, Room 9A178, Fort George C. Meade, MD 20755.

SUPPLEMENTARY INFORMATION: The National Security Agency record system notices as prescribed by the Privacy Act of 1974, Public Law 93-579 (5 U.S.C. 552a) have been published in the **Federal Register** as follows:

The proposed amendments are not within the purview of 5 U.S.C. 552a(o) which requires submission of a new or altered systems notice.

M. S. Healy,
OSD Federal Register Liaison Officer, Washington Headquarters Services.

GNSA01

SYSTEM NAME:

NSA/CSS Access, Authority and Release of Information File

SYSTEM LOCATION:

Primary System—National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.
Decentalized Segments—Each staff, line, contract and field element as appropriate.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NSA/CSS civilian employees, personnel under contract or appointment and military assignees.

CATEGORIES OF RECORDS IN THE SYSTEM:

File may consist of authorizations to obtain keys; authorizations for access to specific sensitive information or areas; delegation of responsibility to authorize or request specific action, work projects or access; notification to report for duty in event of hazardous weather or other emergency; authorizations to officially release various types of communications; assignments to special activities; assignments as Agency representatives to department or other government committees, boards, task groups; assignments to special tasks in event of technical or national emergencies; assignments to duties as fire, safety, security officers, Combined Federal Campaign and blood donation workers; and assignments to other special or volunteer duties or activities.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Law 86-36, Public Law 88-290, 18 U.S.C. § 798, Executive Order 12065.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The purpose of this file is to provide a means to rapidly determine who may have access to information or keys; who is required to report for duty in special circumstances, who has been authorized to release official communications; who has been assigned additional special tasks, voluntary duties, or other duties. The file and its segments are used by each authorized staff, line, contract and field officer, employee, or assignee to make determinations as noted in the purposes above. Where required, specific information from this file may be made available to appropriate investigatory authorities engaged in national security or criminal investigations or to national defense and intelligence authorities or other governmental entities with respect to specific assignments or when emergency action is required.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM: STORAGE:

Paper records in file folders, paper cards in file boxes, magnetic tapes, disks and other computer storage media, computer listings, microfilm.

RETRIEVABILITY:

By name.

SAFEGUARDS:

For paper, computer listing, cards and microfilm—secure limited access facilities, within those facilities secure limited access rooms and within those rooms lockable containers. Access to information is limited to authorized individuals only. For machine records stored on magnetic tape, disk or other computer storage media within the computer processing area—additional secure limited access facilities, specific processing requests from authorized persons only, specific authority to access stored records and delivery to authorized persons only. Where data elements are derived from the Personal Security File—remote terminal inhibitions are in force with respect to access to complete file or data relating to persons not assigned to requesting organization using a remote terminal. Remote terminals are secured, are available to authorized persons only, and certain password and other identifying information available to authorized users only is required.

V 45 AG 2080 UMI

Terminals are not available outside of headquarters area locations.

RETENTION AND DISPOSAL:

Retained until individual is no longer authorized access or release authority or assigned to specific additional duties. Computer files are purged and updated to reflect current status.

SYSTEM MANAGER(S) AND ADDRESS:

Director, NSA.

NOTIFICATION PROCEDURES:

Requests from individual for notification shall be in writing addressed to the Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

RECORD ACCESS PROCEDURES:

Requests from individuals for access shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

CONTESTING RECORD PROCEDURES:

The NSA/CSS rules for contesting contents and appealing initial determinations may be obtained by written request addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

RECORD SOURCE CATEGORIES:

Applications and related forms requesting access, appointment or authorization, notifications of same, personnel records, personnel security records, and other sources as appropriate and required.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Individual records in this file may be exempt pursuant to 5 U.S.C. § 552a(k) (1) and (5). For additional information see agency rules contained in 32 CFR Part 299a.

GNSA02

SYSTEM NAME:

NSA/CSS Applicants

SYSTEM LOCATION:

National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

CATEGORIES OF INDIVIDUALS COVERED BY A THE SYSTEM:

Applicants for employment with NSA/CSS.

CATEGORIES OF RECORDS IN THE SYSTEM:

File contains forms, documents and correspondence providing personal and qualifications information submitted by individual applicants, educational institutions, past employers, references. Records include processing items, status reports, test results, interview reports, reports of reviewing organizations and other related information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Law 86–36, Public Law 88–290, E.O. 10450, and Title 5 U.S.C. and appropriate implementing Office of Personnel Management directives in the Federal Personnel Manual.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The purpose of this file is to support the recruitment, selection, hire and placement of applicants. The file is used to document applicant processing, as a basis for selection decisions by individual agency elements and the personnel organization, and such other related uses as required. The users of this file include those staff, line, contract and field officers and employees as authorized and appropriate. In addition, files may be made available to the Office of Personnel Management, Freedom of Information Act and Privacy Act authorities, Department of Defense and other governmental entities as required and appropriate.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper in file folders, cards in containers, logs, computer listings, computer magnetic tape, disks and other computer storage media, microfilm.

RETRIEVABILITY:

By name, social security number and other appropriate data elements.

SAFEGUARDS:

For paper, computer printouts and microfilm—secure limited access facilities, within those facilities secure limited access rooms and within those rooms lockable containers. Access to information is limited to those individuals specifically authorized and granted access by Deputy Director for Management Services. For machine records stored on magnetic tape, disk or other computer storage media within the computer processing area—additional secure limited access facilities, specific processing requests accepted from authorized persons only. Remote terminal inhibitions are in force with respect to access to computerized file or data relating to persons not assigned to the organization using a remote terminal. Remote terminals are secured, are available to authorized persons only and certain password and other identifying information available to authorized users only is required. Terminals are not available outside of headquarters area locations.

RETENTION AND DISPOSAL:

For applicants who are subsequently hired, records are transferred to Personnel File or destroyed as appropriate. For applicants not hired, records are retained for a period not to exceed one year unless employment requirements necessitate retention for a longer period.

SYSTEM MANAGER(S) AND ADDRESS:

Director, NSA.

NOTIFICATION PROCEDURE:

Requests from individuals for notification shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

RECORD ACCESS PROCEDURES:

Requests from individuals for access shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

CONTESTING RECORD PROCEDURES:

The NSA/CSS rules for contesting contents and appealing initial determinations may be obtained by written request addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

RECORD SOURCE CATEGORIES:

Applicant, educational institutions, references, former employers including other governmental entities, interviewing and reviewing individuals including possible gaining organization, security and medical authorities and other sources as relevant and appropriate.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Individual records in this file may be exempt pursuant to 5 U.S.C. § 552a(k)(1) and (5). For additional information see Agency rules contained in 32 CFR Part 299a.

GNSA03

SYSTEM NAME

NSA/CSS Correspondence, Cases, Complaints, Visitors, Requests

SYSTEM LOCATION:

Primary System—National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755. Decentralized Segments—Each staff, line, contract and field element as authorized and appropriate.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons calling or corresponding with NSA/CSS concerning congressional inquires; job opportunities; Freedom of Information and Privacy Act requests; other information requests, suggestions or comments; registering complaints; requesting appropriate security clearance and permission to visit; requesting orrequiring information relating to litigation or anticipated litigation; and employees or assignees registering complaints or requesting information with respect to Equal Employment Opportunities; requesting inquiry or investigation by the Inspector General; requesting advice, opinions, or assistance from the General Counsel or provided to the General Counsel with respect to conflict of interest issues.

CATEGORIES OF RECORDS IN THE SYSTEM:

File contains correspondence from and to individuals, documents and memoranda related to the response; written material developed during or in anticipation of litigation or investigation of inquiries, complaints or grievances; written material developed in response to a request for advice or opinion from an individual; written material required by law, executive order, and regulations with respect to Equal Employment Opportunity investigations, Inspector General investigations, judicial branch subpoenas, orders and related actions.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Law 86–36, Public Law 88–290, 5 U.S.C. § 552, Public Law 93–579, Public Law 92–261, Public Law 93–259, Executive Order 10450, Executive Order 11222, Executive Order 11478 and Executive Order 12065.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The purpose of this file is to provide a record of the official responses and determinations of NSA/CSS to various inquiries for information, complaints, official actions of other governmental agencies and branches. The users of these files are those staff, line, contract and field officers, employees and assignees delegated the responsibility to respond on behalf of the Director, NSA, to such inquiries and complaints. The files are used to carry out the purpose set forth above, to provide an information base to be used in responding to the various reporting requirements levied by the Public Laws and Executive Orders cited in the authorities section of this notice. Information in the file may be used to provide reports in summary or statistical form to the Department of Defense, Office of Personnel Management, Office of Equal Employment Opportunity, Congress and those committees or subcommittees of the Congress having jurisdiction over matters covered by individual reports. Certain files may be provided to the General Counsel, Department of Defense, the Department of Justice, other appropriate governmental agencies and the judicial branch where litigation or anticipated civil or criminal litigation is involved or where sensitive national security investigations related to protection of intelligence sources or methods are involved.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders.

RETRIEVABILITY:

By name, case or subject and within subject by name.

SAFEGUARDS:

Secure limited access facilities and within those facilities individual limited access offices. Files are stored in lockable containers and are only made available to individuals specifically authorized access or required to respond and individuals affected by actions taken or complaints received. Files related to sensitive investigations by the Equal Employment Opportunity Office, the Inspector General and General Counsel are additionally protected pursuant to appropriate statutes, executive orders or regulations and attorney-client privilege. In some cases records are sealed pursuant to sensitivity of subject matter or specific court order.

RETENTION AND DISPOSAL:

Records are retained on-site indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Director, NSA.

NOTIFICATION PROCEDURE:

Requests from individuals for notification shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

RECORD ACCESS PROCEDURES:

Requests from individuals for access shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

CONTESTING RECORD PROCEDURES:

The NSA/CSS rules for contesting contents and appealing initial determinations may be obtained by written request addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

RECORD SOURCE CATEGORIES:

Individual correspondence, written materials developed in response to inquiries from executive branch departments and agencies, judicial branch elements, Congress, Congressional committees, individual Congressmen, other government and private entities as appropriate, and other sources as appropriate and required.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Individual records in this file may be exempt pursuant to 5 U.S.C. § 552a(k)(1), (2), (4) and (5). For additional information, see agency rules contained in 32 CFR Part 299a.

GNSA04

SYSTEM NAME:

NSA/CSS Cryptologic Reserve Mobilization Designee List.

SYSTEM LOCATION:

Primary System—National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755. Decentralized Segments—Appropriate staff and line elements.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Inactive duty military reservists assigned to NSA/CSS mobilization positions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Record consists of a computer listing of NSA/CSS reserve mobilization requirements.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Law 86–36 and Title 10, U.S. Code.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To maintain Tables of Distribution on mobilization requirements by military service, military job code, billet title,

number of billets, mobilization duty location, training sponsor, and any special clearance requirements of the billet, and to provide a system of identifying mobilization designees with billets for training assignments.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM STORAGE:

Computer listings, computer magnetic tapes, disks and other computer storage media.

RETRIEVABILITY:

By name and mobilization designee requirements.

SAFEGUARDS:

Secure limited access facilities and within those facilities lockable containers. Records are accessible only to authorized personnel.

RETENTION AND DISPOSAL:

Records are permanent. They are reviewed annually for changes in requirements. Superseded records are destroyed when no longer useful for reference purposes.

SYSTEM MANAGER(S) AND ADDRESS:

Director, NASA.

NOTIFICATION PROCEDURE:

Requests from individuals for notification shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

RECORD ACCESS PROCEDURES:

Requests from individuals for access shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

CONTESTING RECORD PROCEDURES:

The NSA/CSS rules for contesting contents and appealing initial determinations may be obtained by written request addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

RECORD SOURCE CATEGORIES:

Individual's parent service.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Individual records in this file may be exempt pursuant to 5 U.S.C. § 552a(k)(1) and (k)(5). For additional information, see agency rules contained in 32 CFR Part 299a.

GNSA05

SYSTEM NAME:

NSA/CSS Equal Employment Opportunity Data.

SYSTEM LOCATION:

National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NSA/CSS civilian personnel and personnel under contract.

CATEGORIES OF RECORDS IN THE SYSTEM:

File contains civilian personal data and Agency organizational data to include job title, grade, date of birth, training, date of last promotion, educational attainments, social security number, time of service, personnel codes, organization assignment.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Law 92–261, Public Law 93–259, Public Law 86–36, Executive Order 11478, Chapter 713 of the Federal Personnel Manual.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Purpose of this file is to insure compliance with cited authorities with respect to equal employment opportunities. Users of the file are those staff, line, contract and field officers and employees specifically authorized by law, regulation, delegation of responsibility, and grant of access by the NSA Equal Employment Opportunity Director. The file is used to compile those studies, research, statistics and reports necessary to insure compliance with cited authorities. Reports, summaries and statistics may be made available to the Department of Defense, Office of Equal Employment Opportunity, Congress, Office of Personnel Management, Department of Justice and judicial branch elements as required by cited authorities, requested pursuant to those authorities or ordered by specific judicial branch order.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tape, disk or other computer storage media, computer listings, paper in file folders.

RETRIEVABILITY:

By name, social security number, and specific subject matter data elements.

SAFEGUARDS:

For paper, computer printouts and microfilm—Secure limited access facilities, within those facilities secure limited access rooms and within those rooms lockable containers. Access to information is limited to those individuals specifically authorized and granted access by EEO Director. For machine records stored on magnetic tape, disk or other computer storage media within the computer processing area—additional secure limited access facilities, specific processing requests from authorized persons only, specific authority to access stored records and delivery to authorized persons only. Where data elements are derived from the Personnel System, remote terminal inhibitions are in force with respect to access to complete file or data relating to persons not assigned to requesting organization using a remote terminal. Remote terminals are secure, are available to authorized persons only, and certain password and other identifying information available to authorized users only is required. Terminals are not available outside of headquarters area locations.

RETENTION AND DISPOSAL:

File is routinely updated and old data disposed of as required. Individual data is subject to retention and disposal requirements specified for records contained in the Personnel System.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Equal Employment Opportunity, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

NOTIFICATION PROCEDURE:

Requests from individuals for notification shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

RECORD ACCESS PROCEDURES:

Request from individuals for access shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

CONTESTING RECORD PROCEDURES:

The NSA/CSS rules for contesting contents and appealing initial determinations may be obtained by written request addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

RECORD SOURCE CATEGORIES:

Individuals themselves, organizational elements, personnel file, and other sources as appropriate and required.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Individual records and data elements in this file may be exempt pursuant to 5 U.S.C. § 552a(k) (1), (2) and (4). For additional information, see agency rules contained in 32 CFR Part 299a.

GNSA06

SYSTEM NAME:

NSA/CSS Health, Medical and Safety files.

SYSTEM LOCATION:

Primary System—National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.
Decentralized Segments—Each staff, line, contract and field element as appropriate.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NSA/CSS civilian employees, military assignees applicants, retirees, building concessionaires, assigned GAS employees, certain contract employees, visitors requiring emergency treatment, in certain cases members of employees' families with prior approval of the employee, blood donors, designated Health and Safety Officers.

CATEGORIES OF RECORDS IN THE SYSTEM:

File may consist of complete medical questionnaires, results of physical examinations and laboratory tests, records of medical treatment and services, x-rays, notices of injury, forms and correspondence including exchanges with Department of Labor related to injury and subsequent claims, correspondence with personal physician, NSA/CSS Medical Center reports, safety reports, absence and attendance records, medical evaluations, fitness of duty reports, "Log of Federal Occupational Injuries and Illnesses," results of psychological assessment testing and interviews, psychiatric examination results and related reports, forms and notes, lists of blood donors.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Law 86–36, and Federal Employees Compensation Act of September 7, 1916, as amended, Title 5, U.S.C., and certain Office of Personnel Management implementation thereof as contained in Federal Personnel Manual. In addition, the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970, as amended (42 U.S.C. § 4582), and subchapter A of Chapter I, Title 42, C.F.R., Executive Order 11807, Executive Order 9397, 29 C.F.R. 1960 and Department of Defense Instruction 1000.19.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To determine fitness for hiring, continued employment of assignment and reassignment; to process accident and compensation claims; correct hazardous conditions; determine eligibility for disability retirement; record names of blood donors. When required, specific information from these files may be made available to the Department of Labor in those cases involving compensation claims and, with the permission of the individual, to other medical personnel or the American Red Cross for additional examination, treatment, counseling or other medical purpose; Freedom of Information and Privacy Act authorities as appropriate; and to other governmental entities as required and appropriate. Alcohol abuse patient records used in accordance with cited statute and regulations.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders, magnetic tape, disk or other computer storage media, computer listings.

RETRIEVABILITY:

By name, social security number, and specific subject matter data elements.

SAFEGUARDS:

Secure, limited access facilities and within these facilities lockable containers. Records are accessible only to authorized personnel. For machine records stored on magnetic tape, disk or other computer storage within the computer processing area—additional secure limited access facilities, specific processing requests from authorized persons only, specific authority to access stored records, and delivery to authorized persons only. Remote terminals are secured, are available to authorized persons only, and certain password and other identifying information available to authorized users only is required. Terminals are not available outside of specific security offices at headquarters area locations.

RETENTION AND DISPOSAL:

Medical files and records on traumatic injury and occupational disease are transferred to official personnel folder upon separation; traumatic injury and occupational disease correspondence on civilian employees and retirees is retained indefinitely. Applicant medical files are retained for no more than one year or until date designated to individual; files on military assignees are forwarded to parent service upon reassignment from NSA/CSS; all other medical case files are destroyed upon termination of association with NSA/CSS. Psychological files on applicants are retained for no more than one year or until date designated to individual; all other files are retained for four years after end of individual's asssociation with NSA/CSS. Decentralized segments are either transferred with employee or assignee, or retained for a period after separation as appropriate but not to exceed three years and are then destroyed. Alchohol abuse patient records retained and disposed of pursuant to cited statute and regulations.

SYSTEM MANAGER(S) AND ADDRESS:

Director, NSA.

NOTIFICATION PROCEDURE:

Requests from individuals for notification shall be in writing addressed to the Chief, Office of Policy, National Security Agency/Central Security Service, Fort George G. Meade, Md. 20755.

RECORD ACCESS PROCEDURES:

Requests from individuals for access shall be in writing addressed to the Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

CONTESTING RECORD PROCEDURES:

The NSA/CSS rules for contesting contents and appealing initial determinations may be obtained by written request addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

RECORD SOURCE CATEGORIES:

Applicants, employees, assigness, official personnel folders, NSA Safety Officers and records, witnesses to accidents and injuries, medical and administrative personnel, blood donor personnel, members of employee's family with employee's permission, and other sources as appropriate and required.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Individual records in this file may be exempt pursuant to 5 U.S.C. § 552a(k)(1),

V 45 AG 2080 UMI

(4), (5) and (6) and may also be subject to certain special access procedures established pursuant to 5 U.S.C. § 552a(f)(3). For additional information, see agency rules contained in 32 CFR part 299a.

GNSA07

SYSTEM NAME:

NSA/CSS Motor Vehicles and Carpools

SYSTEM LOCATION:

Primary System—National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755. Decentralized Segments—Each non-headquarters facility and field element as appropriate and required.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NSA/CSS civilian employees, military assignees, other governmental employees or personnel under contract granted extended temporary or permanent access to an NSA/CSS facility.

CATEGORIES OF RECORDS IN THE SYSTEM:

File may consist of machine-readable or regular paper cards, carpool or other transportation survey results, annotated machine listings, post motor vehicle violation reports, stolen vehicle reports, or other forms and correspondence related to parking privileges, transportation needs, local (parking lot) parking enforcement procedures, vehicle abuse, and other related matters as appropriate and required.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

40 U.S.C. § 318a–b; 50 U.S.C. § 797; Title 34 C.F.R., Part 232, Appendix B; and Title 41 C.F.R., Part 101–20.111 et seq.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The purpose of this file is to provide data necessary to enforcement of parking lot regulations, to assist employees with respect to vehicle abuse and stolen vehicles, provide carpool assistance, assure availability of adequate transportation and parking facilities, and other related matters. The uses of the file are to verify vehicle ownership, determine allocation of parking privileges, ensure the maintenance of adequate and safe parking areas, develop statistics with respect to parking and transportation requirements, encourage formation of carpools or other multiple-user transportation arrangements, provide a directory of potential participants in carpools or other multiple-user transportation arrangements, and other related uses as appropriate and required. The users of the file are those authorized line, staff, contract, and field element officers and employees; any employee, assignee or other individual working at an NSA/CSS facility interested in forming or joining a carpool or other multiple-user transportation arrangement; local civil and military law enforcement personnel as required and appropriate. Statistical data or selected individual data limited to name, address, and telephone number may be made available to commercial or private transportation entities where the individuals have indicated a desire to use or join a multiple-user transportation arrangement, supervisory, and other reviewing authorities in cases of parking privilege abuses, and other related users as required and appropriate.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders, machine-readable and other cards in appropriate containers, magnetic tape, disk or appropriate containers, magnetic tape, disk or other computer storage media, computer listings.

RETRIEVABILITY:

By name, motor vehicle identifier.

SAFEGUARDS:

For paper, cards and computer listings—secure limited access facilities, within those facilities secure limited access rooms and within those rooms lockable containers as appropriate. Access is limited to authorized users. For machine records stored on magnetic tape, disk or other computer storage media within the computer processing area—additional secure limited access facilities, specific processing requests accepted from authorized persons only, specific authority to access stored records, and delivery granted to authorized persons only.

RETENTION AND DISPOSAL:

File is routinely updated and old data disposed of as required. Individual data is subject to retention and disposal requirements specified for records contained in the Personnel System.

SYSTEM MANAGER(S) AND ADDRESS:

Director, NSA.

NOTIFICATION PROCEDURE:

Requests from individuals for notification shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, MD 20755.

RECORD ACCESS PROCEDURES:

Requests from individuals for access shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, MD 20755.

CONTESTING RECORD PROCEDURES:

The NSA/CSS rules for contesting contents and appealing initial determinations may be obtained by written request addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, MD 20755.

RECORD SOURCE CATEGORIES:

Data provided by individuals, authorities in charge of parking facilities, local civil and military law enforcement entities, and other related sources as appropriate and required.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

GNSA08

SYSTEM NAME:

NSA/CSS Payroll and Claims

SYSTEM LOCATION:

Primary System—National Security Agency/Central Security Service, Ft. George G. Meade, MD 20755. Decentralized Segments—Each staff, line, contract, and field element as appropriate.

CATEGORIES OF INDIVIDUALS COVERED BY A THE SYSTEM:

NSA/CSS civilian employees and applicants, military assignees, contractors, reemployed annuitants, personnel under contract.

CATEGORIES OF RECORDS IN THE SYSTEM:

File may consist of records on time and attendance; overtime, shift and holiday work; absent without leave reports; payroll deductions, allotments and allowances; requests for leave; payments for travel performed in connection with permanent change of station, temporary duty, invitations, interviews, pre-employment interviews and initial entry on duty. Also included are Pay Adjustment Authorizations (DD Form 139) and Case Collection Vouchers (DD Form 1131) and, in connection with pay claims, waivers, requests for waivers, documents, correspondence, background data, recommendations and decisions.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Law 86–36; 31 U.S.C. §§ 66a, 951–53; 50 U.S.C. App. § 2160; Titles 5 and 37 of the U.S.C.; Titles 2, 4, 5 and 6 of the GAO Manual.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To maintain effective control over and accountability for all funds; to provide accounting data to support the NSA/CSS budget request and control the execution of the budget; provide financial information required by the Office of Management and Budget; provide financial information for NSA/CSS management purposes; provide for the input of permanent change data and the output of such data as leave without pay, reconciliation of files, periodic step increases, mass pay changes, and changes in leave categories; investigate, review, discuss, and recommend and implement decisions on pay claims waivers. When required, specific information from this file may be made available to other governmental entities in connection with Social Security deductions, unemployment compensation claims, job-related injury and death benefits, tax audit and collections, and other related claims or actions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders; file cards; computer paper printouts; machine-readable cards; computer magnetic tapes, disks, and other computer storage media.

RETRIEVABILITY:

By name, social security number.

SAFEGUARDS:

For paper, computer printouts and microfilm—secure limited access facilities, within those facilities secure limited access rooms and within those rooms lockable containers. Access to information is limited to authorized individuals. For machine records stored on magnetic tape, disk or other computer storage media within the computer processing area—additional secure limited access facilities, specific processing requests from authorized persons only, specific authority to access stored records and delivery to authorized persons only. Remote terminals are secured, are available to authorized persons only, and certain password, and other identifying information available to authorized users only is required. Terminals are not available outside of headquarters area locations.

RETENTION AND DISPOSAL:

Records are reviewed annually and retired or destroyed as appropriate. Permanent records are retired to the St. Louis Federal Records Center after completion of audit. Computer records are purged and updated consistent with these retention policies.

SYSTEM MANAGER(S) AND ADDRESS:

Director, NSA.

NOTIFICATION PROCEDURE:

Requests from individuals for notification shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

RECORD ACCESS PROCEDURES:

Requests from individuals for access shall be in writing addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, Md. 20755.

GNSA11

SYSTEM NAME:

NSA/CSS Time, Attendance, and Absence.

SYSTEM LOCATION:

Primary System—National Security Agency/Central Security Service, Ft. George G. Meade, MD 20755. Decentralized Segments—Each staff, line, contract, and field element as authorized and appropriate.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

NSA/CSS civilian employees, personnel under contract, and military assignees.

CATEGORIES OF RECORDS IN THE SYSTEM:

File contains request forms, time cards, authorization forms, notifications, locator cards, and other correspondence or revisions thereof related to actions concerning time, attendance, absence, annual leave, sick leave, leave without pay, advance leave, administrative leave, exemplary use of leave, unauthorized leave and absences, and other related matters.

CONTESTING RECORD PROCEDURES:

The NSA/CSS rules for contesting contents and appealing initial determinations may be obtained by written request addressed to Chief, Office of Policy, National Security Agency/Central Security Service, Ft. George G. Meade, MD 20755.

RECORD SOURCE CATEGORIES:

Forms, cards, requests and other documentation, submitted by individuals, supervisors, claims officers, Personnel File data, Time, Attendance and Access File data, and other sources as appropriate and required.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Individual records in this file may be exempt pursuant to 5 U.S.C. § 552a(k)(1) and (k)(2). For additional information, see agency rules contained in 32 CFR 299a.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Law 86–36; Public Law 88–290, section 113 of the Budget and Accounting Procedures Act of 1950, as amended; 31 U.S.C. § 66a.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The purpose of these files is to provide a means of accounting for all time, attendances, and absences of NSA/CSS civilian employees, contract employees, and military assignees. The users of these files are those staff, line, contract and field officers, employees, and assignees authorized to account for or investigate employee time,' attendance, and absence. the files may be used to make performance, payroll, personnel, and security determinations. Where required, specific information from these files may be made available to appropriate investigatory authorities engaged in national security or criminal investigations, hearing examiners, and other authorized individuals with respect to grievances or adverse actions, and to those agencies identified in the NSA/CSS System of Records named "Payroll and Claims" as necessary to document payroll actions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file folders, file cards, machine readable cards, computer printouts, computer magnetic tapes, disks, and other computer storage media, and microfilm.

RETRIEVABILITY:

May be retrieved by name and in some cases social security number.

SAFEGUARDS:

For paper, cards, printouts and microfilm—secure limited access facilities, within those facilities secure limited access rooms, and within those rooms lockable containers as

appropriate. Access by authorized

[FR Doc. 80-25329 Filed 8-19-80; 8:45 am]

BILLING CODE 3810-70-M

Office of the Secretary

Privacy Act of 1974; New System of Records

AGENCY: Office of the Secretary of Defense (OSD).

ACTION: Notice of new system of records.

SUMMARY: The Office of the Secretary of Defense publishes a notice of a new system of records, DWHS P37, entitled: "Grievance Records", which incorporates information contained in OPM's system of records OPM/GOVT-2, "Grievance Records", which is being deleted from OPM's annual republication of systems of records (September 1980).

DATE: This system shall be effective September 19, 1980.

ADDRESS: Privacy Act Officer, Directorate for Personnel and Security, Washington Headquarters Services, Department of Defense, Room 3B347, Pentagon, Washinton, D.C. 20301.

FOR FURTHER INFORMATION CONTACT: Mr. James S. Nash, telephone: 202-695-0970.

SUPPLEMENTARY INFORMATION: The Office of the Secretary of Defense (OSD) systems of records notices as prescribed by the Privacy Act have been published in the **Federal Register** as follows:

FR Doc. 79-370542 (44 FR 74088) December 17, 1979
FR Doc. 80-7517 (45 FR 15604) March 11, 1980
FR Doc. 80-8135 (45 FR 17056) March 17, 1980
FR Doc. 80-13709 (45 FR 29390) May 2, 1980
FR Doc. 80-13707 (45 FR 29590) May 5, 1980
FR Doc. 80-15479 (45 FR 34034) May 21, 1980
FR Doc. 80-19461 (45 FR 43409) June 27, 1980
FR Doc. 80-23575 (45 FR 51880) August 5, 1980

This system does not fall within the purview of Office of Management and Budget (OMB) Circular A-108, Transmittal Memoranda No. 1 and No. 3, dated September 30, 1975, and May 17, 1976, respectively, which provide supplemental guidance to Federal agencies regarding the preparation and submission of reports of their intention to establish or alter systems of records under the Privacy Act of 1974. This OMB guidance was set forth in the Federal Register (40 FR 45877) on October 3, 1975.

M. S. Healy,
OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.
August 13, 1980.

DWHS P37

SYSTEM NAME:

Grievance Records.

SYSTEM LOCATION:

Directorate for Personnel and Security, Washington Headquarters Services (WHS), Department of Defense, Room 3B347, Pentagon, Washingon, D.C. 20301.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current or former Federal employees who have submitted grievances in accordance with 5 USC 2302, and 5 USC 7121, or a negotiated procedure.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains records relating to grievances filed by Office of the Secretary of Defense (OSD) employees under 5 USC 2302, and 5 USC 7121. These case files contain all documents related to the grievances, including statements of witnesses, reports of interviews and hearings, examiner's findings and recommendations, a copy of the original and final decision, and related correspondence and exhibits. This system includes files and records of internal grievance and arbitration systems that OSD may establish through negotiations with recognized labor organizations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 USC 2302, and 5 USC 7121.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING THE CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

INTERNAL USERS, USES, AND PURPOSES:

This information is used by the Office of the Secretary of Defense (OSD) in the creation and maintenance of records of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related work force studies. While published statistics and studies do not contain individual identifiers, in some instances the selection of elements of data included in the study may be structured in such a way as to make the data individually identifiable by reference.

EXTERNAL USERS, USES, AND PURPOSES:

These records and information in these records are used:

a. To disclose pertinent information to the appropriate Federal, state, or local agency responsible for investigating, prosecuting, enforcing, or implementing a statute, rule, regulation, or order, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation.

b. To disclose information to any source from which additional information is requested in the course of processing a grievance, to the extent necessary to identify the individual, inform the source of the purpose(s) of the request, and identify the type of information requested.

c. To disclose information to a Federal agency, in response to its request, in connection with the hiring or retention of an employee; the issuance of a security clearance; the conducting of a security or suitability investigation of an individual; the classifying of jobs; the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to requesting the Agency's decision on the matter.

d. To provide information to a congressional office from the record of an individual, in response to an inquiry from that congressional office, made at the request of that individual.

e. To disclose information to another Federal agency or to a court when the Government is party to a judicial proceeding before the court.

f. By the National Archives and Records Service (General Services Adminstration) in records management inspections conducted under authority of 44 U.S.C. 2906.

g. To disclose information to officials of the Merit Systems Protection Board, including the Office of the Special Counsel; the Federal Labor Relations Authority and its General Counsel; or the Equal Employment Opportunity Commission, when requested in performance of their authorized duties.

h. To disclose in response to a request for discovery or for appearance of a witness, information that is relevant to the subject matter involved in a pending judicial or administrative proceeding.

i. To provide information to officials of labor organizations reorganized under the Civil Service Reform Act when relevant and necessary to their duties, exclusive representation concerning personnel policies, practices, and matters affecting work conditions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records maintained in file folders.

RETRIEVABILITY:

These records are retrieved by the names of the individuals on whom the records are maintained.

SAFEGUARDS:

These records are maintained in locked metal file cabinets, with access only to anthorized OSD Personnel employees.

RETENTION AND DISPOSAL:

These records are disposed of 3 years after closing of the case. Disposal is by shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Director for Personnel and Security, Washington Headquarters Services (WHS), Department of Defense, Room 3B347, Pentagon, Washington, D.C. 20301.

NOTIFICATION PROCEDURE:

Information may be obtained from Directorate for Personnel and Security, Washington Headquarters Services (WHS), Department of Defense, Room 3B347, Pentagon, Washington, D.C. 20301. Telephone: 202-697-3305.

RECORD ACCESS PROCEDURES:

Request for access to records may be obtained from the SYSMANAGER.

CONTESTING RECORD PROCEDURES:

The Agency's rules for access to records and for contesting contents and appealing initial determinations by the individual concerned are contained in 32 CFR 286b and OSD Administrative Instruction No. 81.

RECORD SOURCE CATEGORIES:

Information in this system of records is provided:

a. By the individual on whom the record is maintained.

b. By testimony of witnesses.

c. By Agency officials.

d. From related corrspondence from organizations or persons.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 3810-70-M

DEPARTMENT OF EDUCATION

National Advisory Committee on Black Higher Education and Black Colleges and Universities; Meeting

AGENCY: National Advisory Committee on Black Higher Education and Black Colleges and Universities.

ACTION: Notice.

SUMMARY: This notice sets forth the schedule and proposed agenda of the fifteenth meeting of the National Advisory Committee on Black Higher Education and Black Colleges and Universities. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix 1). This document is intended to notify the general public of their opportunity to attend.

DATE: September 18 to 19, 1980, 9:00 a.m. to 5:00 p.m.

ADDRESS: The Forum, Howard University, Armour J. Blackburn University Center, Washington, D.C. 20059.

FOR FURTHER INFORMATION CONTACT: Ms. Carol J. Smith, Program Delegate, National Advisory Committee on Black Higher Education and Black Colleges and Universities, Suite 702-6, 1100 17th Street, NW., Washington, D.C. 20036, AC 202-653-7558.

The National Advisory Committee on Black Higher Education and Black Colleges and Universities is governed by the provisions of Part D of the General Education Provisions Act (Pub. L. 90-247 as amended; 20 U.S.C. 1233 *et seq.)* and the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. Appendix 1) which set forth standards for the formation and use of advisory committees.

This Committee was established to examine all approaches to the higher education of Black Americans as well as the historically Black colleges and universities. Originally scheduled to expire on June 30, 1980, Secretary Hufstedler has extended the Committeed to June 30, 1982 so that the Education Department may continue to benefit from the Committee's recommendations.

The meeting on September 18-19, 1980, will be open to the public beginning at 9:00 am each day. The meeting will be held at Howard University, Armour J. Blackburn University Center, The Forum, Washington, D.C. 20059.

The proposed agenda will include the swearing in ceremony for the members, a review of the Charter and Committee functions and discussion by the Committee on future activities with

respect to issues and recommendations affecting the advancement of Black higher education and enhancement of the historically Black colleges.

Records shall be kept of all Committee proceedings and shall be available for public inspection at the Office of the National Advisory Committee on Black Higher Education and Black Colleges and Universities located at 1100 17th Street, NW., Suite 702–6, Washington, D.C. 20036

Signed at Washington, D.C., on August 13, 1980.

Carol J. Smith,

Program Delegate National Advisory Committee on Black Higher Education and Black Colleges and Universities.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[Docket No. ERA–FC–80–027; OFC Case No. 62009–9170–01, 02–12]

Foster Wheeler Weirton; Acceptance of Petition for Exemption Pursuant to Interim Rules Implementing the Powerplant and Industrial Fuel Use Act of 1978

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Acceptance of Petition for Exemption Pursuant to the Interim Rules Implementing the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: On May 16, 1980, Foster Wheeler Weirton (Foster Wheeler) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) for an order exempting two new major fuel burning installations (MFBIs) from the prohibitions of the Powerplant and Industrial Fuel Use Act of 1978 (FUA or the Act) (42 U.S.C. 8301 *et seq.*), which prohibits the use of petroleum or natural gas as a primary energy source in certain new MFBIs. Criteria for petitioning for exemptions from the prohibitions of FUA are published at 10 CFR Part 501 *et seq.* (Interim Rules), published on June 6, 1980, and 45 FR 38276 (Final Rules), which became effective August 5, 1980.

The MFBIs for which the petition was filed are two identical field-erected steam boilers to be constructed at Foster Wheeler's Weirton, West Virginia facility. These boilers, designated as Nos. 1 and 2 by Foster Wheeler, will each have a design heat input rate capability of 497 million Btu per hour with a steam generating capacity of 350,000 pounds per hour and are capable of burning blast furnace gas in a mixture with natural gas.

Under § 505.28 of the Interim Rules, Foster Wheeler has requested a permanent fuel mixtures exemption to burn natural gas in a mixture with blast furnace gas in each of the two boilers. On June 20, 1980, Foster Wheeler requested that ERA use § 503.38 of the Final Rules to evaluate their petition. The decision to grant or deny the requested exemptions will be made under the Final Rules.

FUA imposes statutory prohibitions against the use of natural gas or petroleum as a primary energy source by new MFBIs which consist of a boiler. ERA's decision in this matter will determine whether Foster Wheeler will be granted a permanent exemption for these two boilers to use natural gas in a mixture with an alternate fuel.

As provided for in Sections 701(c) and (d) of FUA and §§ 501.30 and 501.31 of the Final Rules, interested persons are invited to submit written comments in regard to this matter, and any interested person may submit a written request that ERA convene a public hearing.

DATES: Written comments are due on or before October 6, 1980. A request for public hearing must also be made within this same 45-day period.

ADDRESSES: Fifteen copies of written comments or a request for a public hearing shall be submitted to: Economic Regulatory Administration, Case Control Unit (Fuel Use Act), Box 4629, Room B–210, 2000 M Street, NW, Washington, DC 20461.

Docket No. ERA–FC–80–027 should be printed clearly on the outside of the envelope and on the document contained therein.

FOR FURTHER INFORMATION CONTACT:

Constance L. Buckley, Chief, New MFBI Branch, Office of Fuels Conversion, Economic Regulatory Administration, Department of Energy, 2000 M street, NW, Room 3128, Washington, DC 20461, Phone: (202) 653–3679

Marilyn L. Ross, Office of the General Counsel, Department of Energy, 1000 Independence Avenue, SW, Room 6G–087, Washington, DC 20585, Phone: (202) 252–2967

Gail B. Johnson, Case Manager, Office of Fuels Conversion, Economic Regulatory Administration, 2000 M Street, NW, Room 3128, Washington, DC 20461, Phone: (202) 653–3675

SUPPLEMENTARY INFORMATION: FUA prohibits the use of natural gas or petroleum as a primary energy source in certain new MFBIs unless an exemption for such use has been granted by ERA.

The MFBIs for which these permanent exemptions are requested are two identical field-erected boilers, which each have a design heat input rate capability of 497 million Btu per hour, a steam generating capacity of 350,000 pounds per hour for each unit, and which are designed to burn blast furnace gas in a mixture with natural gas. These two boilers will be used to provide steam to the Weirton Steel Division of National Steel Corporation.

On May 16, 1980, Foster Wheeler filed a petition requesting permanent exemption for two identical field-erected steam boilers, designed to burn a fuel mixture of 75 percent blast furnace gas and 25 percent natural gas, to be constructed at Weirton, West Virginia. Sections 501.21 and 501.22 of the Interim Rules required payment of a filing fee concurrent with submission of a petition. Foster Wheeler failed to pay such a fee and ERA delayed commencement of the acceptability review of Foster Wheeler's petition until receipt of a filing fee. On June 20, 1980, Foster Wheeler requested that its petition be processed using the guidelines of the Final Rules issued May 30, 1980, rather than under the Interim Rules. EPA has agreed, has notified Foster Wheeler verbally that its petition has been accepted, and is hereby waiving the fee and initiating the administrative proceeding.

Section 503.38 of the Final Rules provides for a permanent exemption from the prohibitions of FUA for certain fuel mixtures containing natural gas or petroleum. To qualify, a petitioner must demonstrate to the satisfaction of ERA that:

(1) It proposed to use a mixture of natural gas or petroleum and an alternate fuel as a primary energy source; and

(2) The amount of petroleum or natural gas proposed for use in the mixture will not exceed the minimum percentage of the total annual Btu heat input of the primary energy sources used by the installation needed to maintain operational reliability consistent with maintaining a reasonable level of fuel efficiency.

If the exemption is granted, ERA will not require that the percentage of petroleum and natural gas used in the mixture be less than 25 percent of the total annual Btu heat input of the primary energy sources used by the installation.

Section 503.38(d)(1) provides for a certification alternatives to be used in lieu of the evidence requirements of § 503.38(c) for new installations where the amount of natural gas or petroelum to be used is less than 25 percent of the total annual Btu heat input of the

primary energy sources used by the installation.

Foster Wheeler has certified in its petition that the total amount of natural gas that is proposed to be used in these two identical boilers will not exceed 25 percent of the total annual Btu heat input of the primary energy sources used by each unit.

ERA hereby gives notice that Foster Wheeler's petition for a permanent fuel mixtures exemption has been determined to be complete as filed and is accepted. ERA retains the right to request additional relevant information from Foster Wheeler at any time during the pendency of these proceedings.

As set forth in § 501.3(d) of the Final Rules, the acceptance of this petition by ERA does not constitute a determination that Foster Wheeler is entitled to the exemption requested.

The public file containing documents on these proceedings and supporting materials is available for inspection upon request at: Economic Regulatory Administration, Room B–110, 2000 M Street, NW, Washington, DC, Monday–Friday, 8:00 a.m.–4:30 p.m.

Issued in Washington, DC, on August 14, 1980.

Robert L. Davies,

Assistant Administrator, Office of Fuels Conversion, Economic Regulatory Administration.

[FR Doc. 80-25312 Filed 8-19-80; 8:45 am]

BILLING CODE 6450-01-M

[ERA docket No. 80–Cert–019]

Husky Oil Co.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

Husky Oil Company (Husky) 600 South Cherry Street, Denver, Colorado 80222, filed an application for certification of an elegible use of natural gas to displace fuel oil at its refinery facility in Cody, Park County, Wyoming, with the Administrator of the Economic Regulatory Administration (ERA) pursuant to 10 CFR Part 595 on May 27, 1980. Notice of that application was published in the **Federal Register** (45 FR 51261, August 1, 1980) and an opportunity for public comment was provided for a period of ten (10) calendar days a from the date of publication. No comments were received. The delay between the filing date of the application and its publication in the **Federal Register** was due to the filing by Husky of an amendment to its application which was not received by ERA until July 15, 1980.

The ERA has carefully reviewed Husky's application in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that Husky's application satisfies the criteria enumerated in 10 CFR Part 595, and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. A copy of the transmittal letter and the actual certification are appended to this notice.

Issued in Washington, D.C., on August 14, 1980.

F. Scott Bush,

Assistant Administrator, Regulations and Emergency Planning, Economic Regulatory Administration.

Re ERA Certification of Eligible Use, ERA Docket No. 80–Cert–019, Husky Oil Company

Mr. Kenneth F. Plumb,

Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE, Washington, D.C.

Dear Mr. Plumb: Pursuant to the provisions of 10 CFR Part 595, I am hereby transmitting to the Commission the enclosed certification of an eligible use of natural gas to displace fuel oil. This certification is required by the Commission as a precondition to interstate transportation of fuel oil displacement gas in accordance with the authorizing procedures in 18 CFR Part 284, Subpart F. As noted in the certificate, it is effective for one year from the date of issuance, unless a shorter period of time is required by 18 CFR Part 284, Subpart F. A copy of the enclosed certification is also being published in the **Federal Register** and provided to the applicant.

Should the Commission have any further questions, please contact Mr. Albert F. Bass, Deputy Director, Division of Natural Gas, Economic Regulatory Administration, 2000 M Street NW, Room 7108, Washington, D.C. 20461, telephone (202) 653–3286. All correspondence and inquiries regarding this certification should reference ERA Docket No. 80–Cert–019.

Sincerely,

F. Scott Bush,

Assistant Administrator, Regulations and Emergency Planning, Economic Regulatory Administration.

Certification by the Economic Regulatory Administration to the Federal Energy Regulatory Commission of the Use of Natural Gas for Fuel Oil Displacement by the Husky Oil Co.

[ERA Docket No. 80–CERT–019]

Application for Certification

Pursuant to 10 CFR Part 595, Husky Oil Company (Husky) filed an application for certification of an eligible use of 125,740 Mcf (344 Mcf daily) of natural gas per year for its refinery facility located in Cody, Park County, Wyoming, with the Administrator of the Economic Regulatory Administration (ERA) on May 27, 1980. The application states that the eligible sellers of the gas are the Husky Oil Company (Husky) and the Michigan Consolidated Gas Company (Michigan Consolidated) and the gas will be transported by the Colorado Interstate Gas Company and the Montana-Dakota Utilities. The application indicates that the use of this natural gas is estimated to displace approximately 20,000 barrels of No. 6 fuel oil (3.0 percent sulfur) per year. The application also indicates that neither the gas nor the displaced fuel oil will be used to displace coal in the applicant's facilities.

Certification

Based upon a review of the information contained in the application, as well as other information available to ERA, the ERA hereby certifies, pursuant to 10 CFR Part 595, that the use of 125,740 Mcf of natural gas per year at the Cody Refinery purchased from Husky and Michigan Consolidated is an eligible use of gas within the meaning of 10 CFR Part 595.

Effective Date

This certification is effective upon the date of issuance, and expires one year from that date, unless a shorter period of time is required by 18 CFR Part 284, Subpart F. It is effective during this period of time for the use of up to the same certified volume of natural gas at the same facility purchased from the same eligible sellers.

Issued in Washington, D.C., on August 14, 1980.

F. Scott Bush,

Assistant Administrator, Regulations and Emergency Planning, Economic Regulatory Administration.

[FR Doc. 80-25313 Filed 8-19-80; 8:45 am]

BILLING CODE 6450-01-M

Seminole Refining, Inc.; Final Consent Order

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of final consent order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces notice of a final Consent Order.

EFFECTIVE DATE: August 13, 1980.

FOR FURTHER INFORMATION CONTACT: Stanley S. Mills, Program Manager for Entitlements, Office of Enforcement, Economic Regulatory Administration, U.S. Department of Energy, 2000 M Street, N.W., Room 5114, Washington, D.C. 20461. (202–653–3548).

SUPPLEMENTARY INFORMATION: On July 10, 1980, 45 FR 46475, the Office of Enforcement of the ERA published notification in the **Federal Register** that it executed a proposed Consent Order with Seminole Refining, Inc. of Saint Marks, Florida on July 2, 1980 which would not become effective until 30 days after publication. Interested

persons were invited to submit comments concerning the terms, conditions or procedural aspects of the proposed Consent Order. In addition, persons who believed they had a claim to all or a portion of the refund paid by Seminole Refining, Inc. pursuant to the proposed Consent Order were requested to submit notice of their claims to the ERA.

Although interested persons were invited to submit comments regarding the proposed Consent Order to the DOE, no comments were received. In addition, the ERA did not receive any claims to the refund. The proposed Consent Order has therefore been finalized.

The ERA shall receive $1,500.000.00 from Seminole Refining, Inc. upon the Effective Date of this Consent Order. Seminole Refining, Inc. shall further pay the sum of $400,000.00 to DOE in two annual installments of $200,000.00 each, together with interest at the rate of 15.39 percent per annum, compounded quarterly, running from the Effective Date of this Consent Order. Each installment shall be paid on or before the end of the twelfth and twenty-fourth month following the Effective Date of this Consent Order. These monies shall be placed in a suitable account pending determination of proper distribution.

Issued in Washington, D.C., on the 14th day of August, 1980.

Robert Gerring,

Director, Program Operations Division, Office of Enforcement, Economic Regulatory Administration.

[FR Doc. 80-25311 Filed 8-19-80; 8:45am]

BILLING CODE 6450-01-M

Energy Information Administration

Publication of Alternative Fuel Price Ceilings and Incremental Price Threshold for High Cost Natural Gas

The Natural Gas Policy Act of 1978 (NGPA) (Public Law 95-621), signed into law on November 9, 1978, mandated a new framework for the regulation of most facets of the natural gas industry. In general, under Title II of the NGPA, interstate natural gas pipeline companies are required to pass through certain portions of their acquisition costs for natural gas to industrial users in the form of a surcharge. The statute requires that the ultimate cost of gas to the industrial facility does not exceed the cost of the fuel oil which the facility could use as an alternative.

Pursuant to Title II of the NGPA of 1978, Section 204 (e), the Energy Information Administration (EIA) herewith publishes for the Federal Energy Regulatory Commission (FERC) computed natural gas ceiling prices and a high cost gas incremental pricing threshold which are to be effective September 1, 1980. These prices are based on the prices of alternative fuels.

FOR FURTHER INFORMATION CONTACT: Leroy Brown, Jr., Energy Information Administration, Federal Building, 12th and Pennsylvania, Ave., NW, Rm. 4121, Washington, D.C. 20461. (202) 633-9710.

Section I. Alternative Fuel Price Ceilings

As required by FERC Order No. 50, computed prices are shown for the 48 contiguous States. The District of Columbia's ceiling is included with the ceiling for the State of Maryland. The price ceiling is expressed in dollars per million British Thermal Units (BTU's). The method used to determine the price ceilings is described in Section III.

State	Dollar per million Btu's
Alabama	2.62
Arizona	2.84
Arkansas	2.99
California	2.82
Colorado	2.69
Connecticut	3.07
Delaware	2.90
Florida	2.67
Georgia	2.62
Idaho	3.48
Illinois	2.56
Indiana	2.52
Iowa	2.43
Kansas	2.05
Kentucky	3.51
Louisiana	1.92
Maine	3.06
Maryland	2.86
Massachusetts	3.01
Michigan	2.92
Minnesota	2.50
Mississippi	2.68
Missouri	2.09
Montana	2.69
Nebraska	2.37
Nevada	2.97
New Hampshire	3.32
New Jersey	2.90
New Mexico	2.54
New York	2.84
North Carolina	3.12
North Dakota	2.80
Ohio	2.20
Oklahoma	2.55
Oregon	3.56
Pennsylvania	2.81
Rhode Island	3.45
South Carolina	2.84
South Dakota	3.39
Tennessee	2.85
Texas	2.79
Utah	2.69
Vermont	3.42
Virginia	2.59
Washington	3.01
West Virginia	2.87
Wisconsin	2.59
Wyoming	2.52

Section II. Incremental Pricing Threshold for High Cost Natural Gas

The EIA has determined that the volume-weighted average price for No. 2 distillate fuel oil landed in the greater New York City Metropolitan area during June 1980 was $33.03 per barrel. In order to establish the incremental pricing threshold for high cost natural gas, as identified in the NGPA, Title II, Section 203 (a)(7), this price was multiplied by 1.3 and converted to its equivalent in millions of BTU's by dividing by 5.8. Therefore, the incremental pricing threshold for high cost natural gas, effective September 1, 1980, is $7.40 per million BTU's.

Section III. Method Used to Compute Price Ceilings

The FERC, by Order No. 50, issued on September 28, 1979, in Docket No. RM79-21, established the basis for determining the price ceilings required by the NGPA. FERC also, by Order No. 51, issued in the same docket on the same date, established that only the price paid for No. 6 high sulfur content residual fuel oil would be used to determine the price ceilings until November 1, 1980.

A. Data Collected

The following data were required from all companies identified by the EIA as sellers of No. 6 high sulfur content (greater than 1% sulfur content by weight) residual fuel oil: for each selling price, the number of gallons sold to large industrial users in the months of April 1980, May 1980 and June 1980.[1] All reports of volume sold and price were identified by the State into which the oil was sold.

B. Method Used to Determine Alternative Price Ceilings (1) Calculation of Volume-Weighted Average Price

The prices which will become effective September 1, 1980, (shown in Section I) are based on the reported price of No. 6 high sulfur content residual fuel oil, for each of the 48 contiguous States, for each of the 3 months, April 1980, May 1980 and June 1980. Reported prices for sales in April 1980 were adjusted by the percent change in the nationwide volume-weighted average price from April to June 1980. Prices for May 1980 were similarly adjusted by the percent change in the nationwide volume-weighted average price from May to June 1980. The volume-weighted 3-month average of the adjusted April 1980 and May 1980, and the reported June 1980 prices were then computed for each State.

[1] Large Industrial User—A person/firm which purchases No. 6 fuel oil in quantities of 4,000 gallons or greater for consumption in a business, including the space heating of the business premises. Electric utilities, governmental bodies (Federal, State or Local) and the military are excluded.

(2) *Adjustment for Price Variation*

States were grouped into the regions identified by the FERC (see Section III.C.). Using the adjusted prices and associated volumes reported in a region during the 3-month period, the volume-weighted standard deviation of prices was calculated for each region. The volume-weighted 3-month average price (as calculated in Section III.B.(1) above) for each State was adjusted downward by two times this standard deviation for the region to form the adjusted weighted average price for the State.

(3) *Calculation of Ceiling Prices*

The lowest selling price within the State was determined for each month of the 3-month period (after adjusting up or down by the percent change in oil prices at the national level as discussed in Section III.B.(1) above). The products of the adjusted low price for each month times the State's total reported sales volume for each month were summed over the 3-month period for each State and divided by the State's total sales volume during the 3 months to determine the State's average low price. The adjusted weighted-average price (as calculated in Section III.B.(2)) was compared to this average low price, and the higher of the values was selected as the base for determining the alternative fuel price ceiling for each State. For those States which had no reported sales during one or more months of the 3-month period, the appropriate regional volume-weighted alternative fuel price was computed and used in combination with the available State data to calculate the State's alternative fuel price ceiling base. The appropriate lag adjustment factor (as discussed in Section III.B.4.) was then applied to the alternative fuel ceiling base. The alternative fuel price (expressed in dollars per gallon) was multiplied by 42 and divided by 6.3 to estimate the alternative fuel price ceiling for the State (expressed in dollars per million BTU's).

(4) *Lag Adjustment*

The EIA has implemented a procedure to partially compensate for the two-month lag between the end of the month for which data are collected and the beginning of the month for which ceiling prices become effective. It was determined that *Platt's Oilgram Price Report* publication provides timely information relative to the subject. The prices found in *Platt's Oilgram Price Report* publication are given for each trading day in the form of high and low prices for No. 6 residual oil in 21 cities throughout the United States. The low posted prices for No. 6 residual oil in these cities were used to calculate a national and a regional lag adjustment factor. The national lag adjustment factor was obtained by calculating a weighted average price for No. 6 high sulfur residual fuel oil for the ten trading days ending August 13, 1980, and dividing that price by the corresponding weighted average price computed from prices published by Platt's for the month of June 1980. A regional lag adjustment factor was similarly calculated for four regions. These are: one for FERC Regions A and B combined; one for FERC Region C; one for FERC Regions D, E, and G combined and one for FERC Regions F and H combined. The lower of the national or regional lag factor was then applied to the alternative fuel price ceiling for each State in a given region as calculated in Section III.B.(3).

C. Listing of States by Region

States were grouped by the FERC to form eight distinct regions as follows:

Region A	Region B
Connecticut	Delaware
Maine	Maryland
Massachusetts	New Jersey
New Hampshire	New York
Rhode Island	Pennsylvania
Vermont	
Region C	**Region D**
Alabama	Illinois
Florida	Indiana
Georgia	Kentucky
Mississippi	Michigan
North Carolina	Ohio
South Carolina	West Virginia
Tennessee	Wisconsin
Virginia	
Region E	**Region F**
Iowa	Arkansas
Kansas	Louisisana
Missouri	New Mexico
Minnesota	Oklahoma
Nebraska	Texas
North Dakota	
South Dakota	
Region G	**Region H**
Colorado	Arizona
Idaho	California
Montana	Nevada
Utah	Oregon
Wyoming	Washington

Issued in Washington, D.C., on August 18, 1980.

Albert H. Linden, Jr.,

Acting Administrator, Energy Information Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. EL80-31]

Akutan, Alaska, City of; Declaration of Intention

August 12, 1980.

Take notice that on May 19, 1980, the City of Akutan filed a declaration of intention to construct and operate a hydroelectic facility on an unnamed stream near Akutan, Alaska. The declaration of intention was filed under § 23(b) of the Federal Power Act 16 U.S.C. § 817(b), and requests the Federal Energy Regulatory Commission to conduct an investigation to determine if a FERC license will be required for the project. Correspondence, with the application should be directed to Mr. Vincent McClelland, Project Coordinator, 301 East Firewood Lane, Anchorage, Alaska 99503.

The project would consist of: (1) an earthfill dam, 200 feet long and 30 feet high; (2) a 14-inch diameter penstock, 2000 feet long; (3) a powerhouse containing one generating unit with a rated capacity of 200 kW; and (4) a transmission line, approximately 1.5 miles long, extending from the powerhouse to Akutan.

Project power would be used in the City of Akutan.

Comments, Protests or Petitions to Intervene—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR, § 1.8 or § 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before *September 29, 1980.* The Commission's address is: 825 North Capitol Street, NE., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER80-298]

El Paso Electric Co.; Order Accepting for Filing and Suspending Proposed Rate Increase, Granting Intervention, Granting Waiver and Establishing Procedures

Issued July 29, 1980.

On March 24, 1980 El Paso Electric

Company (El Paso) submitted for filing a

Project Description—The proposed

must conform with the requirements of

applications for Section 103

Company (El Paso) submitted for filing a rate schedule [1] providing for the sale by El Paso to Southern California Edison Company (Edison) of specified amounts of capacity and associated energy during specified months during the years 1980, 1981 and 1982. In addition, energy will also be made available as scheduled by Edison at any time during the contract term subject to the availability of gas-fired generation on El Paso's system. El Paso requests waiver of the notice requirements of Section 35.3 of the Commission's regulations and an effective date of March 24, 1980, the date on which sales of energy to Edison commenced.

On April 28, 1980, Rio Grande Electric Cooperative (Rio Grande) filed an untimely petition to intervene stating that it does not oppose the sale of capacity and energy to Edison. However, Rio Grande states that it has not had an opportunity to fully evaluate the terms and conditions of the sale to be assured they are not discriminatory. Therefore, Rio Grande opposes summary acceptance of the proposed conditions. Rio Grande further states that the sale of capacity off-system by El Paso raises questions about the continued viability of the load projections which apparently induced El Paso to undertake its heavy involvement in the Palo Verde Nuclear Project.[2]

Subsequently, Rio Grande and El Paso filed a joint motion for approval of the firm capacity agreement. In the joint motion, El Paso stipulates that (1) with respect to Rio Grande's concern that the off-system sale will increase fuel clause rates, fuel clause charges will not increase as a result of the sale, and (2) with respect to Rio Grande's concern that approval of the agreement might have precedential effect on pending rate cases, the acceptance of the agreement will not constitute precedential findings as to the terms and conditions contained in the agreement. Therefore, the parties urge acceptance of the filing and termination of the docket.

Discussion

The proposed monthly charge for the firm capacity is $4.80/KW of contract capacity. El Paso states that firm capacity is considered to be provided from system-wide resources and priced based on average system costs. The proposed charge for any energy scheduled for delivery to Edison is 115% of the system incremental energy cost [3] during the hour in which the energy is scheduled plus variable production operation and maintenance expenses. El Paso has used incremental cost pricing for energy associated with firm capacity supplied on a fully distributed average cost basis. This mix of incremental and fully costs may result in unreasonable rates, and we shall set this question for hearing.

El Paso has indicated in its transmittal letter that the agreement was negotiated as a means of reducing Edison's use of oil-fired generation. The company has also indicated that it does not object to collecting revenues under the agreement subject to refund pending a Commission decision in the docket. In light of these factors and Edison's agreement to the terms and conditions of the transaction including the commencement of energy sales as of March 24, 1980, we find there is good cause to grant the waiver of the notice requirements of § 35.3 of the Commission's regulations.

El Paso has indicated that there is a 15% adder to the rate for variable production operation and maintenance costs which is intended to recover the variable component of labor and materials required by generating facilities. This adder, which is set at 1.5 mills/KWh during 1980, is to be determined on an annual basis by the parties. Any change in this component of the energy charge must be timely filed with the Commission as a change in rate schedule under Section 35.13 of the Commission's Regulations together with appropriate cost support as required by that section.

Our review indicates that the proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, preferential, or otherwise unlawful. Therefore, we shall accept El Paso's submittal for filing, to become effective, subject to refund, as of March 24, 1980.

The Commission orders: (A) The rates proposed by El Paso are hereby accepted for filing, to become effective, subject to refund, as of March 24, 1980.

(B) Petitioner Rio Grande is hereby permitted to intervene in this proceeding subject to the Commission's Rules and Regulations; *Provided however,* that participation by such intervenor shall be limited to the matters set forth in its petition to intervene and its motion for approval, filed jointly with El Paso; and *Provided, further,* that the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(C) Changes in the variable production operation and maintenance component of the energy charge must be filed as changes in rate schedule pursuant to Section 35.13 together with appropriate cost support.

(D) Pursuant to the authority contained in and subject to the jurisdiction conferrred upon the Federal Energy Regulatory Commission by Section 402(a) of the DOE Act and by the Federal Power Act, specifically Sections 205 and 206, and by the Commission's Rules of Practice and Procedures and the Regulations under the Federal Power Act (18 CFR Chapter I (1979)), a public hearing shall be held concerning the justness and reasonableness of El Paso's proposed rates.

(E) A presiding administrative law judge to be designated by the Chief Administrative Law Judge for that purpose shall convene a prehearing conference in this proceeding, to be held within 30 days of the issuance of this order, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The presiding administrative law judge is authorized to establish procedural dates and to rule on all motions (except motions to consolidate or sever and motions to dismiss), as provided for in the Commission's Rules of Practice and Procedure.

(F) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-24803 Filed 8-19-80; 8:45 am]

BILLING CODE 6450-85-M

[1] Designated as: *El Paso Electric Company*—Rate Schedule FERC No. 27.

[2] *See El Paso Electric Co.*, Opinion No. 85 (May 19, 1980).

[3] System incremental energy cost is defined in the agreement as the greater of (1) the product of El Paso's incremental heat rate and replacement fuel cost, or (2) El Paso's purchased energy cost, both expressed in Mills/KWh.

[Project No. 3224]

Gillette, Wyo., City of; Application for Preliminary Permit

August 12, 1980.

Take notice that the city of Gillette (Applicant) filed on June 23, 1980, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. §§ 791(a)—825(r)] for proposed Project No. 3224 to be known as Keyhole Dam located on the Keyhole Reservoir in Crook County, Wyoming, near the town of Moorcraft. Correspondence with the Applicant should be directed to: Paul G. Schamp, P.O. Box 3003, Gillette, Wyoming 82716.

Project Description—The proposed project would consist of: (1) a proposed powerhouse containing two generating units, each rated at 450 kW; (2) a proposed 12-kV transmission line approximately 1.5 miles long; and (3) appurtenant facilities. The estimated annual output of the proposed project would be 4,000,000 kWh. Applicant would utilize an existing dam and reservoir owned by the U.S. Corps of Engineers. The Applicant's facilities would be located on private lands.

Purpose of Project—The city of Gillette would utilize the energy produced to meet the growth and demand upon its utilities.

Proposed Scope and Cost of Studies under Permit—The Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time it proposes to conduct economic and environmental studies, prepare application for necessary State and Federal permits, and to develop preliminary and final designs of the project. The Applicant estimates the cost of the proposed studies would be $50,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for the power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before September 20, 1980, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than November 19, 1980. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c), (*as amended* 44 *FR* 61328, October 25, 1979). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (d), (*as amended,* 44 *FR* 61328, October 25, 1979).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR, § 1.8 or § 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before September 20, 1980. The Commission's address is: 825 North Capitol Street, NE., Washington, D.C. 20426. The application is on file with the Commision and is available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-25255 Filed 8-19-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. SA80-142]

Kansas Joint Venture; Application for Adjustment

August 12, 1980.

Take notice that on May 13, 1980, Kansas Joint Venture (KJV), c/o John V. Black, Esquire, 306 South Oak, Pratt, Kansas, 67124, filed with the Federal Energy Regulatory Commission (Commission) an application for an adjustment under Section 502(c) of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3301, *et seq.* KJV petitions for a modification to, exemption from, and/or exception to 18 CFR 273.204 of the Commission's regulations.

Specifically, KJV states that it is the operator of the Fatzer #1 Well, SW/4 NE/4 Section 5, T27N, R17W, Kiowa County, Kansas, and the Taylor #1 Well, NW¼ NE¼ Section 20, T27N, R17W, Edwards County, Kansas, and that the subject wells were put on production in June 1979. In the Fall of 1979, KJV alleges it commenced work on applications for Section 103 determinations which were subsequently filed on March 14, 1980, with the appropriate jurisdictional agency in Kansas. The purchaser of the gas is Panhandle Eastern Pipeline Company.

KJV is eligible to make interim collections of the Section 103 price from the date a notice was filed with this Commission under § 273.202. Upon receiving a final determination, KJV would be eligible for retroactive collections back to its original filing date for jurisdictional determination on March 14, 1980. However, KJV also requests waiver of the regulations in order to collect the Section 103 price as of the date of initial delivery from these wells. KJV asserts that the operation of § 273.204(a) of the Commission's regulations will prevent collection of the difference between the Section 103 rate and the contract price ($1.66/MCF) between June 1979 and March 14, 1980, and would result in an unfair distribution of burdens and special hardships to it.

KJV contends that relief should be granted because it is a small company, lacking the staff of its larger competitors and hence at a disadvantage in keeping abreast of FERC regulations and filing requirements.

The procedures applicable to the conduct of this adjustment proceeding are found in § 1.41 of the Commission's Rules of Practice and Procedure, Order No. 24, issued March 22, 1979 (44 FR 18961, March 30, 1979).

Any person desiring to participate in this adjustment proceeding shall file a petition to intervene in accordance with the provisions of 18 CFR 1.41(e). All petitions to intervene must be filed on or before September 4, 1980.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-25256 Filed 8-19-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. ER 80-582]

Pacific Gas & Electric Co.; Filing

August 12, 1980.

The filing Company submits the following:

Take notice that on August, 1, 1980 Pacific Gas and Electric Company (PG&E) submitted for filing a Notice of Cancellation of PG&E's Rate Schedule F.P.C. No. 21 applicable only to the City of Redding, California. The Rate Schedule expired by its own terms on April 1, 1971.

A copy of this filing has been served upon Redding, California and the California Public Utilities Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before September 2, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-25257 Filed 8-19-80; 8:45 am]

BILLING CODE 6450-85-M

[Projects Nos. 3105 and 3106]

Power Authority of the State of New York; Granting Interventions

August 12, 1980.

The City of New York, New York, the Town of Olive, New York, and New York State Assemblyman Maurice D. Hinchey have petitioned to intervene in the proceeding involving the application of the Power Authority of the State of New York (PASNY) for an exemption from licensing for its proposed Ashokan Project, FERC Project No. 3105. Additionally, the City of New York has petitioned to intervene in the proceeding involving PASNY's application for an exemption from licensing for its proposed Kensico Project, FERC Project No. 3106.

The Ashokan Project would utilize New York City's water supply facilities, and would be located in the Town of Olive and in Maurice Hinchey's Assembly District. The Kensico Project would also utilize New York City's water supply facilities. Thus, each petitioner has an interest in the proceeding(s) in which intervention is sought.

The City of New York supports the grant of exemptions for both projects, provided such action does not impair its rights as owner of certain of the projects' facilities or as consumer of the projects' power. The Town of Olive and Assemblyman Hinchey opposed the grant of an exemption for the Ashokan Project at the time they petitioned to intervene; they now support the exemption.

Pursuant to § 375.302 of the Commission's regulations, 45 FR 21216 (1980), *amending* 18 CFR 3.5(a) (1979), the Petitioners are permitted to intervene in this proceeding subject to the Commission's Rules and Regulations under the Federal Power Act. Participation of the intervenors shall be limited to matters affecting asserted rights and interests specifically set forth in the petitions to intervene. The admission of the intervenors shall not be construed as recognition by the Commission that they might be aggrieved by any order entered in this proceeding.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-25256 Filed 8-19-80; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 3239]

Puget Sound Power & Light Co.; Application for Preliminary Permit

August 12, 1980.

Take notice that Puget Sound Power & Light Company (Applicant) filed on July 3, 1980, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 3239 to be known as Sandy Creek Project located on the Sandy, Rocky, Sulphur, and Dillard Creeks in Whatcom County, Washington. The Project would occupy lands of the United States within the Mount Baker-Snoqualmie National Forest. Correspondence with the Applicant should be directed to: Mr. David H. Knight, Vice President—Power Supply, Puget Sound Power & Light Company, Puget Power Building, Bellevue, Washington 98009.

Project Description.—Applicant proposes to divert water from four creeks—Sandy, Rocky, Sulphur, and Dillard—into a single powerhouse. The proposed project would consist of: (a) four 25-foot high concrete arch or gravity diversion dams; (b) approximately 17,800 feet of low pressure pipeline (diameter range: 36–80 inches); (c) a 48-inch diameter, 4,800-foot long penstock; (d) a concrete powerhouse with a total rated capacity of 8,900 kW, located on the south bank of Sandy Creek at a point approximately 1⅛ miles east of Baker Lake; and (e) a 2.9-mile long, 12.5-kV transmission line connecting the powerhouse to the Applicant's existing Upper Baker Development (FERC Project No. 2150) substation, south of the powerhouse.

Purpose of Project.—Project power would be integrated into the Applicant's existing transmission and distribution network.

Proposed Scope and Cost of Studies Under Permit.—Applicant has requested an 18-month preliminary permit to prepare a project report, including preliminary designs, and results of geological, hydrological, environmental and economic feasibility studies. Applicant has indicated that: (a) no new roads would be required for conducting the studies; (b) an existing stilling pipe and equipment platform would be used for reestablishment of the gaging station on Sulphur Creek; (c) test borings would be done in areas which are clear of vegetation, boring holes would be backfilled, and the ground surface reconditioned to the extent possible.

The cost of the above activities, along with preparation of an environmental impact report, obtaining agreements with the Forest Service and other Federal, State, and local agencies, preparing a license application, conducting final field surveys and preparing designs is estimated by the Applicant to be $500,000.

Purpose of Preliminary Permit.—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for the power, and all other information necessary for inclusion in an application for a license.

Agency Comments.—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications.—This application was filed as a competing application to the Rocky Creek Water Power Project No. 3018 on Rocky and Sulphur Creeks in Whatcom County, under 18 CFR 4.33 *as amended*, 44 FR 61328 (October 25, 1979), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions To Intervene.—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR, § 1.8 or § 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procdures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before September 29, 1980. The Commission's address is: 825 North Capitol Street, NE., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-25259 Filed 8-19-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. RI80-12]

Eldon Walker, et al.; Petition

August 12, 1980.

In the matter of Eldon Walker, Henrietta Walker, Earl Walker, W. A. Robinson, and Jalmer Berg, Petitioners, v. Michigan Wisconsin Pipe Line Company, Defendant.

Take notice that on July 15, 1980, Eldon Walker, Henrietta Walker, Earl Walker, W. A. Robinson, and Jalmer Berg filed a petition with the FERC against Michigan Wisconsin Pipe Line Company (Michigan Wisconsin), alleging: that in 1961 petitioners drilled and completed the Galbreath No. 1 well in Section 14, Township 27 North, Range 25 West, Harper County, Oklahoma, and sold the gas therefrom to Michigan Wisconsin under three contracts they assumed from others in connection with acquisition of the leases involved, and under a fourth contract they entered into with Michigan-Wisconsin directly; that Michigan Wisconsin misrepresented the expiration dates of three of these contracts to petitioners, causing them to believe they were not eligible to be replaced by rollover contracts, when in fact they were eligible; and that petitioners, after learning of the correct expiration dates, requested Michigan Wisconsin to execute rollover contracts for these three expired contracts effective as of their expiration dates, but that Michigan Wisconsin refuses to do so. Petitioners charged Michigan Wisconsin with a failure to bargain in good faith.

Petitioners request that the Commission order Michigan Wisconsin to enter into the contracts with them which they believe themselves to be entitled; that the Commission waive the requirement of Opinion No. 699–H that a rollover contract must be executed before a rollover rate can be granted; or, in the alternative, that they be granted immediate abandonment. For protective purposes, petitioners request that their filing be treated as a notice of unilateral change in price pursuant to Opinion No. 699–H, effective on the dates of expiration of the three above-mentioned contracts. They also request that, during the pendency of this proceeding, they be allowed to shut in their well or be granted a protective order restoring their sales volumes to them.

Any person desiring to be heard or to protest said petition should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Section 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 15, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of the filing are on-file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Project No. 2545]

Washington Water Power Co.; Application for Amendment of a Major License

August 12, 1980.

Take notice that on March 3, 1980, the Washington Water Power Company of Spokane, Washington (Applicant), filed an application for an amendment of a major license with the Federal Energy Regulatory Commission [pursuant to the Federal Power Act, 16 U.S.C., Sections 791(a)—825(r)] to include the constructed Post Falls hydroelectric development in the license for project No. 2545. The Post Falls development is located on the Spokane River in the counties of Kootenai and Benewah, Idaho. Correspondence concerning the application should be sent to: Mr. J. P. Buckley, Vice President and Secretary, P.O. Box 3727, Spokane, Washington; and Mr. Alan P. O'Kelly, 1400 Washington Trust Financial Center, Spokane, Washington 99204.

The constructed Post Falls Development consists of: 1) the 48,000-acre Coeur D'Alene Lake with a useable storage capacity of 223,100 acre-feet; 2) the 431-foot long and 31-foot high spillway dam across the north channel, consisting of piers, one rolling sector gate, and eight Taintor gates; 3) the 127-foot long and 25-foot high concrete gravity spillway dam across the south channel containing six wooden sluice gates; 4) the 215-foot long and 64-foot high concrete gravity powerhouse dam containing six gates and forming the east wall of the powerhouse; 5) five 56-foot long and 11.3-foot diameter steel penstocks and one penstock which is stubbed off for a sixth unit; 6) the 175-foot long and 62-foot wide brick powerhouse containing five generating units, each rated at 2250 kW; 7) a 16,000–KVA 2.4/115–kV step-up transformer and a 4667–KVA 2.4/115–kV step-up transformer; and appurtenant facilities.

Applicant proposes to install an additional sixth generating unit, rated at 350 kW, in the existing powerhouse at a cost of $1,050,000. Further, Applicant, jointly with the City of Post Falls, proposes to expand, on Company-owned land, the existing South City Park. Project power would be integrated into the Applicants's interconnected transmission and distribution system.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be hard or to make any protests about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the Requirements of the Commission's Rules of Practice and Procedure, 16 C.F.R. § 1.8 or § 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in Section 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person

BILLING CODE 6450-85-M

[Docket No. ER80-586]

West Penn Power Co. and Duquesne Light Co.; Filing

August 12, 1980.

The filing Company submits the following:

Take notice that Allegheny Power Service Corporation (APSC) on August 4, 1980 tendered for filing on behalf of (West Penn), one of the electric utilities which make up the integrated Allegheny Power System, and Duquesne Light Company (Duquesne), Amendment No. 9 to the Interchange Agreement dated February 1, 1968, between West Penn and Duquesne designated West Penn Rate Schedule FPC No. 24 and Duquesne Rate Schedule FPC No. 9.

Amendment No. 9: (1) provides for an increase in the demand charge for Short Term power from $0.70 to $0.85 per kilowatt-week and increase in the charge for Short Term power obtained by the supplying party from another system from $0.24 per kilowatt-week; (2) as required by the Commission in Rule 35.23 (f), places a $0.001 per kilowatt-hour cap on the adder to the out-of-pocket costs of providing energy coming from a third party sold under the Short Term and schedules; (3) places demand charges on emergency Service energy which comes from third party of $0.0017 per kilowatt-hour when supplied by Allegheny Power System companies and $0.0016 per kilowatt-hour when supplied by Duquesne; (4) increases the mimimum charge for energy sold under the Emergency Service schedule generated by the supplying party's own system to $0.03 per kilowatt-hour; and (5) places a $0.002 per kilowatt-hour cap on the adders to the out-of-pocket costs of energy supplied by Allegheny Power System companies under the Emergency Service and Short Term schedules. Applicants state that since Short Term and Limited Term power transactions will be scheduled from time to time as load and capacity conditions on the systems of the parties dictate it is impossible to estimate the increase in revenues which would result from Amendment No. 9.

Any person desiring to be heard or protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Section 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protest should be filed on or before September 2, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL 1578-6]

Commonwealth of Virginia, Marine Sanitation Device Standard; Receipt of Supplemental Information in Support of Petition

AGENCY: Environmental Protection Agency.

ACTION: Notice of receipt of supplemental information and solicitation of public comment.

SUMMARY: In 1979, the Commonwealth of Virginia petitioned the Environmental Protection Agency (the Agency) for a determination under section 312(f)(3) of the Clean Water Act that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for a specified portion of the Rappahannock River. The Agency has recently received supplemental information from the Commonwealth. This notice summarizes that information and solicits public comment on the Commonwealth's petition, as supplemented. The Agency has also solicited further information from the Commonwealth, which will be made available for public comment when it is received.

DATES: The Agency will accept public comments on the petition October 6, 1980. The Agency has requested the Commonwealth to provide additional information by September 1, 1980.

ADDRESSES: The Commonwealth's submissions and previous public comments are available for inspection and copying at the Agency's Public Docket Room, Library, Room 2404, 401 M Street, SW., Washingtn, D.C. 20460. Comments should be addressed to Joseph A. Krivak, Director, Criteria and Standards Division (WH-585), Office of Water Regulations and Standards, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: For further information or a copy of the Commonwealth's submissions contact Joseph A. Krivak at the above address or by telephone: (202) 755-0100.

SUPPLEMENTARY INFORMATION: On November 26, 1979, the Environmental Protection Agency (the Agency), published notice that the Commonwealth of Virginia had petitioned it to determine that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the Rappahannock River from its mouth (determined by a line between Windmill Point and Stingray Point) upstream to the Thomas Downing Bridge at Tappahannock, and including all creeks, coves, and estuaries within the specific area (44 FR 67524). The petition area is bordered by four counties: Middlesex, Lancaster, Richmond and Essex. This petition was filed pursuant to section 312(f)(3) of the Clean Water Act, 33 U.S.C. 1322. Under section 312, if the Agency makes an affirmative determination on this petition, the Commonwealth of Virginia may designate the specified waters as "no discharge" waters.

Section 312(f)(3) states that:

> After the effective date of the initial standards and regulations promulgated under this section, if any State determines that the protection and enhancement of the quality of some or all of the waters within such State require greater environmental protection, such State may completely prohibit the discharge from all vessels of any sewage, whether treated or not, into such waters, except that no such probition shall apply until the Administrator determines that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessles are reasonably available for such water to which such prohibition would apply.

On March 11, 1980 (45 FR 15648), after receiving public comment on the Commonwealth's petition, the Agency published its determination that there were major deficiencies in the petition and that it was unable to make the finding required by section 312(f)(3). The Commonwealth was invited to submit additional information by April 10, 1980 and did so. EPA reviewed this information and in an April 30, 1980 letter to the Commonwealth requested clarification concerning the Commonwealth's additional information. EPA indicated that a response was required before the Agency could publish a notice of receipt of the Commonwealth's additional information. The letter indicated that the Agency was particularly interested in capacities of the facilities to handle high volumes of sewage and in the construction and operation of the equipment at each facility. The Commonwealth responsed on June 4, 1980. This notice invites public comment on the Commonwealth's original petition, as modified by its submissions on April 9 and June 4.

The Commonwealth has certified that there are eleven pumpout facilities within the area covered by the petition and a twelfth (Ruark's Boat Yard and Marina) on the north shore of the Piankatank River. The twelve pumpout facilities identified by the Commonwealth are shown in Table 1. Additional information pertaining to these facilities is shown in Table 2.

Table 1.—*With Modified Information, Submitted Apr. 9, 1980 and June 4, 1980*

Name of marina	Geographic location	Nautical miles from mouth of river	Operating hours	Days per week
Walden Bros. Marina	Broad Creek in Middlesex County.	1.9	April 1 to October 30, 8 a.m. to 5 p.m. November 1 to March 31, 8 a.m. to 5 p.m.	5 (closed Saturday and Sunday).
Miller's Marine Railway	Broad Creek in Middlesex County.	1.9	January 1 to December 31, 8 a.m. to 4:30 p.m.	5 (closed Saturday and Sunday).
Dozier's Dockyard Marina	Broad Creek in Middlesex County.	1.9	April 1 to October 31, 9 a.m. to 4:30 p.m.	6 (closed Tuesday).
Montgomery and Wilson Marine Railway	Broad Creek in Middlesex County.	2.0	April 1 to December 1, Monday to Friday 8 a.m. to 5 p.m.; Saturday 8 a.m. to 12:30 p.m.	5½ (closed Saturday afternoons and Sunday).
Norton's Marina	Broad Creek in Middlesex County.	2.0	April 1 to November 30, 8 a.m. to 4:30 p.m.	6 (closed Sunday).
Rappahannock Yachts	Carter Creek in Lancaster County.	9.2	January 1 to December 1, 8 a.m. to 5 p.m.	7.
Regent Point Marina	Locklies Creek in Middlesex County.	9.3	April 1 to October 31, 10 a.m. to 6 p.m. November 1 to March 31, 10 a.m. to 5 p.m.	7. 2 (open Saturday and Sunday).
Tides Lodge Marina	Carter Creek in Lancaster County.	11.0	March 15 to November 28, 8 a.m. to 6 p.m.	7.
Yankee Point Sailboat Marina	Myers Creek in Lancaster County.	14.5	March 1 to October 31, 9 a.m. to 5 p.m.	7.
Urbanna Marine Corp Marina	Urbanna Creek in Middlesex County.	15.8	January 15 to December 1, 8 a.m. to 5 p.m.	6 (closed Sunday).
Garrett's Marina	On the south shore of the Rappahannock River in Essex County.	29.3	May 1 to October 31, 8 a.m. to 5 p.m.. November 1 to April 30, 7:30 a.m. to 4 p.m.	6 (closed Sunday). 5 (closed Saturday and Sunday).
Ruark's Boat Yard and Marina	On the north shore of the Piankatank River in Middlesex County.	9.0	April 15 to November 1, 9 a.m. to 4 p.m.	5 (closed Saturday and Sunday).

Table 2.—*With Modified Information, Submitted Apr. 9, 1980, and June 4, 1980*

Name of marina	Available minimum water depth at mean low water (feet)	Method of disposal of collected sanitary wastes	Number of vessels moored at Marina	Number of transient vessels serviced
Walden Bros. Marina	6	a	53	1 during season.
Miller's Marine Railway	8	a	8	15 per month; most vessels served are commercial.
Dozier's Dockyard Marina	3	d	30	3 per week.
Montgomery and Wilson Marine Railway	4	a	16	3 per year.
Norton's Marina	(1)	a	38	2 or 3 per month during season.
Rappahannock Yachts Marina	6	a	25	0 (does not have slips for transient vessels).
Regent Point Marina	6	d	8	1 per month during season.
Tides Lodge Marina	6	b	29	Less than 15 during 1979 boating season.
Yankee Point Sailboat Marina	6	d	55	3 per week.
Urbanna Marine Corp. Marina	6	c	80	20 per week.[2]
Garrett's Marina	7	a	34	Less than 2 vessels per year.
Ruark's Boat Yard and Marina	8	d	45	1 per week.

[1] No information provided.

[2] Urbanna Marine Corp. sponsors weekend boating events; many of these vessels are trailered to the marina for these events.

a. Sanitary wastes pumped to septic tank, contents to be removed by septic tank contractor.

b. Sanitary wastes pumped to raw sewage pump station which discharges to Tides Golf Lodge Sewage treatment plant, NPDES permit No. VA0029343.

c. Sanitary wastes pumped into Town of Urbanna sewages system, NPDES permit No. VA0026263.

d. Sanitary wastes pumped to holding tank; contents of tank removed by septic tank contractor.

V 45 AUG 20 80 UMI

In addition, the Commonwealth has certified that there are an estimated 2298 vessel slips at marinas and other places where vessels are moored in the area covered by the petition and that all marina slips are filled to capacity year-round. On April 9, 1980, the Commonwealth stated that the estimate of 2298 boats was only an estimate of boats moored at marinas in the area and did not include all boats moored and stored at private locations in the area.

The Commonwealth has secured from the Virginia Commission of Game and Inland Fisheries (GIFC—the agency in Virginia charged with the responsibility of registering boats) a list of all boats registered in the four counties bordering the petition area. This list shows Lancaster County with 2424 boats registered, Middlesex County with 3313, Richmond, County with 702, and Essex County with 1076, for a total of 7515. In the case of Lancaster and Middlesex Counties, the number of boats includes numerous boats located in waters not included in the petition area, e.g., in the Piankatank River and other waters feeding directly into the Chesapeake Bay. The Commonwealth has no figures on how many boats are moored within the two counties but registered elsewhere. In order to estimate the number of boats moored in the area under petition, the Commonwealth has assumed that boats registered outside of these four counties but moored in waters under petition are approximately equal in number to boats registered in the four counties but moored outside of the waters under petition.

The Commonwealth has also certified the number of vessels over 20 feet in length and having a cabin. Lancaster had 417, Richmond had 49, Middlesex had 1011, and Essex had 74 for a Total of 1551. Of these 1551 boats, 1496 were classified as used for pleasure boating. Thus, a probable maximum total of approximately 1500 boats moored in the petition area could be equipped with marine toilets eventually. Best Commonwealth estimates show that 11.4% of the registered boats in Virginia have marine toilets. Applying this figure (11.4%) to the total number of boats registered in the petition area (7515), a total of only 857 boats would have marine toilets. Therefore, in the Commonwealth's opinion, this figure of 1500 watercraft with a marine toilet capability within the area under petition appears to be reasonable.

The Commonwealth has certified that the cost of a pumpout at four of the eleven marinas is five dollars ($5.00); Garrett's Marina and Montgomery and Wilson Marine Railway have increased the charge to ten dollars ($10.00). Costs of pumpout at the remaining five pumpout facilities has not been provided.

On March 11, 1980, the Agency noted that five commenters stated that there are no pumpout facilities at any of the numerous public boat ramps or dockages owned and/or operated by the Commonwealth. The Commonwealth did not dispute these statements. In the Commonwealth's opinion, the presence or absence or pumpout facilities at public boat ramps or dockages owned and/or operated by the Commonwealth is irrelevant to the granting or denial of this petition. The Commonwealth stated that representatives from the Virginia State Health Department recently visited all of the publicly-owned boat ramps within the area under petition, and with the exception of one, all were found to have such water depths that boats with flow-through marine toilets or holding tanks could not have been launched or could have been launched only with a great deal of difficulty. In the Commonwealth's opinion, there is little need to provide pumpout facilities at publicly-owned boat ramps. No further information was provided by the Commonwealth on the one exceptional boat ramp.

The Commonwealth has submitted certified inspections of the eleven pumpout facilities within the area covered by the petition that are fully and completely operational as follows:

(a) The Commonwealth has certified that the pumpout facility at Regent Point Marina consists of a 5-gallon plastic drum with a vented top, and a diaphragm hand pump capable of pumping sewage. A 5-foot length of 1½-inch O.D. (outside diameter) wire-inserted hose is attached to the suction side of the pump. A right-angle nozzle is attached to the end of the suction hose. The discharge line, a 1½-foot length of 1½-inch O.D. hose, is securely attached to the top of the 5-gallon drum and to the pump. The entire unit must be carried on board the vessel; the contents of the holding tanks are then pumped into the five-gallon drum. The collected waste is hand-carried approximately 300 feet to a 2000-gallon holding tank. The waste is then drained through a hose into the holding tank. A plastic, 6-inch diameter access port provides entrance to the holding tank, which is serviced by a septic tank contractor. The Commonwealth states that the owner prefers using a 5-gallon tank because he can carry it on board the sailboats rather than setting a large tank on his dock; he also can operate the unit alone. In the Commonwealth's opinion, a 5-gallon drum is adequate for this particular marina.

(b) The Commonwealth has certified that the pumpout facility at Tides Lodge Marina consists of a dock-mounted, electric ¾ HP motor with an attached, self-priming, impeller pump. The 10-foot suction line is a flexible 1½-O.D. wire-inserted hose with a right-angle nozzle. The discharge line is a 25 foot length of 1½-inch O.D. plastic pipe and leads to an ejector pump station. The contents are pumped from this station to another ejector pump station approximately 400 feet away. This station pumps about 0.25 mile to the Tides Lodge extended aeration package sewage treatment plant. In addition, the second pump station is backed up by three 1000-gallon holding tanks to insure against pump station failure.

(c) The Commonwealth has certified that the pumpout facility at Rappahannock Yachts is a 15-gallon plastic rectangular tank with dual handles attached at each end. Sewage is removed by a diaphragm hand pump. Approximately 10 feet of 1½-inch O.D. wire-inserted suction line and 2 feet of 1½-O.D. wire-inserted discharge lines are attached to the pump. A right-angle nozzle is installed at the end of the suction line and the unit must be carried out on the dock. The tank is hand-carried by two men approximately 120 feet and drained through a 2-foot length of 1¼-inch O.D. line into the owner's septic tank, which is serviced by a septic tank contractor.

(d) The Commonwealth has certified that the pumpout facilities at Yankee Point Sailboat Marina consist of a dock mounted, electric ¼ HP motor with an impeller pump. The 5-foot suction and 6-foot discharge hose are made up of 1½-inch O.D. wire-inserted hose and there is a right-angle nozzle attached to the end of the suction hose. Sewage is pumped approximately 200 feet to a 1000-gallon holding tank. Contents of the tank will be removed by a septic tank hauler.

(e) The Commonwealth has certified that the pumpout facility at Urbanna Marine Corporation Marina consists of a portable centrifugal pump with a gas engine to pump sewage from the boat to a 1000-gallon holding tank. The holding tank is then pumped into the Town of Urbanna's sewage treatment plant. The pump is hand carried out on the docks and then the suction and discharge 1½-inch O.D. lines are attached to the pump. A right-angle nozzle is attached to the end of the suction line.

(f) The Commonwealth has certified that the pumpout facility at Garrett's Marina consists of a 55-gallon steel drum mounted sidewise on a two-wheel trailer. An electric motor with a ¾-inch impeller pump is mounted on the trailer next to the drum. Twenty feet of 1½-inch O.D. wire-inserted suction hose and 2 feet of 1½-inch O.D. rubber discharge hose are attached to the pump. Boats are pumped out at a single dockside location. After servicing the boat(s), the trailer-mounted unit is towed by a tractor approximately ⅛ mile to one of four septic tanks located at the owner's private residence. Contents of the 55-gallon drum are then drained into one of the tanks through 20 feet of 1½-inch O.D. discharge line. A gate valve is provided on the pump discharge line into the 55-gallon drum to provide access for flush water or disinfectant.

(g) The Commonwealth has certified that the pumpout unit at Dozier's Dockyard Marina consists of a 22-gallon steel drum with a diaphragm-type hand pump mounted on the drum. One 10-foot length of 1½-inch O.D. non-kink hose is used for the suction line with a right-angle nozzle. The discharge line is a 1½-foot length of 1½-inch O.D. wire inserted hose, and the contents are emptied through a 1½-inch O.D. brass swing valve. The drum is securely mounted on a two-wheeled cart and then wheeled to a vessel moored at the dock. Wastes are then pumped from the boat and wheeled approximately 150 feet to the owner's 1,000-gallon holding tank. The drum is drained through a 2-foot length of 1½-inch O.D. hose through an access port to the holding tank, which will be serviced by a septic tank contractor.

(h) The Commonwealth has certified that the pumpout facility at Miller's Marine Railway consists of a 22-gallon plastic "travel-along" tank (as used in the recreational vehicle industry). It is attached by metal straps to a two-wheeled dolly and a diaphragm hand pump, and is capable of pumping sewage through a 2-foot length of 1½-inch O.D. wire-inserted discharge hose. The suction line is a 5-foot length of 1½-inch O.D. wire-inserted, flexible hose. The collected wastes are wheeled approximately 150 feet and emptied into a 1000-gallon septic tank. Access to the septic tank is through a 6-inch diameter VC pipe. Miller's Marine Railway tank will be serviced by a septic tank hauler.

(i) The Commonwealth has certified that the pumpout facility at Norton's Marina consists of a vented 55-gallon steel drum mounted on its side to a four-wheeled cart. A 1½ HP electric motor drives a 1¼-inch impeller pump. An 8-foot length of a 1½-inch O.D. wire-inserted, plastic suction hose with a right-angle nozzle is attached to the pump. The discharge hose is a 2-foot length of 1½-inch diameter cast iron pipe; it discharges into the top of the drum. The tank is hand pulled approximately 100 feet and drained through a 2-inch I.D. gate valve into a 6-inch diameter ABS plastic line into the owner's septic tank, which will be serviced by a septic tank contractor.

(j) The Commonwealth has certified that the pumpout facility at Walden Brothers' Marina consists of a 55-gallon steel drum mounted on its side on a four-wheeled wagon. A dockside pumpout unit (consisting of a ¾ HP electric motor impeller pump with a 10-foot wire-inserted, plastic suction hose, a right-angle nozzle, and an automatic shut-off vacuum switch) removes the sewage from boats. Discharge to the wagon mounted drum is through a 1-inch I.D. plastic hose. The drum is wheeled approximately 150 feet and drained into the Walden Brothers' Marina septic tank.

(k) The Commonwealth has certified that the pumpout facility at Montgomery and Wilson Marine Railway consists of a 30-gallon galvanized steel tank mounted sidewise on a two-wheel cart. A hand-operated diaphragm pump with six feet of 1½-inch I.D. suction line and eight feet of 1½-inch discharge line is attached. A right-angle nozzle is attached to the end of the suction line. The tank is wheeled approximately 150 feet and emptied into the Montgomery and Wilson Marine Railway 1000-gallon septic tank.

For facilities using septic tanks and holding tanks, the Commonwealth has certified that these tanks will be emptied by local septic tank contractors.

Finally, the Commonwealth presented a sampling of data from conversations with boat owners and marina operators in the State of Michigan during the Year 1973. The Commonwealth stated that Michigan boat owners reported that they usually pumped out their holding tanks (10 to 20 gallon capacity) two or three times per season; marina operators reported that the average time to pump out and flush a 10-gallon holding tank ranged from 5 minutes with a one-horsepower pump to 15 minutes with a hand pump; and operating reports suggested that peak pumpout demand would be about 10 vessels per day for a marina with 100 slips. The Commonwealth also stated that the owners of Rappahannock Yachts and Regent Point Marina estimated that it takes them about 30 minutes to move a pumpout unit to dockside, pump out an on-board holding tank, and transport the wastes to an on-shore septic tank. The Commonwealth then estimated the following times for various activities required in pumping out a holding tank:

	Minutes
(1) Time to moor vessel and/or bring pump-out unit to dock	5–15
(2) Time to remove contents	2–10
(3) Time to flush out tank	2–10
(4) Time to transport portable tank to on-shore holding tank, empty contents, and return	5–15
Total time	14–50
Average time	32

Upon examination of all the information submitted so far by the Commonwealth, the Agency has found that there are still deficiencies in the information. Many are similar in character to those listed in the Agency's March 11, notice.

(1) Some of the pumpout facilities on which the Commonwealth relies are not operational. The Commonwealth has certified that the Norview Marina had not yet installed a pumpout facility as of April 9, 1980. The Commonwealth also stated that the previously existing pumpout at the Urbanna Bridge Marina had been damaged by an automobile and had not been replaced. On June 4, 1980 the Commonwealth stated that the pumpout facility at the Urbanna Bridge Marina was not fully and completely operational as of April 9, 1980.

In addition, the Commonwealth's petition of April 9, 1980, stated that Windmill Point Marina, Southside Marine Service, Inc., and Whelan's Marina and Campground will install pumpout facilities and that these facilities will be operational during the 1980 boating season. To the best of the Agency's knowledge, these three facilities are still not operational. Until certified by the Commonwealth to be fully and completely operational, no pumpout facility can be considered in any determination pursuant to section 312(f)(3) of the Clean Water Act.

(2) The Commonwealth has stated in inspection reports that several certified pumpout facilities (Yankee Point Sailboat Marina, Tides Lodge Marina, Walden Brothers' Marina, and Norton's Marina) will not service transient vessels. This appears to conflict with the data provided by the Commonwealth

and summarized in Table 2, and suggests that all transient traffice must be serviced at other marinas.

In addition, the Commonwealth has certifed that Norton's Marina moored 38 vessels; however, the minimum water depth at mean low water was not provided by the Commonwealth. A signed, sworn, and notarized statement submitted on behalf of the owner of Norton's Marina reveals that there were 78 vessels moored and that the available minimum water depth at mean low water was 9 feet. The Commonwealth has certified that the available minimum water depth at mean low water for Montgomery and Wilson Marine Railway was 4 feet and that there were 16 vessels moored at the Marina. A signed, sworn, and notarized statement submitted on behalf of the owner reveals that the available minimum water depth at mean low water was 6 feet and that there were 53 vessels moored at the Marine Railway.

(3) The Commonwealth has acknowledged that there are no pumpout facilities within the area covered by the petition to serve the grain barges and tugs that load at the grain-storage facility owned by Perdue, Inc., at Tappanhannock, Virginia, which is within the area covered by the petition. This facility has a storage capacity of 2,150,000 bushels of beans, corn, wheat, and barley. The Commonwealth states that about 40 barge-loads are shipped from the facility each year. The facility is serviced by one tugboat with a draft of 9½ feet when fully fueled, and two barges with a draft of 10½ feet when loaded. Only one barge is used per trip. In the fall of 1979, approximately 45 to 50 loaded barges were shipped down the Rappahannock River from the Perdue, Inc. facility at Tappahannock.

The Commonwealth has certified that the tugboat is equipped with a Model M–50, Type II Microphor MSD. This is a five-man unit fitted with sump tank (effluent retention tank) and discharge pump. The barges have no sanitary facilities. On rare occasions, Perdue, Inc. of Tappahannock consigns several loads of grain to Cargill, Inc. of Chesapeake, Virginia. These grain consignments are barge-loaded at Tappahannock and transported by the Allied Towing Company of Norfolk. All Allied tugboats operating out of Norfolk are equipped with Type II Microphor MSD's.

The Commonwealth has stated that if its petition is granted, tugboats operating at Perdue, Inc. will have to "secure" the marine toilet while operating in the no discharge area. Apparently, the Commonwealth expects that these tugboats will not have any functioning toilet facilities for their crews while in the no discharge area. Section 312, however, requires that pumpout facilities be reasonably available for all vessels. The Commonwealth does not state why it believes that this would not require denial of the petition.

On the other hand, Virginia has described the tugboat that normally services Perdue, Inc. as having both a Type II MSD and an effluent retention tank and discharge pump. If the tugboat were capable of retaining its sewage or treated effluent for a period of time and then discharging treated effluent, it might not require a pumpout facility in the area described in the petition.

(4) The Commonwealth acknowledges that Ruark's Boat Yard and Marina is 9 nautical miles beyond the mouth of the Rappahannock River, and thus 9 nautical miles from the area covered by the petition. This is a significant distance; the Agency stated on March 11, 1980 that the facility is not "reasonably available" to the area covered by the petition. The Commonwealth has provided no additional justification for its consideration with the petition.

(5) Finally for all facilities, the Commonwealth has stated that, in its opinion, the facilities are adequate for the peak usage expected at the facility. However, the Commonwealth provides scant analysis on which it might have based its opinion. The Agency must reach its own decision on the adequacy and availability of facilities, on the basis of information submitted.

The agency has requested the Commonwealth to submit further information by September 1, 1980 addressing the questions raised above, other questions raised in the public comments, and detailed calculations of the likely demands on and capacity of the 11 pumpout facilities. The Commonwealth's submittal will be made available for public inspection and comment. If the Commonwealth's clarification does not demonstrate that adequate facilities are reasonably available for the safe and sanitary removal and treatment of sewage from all vessels, the Agency will deny the Commonwealth's petition on its merits.

Dated: August 14, 1980.

Eckardt C. Beck,

Assistant Administrator for Water and Waste Management.

BILLING CODE 6560-01-M

FEDERAL COMMUNICATIONS COMMISSION

[PR Docket No. 80-506, File No. 014155-IB-40 and PR Docket No. 80-507, File No. 014176-IB-40**]**

Bob Bobbitt Co., Inc., and Porter Lighting Fixture Co., Inc.; Designating Applications for Consolidated Hearing on Stated Issues

Memorandum Opinion and Order

Adopted: August 12, 1980.

Released: August 18, 1980.

In re Applications of Bob Bobbitt Co., Inc., 15800 Addison Road, P.O. Box 141, Addison, Texas 75248, and Porter Lighting Fixture Co., Inc., 12331 North Central Expressway, Dallas, Texas 75243, For Authorizations for New Facilities in the Business Radio Service.

By the Chief, Private Radio Bureau.

1. The Chief, Private Radio Bureau (the Bureau) has before him for consideration the above-captioned applications of Bob Bobbitt Co., Inc. (Bobbitt) and Porter Lighting Fixture Co., Inc. (Porter) for authorization of new facilities in the Business Radio Service. Bobbitt's application, initially filed April 9, 1980, was returned as defective May 16, 1980. It was resubmitted June 3, 1980. Porter's application, also initially filed April 9, 1980, was returned as defective May 20, 1980. It, too, was resubmitted June 3, 1980. Also before the Bureau is information concerning an investigation conducted by the Dallas, Texas District Office of the Commission's Field Operations Bureau into unlicensed operation by Bobbitt and Porter of the radio facilities proposed in their respective applications.

2. Bobbitt and Porter each seeks authorization of 800 MHz band conventional control and mobile stations to operate in conjunction with Specialized Mobile Relay Station WYQ504 licensed to Benjamin L. Farris d/b/a Golden Circle Communications in Richardson, Texas. It appears from the Dallas office's investigation that on or about March 31–April 1, 1980, Farris furnished radio equipment to both Bobbitt and Porter and permitted them to operate that equipment through Farris' Station WYQ504. It also appears that both Bobbitt and Porter operated the radio equipment provided to them by Farris until April 9, 1980, the date when the Dallas office commenced its investigation and when the applications were first received at the Commission.

3. The information before the Bureau concerning the unlicensed operation by Bobbitt and Porter raises serious questions as to whether Bobbitt or Porter possess the requisite character qualifications or is sufficiently competent or shows sufficient interest with respect to the licensing and implementation of radio facilities to receive a grant of the authorization which each here seeks. Because the Bureau cannot make the necessary finding, pursuant to Section 309(a) of the Communications Act of 1934, as amended, that a grant of the above-referenced applications would serve the public interest, convenience and necessity, the applications must, in accordance with Section 309(e) of the Act, be designated for hearing.

4. Accordingly, it is ordered, that in accordance with the provisions of Section 309(e) of the Communications Act of 1934, as amended (47 U.S.C. 309(e)), the above-captioned applications of Bob Bobbitt Co., Inc., File No. 014155–IB–40**, and Porter Lighting Fixture Co., Inc., File No. 014176–IB–40**, for authorization of new facilities in the Business Radio Service are, pursuant to authority delegated in Sections 0.131(a) and 0.331 of the Commission's Rules, designated for a hearing in a consolidated proceeding, at a time and place to be specified at a later date, on the following issues:

(a) To determine whether Bob Bobbitt Co., Inc. operated radio facilities in the Business Radio Service which were not licensed to it.

(b) To determine whether Porter Lighting Fixture Co., Inc. operated radio facilities in the Business Radio Service which were not licensed to it.

(c) To determine whether any unlicensed operation by Bob Bobbitt Co., Inc. was knowing or willful or negligent.

(d) To determine whether any unlicensed operation by Porter Lighting Fixture Co., Inc. was knowing or willful or negligent.

(e) To determine, in light of the evidence adduced pursuant to issues (a) and (c) hereinabove, whether Bob Bobbitt Co., Inc. possesses the requisite character qualifications to receive a grant of its application which is in part the subject of this proceeding.

(f) To determine, in light of the evidence adduced pursuant to issues (b) and (d) hereinabove, whether Porter Lighting Fixture Co., Inc. possesses the requisite character qualifications to receive a grant of its application which is in part the subject of this proceeding.

(g) To determine, in light of the evidence adduced pursuant to issues (a) and (c) hereinabove, whether Bob Bobbitt Co., Inc. has exhibited such lack of interest or carelessness concerning conduct of its affairs with respect to the licensing and implementation of radio facilities that it should not be entrusted with the radio authorization which it is here seeking.

(h) To determine, in light of the evidence adduced pursuant to issues (b) and (d) hereinabove, whether Porter Lighting Fixture Co., Inc. has exhibited such lack of interest or carelessness concerning conduct of its affairs with respect to the licensing and implementation of radio facilities that it should not be entrusted with the radio authorization which it is here seeking.

(i) To determine, in light of the evidence adduced pursuant to issues (a), (c), (e) and (g) hereinabove, what disposition of the above-captioned application of Bob Bobbitt Co., Inc. will best serve the public interest, convenience and necessity.

(j) To determine, in light of the evidence adduced pursuant to issues (b), (d), (f) and (h) hereinabove, what disposition of the above-captioned application of Porter Lighting Fixture Co., Inc. will best serve the public interest, convenience and necessity.

5. It is further ordered, that Bob Bobbitt Co., Inc., Porter Lighting Fixture Co., Inc. and the Chief, Private Radio Bureauy are made parties in this proceeding.

6. It is further ordered, that the burden of proceeding with the introduction of evidence and the burden of proof are, pursuant to Section 309(e) of the Communications Act of 1934, as amended (47 U.S.C. 309(e)), and Sections 1.254 and 1.973(e) of the Commission's Rules, upon Bob Bobbitt Co., Inc. with respect to issues (a), (c), (e), (g) and (i) set forth in paragraph 4 hereinabove, and upon Porter Lighting Fixture Co., Inc. with respect to issues (b), (d), (f), (h) and (j) set forth in paragraph 4 hereinabove.

7. It is further ordered, that each of the parties named in paragraph 5 hereinabove, in order to avail itself of the opportunity to be heard, shall within 20 days of the mailing of this notice of designation by the Secretary of the Commission, file with the Commission, in triplicate, a written notice of appearance that it will appear on the date fixed for hearing and present evidence on the issues specified in this Order, as prescribed in Section 1.221 of the Commission's Rules.

8. It is further ordered, that the Secretary of the Commission shall serve a copy of this Order, by Certified Mail, Return Receipt Requested, upon each of the parties to this proceeding (except the Bureau) at the address furnished in its respective application.

Federal Communications Commission.

Arlan K. van Doorn,

Acting Chief, Private Radio Bureau.

[FR Doc. 80-25283 Filed 8-19-80; 8:45 am]

BILLING CODE 6712-01-M

FEDERAL MARITIME COMMISSION

[Agreement No. T-3918]

Availability of Finding of No Significant Impact

Upon completion of an environmental assessment, the Federal Maritime Commission's Office of Environmental Analysis (OEA) has determined that the environmental issues relative to the referenced agreement do not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.* and that preparation of an environmental impact statement is not required under section 4332(2)(c) of NEPA.

Agreement No. T–3918 is a one-year lease between the Port Everglades Authority and Sea-Land Service, Inc. for a vacant lot in Broward County, Florida. The lot is to be used in the handling and processing of containers and related equipment. The OEA's major environmental concern was whether the agreement would significantly affect energy usage and/or the quality of the air, water, noise and biological environment.

The OEA has determined that the Commission's final resolution of Agreement No. T–3918 will cause no significant adverse environmental effects in excess of those created by existing uses.

The environmental assessment is available for inspection on request from the Office of the Secretary, Room 11101, Federal Maritime Commission, Washington, D.C. 20573, telephone (202) 523–5725. Interested parties may comment on the environmental assessment on or before September 9, 1980. Such comments are to be filed with the Secretary, Federal Maritime Commission, 1100 L Street, N.W., Washington, D.C. 20573. If a party fails to comment within this period, it will be presumed that the party has no comment to make.

Joseph C. Polking,

Assistant Secretary.

[FR Doc. 80-25284 Filed 8-19-80; 8:45 am]

BILLING CODE 6730-01-M

[Docket No. 80-52; Agreements Nos. 10186,

Written comments on the proposed

or special nuclear material at an

quantities of nuclear material received,

the form of samples containing less than

affected by this requirement annually

[Docket No. 80-52; Agreements Nos. 10186, As Amended, 10332, As Amended, and 10371, As Amended, Agreement No. 10377, Agreements Nos. 10364 and 10329]

Intent To Prepare an Energy and Environmental Assessment

Docket No. 80-52 is an investigation to determine whether Agreements Nos. 10186, as amended, 10332, as amended, 10371, as amended and 10377 should be approved, disapproved or modified and whether Agreements Nos. 10364 and 10329 should be disapproved or modified, pursuant to section 15 of the Shipping Act, 1916.

The Office of Environmental Analysis believes that the final resolution of the issues in this proceeding may constitute a major regulatory action affecting energy efficiency or conservation within the meaning of the Energy Policy and Conservation Act of 1975 and a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

Written comments regarding the possible energy and environmental impacts are invited. Such comments should be submitted on or before September 9, 1980, to the Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, D.C. 20573.

Copies of discovery materials and all future correspondence, pleadings and exhibits exchanged or filed in these proceedings will be served on Chief, Office of Environmental Analysis, Federal Maritime Commission, 1100 L Street, NW., Washington, D.C. 20573.

Joseph C. Polking,

Assistant Secretary.

[FR Doc. 80-25308 Filed 8-19-80; 8:45 am]

BILLING CODE 6730-01-M

GENERAL ACCOUNTING OFFICE

Regulatory Reports Review; Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were accepted by the Regulatory Reports Review Staff, GAO, on August 11 and August 12, 1980. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the **Federal Register** is to inform the public of such acceptances.

The notice includes the title of the NRC requests received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed NRC requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before September 8, 1980, and should be addressed to Mr. John M. Lovelady Senior Group Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street, NW., Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

Nuclear Regulatory Commission

The NRC requests clearance of application, recordkeeping, and reporting requirements contained in new 10 CFR Part 75, Safeguards on Nuclear Materials—Implementation of US/IAEA Agreement. The United States, as a party to the Treaty on the Non-Proliferation of Nuclear Weapons (NPT), has joined with other nations in an effort to limit the spread of nuclear weapons. To encourage wide-spread adherence to the NPT by non-nuclear weapon States, which would be committed to accept the application of safeguards administered by the International Atomic Energy Agency (IAEA), President Lyndon B. Johnson in 1967 announced that the United States would permit IAEA to apply its safeguards to nuclear activities in this country—excluding only those with direct national security significance. This policy has been reaffirmed by each succeeding President and has been referred to by other Governments as a consideration affecting their decision to ratify the NPT.

The instrument for applying IAEA safeguards in the United States is a formal Agreement. The US/IAEA Agreement contains provisions which parallel agreements between IAEA and non-nuclear-weapons States, the principal difference being the exclusion of national security activities. Implementation of the Agreement requires the cooperation of NRC licensees, in accordance with new 10 CFR Parts 40, 50, 70, 150 and 170. 10 CFR Part 75 establishes a system of nuclear material accounting and control to implement (with respect to NRC and Agreement State licensees) the Agreement between the United States and the IAEA for the application of safeguards in the United States.

The requirements in Part 75 apply to all persons licensed by the Commission or Agreement States to possess source or special nuclear material at an installation specified on the United States eligible list. The requirements of Part 75 also apply to holders of construction permits and to persons who intend to receive source material or special nuclear material. The United States eligible list is a list of installations eligible for IAEA safeguards under the US/IAEA Safeguards Agreement which the Secretary of State or his designee files with the Commission. Excluded from the list are activities having direct national security significance and activities dealing with mining and ore processing.

These proposed implementing regulations identify provisions requiring licensees: (1) To submit information concerning their installation for the use of IAEA; (2) to establish, maintain, and follow prescribed material accounting and control procedures; (3) to provide reports; and (4) to permit inspections by IAEA representatives.

For NRC to implement its responsibilities, it is necessary for licensees affected by the new 10 CFR Part 75 to maintain records and submit reports as follows: Section 75.3(a) states that the NRC may, upon application of any interested person or upon its own initiative, grant exemptions from the requirements of the part. Section 75.11(a) provides that each licensee subject to the requirements of the Part must submit to the NRC in response to and within the period, which shall be at least 45 days, specified in a written request from the NRC, specific information with respect to any installation in which the licensee carries out licensed activities. The information required is listed in the section. Section 75.11(b) provides that each licensee shall submit to the NRC information with respect to any modification or change at the installation affecting the information described in § 75.11(a). Section 75.12(b)(1) provides that a licensee may request that information of particular sensitivity, which it customarily holds in confidence, not be transmitted physically to the IAEA. Section 75.14(a) provides that at the time information is submitted in accordance with § 75.11, and promptly whenever changes are made, each licensee subject to the provisions of Part 75 shall submit to the NRC information on organizational responsibility for material accounting and control and health and safety rules to be observed by the Agency inspectors at the installation. Section 75.21, Material Accounting and Control, general requirements are: A measurement system for the determination of the quantities of nuclear material received, produced, shipped, lost or otherwise removed from the inventory, and the quantities on inventory; the evaluation of precision and accuracy of measurements and the estimation of measurement uncertainty; procedures for identifying, reviewing and evaluating differences in shipper/receiver measurements; procedures for the evaluation of accumulations of unmeasured inventory and unmeasured losses; and maintenance of accounting and operating records; and also procedures, including frequency, for taking a physical inventory. Section 75.32 provides that the initial report shall be reported on the last day of the calendar month in which the NRC gives the licensee notice that an initial report is required. The report is to be submitted on DOE/NRC-742 within 20 days after the initial reporting date. Section 75.34 provides that inventory change reports are to be submitted on Form DOE/NRC-741 which serves as a shipping and transfer document for special nuclear material, source material and tritium as required of NRC and Agreement State licensees. Section 75.35 provides that material balance reports are to be submitted on Form DOE/NRC-742 in accordance with printed instructions for completing the form. Section 75.43(b) provides that notification shall be given of any proposed shipment of nuclear material for peaceful purposes under an export license issued pursuant to Part 110, in an amount exceeding one effective kilogram, directly or indirectly to any non-nuclear-weapon state (as referred to in Article III(2) of the Treaty on the Non-Proliferation of Nuclear Weapons, 21 U.S.T. 483). If the licensee anticipates that it will make two or more shipments for peaceful purposes within any period of 90 days, directly or indirectly to destinations in the same non-nuclear-weapon state, notification shall be given of each shipment if the aggregate quantity of nuclear material to be transferred exceeds one effective kilogram. Section 75.43(c)(2) provides that notification shall be given with respect to any proposed import of nuclear material described in paragraph (c)(1) of this section in an amount exceeding one effective kilogram. If a licensee anticipates that it will receive two or more shipments of such nuclear material within any 90-day period from points of origin in the same country, notification shall be given with respect to each shipment if the quantity exceeds one effective kilogram. Section 74.43(d) provides that notification shall be given with respect to any shipments of nuclear material (other than small quantities in the form of samples containing less than 0.01 effective kilogram per sample) to a non-eligible destination (i.e., any destination in the U.S. other than an installation on the U.S. eligible list). The NRC estimates that the average annual burden per licensee will be as follows: Section 75.3(a), 8 hours; § 75.11(a), 360 hours; § 75.11(b), 8 hours; § 75.12(b)(1), 4 hours; § 75.14(a), 10 hours and 2 hours; § 75.21, 425 hours; § 75.32, 1 hour; § 75.34, 250 hours; § 75.35, 1 hour; § 75.43(b), 1 hour and 1 hour; § 75.43(c) 1 hour and 1 hour; and § 75.43(d), 1 hour.

The NRC requests clearance of a new Form N-71, Design Information Questionnaire. The NRC through Part 75 (specifically section 75.11) and conforming amendments to Parts 30, 40, 50, 70, 150 and 170 of its regulations will require its licensees to submit data on Form N-71 developed by the International Atomic Energy Agency to provide confidential information. The NRC will be a recipient of the form; however, the primary user of the data collected will be the International Atomic Energy Agency (IAEA). The NRC estimates approximately 200 licensees will be required to complete and submit a Design Information Questionnaire, Form N-71, as a one-time only requirement and that time to complete the Questionnaire will require 360 hours per licensee.

The NRC requests clearance for the application requirement contained in new § 40.31(g) of 10 CFR Part 40, Domestic Licensing of Source Material. This new application requirement implements part of the US/IAEA Agreement program. Section 40.31(g) requires that an applicant for a license to possess and use source material in a uranium hexaflouride production plant or a fuel fabrication plant and any other applicant for a license to possess and use more than one effective kilogram of source material should file with NRC the identificaion of the installation; a description of the general design of the installation in reference to flow of nuclear material; a description of features of the installation relating to material accounting, containment and surveillance; and a description of the existing and proposed procedures of the installation for nuclear material accounting and control. This information should be filed at least nine months prior to the date the applicant desires to receive the source material (or earlier upon request by the Commission). The NRC will grant an exemption from these requirements if it determines that the installation will not be included on the United States eligible list. The NRC estimates that 15 applicants will be affected by this requirement annually and that the burden per applicant will average 360 hours.

The NRC requests clearance for the reporting requirement contained in new § 50.78 of 10 CFR Part 50, Domestic Licensing of Production and Utilization Facilities. This new reporting requirement implements part of the US/IAEA Agreement program. Section 50.78 requires that each holder of a construction permit shall, if requested by the Commission, submit installation information and permit verification thereof by the International Atomic Energy Agency (IAEA), and take such other action as may be necessary to implement the Safeguards Agreement, in the manner set forth in §§ 75.6 and 75.11 thru 75.14 of the Commission's regulations. If the holder of the construction permit is a nuclear power plant or a non-power reactor, the information should be submitted to the Director, Office of Nuclear Reactor Regulation. For all other installations, the Director, Office of Nuclear Material Safety and Safeguards. The NRC estimates that 150 licensees will be affected by this reporting requirement and that burden per licensee will average 360 hours.

The NRC requests clearance for the application requirement contained in new § 70.21(g) of 10 CFR Part 70, Domestic licensing of Special Nuclear Material. This new application requirement implements part of the US/IAEA Agreement program. Section 70.21(g) requires that an applicant for a license to possess and use more than one effective kilogram of special nuclear material should file with the NRC the installation information described in § 75.11; and the applicant shall permit verification by the International Atomic Energy Agency and take such other action as may be necessary to implement the US/IAEA Safeguards Agreement, in the manner set forth in §§ 75.6 and 75.11 thru 75.14. The commission will grant an exemption from the requirements of § 70.21(g), upon application if it determines that the installation will not be included on the United States eligible list. The installation information should be filed at least 9 months prior to the date when the applicant desires to receive the special nuclear material (or earlier upon request by the Commission). Applicants who desire to receive the special nuclear material within 9 months after the effective date of this paragraph should submit the installation information as soon as possible. The NRC estimates that this application requirement will affect 35 applicants

annually and that the burden per applicant will average 360 hours.

The NRC requests clearance of the application requirement contained in new § 150.17a(b) of 10 CFR Part 150, Exemptions and Continued Regulatory Authority in Agreement States Under Section 274. This new application requirement implements part of the US/IAEA Agreement program. Section 150.17a(b) requires that an applicant for a license from an agreement state authorizing the possession of source material in amounts greater than one effective kilogram (except in ore processing) shall file with the Commission, at least 9 months prior to the date when the applicant desires to receive such source material or earlier upon request by the Commission, the installation information described in § 75.11, except that in the case of applicants who desire to receive the source material within 9 months after the effective date of this section, the installation information shall be submitted as soon as possible and the applicant shall permit verification by the International Atomic Energy Agency and take such other action as may be necessary to implement the US/IAEA Safeguards Agreement, in the manner set forth in §§ 75.6 and 75.11 thru 75.14. The Commission will grant an exemption from this requirement upon application, if it determines that the installation will not be included on the United States eligible list.The NRC estimates that number of applicants affected annually will be approximately 154 and the average burden per applicant will be 360 hours.

The NRC requests clearance of new Form 740M, Concise Note. The NRC in accordance with 10 CFR Parts 30, 40, 50, 70, 75 and 150 will require certain licensees who are authorized to possess at any one time and location Special Nuclear Material (SNM) to report to the NRC some discrete data. This will be done by the use of DOE/NRC Form 740M. In some cases it may be desirable to provide additional explanatory information with reports filed on DOE/NRC Forms 741, 742 or 742C, Form 740M is the vehicle to be used to submit a Concise Note. The NRC estimates approximately 200 licensees are expected to submit two reports per year and that the preparation burden for a report will average 15 minutes.

The NRC requests clearance of revision of Form 741/741A, Nuclear Material Transaction Report. The NRC in accordance with 10 CFR Parts 30, 40, 50, 70, 75 and 150 will require certain licensees who are authorized to possess at any one time and location Special Nuclear Material (SNM) to report to the NRC all nuclear material transactions. This will be done by the use of DOE/NRC Form 741/741A. The revision is five new data elements: (1) Concise Note attached to indicate if a DOE/NRC Form 740M is attached as may be required by the Facility Attachment; (2) type of inventory changes—all changes to inventory that meet the reporting criteria must be reported using a code; (3) production code (for DOE use only); (4) key measurement point, used for reporting a location where nuclear material appears in such form that it may be measured to determine material flow or inventory; and (5) measurement identification, this code indicates where and when the material was measured and consists of three parts denoting the measurement basis, measurement point, if other than (3) above, and the measurement method. The last two items apply only to licensees reporting under the requirements in 10 CFR Part 75. The NRC estimates approximately 2,000 licensees will be required to file Form 741/741A and that burden for preparation of each report will average 40 minutes.

The NRC requests clearance of revision of Form 742, Material Balance Report. The NRC in accordance with 10 CFR Parts 30, 40, 50, 70, 75 and 150 will require certain licensees who are authorized to possess at any one time and location Special Nuclear Material (SNM) in a quantity totaling more than 350 grams of contained uranium 235, uranium 233, or plutonium, to report SNM received, produced, possessed, transferred, consumed, disposed of or lost on Form 742. The revision to Form DOE/NRC 742 is five new data elements: (1) DOE/NRC 740M attached, indicates whether a Concise Note is attached; (2) From Other Materials, indicates increases resulting from the introduction of another material into the material balance being reported; (3) Degradation of Other Materials, indicates decreases resulting from the introduction of other material into the material balance being reported or the amount of radioactive decay; (4) Inventory Difference, formerly Material Unaccounted For; and (5) Bias Adjustment, quantity of material which should be added to or subtracted from the inventory difference quantity in Item 77 to produce the best estimate of an unbiased inventory difference. The NRC estimates approximately 300 licenses will be required to file Form 742 and that the burden will average 20 minutes per report.

The NRC requests clearance of a new Form DOE/NRC 742C, Physical Inventory Listing. The NRC in accordance with 10 CFR Parts 30, 40, 50, 70, 75 and 150 will require certain licensees who are authorized to possess at any one time and location Special Nuclear Material (SNM) to report such physical inventory on Form 742C. The form 742C is required to be completed and attached to each Material Balance Report submitted. The Form 742C lists by batch name and other identifying data, all nuclear material on hand at the time of the physical inventory. The NRC estimates that approximately 207 licensees will be required to file Form 742C two times per year and that the burden for preparation of each report will average 8 hours.

The NRC requests clearance of a new, single-time, voluntary survey on release of radioactive material into the environment. The survey will collect data from licensees (medical, research and academic institutions) on their total release of radioactive materials to air and sanitary sewage systems for the year 1979. In order to implement the National Environmental Policy Act (NEPA) NRC is considering revising 10 CFR Part 51 (see Proposed Rule, Federal Register, March 3, 1980) to require the preparation of environmental reassessments for actions previously excluded from NEPA review (i.e., certain material licensee issuances). The data will be used to document the magnitude of releases of radioactive material from licensees and thus aid in NRC's determination of the types of material licenses for which categorical exclusions from environmental assessment might be established. The NRC estimates that respondents will number approximately 2,500 and that reporting burden will average 30 minutes per survey questionnaire prepared.

Norman F. Heyl,

Regulatory Reports Review Officer.

BILLING CODE 1610-01-M

DEPARTMENT OF THE INTERIOR

Bureau of the Land Management

[INT DES 80-52]

Alaska Outer Continental Shelf Oil and Gas Lease Sale; Availability of Draft Environmental Statement and Locations and Dates of Public Hearings Regarding Proposed Oil and Gas Lease Sale No. 60

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Bureau of Land Management has prepared a draft environmental statement relating to a proposed Outer Continental Shelf (OCS) oil and gas lease sale of 153 tracts consisting of 349,917 hectares (864,646 acres) of submerged Federal land in the Lower Cook Inlet/Shelikof Strait Region of Alaska.

Single copies of the draft environmental statement can be obtained from the Office of the Manager, Alaska Outer Continental Shelf Office, Bureau of Land Management, P.O. Box 1159, Anchorage, Alaska 99510 and from the Office of Public Affairs, Bureau of Land Management (130), Washington, D.C. 20240. Copies of the draft statement will also be available for review in the following public libraries in Alaska: Alaska Federation of Natives, 670 W. Fireweed Lane, Anchorage 99501; Department of Interior, Alaska Resources Library, 733 W. 4th Avenue, Anchorage 99501; Kenai Community Library, Box 157, Kenai 99611; North Star Borough Library, Fairbanks 99701; University of Alaska, Institute of Economics and Government Research Library, Fairbanks 99801; Z. J. Loussac Public Library, 427 F Street, Anchorage 99501; Alaska State Library, Juneau 99811; Bureau of Indian Affairs School Library, Elim 99739; Department of Defense, Army Corps of Engineers Library, Anchorage 99510; Department of Interior—Bureau of Mines Library, AF—F.O. Center, P.O. Box 550, Juneau 99802; Ketchikan 99901; Seldovia Public Library, Seldovia 99663; University of Alaska—Juneau Library, P.O. Box 1447, Juneau 99802; Anchor Point Public Library, Anchor Point 99556; Cordova Public Libraruy, Cordova 99574; Elim Learning Center, Elim 99739; Haines Public Library, Haines 99827; Homer Public Library, Homer 99603; Juneau Memorial Library, Douglas Public Library, 114 W 4th Street, Juneau 99824; Ketchikan Public Library, 629 Dock Street, Ketchikan 99901; Kodiak Public Library Association, Inc., Kodiak 99615; Metlakatla Extension Center, Metlakatla 99926; Petersburg Extension Center, Petersburg 99833; Seward Community Library, Seward 99664; Sitka Community Library, Sitka 99835; University of Alaska—Anchorage Library, 3211 Providence Drive, Anchorage 99504; University of Alaska, Elmer E. Rasmusson Library, Fairbanks 99701; Wrangell Extension Center, Wrangell 99929.

In accordance with 43 CFR 3314.1, public hearings on the draft statment have been scheduled as follows:

October 14, 1980, Elks Hall, Homer, Alaska, 3:00 p.m. to 9:00 p.m.

October 15, 1980, Borough Assembly Chambers, Kodiak, Alaska, 1:00 p.m. to 9:00 p.m.

October 16, 1980, Alaska OCS Office, Conference Room, Anchorage, Alaska, 10:00 a.m. to 4:00 p.m.

The hearings will provide the Secretary of the Interior with information from government agencies, public and private groups and individual citizens, to help evaluate the potential effects of the proposed offering. Comments are solicited concerning effects of exploration, development and production resulting from the proposed sale on marine, cultural, recreational and other resources of the Cook Inlet/Shelikof Strait Region.

Interested individuals, representatives of organizations, and public officials wishing to testify at the public hearing are requested to contact the Manager, Alaska Outer Continental Shelf Office, Bureau of Land Management, at the above address by 4:00 p.m., October 7, 1980. Written comments from those unable to attend the hearing also should be addressed to the Manager, Alaska Outer Continental Shelf, Bureau of Land Management at the above address. The Bureau will accept written testimony and comments on the draft evironmental statement until 4:00 p.m., October 24, 1980. This will allow those unable to testify at the hearing to make their views known, and those presenting oral testimony to submit supplemental materials. Oral statements should be limited to ten (10) minutes unless prior arrangements for longer presentations are made through the Alaska OCS Office. Oral statments may be supplemented, however, by a more complete written statement which may be submitted to a hearing official at the time of the presentation or by mail to be received at any time prior to 4:00 p.m., October 24, 1980. To the extent that time is available after presentation of oral statement by those who have given advance notice, others present will be given an opportunity to be heard.

After all testimony and comments have been received and considered, a final environmental statement will be prepared.

Arnold E. Petty,

Acting Associate Director, Bureau of Land Management.

Approved:

James H. Rathlesberger,

Special Assistant to Assistant Secretary of the Interior.

Bureau of Land Management

Multiple Use Advisory Council Meeting

Notice is hereby given, in accordance with Pub. L. 94-579 and 43 CFR Part 1780, that a meeting of the Prineville District Multiple Use Advisory Council will be held on Thursday, Sept. 25, 1980 at 10 a.m., at the Bureau of Land Management Office, 185 E. 4th St., Prineville, OR 97754.

Agenda for the meeting will include:

1. Introduction and biographical sketch of members;
2. Discussion of the function of the Council;
3. Briefing and discussion of Prineville District programs by resource areas, to include, but not be limited to the Wilderness Study Area Proposals, the Brothers Environmental Statement and land use planning;
4. Current sensitive issues;
5. Election of Chairperson and Vice Chairperson;
6. Establishment of committees;
7. Arrangements for next meeting.

The meeting is open to the public. Interested persons may make oral statements to the Council between 11:30 a.m. and 12 noon, or file written statements for the Council's consideration. Anyone wishing to make an oral statement must notify the District Manager at the above address by Sept. 19, 1980. Depending on the number of persons wishing to make an oral statement, a per person time limit may be established.

Summary minutes of the meeting will be maintained in the District Office and be available for public inspection and reproduction (during regular business hours) within thirty days following the meeting.

Paul W. Arrasmith,

District Manager.

August 10, 1980.

BILLING CODE 4310-84-M

[Wyoming 55322]

Wyoming; Order Providing for Opening of Public Lands

August 12, 1980.

1. In an exchange of lands made under the provisions of section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716 (1976), the following described lands have been reconveyed to the United States:

Sixth Principal Meridian, Wyoming

T. 36 N., R. 110 W.
Sec. 18, E½SW¼SE¼,
Except those lands conveyed by Warranty Deed to the Wyoming State Highway Commission recorded at page 225 of book 16 of deed records, Sublette County, Wyoming.

The area described aggregates 17.62 acres.

2. The lands are located in Sublette County, about 10 miles north of the town of Cora. The topography is rolling foothills. Soils are fair and presently supports sagebrush and some forage production.

3. At 10 a.m. on September 22, 1980 the lands shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable laws. All valid applications received at or prior to 10 a.m. on September 22, 1980, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

The lands have been and will continue to be open to the U.S. Mining Laws and applications and offers under the mineral leasing laws.

Inquiries concerning the land should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Cheyenne, Wyoming 82001.

Harold G. Stinchcomb,
Chief, Branch of Lands and Minerals Operations

BILLING CODE 4310-84-M

Baker District Advisory Council; Meeting

Notice is hereby given that the Baker District Advisory Council will convene its first meeting at 9:00 a.m., Tuesday, September 16, 1980, in the Conference Room on the second floor of the Federal Building, Baker, Oregon.

The egenda for the meeting includes: Elect a Chairperson and Vice Chairperson; review purpose, objectives and functions of the Council; adopt rules of Council procedure; review BLM's mission and responsibilities; review status of the Ironside Grazing Environmental Impact Statement and Baker Resource Area Management Framework Plan; review the Bureau's Wilderness program and ORV land use designations.

The second meeting will be held on October 16, 1980, beginning at 7:00 a.m. and will consist of a field tour to look at and discuss specific management issues within the Baker Resource Area. The Ironside Environmental Impact Statement and Baker Management Framework Plan will guide the day's agenda. Members of the public wishing to participate on the field trip are to bring their own transportation and a lunch. Attendees are to meet in the parking lot at the rear of the Federal Building, Baker, Oregon.

Persons wishing to make oral or written statements at either meeting should so advise the District Manager at least 24 hours prior to the meeting. Presentations are to be made in writing and copies filed with the Council. Written statements for consideration by the Council should be sent to the District Manager, Bureau of Land Management, P.O. Box 987, Baker, Oregon 97814.

Dated: August 7, 1980.

Gordon R. Staker,
District Manager.

BILLING CODE 4310-84-M

Lakeview District Advisory Council; Meeting

Notice is hereby given, in accordance with Public Law 94-579 and 43 CFR Part 1780, that a meeting of the Lakeview District Multiple use Advisory Council will be held on Tuesday, September 16, 1980 at 9:00 a.m. at the Bureau of Land Management Office, 1000 South Ninth Street, Lakeview, Oregon 97630. The meeting is open to the public.

Agenda for the meeting will include:

(1) Introduction of individual members.

(2) Organization of the council.

(3) Discussion of the function of the council.

(4) Briefing and discussions on the current status of the MFP in preparation for the Lakeview E.I.S.

(5) Arrangements and agenda for next meeting.

(6) Public comments.

Summary minutes of the meeting will be kept in the Lakeview District Office and will be available for public inspection and reproduction during regular business hours within 30 days after the meeting.

Richard A. Gerity.
District Manager, Lakeview District Office.

August 7, 1980.

[FR Doc. 80-25294 Filed 8-19-80; 8:45 am]
BILLING CODE 4310-84-M

Public Land in Yamhill County, Oreg.; Realty Action—Noncompetitive Sale

August 7, 1980.

The following described land has been examined and identified as suitable for transfer out of Federal ownership by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750-1; 43 U.S.C. 1713) at not less than the fair market value:

Willamette Meridian, Oregon

T. 3 S., R. 6 W.

Sec. 8, metes and bounds within the S1/2NE1/4, N1/2SE1/4
Containing 5.03 acres

The metes and bounds description is too lengthy for inclusion in this notice but anyone requesting the description will be furnished a copy.

The above-described land is being offered by direct sale to Willamette Industries, Inc., at the appraised fair market value of $4,300.00. Sale will not occur until at least 60 days have lasped from the date of this notice.

The land was acquired by the United States in 1958, as part of a larger parcel, for the construction of the Nestucca Access Road. Failure of the Meadow Lake Dam in the winter of 1962-63 forced the relocation of a segment of the road to the south side of the Nestucca River. The above-described land contains the abandoned road segment.

Sale of the land is in the public interest as the land is difficult and uneconomic to manage as part of the public lands due to its small size and narrow configuration. The land is no longer required for roadway purposes or any other Federal purposes.

The highest and best use of the land is for the commercial production of timber. Willamette Industries owns the surrounding land which is under management for timber production. Direct sale to Willamete Industries is justified as sale to another party would result in a land ownership pattern that would conflict with the county comprehensive plan and zoning.

The direct sale has been discussed with county officials and state agencies. Comments received indicates the sale is consistent with local plans, programs and objectives.

The patent, when issued, will contain a reservation to the United States for rights-of-way for ditches or canals under the Act of August 30, 1890.

The mineral estate is not in Federal ownership.

Detailed information concerning the sale, including the planning documents, environmental assessment, and the record of public comments, is available for review at the Salem District Office, P.O. Box 3227 (3550 Liberty Road S.), Salem, OR 97302.

For a period of 45 days from the date of this notice, interested parties may submit comments to the Secretary of the Interior (LLM-320), Washington, D.C. 20240. Any adverse comments will be evaluated by the Secretary of the Interior who may vacate or modify this realty action and issue a final determination. In the absence of any action by the Secretary of the Interior, this realty action will become a final determination of the Department of the Interior.

John D. Evans,
Acting District Manager.

BILLING CODE 4310-84-M

Fish and Wildlife Service

Availability for a Final Environmental Impact Statement on a Renewable Natural Resources Management Plan for Sheldon National Wildlife Refuge, Nevada

AGENCY: Fish and Wildlife Service (FWS), Intertior.

ACTION: Notice.

SUMMARY: This Notice advises the public that a Final Environmental Impact Statement on a Renewable Natural Resources Management Plan for Sheldon National Wildlife Refuge is available for public review. On or before September 19, 1980, FWS will issue a Record of Decision on the proposed action which will be made available to the public according to National Environmental Policy Act (NEPA) Regulations (40 CFR 1506.6).

ADDRESSES: Further comments should be addressed to: R. Kahler Martinson, Regional Director, U.S. Fish and Wildlife Service, Region 1, Lloyd 500 Bldg., Suite 1552, 500 N.E. Multnomah St., Portland, OR 97232.

FOR FURTHER INFORMATION CONTACT: Mr. Blayne Graves, Senior Staff Specialist, Refuges and Wildlife Resources, Region 1, U.S. Fish and Wildlife Service, Lloyd 500 Bldg., Suite 1552, 500 N.E. Mulnomah St., Portland, OR 97232. Individuals wishing copies of this EIS for review should immediately contact the above individual. Copies have been sent to all agencies and individuals who participated in the scoping process and to all others who have already requested copies.

SUPPLEMENTARY INFORMATION: Sole legal responsibility for managing the Sheldon National Wildlife Refuge was transferred to the U.S. Fish and Wildlife Service (FWS) in February 1976. Prior to that time, the area had been jointly administered with the U.S. Bureau of Land Management (BLM), and sustained heavy grazing by feral horses and burros, and domestic livestock under guidelines established by the Taylor Grazing Act of 1936. Becuase FWS administers National Wildlife Refuges under different legal authorities than BLM administers land under its jurisdiction, a resource management plan reflecting the FWS wildlife mission was prepared for Sheldon. The primary purpose of this plan is to provide habitat for a diversity of native plant and animal species.

Specifics of the proposed plan include: an intensively managed grazing program on about 367,000 acres, designed to manipulate the vegetation to enhance its value to wildlife; construction of gates, cattle guards and approximately 70 miles of interior fence to control livestock movements; development of springs and water reservoirs to provide wildlife water, and disperse cattle; management of a special 197,000-acre area designated because of its fragile soils, high value to bighorn sheep, reptiles, amphibians, plant species of special concern, and importance as winter range for antelope and mule deer; and special management emphasis upon sensitive habits (e.g., springs, meadows, streams, riparian strips, aspen groves, and snow pockets).

Effects of the proposed action were anaylzed. Antelope, mule deer, bighorn sheep and sage grouse would be expected to benefit. For other wildlife species, there was insufficient information to determine effects. As population data is accumulated over time, the effects of the grazing program on many of these native populations should become better understood, providing the FWS a basis for adjusting the grazing program as necessary.

The effects analysis also indicates that deliberate manipulation of vegetation would be expected to result in beneficial effects on vegetative condition, vegetative vigor and watershed values (such as soil erosion and water quality).

The economic analysis indicates that the FWS preferred alternative would reduce present AUM usage of permittees. The reduction would range from 25% the second year to 3% the fifth year, and would have no significant economic impact. Over the long term, if the vegetation responds as expected, there would be more AUM's available for wildlife *and* possibly cattle and thus, conceivably, the grazing alternatives could have long-term beneficial economic effects for permittees.

The FWS considered five other alternatives to the proposed action. The first would involve deliberate manipulation of vegetation, but management tools would be limited to prescribed burns, herbicides and mechanical treatments of vegetation. The second alternative would eliminate manipulation of vegetation by any means, on the assumption that natural processes would constitute the best means for restoring range vegetation. The third alternative would continue past management practices, while a fourth alternative would involve implementation of the FWS grazing program—but with elimination of feral horses and burros. Finally, a prescribed grazing alternative would only allow grazing where a positive need or benefit to wildlife could be clearly documented. Unlike the preferred alternative, grazing would not be allowed on a secondary basis.

Final review of this project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4371 et seq.), Council on Environmental Quality Regulations (40 CFR Parts 1500-1508), other appropriate Federal regulations, and FWS procedures for compliance with those regulations.

William H. Meyer,
Acting Regional Director.

INTERSTATE COMMERCE COMMISSION

Washington; Long- and Short-Haul Application for Relief (Formerly Fourth Section Application)

August 14, 1980.

This application for long- and short-haul relief has been filed with the I.C.C.

Protests are due at the I.C.C. on or before September 4, 1980.

No. 43856, Southwestern Freight Bureau, Agent (No. B-87), rates on common salt, in carloads, from or to Southwestern stations, on the one hand, and stations in Illinois Freight, Northern and Western Trunk Line Territories, on the other, as published in Supplement 71 to its Tariff ICC SWFB 2006-K, to become effective September 12, 1980. Grounds for relief—revised rate structure.

By the Commission.

Agatha L. Mergenovich,
Secretary.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special rule 247 was published in the **Federal Register** of July 3, 1980, at 45 FR 45539.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(B). A copy of any

application, together with applicant's

air cleaners, filters, and mufflers, and

CO, and return over the same route,

Alamosa and Antonito, CO, over U.S.

points in Rio Arriba County, NM, as off-

UT, then over UT Hwy 11 to junction

application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

FINDINGS:

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed) appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notice that the decision-notice is effective. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Volume No. OP1-015

Decided: Aug. 13, 1980.

By the Commission, Review Board Number 2, Members Chandler, Eaton and Liberman.

MC 200 (Sub-482F), filed August 7, 1980. Applicant: RISS INTERNATIONAL CORPORATION, P.O. Box 100, 215 W. Pershing Road, Kansas City, MO 64141. Representative: H. Lynn Davis (same address as applicant). Transporting (1) *air cleaners, filters, and mufflers,* and (2) *materials, equipment, and supplies* used in the manufacture, distribution, and installation of the commodities in (1) above, between points in Adair and Livingston Counties, MO, and Adams and Lee Counties, IL, on the one hand, and, on the other, points in the U.S.

MC 2900 (Sub-428F), filed August 7, 1980. Applicant: RYDER TRUCK LINES, INC., 2050 Kings Road, P.O. Box 2408–R, Jacksonville, FL 32203. Representative: S. E. Somers, Jr. (same address as applicant). Transporting (1) *lumber, building materials, metal articles, plastic articles, rubber articles, containers, paper and paper products, automotive parts, machines, machine parts, chemicals, photographic materials, electrical appliances and equipment, parts for electrical appliances and equipment, medicines, toilet preparations, cleaning compounds, ore products, petroleum products, and beer* (except commodities in bulk, and those requiring special equipment), between Chicago, IL, Minneapolis, MN, Kansas City, MO, Omaha, NE, Oklahoma City, OK, Dallas and Houston, TX, Denver, CO, and Cheyenne, WY, on the one hand, and, on the other, points in AZ, CA, NV, OR, UT, and WA, and (2) *electrical appliances and equipment, parts for electrical appliances and equipment, lumber, machines, machine parts, metal articles, plastic articles, and rubber articles* (except commodities in bulk, and those requiring special equipment), between points in AZ, CA, CO, NV, OR, UT, and WA.

MC 29910 (Sub-281F), filed July 29, 1980. Applicant: ARKANSAS–BEST FREIGHT SYSTEM, INC., 301 South 11th St., Fort Smith, AR 72901. Representative: Don A. Smith, P.O. Box 43, 510 North Greenwood Ave., Fort Smith, AR 72902. (I) Over regular routes, Transporting (A) *general commodities* (except those of unusual value, commodities in bulk, and those requiring special equipment), (1) between Denver and Fort Garland, CO, from Denver over U.S. Hwy 85 to Walsenburg, CO, then over U.S. Hwy 160 to Fort Garland, CO, and return over the same route, serving all intermediate points; (2) between junction U.S. Hwy 85 and CO Hwy 393 and junction U.S. Hwy 85 and CO Hwy 105, over relocated U.S. Hwy 85, as an alternate route for operating convenience only, serving no intermediate points; (3) between Pueblo and Leadville, CO, from Pueblo over U.S. Hwy 50 to Salida, CO, then over CO Hwy 291 to junction U.S. Hwy 285, then over U.S. Hwy 285 to junction U.S. Hwy 24, then over U.S. Hwy 24 to Leadville, CO, and return over the same route, serving all intermediate points; (4) between South Fork and Durango, CO, over U.S. Hwy 160, serving all intermediate points, and the off-route point of Ignacio, CO; (5) between Wheeler and Dowd, CO, over U.S. Hwy 6, serving no intermediate points; (6) between junction CO Hwy 115 and U.S. Hwy 85, near Colorado Springs, CO, and junction CO Hwy 115 and U.S. Hwy 50, near Florence, CO, over CO Hwy 115, serving no intermediate points; (7) between junction CO Hwys 120 and 115 near Penrose, CO, and junction CO Hwy 120 and U.S. Hwy 50 near Canon City, CO, over CO Hwy 120, serving no intermediate points; (8) between Denver, CO, and Farmington, NM, from Denver over U.S. Hwy 6 to Wheeler, CO, then over CO Hwy 91 to Leadville, CO, then over U.S. Hwy 24 to Grand Junction, CO, then over U.S. Hwy 50 to Montrose, CO, then over U.S. Hwy 550 to Farmington, and return over the same route, serving all intermediate points between Leadville and Farmington; (9) between Colorado Springs and Leadville, CO, over U.S. Hwy 24, serving all intermediate points; (10) between Denver and Creede, CO, from Denver over U.S. Hwy 285 to junction CO Hwy 291, then over CO Hwy 291 to Salida, CO, then over U.S. Hwy 50 to junction U.S. Hwy 285, then over U.S. Hwy 285 and CO Hwy 17 to Monte Vista, CO (also from junction U.S. Hwy 285 and CO Hwy 17 over CO Hwy 17 to Alamosa, CO, then over U.S. Hwy 160 to Monte Vista), then over U.S. Hwy 160 to junction CO Hwy 149, then over CO Hwy 149 to Creede, and return over the same route, serving the intermediate points of Salida, CO, and those between Salida and Creede, and the off-route points on CO Hwy 112 between Hooper and Del Norte, CO; (11) between Salida and Montrose, CO, over U.S. Hwy 50, serving all intermediate points; (12) between Delta and Somerset, CO, from Delta over CO Hwy 92 to Hotchkiss, CO, then over CO Hwy 133 to Somerset, CO, and return over the same route, serving all intermediate points; (13) between Cortez and Durango, CO, over U.S. Hwy 160, serving the intermediate points of Mancos and Hesperus, CO; (14) between Denver and Salida, CO, from Denver over U.S. Hwy 85 to Pueblo, CO, then over U.S. Hwy 50 to Salida, and return over the same route, serving all intermediate points and the off-route points of Fort Logan, Louviers, Camp Carson, and Minnequa, CO; (15) between Fort Garland and Del Norte, CO, over U.S. Hwy 160, serving all intermediate points, and serving the off-route point of Center, CO; (16) between

Alamosa and Antonito, CO, over U.S. Hwy 285, serving all intermediate points and the off-route points of Capulin, Sanford, and Manassa, CO; (B) *General commodities* (except those of unusual value, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) serving the facilities of the United States Atomic Energy Plant, at or near Marshall, CO, as an off-route point in connection with applicant's otherwise authorized regular-route operations to and from Denver, CO; (2) between Denver and Canon City, CO, from Denver over U.S. Hwy 85 to Pueblo, CO, then over U.S. Hwy 50 to Canon City, and return over the same route, serving all intermediate points; (3) between junction CO Hwy 120 and U.S. Hwy 50 and Canon City, CO, over CO Hwy 120, serving the intermediate points of Concrete, Portland, and Florence, CO, and the off-route points of Wetmore, Coal Creek, Rockvale, and Chandler, CO; (4) between junction CO Hwys 267 and 120, and junction CO Hwy 267 and U.S. Hwy 50, over CO Hwy 267, serving no intermediate points, but serving junction CO Hwys 267 and 120 for the purpose of joinder only;

(5) between Colorado Springs, CO, and junction CO Hwy 115 and U.S. Hwy 50, over CO Hwy 115, serving the intermediate point of Penrose, CO; (6) between junction CO Hwy 115 and U.S. Hwy 50, and junction CO Hwys 115 and 120 near Florence, CO, over CO Hwy 115, serving no intermediate points, but serving the junction of CO Hwys 115 and 120 for the purpose of joinder only; (7) between Cortez and McElmo Canyon, CO, from Cortez over U.S. Hwy 666 to junction unnumbered county road, then over unnumbered county road to McElmo Canyon, and return over the same route, serving all intermediate points; (8) between Pandora, CO, and junction CO Hwy 62 and U.S. Hwy 550 at or near Ridgeway, CO, from Pandora over CO Hwy 108 to junction CO Hwy 145, then over CO Hwy 145 to Placerville, CO, then over CO Hwy 62 to junction U.S. Hwy 550, and return over the same route, serving no intermediate points, but serving junction CO Hwy 62 and U.S. Hwy 550 for the purpose of joinder only; (9) serving the facilities of Glen L. Martin Plant, near Waterton, CO, as an off-route point in connection with applicant's otherwise authorized regular-route operations to and from Denver, CO; (10) between Grand Valley, CO, and the facilities of The Union Oil Company, at Parachute Creek, CO, over an unnumbered county road, serving all intermediate points; (11) serving the Navajo Dam Site near Blanco, NM, and points in Rio Arriba County, NM, as off-route points in connection with applicant's regular-route operations between Durango, CO, and Farmington, NM; (12) between Somerset, CO, and the Paonia Dam, CO, near junction CO Hwy 133 and 135, from Somerset over CO Hwy 135 to junction unnumbered Hwy, then over unnumbered Hwy to the Paonia Dam, and return over the same route, serving no intermediate points; (13) serving the Missile Launching Sites, at or near Lowry Bombing and Gunnery Range, CO, and Elizabeth, CO, as off-route points in connection with applicant's otherwise authorized regular-route operations to and from Denver, CO; (14) between the facilities of the Standard Metal Corporation, near Silverton, CO, and Montrose, CO, from the facilities of the Standard Metal Corporation over CO Hwy 110 to Silverton, then over U.S. Hwy 550 to Montrose, and return over the same route, serving no intermediate points; (15) serving the facilities of the Four Corners Electric Generating Plant and Dam, near Fruitland, NM, as an off-route point in connection with applicant's otherwise authorized regular-route operations; (16) serving the Lemon Dam on the Florida River, near Durango, CO, as an off-route point in connection with applicant's otherwise authorized regular-route operations; (17) between Provo and Park City, UT, from Provo over U.S. Hwy 189 to Heber, UT, then over U.S. Hwy 40 to junction unnumbered Hwy, then over unnumbered Hwy to Park City, UT, and return over the same route, serving all intermediate points and the off-route points of Midway, Hot Pots, and Center Creek, UT, (18) between Orem, UT, and junction UT Hwy 52 and U.S. Hwy 189, over UT Hwy 52, serving all intermediate points, and the off-route points of Midway, Hot Pots, and Center Creek, UT; (19) between Salt Lake City, UT, and junction U.S. Hwy 40 and unnumbered Hwy (formerly UT Hwy 6), near Park City, UT, over U.S. Hwy 40, serving all intermediate points; (20) between Salt Lake City and Price, UT, from Salt Lake City over U.S. Hwy 91 to Spanish Fork, UT, then over U.S. Hwy 6 to Price, and return over the same route, serving all intermediate points, and the off-route points of Kenilworth, Peerless, Spring Canyon, Standardville, Rains, Latuda, and Mutual, UT; (21) serving Storrs, UT, and the facilities of the Carbon Dioxide Plant, near Wellington, UT, as off-route points in connection with applicant's otherwise authorized regular route operations; (22) between Spanish Fork and Marysvale, UT, from Spanish Fork over U.S. Hwy 91 to Nephi, UT, then over UT Hwy 11 to junction U.S. Hwy 89, then over U.S. Hwy 89 to Marysvale, UT, and return over the same route, serving all intermediate points, and the off-route points of Spring City, Glenwood, Monroe, Mayfield, Austin, Wales, Venice, Annabella, Fairview, and Mt. Pleasant, UT; (23) between Pleasant Grove and Provo, UT, over UT Hwy 114, serving all intermediate points, and the off-route point of the Provo Airport, UT, (24) between Nephi and Gunnison, UT, from Nephi over U.S. Hwy 91 to junction UT Hwy 28, then over UT Hwy 28 to Gunnison, and return over the same route, serving all intermediate points; (25) between Price and Grand Junction, CO, over U.S. Hwy 50, serving all intermediate points and all off-route points within 10 miles of the indicated portion of the specified Hwy (except Sunnyside, Sunnydale, Columbia, Dragerton, and Horse Canyon, CO,

(26) between Springville and Emery, UT, from Springville over alternate U.S. Hwy 50 to junction U.S. Hwy 50, then over U.S. Hwy 50 to Price, UT, then over UT Hwy 10 to Emery, and return over the same route, serving all intermediate points between Springville and Price, and the off-route points within 5 miles of the portion of UT Hwy 10 specified; (27) between Glenwood Springs and Aspen, CO, from Glenwood Springs over CO Hwy 82 to junction CO Hwy 133, then over CO Hwy 133 to Carbondale, CO, then over unnumbered Hwy to junction CO Hwy 82, then over CO Hwy 82 to Aspen, and return over the same route, serving all intermediate points; (28) serving Joe's Valley Dam Site, near Orangeville, UT, as an off-route point in connection with applicant's otherwise authorized regular-route operations between Springville and Emery, UT; (29) between Pagosa Springs, CO, and Blanco, NM, from Pagosa Springs over U.S. Hwy 84 to junction NM Hwy 17, then over NM Hwy 17 to Blanco and return over the same route, serving all intermediate points, and serving off-route points in Archuleta County, CO, south and east of U.S. Hwy 160, and those in Rio Arriba County, NM, within 10 miles South of NM Hwy 17; (30) between Basalt and Meridith, CO, over unnumbered Hwy, serving all intermediate points and the off-route point of the Ruedi Dam and Reservoir Site, CO; (31) between Fort Garland, CO, and the facilities of Molybdenum Corporation of America, on NM Hwy 38, near Red River, NM, from Fort Garland over CO Hwy 159 to the CO–NM State line, then over NM Hwy 3 to Questa, NM, then over NM Hwy 38 to the facilities of Molybdenum Corporation of

America, and return over the same route, serving the intermediate point of San Luis, CO, for the purpose of joinder only; (32) between Alamosa and San Luis, CO, from Alamosa over U.S. Hwy 285 to junction CO Hwy 142, then over CO Hwy 142 to San Luis, and return over the same route, serving no intermediate points, but serving San Luis for purpose of joinder only; (33) between Alamosa and Fort Garland, CO, over U.S. Hwy 160, serving no intermediate points, but serving Fort Garland for purpose of joinder only; (34) between Leadville and Dowd, CO, from Leadville over CO Hwy 91 to junction U.S. Hwy 6, then over U.S. Hwy 6 to Dowd, and return over the same route, serving all intermediate points on U.S. Hwy 6 (except Wheeler junction); (35) serving the facilities of Montezuma Plywood Company, near Cortez, CO, as an off-route point in connection with carrier's otherwise authorized regular-route operations to and from Cortez; (36) serving points in San Juan County, NM, (except points on U.S. Hwy 550 west of Farmington, NM), as off-route points in connection with applicant's otherwise authorized regular-route operations to and from Farmington, NM; (43) serving the facilities of Twin Lakes, CO, as an off-route point in connection with applicant's otherwise authorized regular-route operations; (44) between Salt Lake City and Ogden, UT, over U.S. Hwy 91, serving no intermediate points; (45) between Denver and Craig, CO, over U.S. Hwy 40, serving the intermediate points of Steamboat Springs, Milner, McGregor, Tow Creek, Bear River, Mount Harris, Hayden, Kremming, Hot Sulphur Springs, Granby, Fraser, West Portal, and Idaho Springs, CO, and the off-route points of Haybro, Oak Creek, Phippsburg, Yampa, and Toponas, CO; (46) serving the site of the Yampa Project, near Craig, CO, as an off-route point in connection with applicant's otherwise authorized regular-route operations; (47) serving the facilities used by Valley Camp of Utah, Inc., at or near Scofield, UT, as an off-route point in connection with applicant's otherwise authorized regular-route operations; (48) between Price and Sunnyside, UT, from Price over U.S. Hwy 50 to junction UT Hwy 123, then over UT Hwy 123 to Sunnyside, and return over the same route, serving all intermediate points, and the off-route points of Columbia and Horse Canyon, UT; (49) between Price and Mohrland, UT, from Price over UT Hwy 10 to junction UT Hwy 122, then over UT Hwy 122 to Mohrland, and return over the same route, serving all intermediate points; (50) between Farmington and Albuquerque, NM, from Farmington over NM Hwy 17 to junction NM Hwy 44 near Bloomfield, NM, then over NM Hwy 44 to junction Interstate Hwy 25, then over Interstate Hwy 25 to Albuquerque, and return over the same route, serving no intermediate points; (51) between Denver, CO, and junction U.S. Hwy 6 and U.S. Hwy 40, near Idaho Springs, CO, over U.S. Hwy 6, serving junction U.S. Hwys 6 and 40 for the purpose of joinder only in connection with applicant's regular-route operations between Denver, CO, and Farmington, NM, as an alternate route for operating convenience only, and (52) between Denver, CO, and junction CO Hwy 185 and U.S. Hwy 85 near Castle Rock, CO, over CO Hwy 185, serving the junction of CO Hwy 185 and U.S. Hwy 85 for purpose of joinder only in connection with applicant's regular-route operations between Denver and Fort Garland, CO, over U.S. Hwys 85 and 160, as an alternate route for operating convenience only, and (C) *general commodities* (except classes A and B explosives, household goods as defined by the Commission, and commodities requiring special equipment), (1) serving the Provo Airport, near Provo, UT, as an off-route point in connection with applicant's otherwise authorized regular-route operations, and (2) between Springville, UT, and junction Alternate U.S. Hwy 50 (formerly U.S. Hwy 50) and U.S. Hwy 6, near Spanish Fork, UT, over Alternate U.S. Hwy 50, serving all intermediate points; and (III) over irregular routes, transporting (1) *general commodities* (except those of unusual value, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Aztec, Farmington, and Blanco, NM, and (2) *molybdenum concentrates*, in bulk, from the facilities of Molybdenum Corporation of America, near Red River, NM, to Alamosa, CO. Condition: To the extent that any certificate issued in this proceeding authorizes the transportation of classes A and B explosives, it shall expire 5 years from its date of issuance.

Note.—Applicant intends to tack this authority with its existing regular-route authority.

MC 121600 (Sub-13F), filed August 7, 1980. Applicant: AVERITT EXPRESS, INC., P.O. Box 7342, Nashville, TN 37210. Representative: Robert L. Baker, 618 United American Bank Bldg., Nashville, TN 37219. Transporting *general commodities* (except household goods as defined by the Commission and classes A and B explosives), between points in Knox, Overton, and Putnam Counties, TN, on the one hand, and, on the other, points in the U.S.

Note.—Applicant intends to tack the above requested authority with its existing regular route operations.

MC 146451 (Sub-34F), filed August 8, 1980. Applicant: WHATLEY-WHITE, INC., 230 Ross Clark Circle, N.E., Dothan, AL 36302. Representative: R. S. Richard, P.O. Box 2069, Montgomery, AL 36197. Transporting *appliances*, and *parts* for appliances, from the facilities of General Electric Company, at or near Norcross GA, to points in AL, FL, NC, and SC. Condition: As applicant is in common control with another regulated carrier, it must file an application for approval of the common control under the provisions of 49 U.S.C. § 11343, or submit an affidavit indicating why such approval is unnecessary.

MC 151081 (Sub-1F), filed August 5, 1980. Applicant: PAUL DONALD AVERY, JR., d.b.a. DON AVERY TRUCKING, Rt. 2, Box 282A, Pacific, MO 63069. Representative: Paul Donald Avery, Jr. (same address as applicant). Transporting *cullet*, between points in the U.S., under continuing contract(s) with Circo Glass of St. Louis, MO.

MC 151371 (Sub-1F), filed August 8, 1980. Applicant: METALS TRANSPORT, INC., 528 South 108th St., West Allis, WI 53214. Representative: M. H. Dawes (same address as applicant). Transporting (1) *non-ferrous metals, scrap metals, heat processing equipment, fabricated metal products, iron and steel articles, forest products, lumber, millwork, building supplies and hardware, material handling equipment, and water treatment equipment*, (2) *parts and accessories* for the commodities in (a), and (3) *materials, equipment and supplies* used in the facture and repair of the commodities in (1) and (2), between points in the U.S. (including AK, but excluding HI).

Note.—The purpose of this application is to convert applicant's existing contract carrier authority in MC–134730 and Subs 4, 5, 8, and 9 to common carrier authority, and also to convert to common carrier authority any permits issued in the following pending applications—MC 134730 (Subs-20, 21, 22, 23, 24, 25, 26, 27, and 28). Condition: Issuance of a certificate in this proceeding is subject (1) the coincidental cancellation, at applicant's written request, of its permits in MC 134730 and (Subs-4, 5, 8, and 9), and any permits issued in MC 134730 (Subs-20, 21, 22, 23, 24, 25, 26, 27, or 28), and (2) the withdrawal, at applicant's written request, of any of the proceedings still pending in MC 134730 (Subs-20, 21, 22, 23, 24, 25, 26, 27, and 28).

Volume No. OP2–018

Decided: August 18, 1980.

By the Commission, Review Board Number 1, Members Carleton, Joyce and Jones. Member Carleton not participating.

MC 10343 (Sub-40F), filed July 18, 1980. Applicant: CHURCHILL TRUCK LINES, INC., U.S. Hwy. 36 West, P.O. Box 250, Chillicothe, MO 64601. Representative: Frank W. Taylor, Jr., Suite 600, 1221 Baltimore Ave., Kansas City, MO 64105. Goodrich Tire Company in Mailan Township (Allen County, IN) as off-route points, (7) between the intersection of the IN-IL State and U.S. Hwy 41 and Anderson, IN: from the instersection of the IN-IL State line and U.S. Hwy 41 over U.S. Hwy 41 to junctioin U.S. Hwy 6, then over Hwy 6 to junction IN Hwy 130, then over IN Hwy 130 to Valparaiso, then over U.S. Hwy 30 to junction U.S. Hwy 35, then over U.S. Hwy 35 to Logansport, then over U.S. Hwy 24 to Peru, then over IN Hwy 21 to junction IN Hwy 18, then over IN Hwy 18 to Marion, then over IN Hwy 9 to Anderson, and return over the same route, serving Hammond, Whiting, Gary, Hobart, Wheeler, Valparaiso, Knox, Bass Lake, Beardstown, Winamac, Royal Center, Wanatah, Logansport, Peru, Santa Fe, Amboy, Marion, and Alexandria, IN as intermediate points, and serving East Chicago, Indiana Harbor, Hanna, Star City, Thronhope, Portage, Monticello, and Converse, IN as off-route points, (8) between Marion and Muncie, IN: from Marion over IN Hwy 15 to Jonesboro, then over U.S. Hwy 35 to Muncie, and return over the same route, serving Jonesboro, IN as intermediate point, and serving Gas City, Upland, and Matthews, IN as off-route points; (9) between Terre Haute, IN and the intersection of the IN-IL State line and U.S. Hwy 150, over U.S. Hwy 150, (10) between Indianapolis, IN and junction U.S. Hwys 41 and 52, over U.S. Hwy 52, (11) between Vincennes and Muncie, IN, over IN Hwy 67, (13) between Lafayette and Warsaw, IN, over IN Hwy 25, (14) between Valparaiso, IN and the intersection of the IN-IL State line and U.S. Hwy 30, over U.S Hwy 30, (15) between Indianapolis and Logansport, IN: from Indianapolis over U.S. Hwy 421 to junction IN Hwy 29 near Boyleston, then over IN Hwy 29 to Logansport, and return over the same route, (16) between South Bend, IN and the intersection of the IN-IL State line and U.S. Hwy 20; from South Bend over IN Hwy 2 to junction U.S. Hwy 20 near Byron, IN, then over U.S. Hwy 20 to the intersection of the IN-IL State line and U.S. Hwy 20, and return over the same route, (17) serving the facilities of the B.F. Goodrich Company in Milan Township (Allen County, IN), as an off-route point in connection with carrier's regular-route operations to and from Fort Wayne, IN, (18) serving the facilities of the General Electric Company near Mount Vernon, IN, as an off-route point in connection with carrrier's regular-route operations to and from Evansville, IN, (19) between Louisville, KY and Evansville, IN: from Louisville over U.S. Hwy 150 to Prospect, IN, then over IN Hwy 56 to Haysville, IN, then over IN Hwy 45 to Dale, IN, then over U.S. Hwy 231 to junction U.S. Hwy 460, then over U.S. Hwy 460, to Evansville, and return over the same route, (20) between Jasper, IN and junction IN Hwys 64 and 145: from Jasper over IN Hwy 162 to junction IN Hwy 64, then over IN Hwy 64 to junction IN Hwy 145, and return over the same route, (21) between Dale, IN and junction IN Hwys 62 and 145, over IN Hwy 62, serving Siberia, IN as off-route point, (22) between junction IN Hwys 545 and 62 near Bradley, IN and Owensboro, KY: from junction IN Hwys 545 and 62 over IN Hwy 545 to junction IN Hwy 66, then over IN Hwy 66 to junction U.S. Hwy 231, then over U.S. Hwy 231 to Owensboro, and return over the same route, serving no intermediate points, restricted against the transportation of traffic between Evansville, IN and Owensboro, KY (23) between Plymouth and Indianapolis, IN, over U.S. Hwy 31, (24) between Fort Wayne and Indianapolis, IN, over IN Hwy 37, serving Jonesboro, IN as an off-route point, (25) between Logansport and Rochester, IN, over IN Hwy 25, (26) between Marion and Indianapolis, IN: from Marion over IN Hwy 15 to junction U.S. Hwy 35, then over U.S. Hwy 35 to Muncie, then over IN Hwy 67 to Indianapolis, and return over the same route, serving Anderson, IN as an off route point, (27) between Fort Wayne and Plymouth, IN, over U.S. Hwy 30, (28) between Pittsburgh, PA and Chicago, IL: from Pittsburgh over PA Hwy 65 to Rochester, PA, then over PA Hwy 51 to the PA–OH State line, then over OH Hwy 14 to Salem, OH, then

over U.S. Hwy 62 to Canton, OH, then

between St. Louis, MO and Marshall, IL:

problems (e.g., unresolved common

between Alhambra, Kuhn, Mont, and

over U.S. Hwy 62 to Canton, OH, then over U.S. Hwy 30 to junction U.S. Hwy 30N, then over U.S. Hwy 30N to Delphos, OH, then over U.S. Hwy 30 to Ft. Wayne, IN, then over U.S. Hwy 33 to junction U.S. Hwy 6, then over U.S. Hwy 6 to junction U.S. Hwy 41, then over U.S. Hwy 41 to Chicago, and return over the same route, serving Akron, Lima, Xenia, Cleveland, Toledo, Youngstown, and Columbus, OH, Werton and Wheeling, WV, New Castle and Erie, PA, Fort Wayne and Baer Field, IN, and points in the Chicago IL commercial zone, as defined by the Commission, as off-route points, (29) between Chicago, IL and Terre Haute, IN: (a) over U.S. Hwy 41, and (b) from Chicago over IL Hwy 1 to Goodenow, IL, then over IL Hwy 1 to Paris, IL, then over U.S. Hwy 150 to Terre Haute, and return over the same route, serving the facilities of the Southern Indiana Gas and Electric Company, near Yankeetown, IN, as an off-route point, (30) between Indianapolis, IN and Louisville, KY: from Indianapolis over IN Hwy 37 to Paoli, IN, then over U.S. Hwy 150 to Palmyra, IN, then over IN Hwy 135 to Corydon, IN, then over IN Hwy 62 to New Albany, IN, then across the Ohio River to Louisville, and return over the same route, (31) between Columbus and Terre Haute, IN: from Columbus over IN Hwy 46 to junction IN Hwy 59, then over IN Hwy 59 to Brazil, IN, then over U.S. Hwy 40 to Terre Haute, and return over the same route, (32) between Bloomington and Terre Haute, IN: from Bloomington over IN Hwy 45 to junction IN Hwy 54, then over IN Hwy 54 to junction U.S. Hwy 41, then over U.S. Hwy 41 to Terre Haute, and return over the same route, (33) between Fort Wayne, IN and Chicago, IL: from Fort Wayne over U.S. Hwy 30 to junction U.S. Hwy 41, then over U.S. Hwy 41 to Chicago, and return over the same route, (34) between Muncie and Fort Wayne, IN, over IN Hwy 3, (35) between Columbia City and Huntington, IN, over IN Hwy 9, (36) between Wabash and Warsaw, IN, over IN Hwy 15, (37) between Kokomo, IN and junction U.S. Hwy 35 and IN Hwy 15, over U.S. Hwy 35, (38) between Westfield and Noblesville, IN, over IN Hwy 32, (39) between Noblesville and Anderson, IN, over IN Hwy 32, (40) between Anderson, IN and junction unnumbered highway (formerly IN Hwy 232) and IN Hwy 67, over unnumbered highway (formerly IN Hwy 232), (41) between Columbus and Indianapolis, IN: from Columbus over U.S. Hwy 31A to junction U.S. Hwy 31, then over U.S. Hwy 31 to Indianapolis, and return over the same route, (42) between Vincennes and Prospect, IN, over U.S. Hwy 15, serving no intermediate points, and serving Vincennes for purposes of joinder only, (43) between Mitchell, IN and Louisville, KY: from Mitchell over IN Hwy 60 to junction Interstate Hwy 65, then over Interstate Hwy 65 to Louisville, and return over the same route, serving no intermediate points, and serving junction IN Hwy 60 and Interstate Hwy 65 for purposes of joinder only, (44) between junction IN Hwys 46 and 59 and Terre Haute, IN, over IN Hwy 46, (45) between Indianapolis, IN and Louisville, KY: from Indianapolis over U.S. Hwy 31 to Sellersburg, IN, then over U.S. Hwys 31E and 31W to Louisville, and return over the same route, (46) between Kentland, IN and junction U.S. Hwy 24 and IL Hwy 1, over U.S. Hwy 24, (47) between junction IL Hwys a and 119, and, junction IN Hwy 28 and U.S. Hwy 41: from junction IL Hwys 1 and 119 over IL Hwy 119 to the IL–IN State line, then over IN Hwy 28 to junction U.S. Hwy 41, and return over the same route, (48) between Vincennes and Indianapolis, IN, over IN Hwy 67, (49) between junction U.S. Hwy 41 and IN Hwy 57, and, Indianapolis, IN: from junction U.S. Hwy 41, and IN Hwy 57 over IN Hwy 57 to junction IN Hwy 67, then over IN Hwy 67 to Indianapolis, and return over the same route, (50) between Danville, IL and Indianapolis, IN, over U.S. Hwy 136, restricted against traffic (A) originating at Danville, IL destined to Indianapolis, IN, and (B) originating at Indianapolis, IN, and destined to Danville, IL, (51) between Corydon, IN and junction IN Hwy 145 and U.S. Hwy 460, over U.S. Hwy 460,

(52) serving the facilities of Eli Lilly and Company near Clinton, IN, as an off-route point in connection with carrier's otherwise authorized regular-route operations, (53) between Lawrenceville and Paris, IL, over IL Hwy 1, (54) between Chicago and Fairfield, IL: from Chicago over U.S. Hwy 34 to junction U.S. Hwy 45, then over U.S. Hwy 45 to Fairfield, and return over the same route, (55) between Danville and Lincoln, IL, over IL Hwy 10, (56) between Marshall and Vandalia, IL, over U.S. Hwy 40, (57) between Springfield, IL and junction U.S. Hwy 36 and IL Hwy 1, over U.S. Hwy 36, (58) between Lawrenceville and Sandoval, IL, over U.S. Hwy 50, (59) between junction IL Hwys 33 and 49, and, junction IL Hwy 49 and U.S. Hwy 45, over IL Hwy 49, (60) between Bloomington and Ashely, IL, over U.S. Hwy 51, (61) between Bloomington and Litchfield, IL, over U.S. Hwy 66, (62) between Mount Vernon, IL and junction IL Hwy 37 and U.S. Hwy 45, over IL Hwy 37, (63) between junction IL Hwys 10 and 48, and, junction IL Hwy 48 and U.S. Hwy 66, over IL Hwy 48, (64) between Clinton and Springfield, IL, over IL Hwy 54, (65) between Ashley and Fairfield, IL, over IL Hwy 15, (66) between Taylorville, IL and junction IL Hwy 104 and U.S. Hwy 66, over IL Hwy 104, (67) between Pana and Springfield, IL, over IL Hwy 29, (68) between Paris and Bloomington, IL, over U.S. Hwy 150, (69) between Bloomington and Chicago, IL, over U.S. Hwy 66, serving all intermediate points (except those in Will County, IL), (70) between Bloomington and Peoria, IL, over U.S. Hwy 150, (71) between Lincoln and Morton, IL, over IL Hwy 121, serving Morton for purposes of joinder only, (72) serving the facilities of American Cyanamid Co., at South River, MO as an off-route point in connection with carrier's regular-route operations, (73) between Quincy, IL and St. Louis, MO: (a) from Quincy over IL Hwy 96 to junction U.S. Hwy 36, then over U.S. Hwy 36 to Jacksonville, IL, then over U.S. Hwy 67 to junction unnumbered highway (formerly portion U.S. Hwy 67), then over unnumbered highway to junction IL Hwy 267, then over IL Hwy 267 to junction U.S. 67, then over U.S. Hwy 67 to Alton, IL, then over IL Hwy 3 to junction unnumbered highway (formerly portion U.S. Hwy 67A) then over unnumbered highway to junction IL Hwy 203, then over IL Hwy 203 to junction U.S. Hwy 40, then over U.S. Hwy 40 to St. Louis, and return over the same route, and (b) from Quincy over U.S. Hwy 24 to Taylor, MO, then over U.S. Hwy 61 to Wentzville, MO, then over Bypass U.S. Hwy 40 to junction MO Hwy 115, then over MO Hwy 115 to junction MO Hwy 180, then over MO Hwy 180 to St. Louis, and return over the same route, (74) between St. Louis, MO and Lawrenceville, IL: from St. Louis over U.S. Hwy 50 to junction unnumbered highway (formerly U.S. Hwy 50A) near Sumner, IL, then over unnumbered highway to Lawrenceville, and return over the same route, (75) between St. Louis, MO and Bloomington, IL: from St. Louis over Interstate Hwy 55 to junction IL Hwy 4, then over IL Hwy 4 to Staunton, IL, then over unnumbered highway to junction Interstate 55, then over Interstate Hwy 55 to Bloomington, and return over the same route, (76) between Springfield and Peoria, IL, over IL Hwy 29, (77) between Mason City and Danville, IL: from Mason City over IL Hwy 10 to Champain, then over U.S. Hwy 150 to Danville, and return over the same route, (78) between junction Interstate Hwy 55 and IL Hwy 48 and Decatur, IL, over IL Hwy 48, (79) between St. Louis, MO and Marshall, IL: from St. Louis over U.S. Hwy 40 to junction unnumbered highway, then over unnumbered highway to junction U.S. Hwy 40, then over U.S. Hwy 40 to junction U.S. Hwy 40A, then over U.S. Hwy 40A to Mulberry Grove, IL, then over U.S. Hwy 40 to Marshall, and return over the same route, (80) between Jacksonville and Springfield, IL, over U.S. Hwy 36, (81) between Lawrenceville, IL and Vincennes, IN, over U.S. Hwy 50, (82) between Marshall, IL and Terre Haute, IN, over U.S. Hwy 40, (A) serving routes (10) through (16), (33) through (51), (71), and (80) through (82), as alternate routes for operating convenience only, serving no intermediate points (except as noted in routes (42), (43), and (71) above), and (B) serving all intermediate points in routes (2), (3), (9) through (21), (23) through (32), (53) through (70), and (73) through (79) above (except as noted in routes (54) and (69) above); and (II) over irregular routes: (1) between points in Marion County, IN, and (2) between Fort Wayne, IN, on the one hand, and, on the other, Ferguson, IN, and Baer Field Airport, IN.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 80-25281 Filed 8-19-80; 8:45 am]

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special rule 247 was published in the **Federal Register** on July 3, 1980, at 45 FR 45539.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(B). Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service and to comply with the appropriate statutes and Commission regulations. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed) appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notice that the decision-notice is effective. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Volume No. OPI–015

Decided: August 13, 1980.

By the Commission, Review Board Number 2, Members Chandler, Eaton and Liberman.

MC 38481 (Sub-22F), filed August 6, 1980. Applicant: FARRUGGIO'S BRISTOL AND PHILADELPHIA AUTO EXPRESS, INC., 1419 Radcliffe St., Bristol. PA 19007. Representative: Alan Kahn, 1430 Land Title Bldg., Philadelphia, PA 19110. BILLING CODE 7035-01-M

Motor Carrier Finance Applications; Decision-Notice

In FR Doc. 80-22950, published at page 50946, on Thursday, July 31, 1980, on page 50947, in the third column, in the second paragraph, in the first line, "H. HOYT McKAREM," should be corrected to read "MC-F-14338F, filed February 28, 1980. H. HOYT McKAREM,".

BILLING CODE: 1505-01-M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

[Notice No. F-49]

The following applications were filed in region 1.

Send protests to: Interstate Commerce Commission, Regional Authority Center, 150 Causeway St., room 501, Boston, MA 02114.

MC 144496 (Sub-1-1TA), filed July 23, 1980. Applicant: ECKS TRUCKING, INC., 657 Pleasant Street, Norwood, MA 02063. Representative: James F. Martin, Jr., 8 W. Morse Road, Bellingham, MA 02019. Contract carrier, irregular routes: *(1) Foodstuffs, lime juices, grenadine, cocktail mixes and (2) materials, equipment, and supplies used in the manufacture and distribution of the products named in number (1)* above (except commodities in bulk), between the facilities of Cadbury, Schweppes, U.S.A. Ltd., and Jefferson Bottling Co., Warwick, RI, and points in the U.S.A., except AL, HA, and RI. Supporting shipper: Cadbury, Schweppes, U.S.A. Ltd. or its subsidiary, Jefferson Bottling Co., 101 Jefferson Blvd., Warwick, RI 02888.

MC 151349 (Sub-1-1TA), filed July 23, 1980. Applicant: HINGHAM EXPRESS, INC., 349 Lincoln Street, Hingham, MA 22043. Representative: Jeffrey M. Aresty, Esq., Crossland & Aresty, Bay 305 Union Wharf, Boston, MA 02109. *General commodities in containers having a prior or subsequent movement by water or by rail (except those of unusual value, Class A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment)* between Boston, MA and its commercial zone and Providence, RI, and its commercial zone. INTERNATIONAL TRADE COMMISSION

[Invoice. No. 337-TA-69]

Certain Air-Tight Cast-Iron Stoves; Termination

Upon consideration of the presiding officer's recommendation and the record in this proceeding, the Commission is ordering the termination of Inv. No. 337-TA-69, *Certain Air-Tight Cast Iron Stoves*, with respect to three respondents, Oriental Kingsworld Industrial Co. Ltd., Nelson and Small Inc., and Borneo Sumatra Trading Co.

The order is effective as of August 12, 1980.

Any party wishing to petition for reconsideration of the Commission's action must do so within 14 days of service of the Commission order. Such petitions must be in accord with Commission Rule 210.56 (19 CFR 210.56).

Copies of the Commission's Action and Order, the Commission's Opinion and any other public documents in this investigation are available to the public during official working hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, United States International Trade Commission, 701 E Street NW, Washington, D.C. 20436, telephone 202-523-0161.

Notice of the institution of this investigation was published in the Federal Register of July 12, 1979 (44 FR 40732).

Issued: August 12, 1980.

By order of the Commission.

Kenneth R. Mason,
Secretary.

BILLING CODE 7020-02-M

[Invoice No. 337-TA-69]

Certain Airtight Cast-Iron Stoves; Order for Written Comments Regarding Relief, Bonding and the Public Interest

AGENCY: United States International Trade Commission.

ACTION: Written comments on relief, bonding, and the public interests.

SUMMARY: This request follows a Recommended Determination of the Administrative Law Judge in this investigation on July 7, 1980. In her recommended determination the ALJ stated that the following respondents were in violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) by reason of unfair methods of competition and unfair acts in the importation or sale of Certain Airtight Cast-Iron Stoves in the United States: Hearth Craft, Hutch Manufacturing Co., Fireplace Distributors, International Foundries, Harbor Sales, Co., Crane Industries, Great Eastern Trading Co. Inc., Heritage Stove Co., Meteor Design International Ltd., Genial Jade Industrial Co., Pyramid International Co. Ltd., Justin Taiwan Industrial Co. Ltd., Cathay Overseas Trading Co., Taiwan Active Enterprises Co. Ltd., Tinpin Trading Co., Nan Shang Enterprises Co. Ltd., Linmore Enterprise Co. Ltd., Formosa May Inc., Hermix Industries Corp., Firebird Hardware Inc., Lee-Lin Enterprise Co. Ltd., Yulson Industries Co. Ltd., KFK Industrial Co. Ltd., Stratford Mfg. Co. Ltd., You Well Co. Ltd., Collins Co. Ltd., and Wood Heat. This notice requests comments on relief, bonding, and the public interest should the Commission determine that the above-named respondents are in violation of section 337. Copies of the Administrative Law Judge's recommendation may be obtained by interested persons by contacting the Office of the Secretary, U.S. International Trade Commission, 701 E. Street N.W., Washington, D.C. 20436, telephone 202-523-0161.

DATES: Complainant shall file and serve on all parties of record and with the Secretary to the Commission a detailed proposed Commission action, including a proposed determination of bonding, a proposed remedy, and a discussion of

the effects of its proposals on the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, and U.S. consumers by no later than the close of business on Friday, August 29, 1980. The Commission's investigative staff shall file and serve on all parties of record a formal report reflecting its investigation of public interest factors to be considered by the Commission with the staff's recommendation and conclusions no later than the close of business on Friday, September 5, 1980. Any other party, interested agency or department, public interest group, or other member of the public wishing to file written comments and information concerning the action which complainant has proposed, any available alternatives, and the advisability of any Commission action in light of the public interest considerations listed above must file those comments no later than the close of business on Friday, September 5, 1980. Comments should conform with Commission Rule 201.8 (19 CFR 201.8) and should be addressed to Kenneth R. Mason, Secretary, U.S. International Trade Commission, 701 E. Street N.W., Washington, D.C. 20436.

FOR FURTHER INFORMATION CONTACT: Jeffrey S. Neeley, Office of the General Counsel, U.S. International Trade Commission, 701 E Street N.W., Washington, D.C. 20436; telephone 202–523–0359.

SUPPLEMENTARY INFORMATION: This investigation began with publication by the Commission of a notice in the **Federal Register** on July 12, 1979 (44 FR 40732). Twenty-five parties were named as respondents. By notice published in the **Federal Register** (44 FR 58816) on October 11, 1979, the Commission named twenty-six additional respondents. A subsequent notice dated October 24, 1979 (44 FR 61289) named one more respondent. In her recommended determination of July 7, 1980 the Administrative Law Judge found that twenty-seven respondents had engaged in one or more unfair methods of competition or unfair acts in the importation or sale in the United States of cast-iron wood-burning or coal-burning stoves which are airtight or represented to be airtight. All of the respondents found to be violating section 337 were in default.

WRITTEN COMMENTS REQUESTED: Should the Commission adopt the recommendation of the Administrative Law Judge, it must make determinations concerning the appropriate relief and bonding, if any, and it must consider the public interest. These issues are described below.

(a) *Relief.*—In the event that the Commission were to find a violation of section 337, it would issue (1) an order which could result in the exclusion from entry of certain airtight cast-iron stoves into the United States or (2) an order which could result in requiring respondents to cease and desist from unfair methods of competition or unfair acts in the importation and sale of these airtight cast-iron stoves. Accordingly, the Commission is interested in what relief should be ordered, if any.

(b) *Bonding.*—In the event that the Commission were to find a violation of section 337 and order some form of relief, that relief would not become final for a sixty-day period during which the President would consider the Commission's determination. During this period, the airtight cast-iron stoves would be entitled to enter the United States under a bond determined by the Commission and prescribed by the Secretary of the Treasury. Should the Commission determine that a bond is unnecessary, importation could continue during this period. Accordingly, the Commission is interested in what bond should be determined, if any.

(c) *The Public Interest.*—In the event that the Commission were to find a violation of section 337 and order some form of relief, the Commission must consider the effect of that relief upon the public interest. Accordingly, the Commission is interested in the effect of any exclusion order or cease and desist order upon (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) the production of like or directly competitive articles in the United States, and (4) U.S. consumers.

(d) *Request for Oral Argument and Oral Presentation.*—At present, no oral argument is planned with respect to the recommended determination of the presiding officer concerning whether there is a violation of section 337 of the Tariff Act of 1930 in this matter. Similarly, no oral presentation is planned with respect to the relief, bonding, and public interest factors set forth in section 337(d) and (f) of the Tariff Act of 1930. (19 U.S.C. 1337). However, the Commission will consider requests for an oral argument or an oral presentation if they are received by the Secretary of the Commission not later than September 19, 1980.

By order of the Commission.

Issued: August 15, 1980.

Kenneth R. Mason,
Secretary.

BILLING CODE 7020–02–M

[Investigation No. 337–TA–67]

Certain Inclined-Field Acceleration Tubes; Termination of Investigation With Respect to the University of Pittsburgh

AGENCY: U.S. International Trade Commission.

ACTION: Termination of investigation No. 337–TA–67, Certain Inclined-Field Acceleration Tubes, with respect to respondent University of Pittsburgh.

Notice is hereby given that the Commission, having on June 25, 1980, published for comment a licensing agreement between Complainant High Voltage Engineering Corp., South Bedford Street, Burlington, Mass., and respondent University of Pittsburgh, Pittsburgh, PA., settling complainant's patent infringement claims against the university (45 FR 42893), and having received no comments thereon, hereby terminates this investigation with respect to the University of Pittsburgh.

EFFECTIVE DATE: August 13, 1980.

FOR FURTHER INFORMATION CONTACT: Louis Mastriani, Commission investigative attorney (202–523–0489) or Michael Jennison, Office of the General Counsel (202–523–0189).

AUTHORITY: The authority for termination of a respondent is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and 19 CFR 210.51–.55.

SUPPLEMENTARY INFORMATION: Any party wishing to petition for reconsideration of the Commission's action must do so within fourteen (14) days of service of the Commission order. Petitions must be in accord with section 210.56 of the Commission's Rules of Practice and Procedure (19 CFR 210.56).

Copies of the Commission's action and order and any other public documents in this investigation are available to the public during official working hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

Notice of the institution of this investigation was published in the **Federal Register** of June 27, 1979 (44 FR 32567).

Issued: August 13, 1980.

By order of the Commission.

Kenneth R. Mason,
Secretary.

[332–73]

Release for Public Comment of Provisionally Adopted Chapters of the Harmonized Commodity Description and Coding System

AGENCY: United States International Trade Commission.

ACTION: Release for public comment, pursuant to Commission investigation No. 332–73, under the authority of section 332(g) of the Tariff Act of 1930, as amended, of drafts of the following chapters of the Harmonized Commodity Description and Coding System as provisionally adopted by the Harmonized System Committee and the Nomenclature Committee of the Customs Cooperation Council.

Chapter 27: Mineral fuels, mineral oils and products of their distillation; bituminous substances; mineral waxes
Chapter 31: Fertilizers
Chapter 32: Tanning or dyeing extracts; tannings and their derivatives; dyes, pigments and other colouring matter; paints and varnishes; putty and other mastics; inks
Chapter 38: Miscellaneous chemical products
Chapter 84: Nuclear reactors, boilers, machinery and mechanical applicances; parts thereof
Chapter 85: Electrical machinery and equipment; parts thereof
Chapter 93: Arms and ammunition; parts thereof
Chapter 94: Furniture; bedding, mattresses, mattress supports, cushions and similar stuffed furnishings; lamps and lighting fittings, not elsewhere specified or included; illuminated signs, illuminated nameplates and the like; prefabricated buildings
Chapter 99: Works of art, collectors' pieces, and antiques

WRITTEN SUBMISSIONS: Parties wishing to submit written comments should do so by December 1, 1980.

HEARING: Parties desiring the Commission to hold a hearing on these draft chapters of the Harmonized Code should contact the Secretary of the Commission by October 1, 1980 and show good cause for holding a hearing.

COPIES OF DOCUMENTS: Copies of the chapters which are subject of this notice are available for public inspection at the offices of the Commission, 701 E Street NW, Washington, D.C. 20436, or at 6 World Trade Center, New York, N.Y. 10048. The Commission will also send copies to interested parties upon request.

FOR FURTHER INFORMATION CONTACT: Eugene A. Rosengarden, Director, Office of Tariff Affairs, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436, Telephone: 202/523–0370.

SUPPLEMENTARY INFORMATION: In its public notices of February 8, 1980 (45 F.R. 9828 of February 13, 1980) and March 21, 1980 (45 F.R. 19896 of March 26, 1980) the Commission identified 59 chapters of the Harmonized Commodity Description and Coding System (Harmonized System) for which texts had been provisionally adopted by the Harmonized System and Nomenclature Committees of the Customs Cooperation Council. The purpose of the above mentioned notices was to invite comments and views of interested parties with respect to the 59 chapters.

Since the release of the March 21, 1980 notice, provisionally adopted texts of nine further chapters have been published by the Customs Cooperation Council. This notice hereby amends the previous notice by adding these nine new chapter texts to the list of texts released for public comment.

This notice is being issued pursuant to Commission investigation No. 332–73, instituted on January 31, 1975 (40 F.R. 6329), under section 332(g) of the Tariff Act of 1930, as amended. The investigation was initiated in accordance with section 608(c) of the Trade Act of 1974, which provides, in part, that the Commission shall institute an investigation which would provide the basis for—

(2) full and immediate participation by the United States International Trade Commission in the United States contribution to technical work of the Harmonized Systems [sic] Committee under the Customs Cooperation Council to assure the recognition of the needs of the United States business community in the development of a Harmonized Code reflecting should principles of commodity identification and specification and modern producing methods and trading practices * * *.

The Harmonized System is being developed by the Customs Cooperation Council (CCC), an 80-member international organization with headquarters in Brussels, as an international commodity classification system which will be adaptable for modernized customs tariff nomenclature purposes and for recording, handling, and reporting of transactions in international trade. The Harmonized System will be based on, and in many respects will be an extension of, the Customs Cooperation Council Nomenclature (CCCN), formerly known as the Brussels Tariff Nomenclature (BTN).

Currently, the Technical Team working under auspices of the CCC prepares drafts of the various chapters of the Harmonized System for consideration by the Harmonized System Committee, which was established in order to develop the code. These drafts are forwarded to the members and observers of the Committee for their review and submission of written comments. The Committee meets three times a year to consider these drafts and the written comments and presentations of the various delegations. The review of a particular chapter or group of chapters may extend to more than one meeting.

In its public notices of May 4, 1976 (41 FR 18716 of May 6, 1976), August 9, 1976 (41 FR 34370 of August 13, 1976), December 20, 1976 (41 FR 55948 of December 23, 1976), September 1, 1977 (42 FR 44852 of September 7, 1977), February 7, 1978 (43 FR 5902 of February 10, 1978), October 16, 1978 (43 FR 48723 of October 19, 1978), February 14, 1979 (44 FR 10435 of February 20, 1979), May 16, 1979 (44 FR 29740 of May 22, 1979), September 5, 1979 (44 FR 53112 of September 12, 1979), January 28, 1980 (45 FR 7648 of February 4, 1980), February 1, 1980 (45 FR 8168 of February 6, 1980), May 20, 1980 (45 FR 36231 of May 29, 1980), and May 23, 1980 (45 FR 36230 of May 29, 1980), the Commission identified those chapters which have been considered thus far by the Harmonized System Committee, and the chapters for which a Technical Team draft has been released.

Following its deliberation on the draft chapters, the Harmonized System Committee forwards recommended texts for the chapters to the Nomenclature Committee. The Nomenclature Committee, which supervises the operations of the convention on Nomenclature for the Classification of Goods in Customs Tariffs and is responsible for ensuring international uniformity in the interpretation and application of the CCCN, reviews the recommended texts for the Harmonized System and returns the draft chapters which it has approved to the Harmonized System Committee. The draft chapters which have thusly been provisionally approved by both committees are then held in abeyance pending final revision sessions. It is anticipated that the Harmonized System

Committee will begin final revision

each year thereafter so long as the import relief is in effect

Joseph H. Widmar,
Director of Operations,

Director, Office of Research Programs,
National Institute of Justice,

of control room layout, the adequacy of

Committee will begin final revision sessions early in 1981.

The draft chapters released for public comment today have been provisionally adopted by the Harmonized System Committee and the Nomenclature Committee according to the above described procedure. As further chapters are adopted, the Commission will issue future notice requesting public comment.

In 1977, the Department of the Treasury established an Interagency Advisory Committee on Customs Cooperation Council Matters in order to provide a basis for interested Federal agencies to participate with respect to CCC matters. In order to establish and develop U.S. programs and policies with respect to the Harmonized System, the interagency committee has instituted procedures which takes into account the provisions of section 608(c) of the Trade Act of 1974, which call for the Commission to contribute to the U.S. technical input to the Harmonized System Committee. Under these procedures the Commission is preparing technical comments and proposals on the various chapters of the Harmonized System for consideration by the interagency committee in the determination of U.S. proposals with respect to the Harmonized Code. In making proposals, the Commission is seeking and taking into consideration the views of trade and industry and other interested parties and of interested Government agencies.

Issued: August 15, 1980.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[332-112]

Quarterly and Annual Reports Providing Information Providing Information on Color Television Receivers and Certain Subassemblies Thereof

AGENCY: United States International Trade Commission.

ACTION: Institution of an investigation under the authority of section 332(b) of the Tariff Act of 1930, as amended (19 U.S.C. 1332(b)), to establish a permanent docket for the quarterly and annual reports concerning color television receivers and certain subassemblies thereof required by Presidential Proclamation 4769 of June 30, 1980 (45 FR 45237, July 2, 1980).

EFFECTIVE DATE: July 1, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. William Fletcher or Mr. Scott Baker, Machinery and Equipment Division, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436 (telephone 202-523-0378, 202-523-0361, respectively).

SUPPLEMENTARY INFORMATION: On May 16, 1980, the United States International Trade Commission reported to the President (Publication 1068) the results of its investigation under section 203(i)(3) of the Trade Act of 1974 (19 U.S.C. 2253(i)(3)). The Commission advised that termination of import relief in effect with respect to color television receivers and subassemblies thereof from Taiwan and Korea will have an adverse impact on the domestic industry producing like or directly competitive articles.

After considering the advice of the Commission, the President determined that an extension of the orderly marketing agreements with the Coordinating Council for North American Affairs (representing Taiwan) and the Republic of Korea, covering color television receivers and certain subassemblies thereof, is in the national interest.

On June 30, 1980, the President issued Proclamation 4769 limiting, effective July 1, 1980, the number of color television receivers imported into the United States from Taiwan and Korea through June 30, 1982, unless earlier modified or terminated.

Paragraph (8) of Presidential Proclamation 4769 directs as follows:

(8) The USITC shall issue reports and conduct the following surveys with respect to the certain color television receivers, and subassemblies thereof the subject of this proclamation:

(a) *Quarterly* surveys by calendar quarter to obtain from producers in the United States monthly data on production, shipments, inventories, employment, man-hours, prices, and other economic factors indicative of conditions in the U.S. industry. The initial surveys shall cover the second quarter of 1980. Subsequent surveys shall cover individual quarters with the last such survey covering the quarter which ends not less than 60 days prior to the termination of the import relief. The USITC shall publish the results of the surveys within 45 days after the end of the surveyed quarter.

(b) *Annual.* Annual surveys to obtain data from producers in the United States by calendar quarter on profits, capacity, and annual data on capital expenditures and research and development expenditures; and to obtain from importers data by calendar quarter on prices, orders, and inventories. The initial surveys shall cover the calendar year 1980, and the results shall be published by March 31, 1981. The results of subsequent surveys shall be published by March 31 of each year thereafter so long as the import relief is in effect.

Issued: August 12, 1980.

By order of the Commission.

Kenneth R. Mason,

Secretary.

NUCLEAR REGULATORY COMMISSION

Availability of Draft Human Engineering Guide To Control Room Evaluation

Notice is given that the Commission's Office of Nuclear Reactor Regulation has published a draft Human Engineering Guide to Control Room Evaluation which was prepared for the Commission by the Essex Corporation of Alexandria, Virginia. Identified as NUREG/CR-1580, the draft is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C., and in all other Commission Local Public Document Rooms. This document is a draft version of the control room design review guidelines described in Task 1.D of the NRC Action Plan developed as a result of the TMI-2 Accident, NUREG-0660. The guidelines are intended to provide guidance for a detailed control room design review to identify and correct design deficiencies. This review will be performed by all operating reactor licensees and applicants for operating licenses. Review subjects include an assessment of control room layout, the adequacy of the information provided, the arrangement and identification of important controls and instrumentation displays, the usefulness of the audio and visual alarm systems, the information recording and recall capability, the control room environment, and other considerations of human factors that have an impact on operator effectiveness.

Interested persons may submit comments on the draft guidelines for the Commission's consideration. Operating reactor licensees, applicants for operating licenses, and designated Federal agencies and organizations with experience in human factors analysis are being provided with copies of the draft guidelines. Comments on the draft guidelines received by the Commission will be made available for public inspection at the Commission's Public Document Room in Washington, D.C. Upon consideration of comments submitted with respect to the draft guidelines, the NRC will prepare final guidelines, the availability of which will be published in the **Federal Register.** The final guidelines will be identified as NUREG-0700.

The Commission staff plans to meet with operating reactor licensees and applicants for operating licenses, human factor engineering experts, and other interested parties at some time after comments on the draft guidelines have been received, but prior to publication of the final guidelines. The purpose of these meetings will be to review the guidelines in the context of the Commission's evaluation criteria that are to be developed and used by the Commission staff to judge the acceptability of the design reviews performed and the design modifications implemented. Notice of these meetings will be published in the **Federal Register.**

Comments on the draft Human Engineering Guide to Control Room Evaluation should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Human Factors Safety. Comments are due by September 12, 1980.

Dated at Bethesda, Md., this 12th day of August 1980.

D. Tondi,

Acting Chief, Human Factors Engineering Branch, Division of Human Factors Safety.

[FR Doc. 80-25272 Filed 8-19-80; 8:45 am]

BILLING CODE 7590-01-M

[NUREG-0612]

special review of equipment,

For the Nuclear Regulatory Commission.

Regulatory Commission, Washington,

following factors: (1) The nature of the

mailed); (University of Maryland); and

[NUREG-0612]

Issuance and Availability: Control of Heavy Loads at Nuclear Power Plants—Resolution of Task A-36

The Nuclear Regulatory Commission (NRC) staff has prepared a report entitled, "Control of Heavy Loads at Nuclear Power Plants—Resolution of Task A-36" (NUREG-0612), dated July 1980. The report provides the staff's resolution of the NRC's Generic Technical Activity A-36, which was an "unresolved safety issue" pursuant to Section 210 of the Energy Reorganization Act of 1974, as amended.

The generic study was established to take a systematic look at staff licensing criteria and adequacy of measures in effect at operating plants, and to recommend necessary changes to assure the safe handling of heavy loads in the area of the fuel storage pool, fuel in the reactor vessel during refueling, and safety related equipment.

NUREG 0612 describes the types of heavy loads handled, the potential consequences of load handling accidents, and the staff's plan for implementing guidelines to assure safe load handling.

The staff has determined that a number of procedural and design measures are in effect at operating plants to reduce the likelihood or mitigate the effects of load handling accidents; however, adequate measures have not been taken for all of the heavy loads that may be handled and the potential consequences that may result from a load handling accident. NUREG 0612 describes the interim measures that should be satisfied until full conformance to the guidelines in the report. The staff will be sending a generic letter to licensees identifying the interim measures that should be implemented.

Our review showed that load drops occur rather infrequently. Nonetheless, load drops can and have occurred at nuclear facilities, although these have not resulted in an offsite release of radioactive material. The staff believes that the likelihood for a load drop in this interim period and the potential consequences warrant some interim actions prior to final implementation of the guidance in NUREG 0612. The measures that will be implemented at operating facilities in this interim period include: revisions to technical specifications to include a restriction on carrying heavy loads over fuel in the storage pool; definition of safe load paths; development of procedures for handling heavy loads; training of crane operators; crane inspections; and a special review of equipment, procedures, and personnel training for the handling of loads which must be brought over the core such as vessel internals or the vessel inspection tool. These measures will assure that heavy loads are kept away from fuel in the core or spent fuel pool except where necessary, that equipment used to handle these heavy loads are in proper condition, and that personnel who handle these loads have received sufficient direction and training.

NUREG 0612 also provides guidelines to assure safe load handling over the life of the plant and acceptance criteria for evaluation of licensee measures and designs related to load handling. General guidelines are provided that include definition of safe load handling paths, qualification and training of crane operators, selection and proper use of slings and other handling devices, and periodic inspection, test, and maintenance of cranes. Additionally, certain area specific guidelines are provided that include alternatives on upgrading handling system reliability, use of mechanical stops or electrical interlocks to restrict crane travel, or analyzing the consequences of postulated load handling accidents to demonstrate that acceptance criteria are satisfied. The factors that should be considered in these analyses are also specified.

NUREG 0612 also contains recommended changes to Regulatory Guides and Standard Review Plans that will be used in the CP and OL licensing reviews.

The staff has initiated the implementation review of the guidelines in NUREG 0612 on a plant specific basis.

Copies of the report will be available after August 14, 1980. Copies will be sent directly to utilities, utility groups and associations, and environmental and public interest groups. Copies will also be forwarded to the applicable Congressional Committees for their information and use. Other copies will be available for review at the NRC Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Commission's local public document room located in the vicinity of existing nuclear power plants. Addresses of these local public document rooms can be obtained by contacting the Chief, Local Public Document Room Branch, Mail Stop 309, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone (301) 492-7536.

Dated at Bethesda, Md., this 12th day of August 1980.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Acting Director, Division of Operating Reactors Office of Nuclear Reactor Regulation.

[FR Doc. 80-25271 Filed 8-19-80; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-255]

Consumers Power Co.;

Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 59 to Provisional Operating License No. DPR—20, issued to Consumers Power Company (the licensee), which revised the Technical Specifications for operation of the Palisades Plant (the facility) located in Covert Township, Van Buren County, Michigan. The amendment is effective as of it date of issuance.

The amendment deletes the requirement for quarterly stroking of the valves associated with the operation of the Safety Injection and Refueling Water Storage Tank Level Switch Interlocks except when in cold shutdown or refueling modes.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this action was not required since the amendment does not involve a significance hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any signficant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 14, 1980, (2) Amendment No. 59 to License No. DPR—20, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. 20555, and at the Kalamazoo Public Library, 315 South Rose Street, Kalamazoo, Michigan 49006. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C., 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 29th day of July 1980.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Chief, Operating Reactors Branch No. 5, Division of Licensing.

[FR Doc. 80-25267 Filed 8-19-80; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-166]

University of Maryland; Proposed Renewal of Facility License

The United States Nuclear Regulatory Commission (the Commission) is considering renewal of Facility License No. R-70, issued to the University of Maryland (the licensee), for operation of the TRIGA-type research reactor located on the licensee's campus at College Park, Maryland.

The renewal would extend the expiration date of Facility License No. R-70 to June 29, 2000, in accordance with the licensee's timely application for renewal dated May 23, 1980.

Prior to renewal of the license, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By September 19, 1980, the licensee may file a request for a hearing with respect to renewal of the subject facility license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petitioner should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference schedules in the proceeding but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter and the bases for each contention set forth with reasonable specificity.

Contentions shall be limited to matters within the scope of the renewal action under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 324-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to James R. Miller: (petitioner's name and telephone number); (date petition was mailed); (University of Maryland); and (publication date and page number of this **Federal Register** notice). A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Dr. John S. Toll, President, University of Maryland, Adelphi, Maryland 20783.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a) (i)-(v) and 2.714(d).

For further details with respect to this action, see the application for renewal dated May 23, 1980, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555.

Dated at Bethesda, Md., this 11th day of August 1980.

For Nuclear Regulatory Commission.

James R. Miller,

Chief, Standardization and Special Projects Branch, Division of Licensing.

[FR Doc. 80-25266 Filed 8-19-80; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-367 CPA]

Northern Indiana Public Service Co., (Bailly Generating Station, Nuclear 1); Hearing on Amendment of Construction Permit Extension

On November 30, 1979, the Nuclear Regulatory Commission published in the **Federal Register** a Notice of Opportunity for Hearing on a Proposed Issuance of an Amendment to Construction Permit CPPR-104 that had been issued to the Northern Indiana Public Service Company (Permittee) for construction of the Bailly Generating Station, Nuclear 1 (the facility), a boiling water reactor to be located 12 miles northeast of Gary, Indiana. The proposed amendment would extend the latest date for completion of the facility from September 1, 1979 to December 1, 1987.

The Notice indicated that the Commission must make the findings required by the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations, including 10 CFR 50.55(b), which requires a showing of

good cause for the extension of the completion date for a reasonable period of time. The Notice determined that Permittee's application for extension had been filed more than thirty (30) days prior to the date for expiration of the permit, as required by the Administrative Procedure Act and 10 CFR 2.109, and that, consequently, the construction permit would not be deemed to have expired until the application has been finally determined.

The Notice also provided that, by December 31, 1979, the Permittee and any person whose interests may be affected by the proceeding might file a request for a hearing with respect to whether, pursuant to 10 CFR 50.55(b), good cause has been shown for the requested extension, *i.e.*, whether the causes put forward by Permittee are among those which the Commission will recognize as bases for extending the completion date. By that date, individual petitions were received from: George Schultz, Local 1010 of the United Steelworkers of America, the Lake Michigan Federation, and the State of Illinois. Joint petitions were also received by that date from a group of petitioners denominated "Porter County Chapter Petitioners", another group denominated "Gary Petitioners", and George and Anna Grabowski. An Atomic Safety and Licensing Board was designated to rule upon intervention petitions and request for hearings, and to preside over the proceeding in the event that a hearing is ordered. The members of the Board are: Mr. Glenn O. Bright, Dr. Richard F. Cole, and Mr. Herbet Grossman who will serve as Chairman of the Board.

On August 7, 1980, the Board granted the petitions of Local 1010 (conditionally), the State of Illinois, Porter County Chapter Petitioners, and George and Anna Grabowski. As a result, a hearing to consider the proposed amendment to construction permit will be held near the site of the Bailly construction, at a time and place to be established.

Limited appearance statements will be heard at the hearing. Members of the public may request permission to make a limited appearance pursuant to § 2.715(a) of the Commission's Rules of Practice, 10 CFR Part 2. Persons desiring to make limited appearances are requested to inform the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A person making a limited appearance does not become a party but may state his position and raise questions which, if relevant, the Board may require be answered by the parties through evidence on the record. Limited appearances will be received at the time of the evidentiary hearing within such limits and on such conditions as may be fixed by the Board.

For further details with respect to this action, see the applications for extension dated February 7, 1979 and August 31, 1979, which are available for public inspection at the Commission's Public Document Room, 1717 H St., NW., Washington, D.C. and at the Westchester Township Public Library, 125 South 2nd Street, Chesterton, Indiana.

By order of the Board.

Dated at Bethesda, Md., this 14th day of August 1980.

For the Atomic Safety and Licensing Board.

Herbert Grossman,

Chairman.

[FR Doc. 80-25270 Filed 8-19-80; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-344]

Portland General Electric Co., (Trojan Nuclear Plant); Director's Decision

By telegram dated May 29, 1980, the Trojan Decommissioning Alliance of Portland, Oregon, requested that the Commission suspend operation of the Trojan Nuclear Plant on the basis of potential dangers posed by recent volcanic activity at Mount St. Helens in Washington State. On June 3, 1980, the Commission referred this request for action to the NRC Staff for consideration under 10 CFR 2.206 of the Commission's regulations. For the reasons stated in this decision, the Alliance's request is denied.

The potential impact of volcanic activity on the safety of the Trojan facility was investigated thoroughly by government geologists (Atomic Energy Commission and the U.S. Geological Survey) before the plant was allowed to be constructed and again before the operating license was issued. This investigation and reassessment of volcanic-related hazards has continued as attested by the affidavit which was filed with the Atomic Safety and Licensing Board in the Trojan spent fuel pool expansion proceeding in April, 1978.

Although this report filed prior to the recent volcanic activity, it is with few exceptions considered an accurate assessment today. Exceptions to the report include (1) the underestimation of volume of debris associated with a potential mudflow, (2) exclusion of a discussion of volcano-induced earthquakes, and (3) the statement that historic data indicates that the volcano has been substantially more active in the 19th century than the 20th century. Notwithstanding the above exceptions, the report's conclusion that the Trojan site is suitable from a volcanic hazards point of view remains accurate.

The recent massive eruption of May 18, 1980 exceeded that envisioned by the Nuclear Regulatory Commission and by our advisors, the U.S. Geological Survey. Nevertheless, the effects of the recent volcanism (mudflows, earthquakes and ashfall) at the Trojan site have been minimal. Mudflows in the Toutte, Kalama, and Lewis River valleys have not comprised the safety of the Trojan plant. Volcanic-induced earthquakes have been small and have neither been felt nor recorded instrumentally at the site. Ashfall at the Trojan plant resulting from the May 25, 1980 eruption has been slight (not exceeding ⅛ of an inch) and fell at the site in the form of a muddy rain or mist. The only other indication of ash occurred on April 29, 1980 when a thin coating of the ash was noted at the Trojan site.

According to University of Washington seismologists, the volcanic-induced earthquakes mentioned previously have not exceeded Richter Magnitude 5.1 and have been concentrated in an area roughly coincidental with the volcano crater which is 35 miles northeast of the Tojan plant. None of the larger events (Magnitude 5.0 and above) have occurred closer than 35 miles to the plant. For the most part, the volcanic earthquakes have occurred as shallow depths and have consequently been felt only in the immediate vincinity of the seismic event. However, there have been unconfirmed reports of volcanic-related earthquakes (originating at Mount St. Helens) being felt in the Longview-Kelso, Washington area, roughly five miles north of the Trojan plant. Apparently those feeling the tremors were located in areas where soil overlies bedrock. The plant is designed to safely withstand seismic levels of 0.25g peak ground acceleration. This corresponds to earthquake levels many times greater than those generated by the volcano-induced earthquakes.

We have been in constant contact with numerous state, governmental agency, and university scientists since initiation of earthquake activity and subsequent volcanic activity in the vincinty of Mount St. Helens on March 20, 1980. This surveillance, accumulation of information, and assessment will continue as long as the volcano remains active. In addition, representatives of the NRC staff visted the Trojan site and environs on June 18, 1980 for the specific purpose of assessing the safety of Trojan in light of the recent volcanic activity.

Our conclusion, based upon an evaluation of volcanic phenomena prior to construction, coupled with an assessment of the effects of the activity beginning March 20, 1980, is that the Trojan site remains suitable from a volcanic hazards viewpoints.

As to evacuation under severe ashfall conditions, this can cause transportation problems somewhat similar to those produced by road icing or heavy snowfall. The first protective action to be taken following a radiological emergency at a nulcear facility is to alert the public to take shelter and await further instructions. Seeking shelter in homes is an effective protective measure under most circumstances. A decision to evacuate is based on an assessment of the potential injury to the public from the accident and must be balanced against the risk to the public from the evacuation itself and against the conditions that prevail at the time. Seeking shelter would have to be given greater weight under ashfall conditions, depending on its severity.

Beyond about five miles, sheltering following by relocation within several hours is essentially as effective as immediately evacuation. Within five miles, sheltering is still an effective protective measure. Under ashfall conditions, consideration would have to be given to limiting the evacuation area, depending on the exact circumstances. This would reduce the difficulty of evacuating those persons exposed to the greatest risk.

Therefore, if an accident occurred in combination with transportation difficulties due to severe volcanic ashfall, effective protecting measures can still be implemented, albeit with greater difficulty. The probability of these two events occurring simultaneously is, however, extremely low.

Based on the foregoing, your request on behalf of the Trojan Decommissioning Alliance that operation of the Trojan Nuclear Plant be suspended on the basis of the recent volcanic activity at Mount St. Helens is denied.

Dated at Bethesda, Md., this 13th day of August 1980.

Edson G. Case,

Acting Director, Office of Nuclear Reactor Regulations.

BILLING CODE 7590-01-M

[Docket No. 50-29]

Yankee Atomic Electric Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amemend No. 61 to Facility Operating Licenses No. DPR-3, issued to Yankee Atomic Electric company (the licensee), which revised the license and its appended Technical Specifications for operation of the Yankee Nuclear Power Station (Yankee-Rowe) (the facility) located in Rowe, Franklin County, Massachusetts. The amendment is effective as of its date of issuance.

The amendment deletes the technical specifications for secondary water chemistry and incorporates a new license condition in the license, paragraph 2.C(5), for implementation of a secondary water chemistry monitoring program which inhibits steam generator tube degradation.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated September 24, 1979 (Proposed Change No. 167), (2) Amendment No. 61, to License No. DPR-3, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director Division of Licensing.

Dated at Bethesda, Md., this 21st day of July 1980.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Chief, Operating Reactors Branch No. 5, Division of Licensing.

BILLING CODE 7590-01-M

Draft Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a new guide planned for its Regulatory Guide series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, OH 710-4 (which should be mentioned in all correspondence concerning this draft guide), is entitled "Health Physics Surveys in Uranium Mills" and is intended for Division 8, "Occupational Health." It is being developed to describe health physics surveys acceptable to the NRC staff for protecting uranium mill workers from radiation and the chemical toxicity of uranium while on the job.

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review and do not represent an official NRC staff position.

Public comments are being solicited on both drafts, the guide (including any implementation schedule) and the draft value/impact statement. Comments on the draft value/impact statement should be accompanied by supporting data. Comments on both drafts should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, by October 20, 1980.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

V 45 AG 2080 UMI

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Md., this 11th day of August 1980.

For the Nuclear Regulatory Commission.

Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 8.25, "Calibration and Error Limits of Air Sampling Instruments for Total Volume of Air Samples," identifies methods for calibrating air sampling instruments used to assess the air concentration of radioactive materials and provides guidance for measuring within certain limits the volume of air sampled. This guide endorses and supplements a manual, "Air Sampling Instruments for Evaluation of Atmospheric Contaminants," 5th Edition, 1978, published by the American Conference of Governmental Industrial Hygienists.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Copies of active guides may be purchased at the current Government Printing Office price. A subscription service for future guides in specific divisions is available through the Government Printing Office. Information on the subscription service and current prices may be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Publications Sales Manager.

OFFICE OF MANAGEMENT AND BUDGET

President's Commission for a National Agenda for the Eighties; Meeting

August 14, 1980.

AGENCY: Office of Management and Budget.

ACTION: Notice of meetings.

SUMMARY: Pursuant to Pub. L. 92-463, notice is hereby given for a meeting of Panel VII (Electoral Process) of the President's Commission for a National Agenda for the Eighties. The meeting is scheduled for August 27, 1980, from 3:30 p.m. to 6:00 p.m., in room 9104 of the New Executive Office Building, in Washington, D.C.

The purpose of the meeting is to discuss the panel's option paper on the Presidency and the Executive branch.

Available seats will be assigned on a first-come basis.

The meeting will be open to the public.

FOR FURTHER INFORMATION CONTACT: President's Commission for a National Agenda for the Eighties, Office of Administration, 744 Jackson Place, Northwest, Washington, D.C. 20006, (202) 275-0616.

Brenda Mayberry,

Acting Budget and Management Officer.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Trade Policy Staff Committee; Articles Being Considered for Possible Duty Modification

Correction

In FR Doc. 80-23950 appearing at page 52978 in the issue of Friday, August 8, 1980, make the following corrections to Annex I:

(1) On page 52979, TSUS item 118.30 should be followed by footnote reference " 1".

(2) On page 52979, item 517.91 is listed twice but should be listed only once.

(3) Also on page 52979, item 603.30 was left out and should be inserted in its correct numercial order.

(4) On page 52980, at the end of Annex I insert the following footnote texts:

[1] Only goat's milk products not containing any other type of milk.

[2] Only pineapple and quince pastes and pulps.

[3] Only sauces other than tomato.

BILLING CODE 1505-01-M

SMALL BUSINESS ADMINISTRATION

Availability of Fiscal Year 1980 Funds for Continuation of Data Base Development Design With Specific Application to Large Micro Data Files

AGENCY: Small Business Administration, Office of Advocacy.

ACTION: Notice.

SUMMARY: The Office of Economic Research, Office of Advocacy announces availability of FY 80 funds to continue its data base development work. Under Public Law 94-305, passed in 1976, funds will be awarded as cooperative agreements which means that substantial performance involvement between the Small Business Administration and the recipient is anticipated. Any person or group outside the Federal Government may submit a proposal. This notice sets forth: (1) conditions under which proposals will be evaluated to determine relevance to the project objectives; (2) filing dates; (3) funding; and (4) recommended format.

Vendor meeting was held on August 1, 1980.

DATE: Applications and accompanying proposals must be received no later than August 22, 1980.

ADDRESS: Small Business Administration, Office of Economic Research 1441 L Street N.W. (Room 1100 Vermont Building), Washingotn, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Dr. William Whiston, or Mr. David Hirschberg, telephone (202) 634-4885.

SUPPLEMENTARY INFORMATION:

A. Program Objectives

Under Public Law 94-305, and more recently under S. 2698 (the Small Business Economic Policy Act), the Office of Economic Research is requested in Section 303 of the latter to "examine the current role of small business in the economy on an industry-by-industry basis and * * * " to identify economic trends which will or may affect the small business sector and the state of competition." In Section 401, the Office is requested by the Congress to provide data on "employment layoff and new hires; * * * sales and new orders; * * * debt to equity ratios" * * * among others.

This data will provide: (1) the most comprehensive, and up-to-date list of businesses in the United States; (2) a unique file of current economic and trend data which has undergone a rigorous series of imputations, tests, and benchmarking; and (3) and opportunity for future model buildings and relevant policy analyses by researchers, on and as needed basis.

B. Scope and Purpose of this Announcement

This announcement initiates the second and third phases of the Data Base Development Design. The Office of Economic Research perceives three separate projects in the second and third phases as described below. An applicant may submit a proposal on one, two, or all three projects, but each project must be applied for separately and the applicant should clearly identify which project it is they are applying for with each submission.

C. Projects

1. *Creation of an initial data base*—Much of this task has already been completed by the Brookings Institution, who will be working along with recipients of awards of this program announcement. The major files with which Brookings has been working are the Dun and Bradstreet 4.3 million record Market Identifier File and the Duns 1.0 million record Financial Statistics File. In addition, there are smaller subsets to each of these files. The tasks under this sub-heading suggest a plan for continued testing of these files for reliability of the data, choosing stratified samples for the files, updating missing employment, sales and asset data by appropriate statistical techniques, and constructing a longitudinal study of firm births and deaths from the files. To assist an applicant to prepare a proposal for this Program Announcement, the progress reports of the Brookings Institution will be made available.

2. *Coordination of above work with that of the Brookings Institution*—The applicant's plan should reflect the coordination of all research with both SBA's research needs and those of the Brookings Institution. Brookings will continue to play a major role in evaluating the progress and performance of the above work. The applicant's proposal must describe a plan to benchmark the Dun and Bradstreet data files with other published and unpublished government sources, and the applicant should include a plan which encompasses the comparability of reporting units such as those for taxpaying work, enterprises, and establishment, as they affect comparisons among data sources.

The software and hardware configurations are crucial aspects to this part of the proposal. The computer language used should be protable, as should the hardware.

3. *Experimented Testing of an Augmented Duns File*—The Office of Economic Research, Office of Advocacy is developing an Indicative Data Base which will be an *up-to-date comprehensive listing* of all relevant businesses in the United States. This involves augmenting the Dun and Bradstreet data files by adding approximately 2 million records (2 million is roughly the difference between the number of establishments in the Duns Market Identifier File and the business list data sold by commercial firms). The applicant should indicate how this matching should be done, and how they plan to test this augmented file against other specified files—such as those of the Department of Labor's Wage and Benefit program, the Unemployment Insurance system and the Internal Revenue Service's files.

D. Eligible Applicants

Any non-Federal public or private, profit or no-profit entity or individual is eligible to apply for a cooperative agreement under this announcement. Preference will be given to small business applicants.

E. Funding

For Fiscal Year 1980, the Office of Economic Research has $800,000 for funding the three projects described above. The Office of Economic Research anticipates that this will be a 5-year study; the initial budgeting, however, will be for a 1-year period. With satisfactory progress, the agreement may be renewed in succeeding years, depending on the availability of funds. A cooperative agreement may be continued, therefore, on a non-competitive basis for future years. Any proposal submitted on a multi-year basis should contain a detailed proposal for the initial year which funding is requested, plus an outline of planned activities and expected costs for succeeding years.

Acceptable proposals which cannot be funded in FY 80 will be retained and considered for FY 81 funding.

F. Review Criteria

All proposals received as a result of this solicitation will be evaluated both by a panel of experts inside the Small Business Administration and an outside panel of academic, government, and small business persons. The following factors will be used to score the proposals:

(1) The methodology should be well-defined, logically constructed, reasonably documented, and appropriate to the project: 20%.

(2) The extent to which the proposal exhibits an understanding of existing work in this and related areas of research, including data resources and limitations relevant to the proposed topic: 15%.

(3) The promise of the proposal for assistance within reasonable timeframes to gather data for Federal and non-Federal entities for the purpose of providing economic reasearch concerning the well-being of small business: 10%.

(4) The appropriateness of the project within the constraints of the facilities available and the qualifications of the personnel involved: 10%.

(5) The adequacy of the project in terms of level of effort, time, costs, organization, and management of the project: 10%.

(6) The firm submitting the proposal(s) is a small business which is defined as having average annual receipts not in excess of $2 million for the past three fiscal years: 15%.

(7) Small business status: 20%.

G. Recommended Format

Applications are to be submitted on Standard Form #424 along with the requisite number of signed copies of "Assurances and Certifications." Forms may be obtained from the following: Grants Management Officer, Small Business Administration, 1441 L Street N.W. (Room 221), Washington, D.C. 20416, Telephone (202) 653-7744. All proposals should contain the following elements:

(1) *Cover Page.*

Research proposals should be cleared through the execute officer who has the

where specific tasks and results may be influenced by factors beyond the control

Dated: August 14, 1980

and have responded to them by revising the policy with respect to CDC's as

disclosure of information became effective August 1, 1980.

and Rulings. However, personnel from other Customs offices participated in its

Research proposals should be cleared through the execute officer who has the power to bind firms or institutions. One copy must be signed, in the space provided on the cover, by the principal investigator, the department chairman (if appropriate), and the authorized financial officer in the following suggested format:

Title of Proposal _____
Name of Principal Investigator(s) _____
Total cost of Proposal _____
Period of Proposal _____
Organization or Institution and Department _____
Required Signatures _____
Principal Investigator(s) _____
Name _____
Date _____
Address _____
Telephone Number _____
Required Organization Approval:

Telephone Number _____

(2) *Project Description.* Each proposal shall provide, in ten pages or less, a complete and accurate description of the proposed project. This section should provide the basic information to be used in evaluating the proposal to determine its priority for funding. The information provided in this section must be brief and specific. Detailed background information may be included as supporting documentation to the proposal.

The following format shall be used for the project description:

a. *Project Goals and objectives.* The projects's objectives must be clearly and unambiguously stated. To the greater extent possible, they should be stated in quantitative terms or other descriptors that can be measured.

b. *Project Outline.* The proposal should clearly define the tasks that are to be performed, the key events or milestones in accomplishing the task schedule, and the feasibility of achieving these events or milestones.

c. *Project management.* The proposal should describe how the project will be organized and managed, and should list those persons or groups assigned to the project along with their qualifications and their level of involvement in the project.

d. *Project Evaluation.* The proposal must describe how the progress of the project will be monitored and evaluated while the project is underway and upon completion. It must also indicate what actions the applicant will undertake in the event project objectives becomes unattainable. This is particularly important for demonstration projects where specific tasks and results may be influenced by factors beyond the control of the applicant.

e. *Project Costs.* The proposal must provide a detailed schedule or project costs, identifying in particular:

(a) Salaries and Fringe Benefits.
(b) Equipment.
(c) Travel.
(d) Publication costs.
(e) Other direct costs (specify).
(f) Indirect costs (attach negotiated agreement).
(g) Total Costs.

(3) Supporting Documentation. The supporting documentation should contain any additional information that will strengthen the proposal.

H. Financial Information

(1) Account Identification—73–0100–0–1–376.

(2) Federal Catalog of Domestic Assistance Identification—#59.034.

Dated: August 14, 1980.

BILLING CODE 8025-01-M

[License No. 01/01-0306]

Maine Capital Corp.; Issuance of License To Operate as a Small Business Investment Company

On July 16, 1980, a notice was published in the **Federal Register** (45 FR 47775) stating that Maine Capital Corporation, One Memorial Circle, Augusta, Maine 04330 had filed an Application with the Small Business Administration, pursuant to Section 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1980)), for a license to operate as a small business investment company.

Interested parties were given until the close of business on July 31, 1980, to submit written comments on the Application to the SBA.

Notice is hereby given that no written comments were received, and having considered the Application and all other pertinent information, the SBA approved the issuance of License No. 01/01–0306 on August 7, 1980, to Main Capital Corporation, pursuant to Section 301(c) of the Small Business Investment Act of 1958, as amended.

BILLING CODE 8025-01-M

Implementation of Economic Opportunity Act, as amended by Pub. L. 95–568

AGENCY: Small Business Administration.

ACTION: General notice.

Section 742(a)(2) of the Economic Opportunity Act, as amended by section 14j of Pub. L. 95–568, 42 U.S.C. 2985a(2)(a), provides that the Administrator of the Small Business Administration (SBA) after consultation with the Director of the Community Services Administration (CSA) shall promulgate regulations to insure the availability to community development corporations (CDC's) of such of SBA's programs as will further the purposes of the Economic Opportunity Act. A controversy over the effect of this section has existed between CSA and SBA since its passage in 1974. This controversy culminated in a lawsuit brought by a CDC and a small business to, among other things, compel SBA to permit the small business to enter SBA's section 8(a) program.

Pursuant to a settlement agreement entered into by SBA and the other parties to that lawsuit, SBA agreed to consult with CSA and draft proposed regulations to implement section 742(a)(2) of the Economic Opportunity Act.

The consultation process has taken place. During that process, CSA advised SBA of four specific SBA policies which it suggested should be altered by regulation, or otherwise, in order to insure that SBA's programs would be available to CDC's. These policies included:

1. SBA's affiliation rule and its effect on CDC participation in SBA programs;
2. SBA's section 8(a) program eligibility requirement that the ownership, management and daily business operations of applicants be controlled by socially and economically disadvantaged persons;
3. SBA policy that $150,000 of the required $500,000 "private capital" for entry into the Small Business Investment Company and section 301(d) licensee programs must be non-Federal.
4. SBA policy that CDC-owned businesses cannot apply for any loan programs for which their CDC has acted as a "packager."

The pertinent program offices within SBA has considered CSA's suggestions,

and have responded to them by revising the policy with respect to CDC's as packagers of loans for buisnesses in which they own interests. In this regard, a letter so advising has been prepared to be sent to CSA and appropriate changes in SBA's internal standard operating procedures are being made. In addition, two proposed regulations have been drafted dealing with CDC eligibility for SBA's section 8(a) program and Small Business Investment Company program. These proposed regulations are published elsewhere in this issue. Finally, SBA has chosen not to alter its affiliation policy, and a letter to that effect has also been prepared to be sent to CSA which explains the basis for that decision.

Dated: August 11, 1980.

William H. Mauk, Jr.

Acting Administrator.

BILLING CODE 8025-01-M

DEPARTMENT OF THE TREASURY

Customs Service

Disclosure of Information on Export Documents; Shipper's Certification of Confidentiality

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: General notice.

SUMMARY: This notice advises the exporting community of the provisions of a new law which changes the procedures a shipper must follow in order to request that Customs not disclose to the public the shipper's name and address from documents submitted to Customs in connection with exports from the United States. Customs will publish a final rule document at a later date amending the Customs Regulations to implement those procedural changes.

FOR FURTHER INFORMATION CONTACT: Doris B. Robinson, Freedom of Information and Privacy Branch, Office of Regulations and Rulings, U.S. Customs Service, 1301 Constitution Avenue NW, Washington, D.C. 20229 (202–566–8681).

SUPPLEMENTARY INFORMATION:

Background

Public Law 96–275, which was published as T.D. 80–184 in the Customs Bulletin of July 23, 1980, an Act "to protect the confidentiality of Shippers' Export Declarations and to standardize export data submission and disclosure requirements," was enacted by Congress on June 17, 1980. The provisions of that law relating to disclosure of information became effective August 1, 1980.

Section 2 of the law provides that the name and address of a shipper contained in an outward foreign manifest or documents attached to the manifest will be subject to public disclosure unless the shipper has made a biennial (every two years) certification to Customs claiming confidential treatment for that information.

New Customs Procedures

To implement the many changes required by the law, Customs will amend its regulations contained in title 19, Code of Federal Regulations, Chapter I (19 CFR Chapter I), in a final rule document to be published in the **Federal Register** at a later date. However, as regards the new certification requirement imposed by the law, Customs considers it advisable to notify members of the exporting community of changes in disclosure of information procedures by this document.

Effective August 1, 1980, if a shipper wishes to request confidential treatment by Customs of his/her name and address, the following procedures will be used:

1. A shipper, or authorized employee or official of the shipper, must submit a certification claiming confidential treatment of the shipper's name and address.

2. There is no prescribed format for a certification.

3. The certification must be submitted to the Regional Commissioner for the Region in which the port of exportation is located.

4. Each certification will be valid for a period of two (2) years from the date of its submission to Customs.

Existing Shipper's Claims For Confidentiality

A shipper who, before August 1, 1980, had applied for and obtained Customs approval of a claim for confidential treatment of the shipper's name, must submit to Customs a new "certification" claiming confidentiality of the shipper's name and address if desired, following the procedure described above. However, claims of confidentiality made by a shipper and already approved by Customs will continue in effect until 60 days after the publication in the **Federal Register** of the final rule document (Treasury Decision) amending the Customs Regulations to implement the new law.

Drafting Information

The principal author of this document was Todd J. Schneider, Regulations and Research Division, Office of Regulations and Rulings. However, personnel from other Customs offices participated in its development.

Dated: August 13, 1980.

R. E. Chasen.

Commissioner of Customs.

[T.D. 80–212]

Florasynth, Inc.; Recordation of Trade Name

On June 11, 1980, there was published in the **Federal Register** (45 FR 39609) a notice of application for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name FLORASYNTH, INC. The notice advised that prior to final action on the application, filed pursuant to § 133.12, Customs Regulations (19 CFR 133.12), consideration would be given to relevent data, veiws, or arguments submitted in opposition to the recordation and received not later than 30 days from the date of publication of the notice.

The name "FLORASYNTH, INC." is hereby recorded as the trade name of Florasynth, Inc., a corporation organized under the laws of the State of new York, located at 410 East 62nd Street, New York, New York 10021, when applied to essences and aromatic ingredients used as bases for cosmetics, toilet preparations, perfumes and colognes, and as flavor in foods, beverages and tobacco products; essential oils, used as an odorant to mask disinfectants, insecticides, and similar products; extracts, flavors, oils and emulsions for use in making soft drink syrups and bases; non-alcoholic preparation for producing a foam in soft drinks and a flavoring agent used in the preparation of root beer; orange compound adapted to produce a cloud in non-alcoholic, malt-less soft drink beverages and having flavoring ingredients; natural and synthetic organic flavors, extracts, oils, and blenders for alcoholic beverages; imitation vanilla bean flavor; grapefruit juice powder, lemon juice powder, lime juice powder, orange juice powder, and brown sugar powdered flavor; citrus oils for food purposes; onion powder and garlic powder; and coffee, manufactured in Brazil, Canada, England, France, Japan, Mexico and the United States. Various foreign subsidiaries are authorized to use the trade name.

Dated: August 14, 1980.

Salvatore F. Caramagno,

Director, Office of Management Services.

Approved: August 12, 1980.

By direction of the Administrator.

Richard J. Morrison,

Assistant Administrator for Administration.

BILLING CODE 4810-22-M

VETERANS ADMINISTRATION

Privacy Act of 1974; Systems of Records

Privacy Act of 1974 (5 U.S.C. 552a(e)(4)) requires that all agencies publish in the **Federal Register**, a notice of the existence and character of their systems of records. Accordingly, the Veterans Administration published and adopted a notice of its inventory of personal records of September 27, 1977 (42 FR 49728).

Notice is hereby given that the Veterans Administration is adding a new system of records entitled "Resident Engineer Assignment System (REAS)" (62VA08). This system is authorized under Title 5 U.S.C. Section 301 and Title 38 U.S.C. Sections 210(c) and 219.

The purpose of this new system of records is to aid in the assignment of Resident Engineers and clerical support staff to supervise VA construction sites. The data in the records will include various personal and professional information such as areas of preference, VA experience, states in which licensed, family information, etc. The data will be used exclusively in permitting the efficient scheduling of assignments of Resident Engineers and their clerical support staff to construction sites with the maximum utilization of these personnel with a minimum of relocation. No disclosures of this information will be made outside the agency.

The use of the information and data in this system is restricted solely to the office of the system manager and does not have any routine uses as defined by the Privacy Act of 1974 (5 U.S.C. 552a(a)(7)). Therefore, the requirement to give 30-days prior public notice before compiling this new system does not apply.

A "Report of New System" and an advance copy of the revised system notice were sent on June 24, 1980, to the Speaker of the House, the President of the Senate, and the Office of Management and Budget, as required by the provision of 5 U.S.C. 552a(o) of the Privacy Act and guidelines issued by the Office of Management and Budget (40 FR 45877), October 3, 1975.

Notice is hereby given that this description is effective the date of approval by the Administrator of Veterans Affairs (August 12, 1980).

Approved: August 12, 1980.

By direction of the Administrator.

Maury S. Cralle, Jr.,

Associate Deputy Administrator.

SYSTEM NAME:

Resident Engineer Assignment System, 62VA08.

SYSTEM LOCATION:

Records are maintained in the Office of Construction, Cental Office, Veterans Administration, Washington, D.C., 20420.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Resident Engineers and their clerical staff currently employed by the Veterans Administration Central Office and assigned to nationwide construction site supervision responsibilities.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records include information such as station assignment, last relocation date, states in which licensed, area or preference, address, family, grade and last promotion date, employment date, and VA experience. Only records that permit efficient scheduling assignments of Resident Engineers and their clerical staff to construction sites and that will maximize utilization of these personnel with a minimum of relocations will be maintained.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title 5 U.S.C. Section 301, Title 38 U.S.C., Sections 210(c), 219.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

(a) Magnetic tape at the VA Central Office.

(b) Paper documents at the VA Central Office.

RETRIEVABILITY:

Records are indexed by name of the employee and filed alphabetically.

SAFEGUARDS:

Physical Security: Maintained under lock and key in file cabinets. Access to files is restricted to Resident Engineer assignment officials on a need to know basis. The file area is locked after duty hours and protected from unauthorized access by the Federal Protective Service.

RETENTION AND DISPOSAL:

Records are maintained for the duration of employment of the Resident Engineers and clerical staff. When the employee leaves the Office of Construction the records are destroyed in accordance with approved VA procedures.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Information Systems Staff, Office of Construction, Veterans Administration, Washington, D.C. 20420.

NOTIFICATION PROCEDURE:

An individual seeking information concerning the existence of records or the contents of records on him or her must furnish a written request or apply in person at the Office of the Director, Resident Engineer Staff, Office of Construction, Veterans Administration, Washington, D.C. 20420. The individual must reasonably identify the system of records and provide his or her full name.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Questionnaires completed by Resident Engineers and their clerical staff, and from present Resident Engineer staff assignment records.

CIVIL AERONAUTICS BOARD.

[M-289, August 14, 1980]

TIME AND DATE: 9:30 a.m., August 21, 1980.

PLACE: Room 1027, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

SUBJECT:

1. Ratification of items adopted by notation.
2. Docket 38278, Southwest Airlines notice to terminate service at Beaumont/Port Arthur, Texas. (Memo No. 9864, BDA, OCCR)
3. Dockets 38412 and 38413, Braniff Airways 90-day notice of termination of all service at Cleveland, Ohio and Milwaukee, Wisconsin. (BDA, OCCR) (Memo No. 9870)
4. Docket 38547, United Air Lines notice under section 401(j)(2) to suspend nonstop or single-plane service in 34 markets. (BDA, OCCR) (Memo No. 9869)
5. Docket 34681, proposed final 419 rate of compensation for Air North service at five Upstate New York points. (Memo No. 8486-N, BDA, OCCR)
6. Docket 34802, Wien Air Alaska, Inc. Intra-Alaska Service Mail Rates. (Memo No. 9210-A, BDA)
7. Docket 37588, Palm Beach Environmental Study. (Memo No. 9446-E, 9446-F)
8. Docket 32660, Petition of the International Airforwarder Agents Association for review of staff action. (Memo No. 9865, BIA)
9. Dockets 35634 and 32660, IATA petition for reconsideration of Order 80-4-75. (Memo No. 9567-A, BIA)
10. Docket 37286, Application of Saudi Arabia Airlines Corporation for amendment of its foreign air carrier permit to add Houston, Texas and coterminalize its U.S. points. (BIA, BCP, OGC, BALJ)
11. Docket 37580, Application of TACA International Airlines, S.A. for an amendment to its foreign air carrier permit to operate scheduled all-cargo service. (Memo 9868, BIA, OGC, BALJ)
12. Docket 36916, Application of Redcoat Air Cargo Limited for foreign charter air carrier permit to carry cargo between the United States and the United Kingdom. (BIA, OGC, BALJ) (Memo No. 9867)
13. Docket 33220, Yucatan Service Case. (Instructions to staff)

STATUS: Open.

PERSON TO CONTACT: Phyllis T. Kaylor, the Secretary, (202) 673-5068.

NATIONAL RAILROAD PASSENGER CORPORATION.

(Board of Directors)

In accordance with Rule 4a. of Appendix A of the Bylaws of the National Railroad Passenger Corporation notice is given that the Board of Directors will meet on August 27, 1980.

A. The meeting will be held on Wednesday, August 27, 1980, in the National Guard Association Building, 3rd Floor, One Massachusetts Avenue, Northwest, Washington, D.C., beginning at 9:30 a.m.

B. The meeting will be open to the public at 10:30 a.m. beginning with agenda item No. 3, as described below.

C. The agenda items to be discussed at the meeting follow.

Agenda—National Railroad Passenger Corporation

Meeting of the Board of Directors, August 27, 1980

Closed Session (9:30)

1. Internal Personnel Matters.
2. Litigation Matters

Open Session (10:30)

3. Approval of Minutes of Regular Meeting of July 30, 1980.
4. Ratify Appointment of Director to Committee.

5. Approval of Consulting Contract for the Design and Implementation of the ARTS Replacement Project.
6. Commitment Approval Requests:
80–165 Retirement and sale of five overage GG1 electric locomotives.
80–157 New Orleans—Modernize and rehabilitate equipment washing facilities.
80–169 Hialeah/St. Petersburg—Provide 480 volt standby service for HEP trains.
80–183 Acquire facility for the Amtrak Institute for Rail Services.
80–184 Purchase Conrail portion of Chicago joint track.
78–33–R1 Modernization of Beech Grove—Phase III.
76–294–S5 Fiscal year 1981 Northeast Corridor purchase.
7. Resolution Adopting Equipment Retirement Policy.
8. Film Presentation: Amtrak TV News.
9. Board Committee Reports:
Equipment.
Finance.
Legal affairs.
Northeast Corridor improvement project.
Organization and compensation.
10. President's Report.
11. New Business.
12. Adjournment.

D. Inquiries regarding the information required to be made available pursuant to Appendix A of the Corporation's Bylaws should be directed to the Assistant Corporate Secretary at (202) 383–3991.

Barbara J. Willman,

Assistant Corporate Secretary.

20 CFR Parts 404 and 416

[Regs. Nos. 4 and 16]

Federal Old Age, Survivors, and Disability Insurance Benefits; Supplemental Security Income for the Aged, Blind, and Disabled

AGENCY: Social Security Administration, HHS.

ACTION: Final rules.

SUMMARY: The Department of Health and Human Services has revised the regulations in Subpart P of Part 404 and Subpart I of Part 416 to make them clearer and easier for the public to use. These subparts contain the rules for determining disability and blindness under titles II and XVI of the Social Security Act. We have completely reorganized and rewritten these rules in simpler, briefer language.

We have updated these regulations by including certain policies which we are now following in evaluating disability and blindness. We have also changed the provisions on the amount of earnings we consider representative of substantial gainful activity and on the monetary amount we do not count for trial work period purposes.

These final regulations do not include the regulatory changes which will be required by the recently enacted Social Security Disability Amendments of 1980, Pub. L. 96–265. The changes that we will have to make to our regulations because of this recent legislation will, in general, not change the substance of the policies in these final rules, including policies already being followed which we are placing in our regulations for the first time. We will, however, be making modifications in some limited areas, such as to our policy on the purchase of medical evidence in title II cases, the trial work period, substantial gainful activity, and vocational rehabilitation. We will publish these changes either with notice of proposed rulemaking or as interim regulations, as appropriate, so that the public will have full opportunity to provide views and comments before final rules are adopted.

DATES: These regulations will be effective August 20, 1980.

FOR FURTHER INFORMATION CONTACT: Harry J. Short or William J. Ziegler, Legal Assistants, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, MD. 21235, telephone 301–594–7337 or 301–594–7415.

SUPPLEMENTARY INFORMATION:

Revising the Disability Regulations

We have completely revised the regulations under "Operation Common Sense" and in accordance with Executive Order 12044. These regulations describe how we determine disability and blindness for the purpose of paying benefits under the disability insurance program (Part 404) and supplemental security income program (Part 416). These regulations explain (1) the requirements for receiving cash benefits based upon disability or blindness and for getting a "period of disability," (2) the evidence a person must give us when applying for benefits or a "period of disability," (3) how we evaluate the evidence to make a disability or blindness determination on a claim, (4) what we need to know and what a person must do after beginning to receive benefits, and (5) the factors we consider when determining whether a person will continue to receive these benefits or have a period of disability continue.

In order to obtain the public's views and comments before proceeding with these amendments, we published these regulations along with a Notice of Proposed Rulemaking in the Federal Register on July 3, 1979 (44 FR 38879). On March 23, 1979, we published, at 44 FR 17654, interim regulations setting the substantial gainful activity (SGA) level amounts for 1978 and 1979. Then on March 18, 1980, we published, at 45 FR 17131, interim regulations setting the substantial gainful activity level amount for 1980 and thereafter. We have carefully considered all the comments pertaining to the proposed amendments and the interim regulations on the 1978 and 1979 substantial gainful activity earnings guidelines, and we have answered the issues raised in these comments later in the preamble. We will respond to any comments on the 1980 SGA amounts when we publish those regulations in final form. Although we are not finalizing the 1980 figures at this time, we are including them in this recodification since the 1980 figures do have interim effectiveness.

Our Goals

We have rewritten the disability regulations to make them easier to read and understand. We have tried to remove legalistic language and bureaucratic jargon, and to define the terms we use in simpler language. We have also rearranged the sections to make it easier for persons to find information for which they may be looking.

We have also taken out of the regulations policies which we no longer follow or which we very seldom use. For example, we have deleted the rules for determining disability in 1965 and earlier, before the law was changed.

At the same time we have added to the regulations certain policies which we are now following in determining disability. These are based on provisions of the law and should be included in the regulations. Most of these policies are already in our Program Operations Manual, which State and Federal employees use when evaluating disability. This manual is available for anyone to see at any of our local social security offices. We are also putting into the regulations other policies we have adopted based on our experience in evaluating disability claims over many years. These policies will now clearly apply to all determinations, including appeals.

While legislation has recently been enacted which will require changes in disability regulations, we have not attempted to include any of these changes in this recodification. As previously explained, the purpose of this recodification is to rewrite and clarify existing regulations and incorporate a number of policies (not previously part of our regulations) that we follow in evaluating disability and blindness.

We will publish proposed regulations implementing changes required by this new legislation as Notices of Proposed Rulemaking or as Interim regulations as soon as possible.

Policies We Are Including in the Regulations for the First Time

What We Mean by an Impairment That Is Not Severe

To receive disability benefits, a person must have a severe impairment. We deny a disability claim if we find that a person does not have a severe impairment. In §§ 404.1521 and 416.921, we explain in more detail that an impairment is not severe when it does not significantly limit a person's physical or mental ability to do those things needed to work. For the first time, we explain what abilities we consider necessary in order for a person to work.

When a Person Has Two or More Impairments—Initial Claims

To get disability benefits or establish a period of disability, a person must have a severe impairment, and the impairment must either be expected to result in death or to last for 12 continuous months or longer. In

§§ 404.1522 and 416.922 we explain that, when a person has two or more impairments, we will evaluate them together to see if they are severe enough to keep the person from doing substantial gainful activity. However, in doing this evaluation, we will only include impairments which are expected to result in death or to last for 12 months or longer.

The Meaning of Medical Equivalence

When a person has a severe impairment which is one that is shown in our Listing of Impairments in Appendix 1 or is medically equivalent (equal) to one shown there, we consider that person disabled if he or she is not doing substantial gainful activity. We explain in §§ 404.1526 and 416.926 how we decide whether an impairment is equal to a listed impairment. If a person's impairment is not listed, we will consider the listed impairment most like the person's impairment to decide whether it is medically equal. If the person has more than one impairment, and none of them meets or equals a listed impairment, we will review the symptoms, signs, and laboratory findings about the impairments against the listed impairments most like the person's impairment. We will then decide whether we can consider the combination of impairments medically equal to any listed impairment.

Medical Evidence of Disability

We have stated more clearly what we consider acceptable medical evidence by listing acceptable sources and by describing the required content of medical evidence (See §§404.1513 and 416.913). We have also added osteopaths, optometrists, and psychologists to the list of acceptable medical sources.

When We Will Purchase Medical Evidence

There has been some confusion about our policies on when we will pay for medical evidence. In § 416.914 we explain that we will usually pay for medical evidence for a person who is applying for supplemental security income benefits based on disability or blindness. We will always pay for this medical evidence when we decide that we need it to make a determination of disability or blindness. We may pay for the evidence in other situations. In § 404.1514 we explain when we will pay for medical evidence for a person who is applying for title II disability benefits. We pay for if only in limited situations.

Consultative Examination at Our Expense

Sometimes we must arrange a special medical examination for a person to get the information we need to make a determination. In §§ 404.1517 and 416.917, we explain when we may ask a person to go for one of these special examinations. Frequently, we need more detailed medical information or a technical, specialized medical test which a person's treating physician cannot give us or do for us. Sometimes, we must resolve a conflict or difference in medical findings in the evidence we already have. In these sections we also point out that we will give the examiner information about the person we are sending for the examination. We will always tell the person the purpose of the examination and the name of the examiner before the examination.

Failure To Appear at a Consultative Examination

If a person does not go to an examination so that we do not get information we need to determine disability or blindness, we may find that the person is not disabled or blind, unless he or she had a good reason for not going. In §§ 404.1518(b) and 416.918(b) we give examples of what we consider good reasons for not going to an examination. These include being ill on the day of the examination, not receiving sufficient notice from us, receiving incorrect information from us, or having a death or serious illness in the family.

How We Evaluate Subjective Symptoms, Including Pain

In §§ 404.1529 and 416.929 we explain how we evaluate pain and other subjective symptoms. We recognize that the effects of pain and other subjective symptoms can usually be evaluated by clinical and laboratory diagnostic techniques.

Residual Functional Capacity

We consider a person's residual functional capacity when we are deciding whether a person is able to do his or her past work or other work. Residual functional capacity is generally the physical and mental abilities a person still has which enable him or her to work even though these abilities are limited because of his or her impairment. In §§ 404.1545 and 416.945, we explain how we determine residual functional capacity. Anyone qualified to make medical judgments may assess residual functional capacity. Qualified persons include treating or examining physicians, consultative physicians, and State agency physicians at the initial and reconsideration levels. While there are no preferred sources, the final responsibility for the assessment at the initial and reconsideration levels is with the State agency staff physician. For cases at the hearing and Appeals Council level, the responsibility for assuring that the assessment of residual functional capacity is supported by the evidence in file rests with administrative law judges or members of the Appeals Council.

Impairments Which May Warrant a Finding of Presumptive Disability or Presumptive Blindness

Under certain circumstances, we may pay benefits to a person applying for supplemental security income benefits on the basis of disability or blindness before we make a formal determination of disability or blindness. We call these payments presumptive disability and presumptive blindness payments. We only make these payments when it appears, on the basis of the available evidence, that the person is disabled or blind. If we decide later, after we get more evidence, that the person is not disabled or blind, he or she will not have to pay back the money we have already paid to him or her. In § 416.934, we give examples of 10 specific impairment categories where we will make a presumptive determination before we get any more medical evidence. We have been making presumptive payments on the basis of these impairment categories for several years.

When Vocational Factors Are Considered

In §§ 404.1560 and 416.960, we explain what evidence we will need when we cannot make a decision about whether a person is disabled on medical evidence alone. We will need information about the person's age, education, and work experience, as explained below. We may also need additional medical evidence to determine that person's residual functional capacity. If we find that the person cannot do work he or she has done in the past, we will use authoritative publications and, in some cases, the services of vocational experts, to determine what range of work or specific occupations, if any, he or she can do. These jobs must exist in significant numbers in the national economy. We define "significant numbers in the national economy" in §§ 404.1566 and 416.966.

Age as a Vocational Factor

In §§ 404.1563 and 416.963, we explain when we will ask a person to prove his

or her age. We do not generally do this. However, if we need to know a person's exact age to determine whether he or she is disabled, or if the amount of the benefit will be affected, we ask for proof of age.

Education as a Vocational Factor

In §§ 404.1564 and 416.964, we explain what information we need to know about a person's education to make a disability determination. We will ask how long a person attended school, and we will also consider how much formal or informal education a person has had through previous work, community projects, hobbies, and any other activities which may help a person to work. We will also consider any information which shows that the formal education may not have given the person as much education as the grade level might show.

Work Experience as a Vocational Factor

In §§ 404.1565 and 416.965, we explain what information we may need about a person's work experience. If we need to consider whether that person can do past work or work that is different from what he or she did in the past, we will ask for a description of jobs done in the last 15 years. This will include job duties, tools, machinery and equipment used, and physical and mental activities. However, if all the work that the person did in the last 15 years was hard labor and unskilled, and that person has very little education, we ask about all the work the person did since he or she first began working. If a claimant has only a marginal education and long work experience (e.g. 35 years or more) where he or she did only arduous unskilled physical labor; and he or she can no longer do this kind of work, we use a different rule to determine disability (see §§ 404.1562 and 416.962). With this additional information, we can tell if the claimant qualifies for benefits under this rule. We also explain that we consider past work experience to be work that will help the person work now if the work at any skill level was done within the past 15 years, lasted long enough, and was substantial and gainful.

Work Which Exists in the National Economy

We explain in §§ 404.1566 and 416.966 that, in determining whether unskilled jobs requiring sedentary, light or medium exertion exist in the national economy in significant numbers in one or more regions of the country, we will use reliable job information available in various governmental and other publications. We also explain that we may use the services of a vocational expert or other specialist when there is a question about whether the work skills used in past work can be useful in doing other work and the kinds of jobs or specific occupations in which they can be used.

Substantial Gainful Activity

In §§ 404.1574, 416.974, and 404.1584 we list the rules on determining whether a person is engaging in substantial gainful activity. In §§ 404.1575 and 416.975, we have added evaluation guides for self-employed persons and have explained what we mean by significant services by self-employed persons. Whether a person is doing significant services depends upon how much he or she is involved in the management of the business. Significant services are important in determining whether a self-employed person is doing substantial gainful activity.

Subsidies

We explain in §§ 404.1574(a) and 416.974(a) how we evaluate earnings when a person is receiving a subsidy. Subsidies are payments by an employer to an employee for more than the reasonable value of his or her work. We exclude subsidies in determining whether work is substantial gainful activity. When the employer does not set the amount of the subsidy or does not adequately explain how he or she figured the subsidy, we will try to develop how much the work is worth.

Responsibility To Notify Us of Discharge From a Hospital

We no longer require a person to tell us when he or she is discharged from a hospital or similar institution. We have found that release from a hospital is not a reliable indication of recovery from disability. Also, advances in medical treatment have reduced the average period of hospitalization, and more people are now receiving treatment outside hospitals. Elimination of this reporting requirement (1) relieves the beneficiary of a responsibility, (2) eliminates premature, unproductive investigations, (3) reduces costs to the Government and (4) reduces inconvenience to beneficiaries. We are updating §§ 404.1588 and 416.988 to reflect this change.

We May Investigate Whether Disability or Blindness Continues

After we find that a person is disabled or blind, we may determine from time to time if he or she is still disabled or blind. We may begin an investigation for this purpose for any number of reasons, including the person's failure to follow the requirements of the Social Security Act or these regulations. If our investigation shows that we should stop benefits, we will tell the person and give him or her a chance to reply. We explain these policies in §§ 404.1589 and 416.989. In §§ 404.1590 and 416.990, we discuss the events which will prompt us to investigate whether a person is still disabled.

If Medical Recovery Was Expected When a Person Returned to Work

In §§ 404.1591 and 416.991 we explain that when a person who has an impairment which is expected to improve, returns to full-time work with no significant medical limitations, we may determine that he or she is no longer disabled as of the first month in which he or she returned to work.

Why and When Disability May Be Determined To Have Stopped

In §§ 404.1579, 404.1586, 404.1594 and 416.994 we explain a new policy on when disability is considered to stop. At one time we would not find that disability or blindness had stopped unless the medical evidence showed that the person's condition had improved since we last determined that he or she was disabled. About three years ago, we changed this policy and began to find that disability or blindness had stopped if we found, on the basis of new evidence, that the person was not disabled or blind as defined in the law.

Before We Make a Determination That Disability Stopped

In § 404.1595 we explain that we will always give a person advance notice before we make a final determination that he or she is no longer disabled, unless that person already knows our decision. For example, the person may have told us that he or she was no longer disabled. In this notice, we will tell the person the reason why we have decided that he or she is no longer disabled and allow the person a chance to answer and give us additional information.

When We May Stop Benefits Before Making a Final Determination

We explain in § 404.1596 when we will stop payments before determining whether a person is still disabled. We will do this to prevent an overpayment, when a beneficiary does not cooperate in a continuing disability investigation, or if his or her whereabouts are unknown.

When a Person Becomes Disabled by Another Impairment

In §§ 404.1598 and 416.998 we explain how we treat a person who gets another impairment. If a person already receiving benefits becomes disabled by another impairment, the new impairment need not be expected to last 12 months or result in death in order for us to find the person still disabled. However, the new impairment must be severe enough to prevent substantial gainful activity and must begin in or before the month in which the last impairment ended.

The Trial Work Period

We explain our policies on the trial work period in § 404.1580, 404.1585, 404.1592 and 416.992. The trial work period is a period during which a disabled person may test his or her ability to return to work. If a disabled person does return to work, that person may work for 9 months (which do not have to be consecutive) before we evaluate this work. We consider any month in which a person performs services to be a trial work month. In §§ 404.1592 and 416.992, we define "services" to mean any activity, even though it is not substantial gainful activity, which is done by a person in employment or self-employment for remuneration, generally pay or profit, or is the kind normally done for remuneration. For an employee, we consider work "services" if his or her earnings after 1978 are more than $75 a month. For a self-employed person, we consider work "services" if his or her net earnings after 1978 are more than $75 a month or if the time spent in work is more than 15 hours a month. Before 1979, we used $50 a month as the amount of earnings considered to show "services".

The Appendices

The medical criteria and the medical-vocational guides used in making disability determinations were previously appendices to both subpart P of Part 404 and subpart I of Part 416. Except for Part B of Appendix 1 to subpart I, these appendices are the same, word-for-word, and were repeated at the end of both subparts only for ease of reference. Part B of Appendix 1 contains medical criteria applicable to children and, since they apply mainly to claims under title XVI, were located only in Part 416. However, Part B also applies in some cases under the title II disability insurance program. In this recodification we have taken the appendices out of Part 416 and located them only in subpart P of Part 404. This eliminates some of the unnecessary repetition in our regulations and is consistent with the goals of "Operation Common Sense." We have made the changes needed to cross-refer subpart I of Part 416 to the appendices in Part 404.

Social Security Disability Amendments of 1980

These final regulations do not include the regulatory changes which will be required by the recently enacted Social Security Disability Amendments of 1980, Public Law 96–265. The changes that we will have to make to our regulations because of this recent legislation will, in general, not change the substance of the policies in these final rules, including policies already being followed which we are placing in our regulations for the first time. We will, however, be making modifications in some limited areas, such as to our policy on the purchase of medical evidence in title II cases, the trial work period, substantial gainful activity, and vocational rehabilitation. We will publish these changes either with notice of proposed rulemaking or as interim regulations, as appropriate, so that the public will have full opportunity to provide views and comments before final rules are adopted.

Public Comments

We received comments on 95 sections of the proposed disability regulations involving over 150 different issues. Most of the comments we received came from legal aid services and other organizations involved in representing disability claimants. We also received a large number of suggestions from persons involved in the administration of the disability program.

Many of the comments we received were favorable toward our rewriting the disability regulations in simpler language. These commenters believe that we have made these regulations easier to read and understand. They also think the regulations are better organized and that information they need will be easier to find. For example, one person stated he found "the regulations to be much more comprehensive and understandable." Another person stated that she found the "rules easily readable and easily understood." Another person commented that "they are much easier to understand and include many policies which have been unwritten in the past." Still another person stated that the regulations are far more understandable, which is a "step in the right direction."

On the negative side, several people complained about our adding new material to the regulations. Generally, they believed that we should not have included new rules in the regulations at the same time we were rewriting them for clarity and ease of understanding. According to these comments, it is difficult to determine exactly what is new to the regulations and what is merely a rewritten version of the previous regulations. Some of these people questioned whether the policies we included in the regulations for the first time were actually being followed by the Social Security Administration. One person stated that "the Operation Common Sense procedure is not the place for substantive changes." Another person stated that the Notice of Proposed Rule Making (NPRM) was misleading because the summary indicated that the purpose was to rewrite the affected subparts in simpler language.

However, "Operation Common Sense" has other objectives in addition to rewriting the regulations in plain language. Some of these objectives, which we explained in the preamble to the NPRM, include updating the regulations to include important policies and removing from the regulations outdated policies we no longer follow. In the preamble, we clearly identified the policies we were including in the regulations for the first time.

We have made several changes on the basis of comments we received from the public.

One of the changes we made concerns the rule about the need to follow prescribed treatment. Under our proposal, if we believed that treatment might enable a person to work, we could send him or her to a physician at our expense for a medical opinion on treatment. In determining whether treatment could correct the impairment enough so that the person could work, we intended to consider that physician's findings and recommendations along with any other medical findings and recommendations we had received from the person's treating physician or any other medical source. Under this proposed rule, we would not have paid benefits to a person who refused to follow treatment we determined could correct the impairment enough to enable him or her to work, unless there was good reason for the person to refuse the treatment.

Because of the many critical comments we received concerning this proposed rule and the issues raised in these comments, we have not adopted this change in policy. Instead, we will continue to follow the same rule which we have followed in the past. Under this rule, which we have kept in the regulations, we only require that a person must follow treatment prescribed

V 45 AG 2080 UMI

by his or her own physician or other treating source.

Also, because of the many public comments which questioned the need for certification of records from hospitals and other similar institutions, we have changed our position. We will not return these records for certification unless there seems to be something questionable about them.

We have added optometrists to the list of acceptable medical sources for the measurement of loss of sight. However, we have pointed out that in some cases we may still need a report from a physician to determine other aspects of eye diseases.

Many persons pointed out to us an error in our explanation of how we evaluate symptoms, including pain. In the NPRM we stated that we would never find a person disabled based on symptoms, including pain, alone. Since we do find persons disabled on the basis of pain and other symptoms, we have explained in the final regulations that there must be medical signs or findings to show that there is a medical condition that could reasonably be expected to produce the symptoms.

We have decided to remove Appendix 1, Listing of Impairments, and Appendix 2, Medical-Vocational Guidelines, from Subpart I of Part 416 and include them only in Subpart P of Part 404. While we received some objections about doing this, we believe the advantages in not duplicating this material in Chapter III of Title 20 of the CFR outweigh the negative considerations.

In these final regulations, we have not made any significant changes in the appendices, since they were recently revised and updated. (Appendix 1, the medical criteria, was published in the **Federal Register** on March 27, 1979 (44 FR 18170), and Appendix 2, the vocational guidelines, was published in the **Federal Register** on November 28, 1978 (43 FR 55349)). We have only corrected some errors and references.

We have replaced the term "wages" wherever it appears with the broader term "pay". This change makes it clearer that we are referring to any compensation (it does not have to be cash) a person receives for his or her services and avoids confusion with "wages" as that term is defined in section 209 of the Social Security Act.

We have also made other changes of a clarifying nature.

There follows a discussion of issues which were raised in the comments made by the public in response to the NPRM published in the **Federal Register** on July 3, 1979 (44 FR 38879). We discuss these comments under the appropriate section headings. Many of the written comments we received necessarily had to be condensed, summarized, or paraphrased. However, we have tried to express everyone's views adequately and to respond to the issues raised.

General

Scope of Subparts

Comment: A legal aid bureau objected to our stating in §§ 404.1501(a) and 416.901(a) that disability determinations by other programs have no effect on our determinations.

Response: Determinations under other programs are considered in our evaluation of disability and blindness. Our intention was to make clear that we must make our own determinations based on social security law. Therefore, we have changed the statement to read "determinations made under other programs are not binding on our determinations."

Determinations

Who Makes Disability and Blindness Determinations

Comment: A person representing a legal aid bureau commented that §404.1503(d) should read exactly the same as § 416.903(d) in order to allow us to find an earlier disability date, a later date for ending disability, or a disability when the State agency found none. According to this person, there is no basis for this difference between the title II and title XVI disability programs.

Response: Section 221(c) of title II of the Social Security Act provides that as a result of reviewing title II disability determinations by State agencies, we may only determine that a person is not disabled, or that disability began later, or that disability ended earlier. We may not under title II change any State agency's decision to a more favorable one for the person claiming benefits. On the other hand, under section 1633 of title XVI of the Act, there are no restrictions upon our changing a State agency's disability determinations concerning supplemental security income benefits. Since the differences in these sections are in the law, we cannot adopt this comment.

Definition of Disability

Basic Definition of Disability

Comment: A legal aid bureau objects to the basic definition of disability in §§404.1505 and 416.905 because the definition does not state that other substantial gainful activity must exist in significant numbers in the national economy.

Response: These sections introduce the basic definition of disability which is further explained in later sections concerning the evaluation of disability. Under Vocational Considerations, §§ 404.1566 and 416.966, we adequately explain that we consider work to exist in the national economy when it exists in significant numbers either in the region where a person lives or in several other regions of the country. Consequently, we have not adopted this comment.

Additional Changes: We have added a statement to § 404.1505(a) to make clear that the basic definition of disability applies when a person is applying for a period of disability, or disability insurance benefits as a disabled worker, or child insurance benefits based on disability before age 22.

Disability for Children Under Age 18

Comment: Several persons commented that § 416.906 and related sections, by requiring children under age 18 to have an impairment which meets or equals the Listing of Impairments in order to be found disabled, are in conflict with the statutory language in section 1614(a)(3)(A). According to these comments, the law only requires a child under age 18 to have a medically determinable physical or mental impairment of comparable severity to that which would be disabling for an adult. An adult may be found to be disabled on the basis of vocational considerations even when the impairment does not meet or equal the Listing of Impairments. Therefore, according to these comments, we are requiring children under age 18 to have an impairment of greater severity than an adult in order to be found disabled. In their views, this requirement exceeds the test of comparable severity provided in the law and is not authorized under the law as in the case of disabled widows and widowers under title II of the Act.

Response: The title XVI definition of disability for children under age 18 does not specifically exclude the consideration of vocational factors. However, the use of vocational factors is not appropriate since the activities of children under age 18 are extremely difficult to measure in vocational terms. In view of this, it is more equitable to evaluate childhood claims only on medical terms—i.e., the impairment must meet or equal the Listing of Impairments. However, many conditions have a different effect on children than on adults, and for this reason a supplemental Listing of Impairments is also used for children. This supplement realistically expands the area of medical consideration for children, and lessens

any inequity that could result because of the absence of vocational evaluation. Therefore, we are not making any changes in this section.

What Is Needed To Show an Impairment

Comment: On commenting on §§ 404.1508 and 416.908, one person took the position that a disability claimant should be able to rely solely on statements of symptoms in a clinical setting. This person believes that under the law symptoms alone may support a finding of disability.

Response: Sections 404.1508 and 416.908 state that an impairment must be established by medical findings consisting of signs, symptoms and laboratory findings. These sections, however, go on to state that disability cannot be found on the basis of a statement of symptoms alone.

A history of symptoms, recorded in a clinical setting, is important to the evaluation of disability, and this is recognized in the regulations. However, it is essential for the regulations to specify that a statement of symptoms alone is not sufficient for a decision. The law requires that disability be determined on the basis of a medically determinable impairment. Symptoms, in the absence of any confirming signs or clinical findings, cannot meet this requirement.

Comment: Another person pointed out that §§ 404.1508 and 416.908 mention signs, symptoms, and laboratory findings but that these are not defined until later in §§404.1528 and 416.928. This person recommends that we cross-refer these sections.

Response: We agree with the comment and have added a cross reference.

Evidence

Your Responsibility To Submit Evidence

Comment: Several persons, some of whom represented legal advocacy groups, commented that §§ 404.1512 and 416.912 place too heavy a burden upon claimants by requiring them to submit medical evidence to prove disability. Some of these persons pointed out that under the title XVI supplemental security income program, which is based on need, the Secretary has a special obligation of obtaining medical evidence on behalf of the claimant.

Response: We will always assist a person in obtaining the medical evidence we need to make a disability determination. However, the person must give us the names and addresses of physicians and other treatment sources and give us permission to obtain the evidence on his or her behalf. For a person applying for supplemental security income benefits, we will pay for the medical evidence if there is any charge. When we need special medical information which a person's treating sources cannot give to us, we will send the person for medical examinations and tests at our expense. However, the person must cooperate with us in obtaining the medical evidence.

In order to clarify our responsibility, we have added the following statement to §§ 404.1512 and 416.912: "We will help you in getting medical reports when you give us permission to request them from your doctor and other medical sources."

Comment: One person objected to the language in §§ 404.1512 and 416.912 which states that we will only consider impairments which the claimant tells us about or about which the claimant gives us evidence. This person pointed out that the claimant may not be aware of what is wrong with him or her, the diagnoses may be incomplete, or the interviewer may not have obtained all the information.

Response: We agree that we should not rely solely on the claimant's statements and the evidence which the claimant gives us. Therefore, we have changed the language in these sections to make it clear that we will consider impairments about which we receive evidence in addition to impairments about which the claimant tells us. Of course, we cannot be expected to consider impairments of which we are reasonably not aware.

Comment: Another person from a legal service foundation commented that the claimant should at least be advised of which reports we considered in making the disability determination.

Response: In making a disability determination, we consider all the medical evidence we receive about a person's medical condition. We do not routinely identify each of these medical sources when we inform the person of our decisions about disability. However, this information is available to him or her upon request.

Medical Evidence of Your Impairment

Comment: Two persons, representing a professional association, commended us for including "licensed or certified psychologists" under acceptable medical sources in §§ 404.1513 and 416.913. However, these same persons pointed out that other related sections pertaining to medical evidence refer only to "physicians" when discussing medical evidence. According to these persons, the term "health care providers" would be more appropriate.

Response: One of our main reasons for revising the regulations is to make them easier to read and understand. We believe that simply using the term physician in these sections accomplishes this purpose better than using the more general and abstract term "health care provider." The sections in which we use the word physician focus on issues which are not directly concerned with the source of the medical evidence. In sections that are directly concerned with the qualifications of persons giving us evidence, we have made it clear that acceptable evidence is not limited to reports from physicians. Therefore, we have not adopted this comment.

Comment: Another person, representing a professional association, recommended that "licensed or certified optometrists" be added to the list of acceptable sources in §§ 404.1513 and 416.913. According to this comment, we should include optometrists because doctors of optometry are licensed by all 50 states and are qualified to supply reports on visual impairments within their speciality.

Response: We agree with the comment and have added optometrists as an acceptable source for the measurement of loss of sight (the measurement of visual acuity and visual fields). However, we have also pointed out that we may need a report from a physician to determine other aspects of eye diseases.

Comment: A representative of a professional association stated that the limitations which we place upon reports from optometrists in § 404.1513 is unnecessary and inconsistent with the education of optometrists and the scope of their license to practice. According to this comment, requiring a report from a physician when a report from an optometrist would be sufficient needlessly increases costs by requiring an extra, unnecessary eye examination. This policy is also said to arbitrarily discourage the use of doctors of optometry under the title II disability program.

Response: Under the provision of this section, we accept findings from optometrists on the measurement of visual acuity and visual fields without restriction, on the same basis as we accept a report from a physician. However, we require a physician's findings to determine other aspects of an eye disease that are essential to establish a medically determinable impairment. These aspects include diagnosis and treatment. We need this information to determine whether surgery or other therapy might correct or improve sight to the extent that the

impairment would no longer be disabling. Also, in some cases, we have

any change in the regulations. In following the previous regulations,

request it and that we might also pay for evidence we receive even if it is not

that we will pay for this evidence if we find it is needed to evaluate the claim.

reason for failing or refusing to take part in a consultative examination or test

case in mind. Sometimes, without knowing all the circumstances, we refer

impairment would no longer be disabling. Also, in some cases, we have found that another health problem requiring evaluation by a physician is the cause of the visual loss rather than an eye disease.

Since the regulations must cover the entire range of diseases that result in loss of sight, we believe it is essential to maintain a statement placing limits on the use of evidence submitted by optometrists.

Program costs are not appreciably increased by this requirement, nor does it mean that a person must undergo two examinations, one by a physician and another by an optometrist. We make most of our determinations for all types of impairments, by using reports of past treatment, without the need to obtain an examination for the specific purpose of the disability determination. In the case of visual impairments, persons applying for benefits usually have medically records that are not restricted to an examination by an optometrist. Physicians, whether private or serving in a clinic, are still the first source of contact for most health problems. Also, optometrists frequently make referrals to physicians for consideration of surgery or other therapy. By the time a visual impairment has become so severe that a person applies for disability benefits, there is usually evidence available from a physician who has diagnosed the disease and prescribed treatment.

Comment: Another person, representing an assistance group, commented that §§ 404.1513 and 416.913 should not limit the sources from which we may obtain medical records. He pointed out that in many urban and rural areas medical clinics are staffed primarily by nurses and physician assistants. These practitioners provide useful medical reports.

Response: Under paragraph (e) of these sections, we explain that information from sources other than a licensed physician may assist us in evaluating a person's ability to work. We do accept reports from nurses, physician assistants, and other similar practitioners.

Comment: Several persons, including representatives from various legal aid groups, objected to the requirement that medical records from hospitals, clinics, sanatoriums, medical institutions, and health care facilities be certified by the custodians of the records. They believe that certification is unnecessary and would cause needless delay in obtaining medical reports.

Response: The certification requirement stated in §§ 404.1513(a) and 416.913(a) in the NPRM did not represent any change in the regulations. In following the previous regulations, however, we always accepted medical records from hospitals and other similar institutions as long as it was clear that the reports came from the hospital or institution. We considered the signature of the custodian, the letterhead, the covering letter, or other similar information sufficient for this purpose. We did not generally require certification in a legal sense. In order to avoid confusion in the future, we have modified the language in these sections to state that while these records should be certified, we will not return uncertified records unless there seems to be something questionable about them.

Comment: Another person pointed out that we should delete the reference to licensing in §§ 404.1513(e) and 416.913(e), since the practitioners we are referring to are actually licensed in most States for the practice in which they specialize.

Response: We agree with this comment, and we have eliminated the wording "not medically licensed."

When We Will Purchase Existing Evidence

Comment: One person from a legal service foundation pointed out that it would be less expensive for us to purchase existing medical records under the title II disability program than to refer persons for consultative examinations at our expense.

Response: Section 416.914 explains that we will pay for existing medical evidence for persons applying for supplemental security income benefits under title XVI of the Act. However the title II law does not allow us to routinely purchase existing medical evidence. Section 404.1514 explains that in rare situations we will pay for existing medical records under title II disability program when the only other way we can get the medical information we need is to refer the person for an expensive consultative examination. Generally, we do this when there are indications that the person is disabled but is unable to pay for the medical records. If we find that the medical sources have the additional information we need for making a disability determination but will not give it to us until they are paid, we may pay them a small fee to cover copying and mailing costs.

Additional Changes: In § 416.914 we explain that we always pay for existing medical evidence we request for use in making title XVI disability or blindness determinations. However, in the NPRM we added that we would pay for evidence we use even if we did not request it and that we might also pay for evidence we receive even if it is not needed as long as the person applying for benefits or the medical source believed that the evidence was needed. We have decided not to include these additional statements in the final regulations. These situations do not occur often enough to require regulations. Removing these statements does not mean that we will no longer pay for evidence which we did not request or need for the disability or blindness determination. As in the past, we will continue to make these decisions on a case-by-case basis. For example, we may pay for a report from a physician who submits evidence requested by a patient without knowing that sufficient information has already been sent to us by a hosptial. We cover this in our operating instructions.

If You Fail To Submit Medical and Other Evidence

Comment: One person from a legal service foundation commented that the claimant should be notified of which physicians or hospitals refused to give us evidence. According to the comment, we should also inform the claimant about what records we will pay for.

Response: We will notify the claimant if there are any problems in obtaining medical records from any of his or her treating or examing medical sources. We usually assist the claimant in contacting these sources again in order to obtain the reports. Often we refer the claimant for a special medical examination at our expense if we cannot get the reports we need from his or her own physicians and hospitals.

At the time of the initial interview, we generally tell supplemental security income claimants what medical evidence we will pay for. When we refer a claimant for a consultative examination, we give him or her a pamphlet explaining the reasons for the examination. We also explain that the examination is at our expense. Therefore, we see not reason for making any changes in the language in §§ 404.1516 and 416.916.

Comment: One person commented that these regulations are not supported by the legislative history of the title XVI disability program, because Congress intended that the burden of obtaining medical evidence for claimants rests upon the Secretary.

Response: We recognize in § 416.914 that we have the responsibility of obtaining medical evidence for supplemental security income claimants. In § 416.916 we ask only that the person cooperate with us in obtaining the medical evidence. We specifically state

that we will pay for this evidence if we find it is needed to evaluate the claim.

Comment: Sections 404.1516 and 416.916, according to one person, are not equitable, because failure to submit medical evidence will result in a denial under these regulations. This person believes that § 416.916 is especially inequitable for title XVI disability claimants. According to the comment, the "good cause" provisions for failure to appear for a consultative examination should be extended to failure to submit medical records.

Response: We always consider whether or not a person has good reason for failure to submit medical reports. However, we do not believe that it is necessary to give examples of "good cause" for failure under these sections. We agree that we cannot find a person not disabled merely for failure to give us medical evidence. Therefore, we are changing the language in these sections to explain that we will always make a disability determination on the basis of the evidence available to us.

Additional Changes: We have added an explanation to § 416.916 that a person will not be excused from giving us evidence because of religious or personal reasons against medical examinations, tests, or treatment. This rule was stated in the NPRM in § 404.1516 but was erroneously omitted from § 416.916, where it also applies.

Consultative Examination at Our Expense

Additional Changes: Upon further consideration, we have expanded § 416.917 to make it clear that we will not pay for any medical examinations arranged by a claimant or his or her representative without being asked by us. The reason we are adding this statement is because in some situations, claimants or their representatives have been arranging for medical examinations at our expense without first consulting with us. Frequently, we have found that the examination report only duplicated information already available to us or was not necessary for making a disability determination.

If You Do Not Appear at a Consultative Examination

Comment: One person from a legal aid bureau stated that in §§ 404.1518 and 416.918 we should make it clear that the listed examples of good reasons for not going to a consultative examination are not "all-inclusive." This person suggested that we include another example for not going to an examination: "For other valid reasons."

Response: These sections already state that the person must have a good reason for failing or refusing to take part in a consultative examination or test which we arrange to get information we need for a disability determination. We ask a person who is unable to go to an examination to tell us why as soon as possible. We explain that if the person has a good reason, we will schedule another examination or try to get the information we need in another way. The reasons listed are described only as "some examples of what we consider good reasons for not going to a scheduled examination." Therefore, we believe it is clear that these are not the only reasons which we will consider valid.

Comment: Another person commented that "inconvenient or unreasonable scheduling" should be included as a good reason for not going to a consultative examination.

Response: The examples we provided in §§ 404.1518 and 416.918 are only guidelines of what we consider to be good reasons for not going to a consultative examination. If the claimant cannot keep an appointment, he or she should notify us immediately. We explain this to the person when we arrange a special examination for him or her. If the claimant has a good reason, such as inconvenient time or place causing genuine hardship, we will reschedule the examination. The examples of good reasons are not the only acceptable reasons. We must consider other reasons on an individual basis.

Comment: Several persons commented about our excusing a claimant from going to a consultative examination on the basis of "having had professional or personal contact with the scheduled examiner and believing that the examiner could not be objective." One person believed that we should also consider objections to the examinations made by the claimant's representative, such as his or her attorney. Other persons commented that this example would permit a claimant to refuse an examination without any showing of bias on the examiner's part. According to these comments, the claimant would only need to assert that he or she believed, on the basis of past experience, that the examiner could not be objective. Some persons believe that the claimant should be obligated to submit evidence to show that the examiner could not be objective. Still another person pointed out that the claimant in some cases is mentally ill and could refuse an examination on the basis of delusions.

Response: In proposing this example of good reason for not going to an examination, we had a specific type of case in mind. Sometimes, without knowing all the circumstances, we refer a claimant for a consultative examination with an examiner who previously represented an interest adverse to the claimant. For example, the examiner may have represented the claimant's employer in a worker's compensation case, or he or she may have been involved in an insurance claim or legal action adverse to the claimant. In this situation, we would consider the claimant to have good reason for refusing a consultative examination with the examiner on the basis of possible bias or partiality on his or her part.

In view of the fact that this listed example has been misinterpreted by so many people, we have decided to remove it from the examples of good reasons for failure to appear for a consultative examination. Removing it from the listed examples, however, does not mean that we will no longer consider bias, prejudice, partiality, or lack of objectivity on the part of the examiner as a good reason for refusing an examination. The purpose of the examples in §§ 404.1518 and 416.918 is to give clearcut situations where the claimant would have good reason for refusing an examination. We will still consider all other reasons given by the claimant.

Comment: Other persons commented that we should spell out in §§ 404.1518 and 416.918 any adverse consequences for failure to report for a consultative examination.

Response: If a person will not go to a consultative examination, we must, of course, make the disability determination on the basis of whatever evidence is available to us. Since we usually send a person for a consultative examination when the evidence we already have is not sufficient to show disability, the refusal to go to the examination could result in our determining that the person is not disabled.

Evaluation of Disability

Evaluation of Disability in General

Comment: One person objected to §§ 404.1520(b) and 416.920(b), because they provide a sequential evaluation in which a claimant may be found not disabled on the basis of doing substantial gainful activity without considering medical or vocational factors. According to this comment, the claimant's medical condition must always be considered, especially since some people force themselves to work to meet expenses, even though the work

tends to worsen their physical or mental impairment.

"severe" in §§ 404.1522 and 416.922. This commenter believes that this

Additional Changes: In order to clarify the meaning of this section, we

cases under the title II disability insurance program.

tends to worsen their physical or mental impairment.

Response: We consider the concerns expressed in this comment under §§ 404.1571–404.1575 and 416.971–416.975, which deal with substantial gainful activity in more detail. In §§ 404.1520 and 416.920 we give only a brief explanation of the steps we follow in evaluating disability in general. Each of the steps is explained more fully in other sections of the regulations.

After considering this comment, however, we have decided to change §§ 404.1520(b) and 416.920(b) to provide that if a person is doing substantial gainful activity, we will find that he or she is not disabled regardless of his or her medical condition, age, education, and work experience. This language is more in conformity with the law. Sections 223(d)(4) of Title II and 1614(a)(3)(D) of Title XVI of the Social Security Act provide that a person whose earnings meet the criteria established by the Secretary for determining when services or earnings demonstrate ability to engage in substantial gainful activity shall be found not disabled. The law provides that this is true *notwithstanding* the person's physical or mental impairment or his or her age, education, and work experience. We have made this change because we believe that the word "regardless" conveys the meaning of the law more clearly than "without considering." In fact, in some cases, we may have considered the medical evidence and vocational factors before becoming aware that the claimant was actually doing substantial gainful activity during the period of time in which we are considering whether he or she is disabled.

Additional Changes: In §§ 404.1520 and 416.920, paragraph (f)(2), we have changed the notation "e.g." to "i.e.", to make the insert in the parentheses read "(i.e., 35 years or more)." This change has been made because the 35 years requirement is not an example. See §§ 404.1562 and 416.962 for a further explanation of this rule.

What We Mean by an Impairment That Is Not Severe

Comment: We received a letter from one person who made extensive comments on the denial of claims on the basis of nonsevere impairments, as described in §§ 404.1521 and 416.921. The commenter contends this principle introduces an "average man" concept that conflicts with the law and with court interpretations of the law, both of which require consideration of the claimant's circumstances in each case. This person also feels that it is difficult to define with accuracy impairments that are not severe, and suggests that it would be more realistic, and just as economical, to evaluate these impairments in terms of the vocational impact in each case. This person pointed out, further, that if an impairment is truly minimal, it should not be difficult to make the decision using the vocational considerations described in §§ 404.1545 through 404.1568 and 416.945 through 416.968.

Response: Although this evaluation approach to impairments that are not severe has been in the regulations for some time, we expanded it in 1978, when we published the more detailed regulations describing the principles used in vocational evaluation. (43 FR 55349)

We anticipated that greater program efficiency would be obtained by this provision, by limiting the number of cases in which it would be necessary to follow the vocational evaluation sequence described in §§ 404.1545 through 404.1568 and §§ 416.945 through 416.968.

We are now attempting to determine whether this advantage has been realized. The reasons for this are in part due to the problems discussed by this commenter. In most cases that involve an impairment that is not severe, the vocational evaluation guides can be applied as efficiently as can the nonsevere impairment principle. Most cases of this kind do not require extensive investigation of a person's vocational background in order to evaluate them under the vocational guidelines. We can decide many cases of this type on the basis that a person can return to his or her most recent occupation. Also, defining an impairment that is not severe can sometimes be as judgmental as a decision based on vocational considerations.

We are now studying the feasibility of a possible revision of this rule. However, the rule proposed in §§ 404.1521 and 416.921 is included in this final publication since it reflects current policy. Any future revision we make in the basic concept will be published in the **Federal Register** with an opportunity for the public to comment.

When You Have Two or More Unrelated Impairments—Initial Claims

Comment: Several persons representing legal services commented that §§ 404.1522 and 416.922 are inconsistent with the law, in that two impairments, each disabling for 6 months, should be sufficient to meet the requirement that disability must last for 12 months. According to these comments, these two sections conflict with §§ 404.1598 and 416.998, which allow disability to continue under a new impairment, which is not expected to last for 12 months. One person stated that nowhere in the law is there any indication that two separate impairments cannot be combined to total a 12 month period.

Response: Under the law, in determining whether the 12 month duration requirement is met, we must look at each impairment to see how long it has lasted or is expected to last. We cannot consider in our determination any impairment lasting, or expected to last, less than 12 months. This is not inconsistent with §§ 404.1598 and 416.998, which concern determinations on whether disability continues for persons who are receiving disability benefits. These sections provide that a new impairment superimposed on a disabling impairment which has ended extends disability so long as it is disabling, even though it is expected to last less than 12 months. This is because the duration requirement is a requirement only for initial entitlement to benefits. Once we find a person to have a qualifying impairment(s), we cannot find that disability has ended, as long as he or she continues to have an impairment severe enough to prevent substantial gainful activity.

Comment: One person commented that §§ 404.1522 and 416.922 violate court interpretations of the statutory language pertaining to the 12-month duration requirement. According to this comment these sections adopt a "retrospective" viewpoint.

Response: These sections explain how we evaluate multiple impairments to determine whether they meet the duration requirement, which is the requirement that the disabling impairment must last or must be expected to last for a continuous period of 12 months. We do not intend to apply these sections in retrospect. Rather, we will apply them at the time when the disability determination is made, and in most instances the rule will affect only the first month for which we pay a disability benefit. For example, a person who suffers a leg fracture and then two months later, before complete recovery from the fracture, develops a chronic and disabiling heart condition, will not be determined to be disabled until the onset of the heart condition, assuming that we have evidence to show that the leg fracture is a temporary impairment that cannot be expected to last 12 months.

Comment: One person from a legal assistance agency objected to the word "severe" in §§ 404.1522 and 416.922. This commenter believes that this qualification is contrary to the Act, because it implies that all impairments, even ones lasting or expected to last twelve months, will no longer be considered in evaluating disability.

Response: The sections cited in this comment concern the duration requirement; i.e., the requirement that disability must last twelve months. These sections explain that an impairment of short duration cannot be combined with another unrelated impairment to meet the twelve-month duration requirement. The reference to *severe* impairments is merely meant to confirm that there would be no concern with how long an impairment has lasted, or is expected to last, unless it is severe. The duration requirement does not come into consideration until it is first established that an impairment is disabling at some point in time.

Comment: Another person stated that the NPRM is misleading because nowhere in the preamble summary is there any reference to §§ 404.1522 and 416.922. This person claims that the Social Security Administration has never followed the policy in these sections about unrelated impairments. According to this comment, the NPRM should be republished with a clear statement that this is an entirely new policy which was never followed in the past.

Response: The preamble of the NPRM did include a summary of these sections on page 38880 of Volume 44 of the **Federal Register.** We also stated in the preamble that we were adding to the regulations the important policies which we were following in determining disability. We further pointed out that most of these policies were already in our Program Operations Manual which State and Federal employees use when evaluating disability.

The policy stated in these sections is not in the Program Operations Manual, since we only recently adopted the policy about a year before the publication of the NPRM but after a long period of consideration. Therefore, the policy was appropriately announced in the NPRM. Although this policy was being followed at the initial and reconsideration level, it was not binding upon administrative law judges and the Appeals Council, since they are only required to follow the law, the regulations, and Social Security Rulings in deciding cases. On page 38880 of the preamble we specifically stated that we were including our basic policies in the regulations, since it is desirable that the same rules apply at all levels of adjudication.

Additional Changes: In order to clarify the meaning of this section, we have revised the second sentence to read: "If you have a severe impairment(s) and then develop another unrelated severe impairment(s) but neither one is expected to last 12 months, we cannot find you disabled, even though the two impairments may in combination last for 12 months."

Medical Considerations

Listing of Impairments

Comment: Several persons commented about our taking the Listing of Impairments (Appendix 1) and the Medical Vocational Guidelines (Appendix 2) out of Part 416 and including them only in Part 404. One person stated that it is contradictory to "Operation Common Sense" to fragment the organization of related regulations. According to this commenter, the title XVI and the title II disability programs are essentially independent to each other and share only common administration. According to another comment, many persons are involved in only one of these programs and keep only the law and regulations concerning that program. This person believes that removing these appendices from Part 416 will impede the researching of disability issues. Another person noted that he only receives title II regulations from Commerce Clearing House (Unemployment Reports). This person recommended that we publish all the regulations common to both programs in one place in the Code of Federal Regulations (CFR).

Response: One of the objectives in rewriting the regulations under "Operation Common Sense" is to eliminate overlapping and duplicate material in order to insure that paperwork costs and other burdens on the public are minimized. This is an important part of the Department's program to revise, rewrite, and reduce the more than 6,000 pages of the Department's regulations in the CFR.

Both Appendix 1 and Appendix 2 were formerly located in two places, behind Subpart P of Part 404 and behind Subpart I of Part 416. The criteria in these appendices, the medical listings and the vocational guidelines, apply to both the title II and the title XVI disability programs. These appendices are exactly the same, except for Part B of Appendix 1, which was previously located only behind Subpart I of Part 416, because Part B mainly applied to the evaluation of disability for children under age 18 for purposes of the Supplemental Security Income program. However, Part B also applies in some cases under the title II disability insurance program.

In order to eliminate this duplication of material, which is exactly the same, we have published Appendix 1 and Appendix 2 only behind Subpart P of Part 404. This eliminates some of the unnecessary repetition in our regulations and is consistent with the goals of "Operation Common Sense." We have cross referenced Subpart I of Part 416 to the Appendices in Part 404. These references clearly show that we are using the same Appendices for two separate disability programs. Since Parts 404 and 416 are both published in Chapter III (Parts 400 to 499) of title 20 of the CFR, this material is available to everyone in one volume of the CFR.

Comment: One person, representing a legal aid bureau, stated that our revision of §§ 404.1525 and 416.925 requires that a claimant who has a listed impairment must prove the 12-month duration requirement. This person observed that under the previous regulations, if a claimant's medical condition met a listed impairment, we presumed that the 12-month duration requirement was met. According to this comment, this significant, additional requirement is unwarranted.

Response: The majority of the impairments listed in Appendix 1 do not require a separate decision on the duration of the impairment. This is because the majority of the described medical conditions are either static or become more severe with the passage of time. However, some impairments are also listed which are subject to improvement in some cases. If we revised the listing to include only impairments in which the duration requirement can be presumed, we would have to exclude many impairments that are subject to improvement. We believe that it is in the public interest to list as many impairments as possible. Therefore, we will no longer presume that the duration requirement is met merely because an impairment is listed in Appendix 1.

Comment: One person from a legal service agency commented that the Listing of Impairments requires overly restrictive standards for wage earner claimants, because the listing describes impairments severe enough to prevent a person from doing any gainful activity. This person observed that the law requires a more stringent standard of disability for surviving spouses, who must be unable to do gainful activity to be found disabled. Therefore, this person believes that the listing requires a worker to be as functionally limited as a surviving spouse.

Response: If a worker has an impairment which meets the duration

considering the vocational factors of age, education and work experience.

subjective symptoms can be accepted is contrary to long-standing principles of

medical signs or findings show that

treatment conforms to widely accepted

Response: The condition in paragraph (c) was previously published as a final

Response: If a worker has an impairment which meets the duration requirement and is listed in Appendix 1, or is equal to one of the listed impairments, we will find that worker disabled on the basis that he or she is unable to do any gainful activity. This is the requirement that widows, widowers, and surviving divorced wives *must* meet in order to be found disabled. However, unlike the surviving spouse, we may still find the worker disabled even when he or she does not have any impairment which meets or equals a listed impairment. A worker who has an impairment severe enough to keep him or her from doing previous work may be found unable to do any substantial gainful activity, considering his or her age, education, and work experience. We agree with the comment that in order for us to find that the worker is disabled on medical considerations alone, the worker must meet the same standard of disability established by law for widows, widowers, and surviving divorced wives. However, this is not the only standard which we consider in evaluating the worker's claim.

Additional Changes: In §§ 404.1525 and 416.925, we have revised the last sentence in paragraph (a) to point out that the evidence must show that the impairment has lasted or is expected to last for a continuous period of at least 12 months. In paragraph (b)(1) we have changed "similar impairment impact" to "similar effect" for clarity.

Medical Equivalence

Comments: Several comments were received on determining medical equivalence under §§ 404.1526 and 416.926. These included a comment questioning whether there has been a change in these regulations that would now require claimants to have an impairment that is medically equivalent to a listed impairment in order to be found disabled. Others commented on the complexity involved in these decisions, and whether it was proper to make this decision by comparing the person's impairment(s) with the listed impairment most like it.

Response: Nothing new has been added. Medical equivalence is still only one aspect of disability evaluation. It is used whenever claimants have a severe impairment or combination of impairments that do not meet the specific findings contained in a listing. If evaluation for medical equivalence does not result in a disability allowance, we must still consider whether the claimant is unable to do any substantial gainful activity by reason of the impairment(s), considering the vocational factors of age, education and work experience.

These decisions are complex, as pointed out by one of the commenters. In order to make these decisions as accurately as possible, however, we make all decisions of medical equivalence on the basis of medical judgments furnished by physicians in the disability program who are familiar with the medical requirements.

A comparison is made with the listed impairment most like the claimant's impairment to see if it is as severe. Each listed condition is independent, and the listed findings represent a point of severity for that particular condition at which we no longer consider it reasonable or necessary to consider vocational factors under the guidelines described in §§ 404.1560 through 404.1569 or §§ 416.960 through 416.969

Conclusions by Physicians Concerning Your Disability

Comment: One person representing a legal service foundation commented that §§ 404.1527 and 416.927 are impermissible in light of the substantial body of case law indicating that the uncontradicted conclusion of a physician is entitled to "great weight." This person further stated that the treating physician's conclusion as to the existence of disability, if uncontradicted, is "binding" upon the Secretary.

Response: In these sections we explain that under the law we are responsible for making the disability determination on the basis of the evidence. Opinions by physicans about "disability" or "the ability to work" are not binding upon us. While we carefully consider these opinions, there must be sufficient evidence to support conclusions. When there is insufficient evidence to support an opinion, we ask for additional evidence. However, we must make our determination on the basis of the evidence and not on the basis of an opinion alone and some court decisions have criticized us for not obtaining sufficient evidence.

How We Evaluate Symptoms, Including Pain

Comments: One person from a legal service foundation objected to the statement in §§ 404.1529 and 416.929 that "we will never find that you were disabled based on your symptoms, including pain alone." According to this comment, the statement violates case law indicating that pain itself can be disabling. Another person, representing a legal aid bureau, believes that these sections must be deleted, because the requirement of objective proof before subjective symptoms can be accepted is contrary to long-standing principles of law that "pain," unaccompanied by any objectively observable symptoms, will support a claim for disability benefits. Another legal service representative stated that all the courts have held that subjective medical evidence, even including pain unsupported by objective medical evidence, will support a finding of disability. Still another person from a legal aid foundation stated that these sections fail to account for the fact that pain is outside the realm of objective scientific measurement and cannot be diagnosed by laboratory and clinical procedures. According to another comment, these sections fail to recognize that pain can be separate from any particular syndrome and can be part of an overlay of multiple medical problems and physical inactivity, or even of undiagnosed but very real conditions. One person agreed that the source of pain must have a medical verification but considered the sections "overbroad" and contrary to the law. Other persons expressed similar objections to these sections.

Response: In including these sections in the regulations for the first time, we did not intend that pain itself must be objectively measured. We only require proof that there is a medical condition producing the pain. After we verify that there is a medical condition which can be expected to cause pain, we can evaluate any medical evidence submitted to determine whether the pain is disabling. Pain that is of such long duration and severity as to be significant for disability evaluation is, almost without exception, verifiable by clinical signs and findings showing a medical condition that can be reasonably expected to produce the pain. We do not require that a specific diagnosis be established, but, in practice, the medical signs and findings that show the presence of a medical condition consistent with pain will also permit a diagnosis in most cases.

After reviewing these comments, however, we realize that the language in the last sentence of these sections is unclear. It could be read to mean that we never find a person disabled when the only limitation is severe pain. We intended that there must be other signs and findings that show there is a medical condition present that can be reasonably expected to result in severe pain. We have rewritten the last sentence to clarify that pain, in itself, or other symptoms, can be disabling. This sentence now reads: "We will never find that you are disabled based on your symptoms, including pain, unless

medical signs or findings show that there is a medical condition that could be reasonably expected to produce these symptoms." In the second sentence, we have also removed the word "objective," since "signs and laboratory findings" are objective by definition.

Need To Follow Prescribed Treatment

Comment: Many persons objected to the change in policy which we proposed in §§ 404.1530 and 416.930 of the NPRM. Under this proposal, in order to receive benefits, a person would have to follow treatment which we determined would restore his or her ability to work, even if the treatment had not been prescribed by his or her own physician. In addition to the adverse comments which we received from members of the public, physicians and other Federal and State personnel involved in the day-to-day administration of the titles II and XVI disability programs also expressed serious concerns about this proposed change in our policy. A few comments agreed with this proposal, but most comments pointed out its disadvantages. Several persons repreesenting legal aid services commented that relying on the viewpoint of a consulting physician who sees a claimant for a single examination, rather than on an attending physician who is actually treating the claimant, would be "unduly harsh and restrictive." Several persons believed that this change in policy would be an interference in the doctor-patient relationship. Some doctors thought that this policy "would be fraught with marked malpractice liability." A representative from a legal aid bureau expressed the opinion that this new requirement may cause injury to a claimant's physical or mental condition, because a consulting physician is not qualified to prescribe mandatory treatment. According to other attorneys, this provision is beyond the scope of the law and contrary to court decisions. Others pointed out that the proposed rule "gives much too much weight to consulting physicians" and that the claimant should have some freedom in deciding on whose treatment to follow. Others questioned whether consulting physicians would be willing to assume this responsibility.

Response: We have decided not to adopt that proposed rule. From the beginning, we recognized that this proposal would require careful administration on our part. We would have only applied this proposed rule to medical conditions which we carefully evaluated. We had intended to limit the proposed rule to medical conditions where it is clear that the recommended treatment conforms to widely accepted medical standards. Admittedly, we would have had difficulty in accomplishing this goal while administering a nationwide program that requires us to consider the wide variety of impairments that might produce disability and the treatment for these medical conditions.

Our intent in proposing the change in policy was to eliminate situations where we are paying disability benefits to persons who would be able to return to work if they followed appropriate treatment. By obtaining another medical opinion about appropriate treatment, we might encourage some disabled persons to seek treatment to correct their medical condition. However, there are probably few people receiving disability benefits only because of lack of proper treatment. Therefore, the proposed change in policy would have little effect on the total cost of disability benefits.

In view of the potential problems which were pointed out in the comments, we are not adopting this proposed rule. In deciding whether a person is following treatment which would restore his or her ability to work, we will continue our past policy of only considering treatment that has been prescribed by a treating source. We have revised §§ 404.1530 and 416.930 along these lines.

Comment: One person commented about the examples of good reasons for not following prescribed treatment. According to this comment, the example in paragraph (c)(2) of §§ 404.1530 and 416.930 is not appropriate, because one cannot meet the Listing of Impairments, which applies to both eyes, by having a very severe problem with one eye alone.

Response: We agree with this comment. Therefore, we have revised the example to show that a person would have good reason for refusing cataract surgery for one eye when there is an impairment of the other eye resulting in a severe loss of vision that is not subject to improvement through treatment.

Presumptive Disability and Blindness

When Presumptive Payments Begin and End

Comment: One person representing a legal aid bureau commented that paragraph (c) of § 416.932 is an additional condition for cessation of presumptive disability. This person stated that this condition should be published as a substantive change and not as part of "Operation Common Sense," since it is not in the prior regulations.

Response: The condition in paragraph (c) was previously published as a final regulation in § 416.952 in the **Federal Register** on April 24, 1978 (43 FR 17354). It read as follows: "(c) The month in which a non-medical factor of entitlement is no longer met." This described one of the conditions which would end payments based on presumptive disability or presumptive blindness. In the NPRM, we rewrote this paragraph to read: "(c) The month in which you no longer meet one of the other eligibility requirements (e.g., your income exceeds the limits)." We did not intend to make any change in the rule but only to state more clearly what we mean by "a non-medical factor of entitlement".

Impairments Which May Warrant a Finding of Presumptive Disability or Presumptive Blindness

Comment: One person observed that the list of impairments in § 416.934 which warrant a finding of presumptive disability or presumptive blindness without obtaining medical evidence is completely new to the regulations. This person belives that we should have published this list of impairments separately as a proposed substantive change and not as a part of "Operation Common Sense", in which it was "slipped in" with other regulations. This person also believes that the section should at least include a statement that the list is not meant to exclude other possibilities.

Response: We stated in the preamble of the NPRM that we were including in the regulations for the first time the important policies which we were already following. We highlighted this addition on page 38881, where we stated that "in § 416.934, we give examples of 10 specific impairment categories where we will make a presumptive determination before we get any more medical evidence." We also pointed out that we have been paying presumptive payments on the basis of these impairment categories for several years. Those categories were already listed in our operating manuals. On the second point, based on our experience, we have listed impairments that are observable or can be judged without medical evidence and have a high degree of probability of a finding of disability or blindness. In other cases we need some other evidence. In § 416.933, we already explain how we make a finding of presumptive disability or presumptive blindness in other cases in which the medical evidence shows a high degree of probability that disability or blindness exists.

V 45 A G 2 0 8 0 UMI

Drug Addiction and Alcoholism

Medically Determined Drug Addicts and Alcoholics

Comment: One person pointed out that § 416.935 no longer includes the phrase in the previous rule which defined "contributing factor" as "material to the finding of disability." This person stated that the phrase has a specific legal meaning, narrower and clearer than "contributing factor" and should be retained in the new section, even though it may not be considered as ordinary language.

Response: We agree with this comment, and we have restored the phrase "material to the finding of your disability" in order to more clearly define the meaning of contributing factor."

Treatment Required for Medically Determined Drug Addicts and Alcoholics

Comment: One person objected to § 416.936 because it omits language from the previous rule that made it clear that ineligibility for failure to accept and comply with treatment applies only to those months in which there was noncompliance. This person believes that the language "for such month" should be retained because without it the section could be interpreted to permit permanent cessation of payments, requiring the claimant to make a new application and undergo a new determination of disability in order to become eligible again.

Response: We agree with the comment, and we have added the phrase "for any month" to make it clear that we are only referring to the month of noncompliance.

Residual Functional Capacity

Your Residual Functional Capacity

Comment: One person, in discussing §§ 404.1545 and 416.945, noted that "sensory characteristics" were included with physical abilities in paragraph (b), while only skin impairments and epilepsy were mentioned as examples of impairments other than physical or mental ones in paragraph (d).

Response: We agree that these paragraphs in the sections are confusing. Accordingly, we have deleted "and sensory characteristics" from paragraph (b) and we have added to paragraph (d) the phrase "impairments of vision, hearing or other senses, postural and manipulative limitations, and environmental restrictions."

Comment: Another person commenting on §§ 404.1545 and 416.945 stated that in determining residual functional capacity, it is not clear what we mean by the statement that we will consider other factors, such as a claimant's description of the impairment, when we cannot make a decision on medical findings. This person questioned whether a claimant's description of the impairment is not in fact the same as medical findings of his symptoms to be considered along with signs and laboratory findings.

Response: The determination of residual functional capacity is based on a medical assessment, and often requires descriptions or observations that go beyond those symptoms that are important for medical diagnosis and treatment. These observations by examining physicians relate to physical limitations that affect work and not necessarily to medical findings that relate to the treatment of the claimant's condition. The claimant's own description of how an impairment limits capacity to work may also be helpful. These descriptions and observations are then considered together with the claimant's complete medical record. Sections 404.1545(a) and 416.945(a) have been revised to clarify these points. Additional material has also been added to emphasize that the determination of residual functional capacity is not in itself a determination of disability, but is used together with the vocational guidelines to make a disability determination.

Comment: One person commented that we should consider a claimant's pain in determining residual functional capacity.

Response: Since pain, as a symptom, is a medical finding, we do consider a claimant's pain in making a decision about residual functional capacity. How we evaluate pain, and other symptoms, is described in §§ 404.1529 and 416.929.

Responsibility for Assessing and Determining Residual Functional Capacity

Comment: A person representing a legal aid bureau expressed concern that §§ 404.1546 and 416.946 require administrative law judges to accept conclusions by physicians. This person believes that the sections should specifically provide that while a physician's judgment as to residual functional capacity should be considered, it is in no way binding on the trier of fact, such as the administrative law judge, who has the responsibility to reach a finding of fact on this issue.

Response: We agree that the responsibility of the administrative law judge and the Appeals Council should be defined in these sections. Therefore, we have revised the language to make it clear that the administrative law judge, or Appeals Council, has the responsibility for deciding the claimant's residual functional capacity on the basis of the medical evidence for cases at the hearing or Appeals Council level.

Comment: One person objected to §§ 404.1546 and 416.946 because current medical forms are inadequate for furnishing a medical assessment by the treating physician as required by the regulations.

Response: These sections state that a treating or examining physician, State Agency physician, or any other physician designated by the Secretary may make an assessment and determination of the residual functional capacity. These sections, however, do not indicate that the treating or examining physician is the preferred source for the assessment of the claimant's residual functional capacity. Therefore, we ordinarily do not ask the treating physician to make an assessment.

Vocational Considerations

When Your Vocational Background Will Be Considered

Comment: A person from a social service agency believes that the provision in § 416.960(a) that states that vocational factors do not apply to supplemental security income (SSI) claimants who are eligible for benefits because of blindness will cause problems for rehabilitation agencies. This person interprets this section to mean that those who meet the blindness eligibility requirements under the SSI program can continue to receive benefits indefinitely, even though they may have acquired skills through vocational rehabilitation and have obtained successful employment.

Response: The law does not give us the discretion to decide whether vocational factors should apply to the blind as well as to the disabled. Title XVI of the Social Security Act provides two distinct benefit categories for people with impairments: disability and blindness. To receive benefits based upon blindness, the person must meet the requirement of statutory blindness by having central visual acuity of 20/200 or less in the better eye with the use of correcting lens or an equivalent limitation in the field of vision. By law the determination is made on the basis of medical considerations alone without the need to consider vocational factors. There is no requirement that the blind person be unable to work. However, if the blind person is working, we will consider the earnings under the income and resources provisions of the law. This means that if the blind person's income and resources exceed the limitations under the law, that person will not be eligible for benefits even though blind. See §§ 416.981–416.985, which explain the policies of the SSI program with respect to blindness.

If You Have Done Only Arduous Unskilled Physical Labor

Comment: A representative from a legal aid bureau stated that §§ 404.1562 and 416.962 seem to limit the application of the rule that is stated in those sections to persons who have worked a minimum of 35 years in arduous unskilled physical labor. This person pointed out that the prior regulations explaining this rule stated "e.g., 35 to 40 years," which implied that the 35-year limit is only an example.

Response: In order for us to apply this particular rule the claimant must have done arduous unskilled labor for at least 35 years and now be unable to do this kind of work because of a severe impairment. Generally, this means that the claimant is an older person. Since the claimant must also have no more than a marginal education, we are able to make a determination of disability on the basis of these seriously adverse vocational factors without considering whether the claimant has qualifications for doing other work. However, when a claimant has done arduous unskilled labor for less than 35 years, this does not mean that we will deny the claimant's application. We look further at the claimant's vocational background, including age, education, and work experience, and may find that the claimant has no qualifications for other work. In §§ 404.1520 and 416.920, we have also changed the "e.g.," to "i.e.," in paragraph (f)(2) to clarify that the 35-year requirement is not merely an example.

Your Age as a Vocational Factor

Comment: One person representing a legal aid bureau observed that §§ 404.1563 and 416.963 omit the statement in the prior regulations which provided that the age categories "are not to be applied mechanically in borderline situations." According to this comment, this is an important provision which protects claimants from arbitrary and unreasonable treatment where their age is very close to a different category. Another person asked whether we intended to delete this provision.

Response: We agree that this provision is important, and we have restored it.

Your Work Experience as a Vocational Factor

Comment: One person considered it inconsistent that §§ 404.1565 and 416.965 provide "that your work experience applies when it was done within the last 15 years, lasted long enough (usually six months to a year) for you to learn to do it" and that §§ 404.1568 and 416.968 state that, as to unskilled work, "a person can usually learn to do the job in 30 days."

Response: We agree. We did not intend by the parenthetical guidance "(usually six months to a year)" to preclude consideration of a shorter period of relevant work. This language could cause confusion. Therefore, we have deleted it from these sections.

Comment: Another person believed that someone not familiar with the disability program could confuse the term "earnings requirements" with "substantial gainful activity" and suggested that we use different wording than "earnings requirements."

Response: We have adopted this suggestion. Accordingly, we have substituted the term "disability insured status" in § 404.1565. In § 416.965 we have deleted the statement about when the earnings requirement was last met, since there is no insured status requirement under the Supplemental Security Income Program.

Work Which Exists in the National Economy

Comment: One person questioned how "technological changes in the industry" could affect employability as do the other factors in paragraph (c) of §§ 404.1566 and 416.966.

Response: All of the seven items we listed in paragraph (c) refer to the inability to *get* a job, as opposed to the physical or mental inability to *do* a job. Technological changes, such as automation in the industry in which a person worked, may eliminate certain jobs or require greater skills or different skills.

Comment: Another person commented that §§ 404.1566 and 416.966 make it possible for administrative law judges or the Appeals Council to take administrative notice of not just the existence of jobs but also the tasks involved in jobs. According to this comment, this is a function for a vocational expert.

Response: We take administrative notice of unskilled occupations only. These occupations are entry occupations, requiring no prior experience, and can be learned after a short demonstration or within 30 days on the job. Since the tasks involved in unskilled occupations are so elementary, vocational experts would contribute little to the decisions involving vocational adjustment to this work. The unskilled occupations we refer to in Appendix 2 to Subpart P of Part 404 were taken by us from the *Dictionary of Occupational Titles*, Third Edition, published by the Department of Labor.

Additional Changes: After further consideration, we have decided to expand paragraph (c) of §§ 404.1566 and 416.966 by adding item (8) to explain that we will also find a person not disabled if his or her residual functional capacity and vocational abilities make it possible to do work which exists in the national economy, but the person remains unemployed because he or she does not wish to do a particular type of work.

In paragraph (e), which explains the use of vocational experts and other specialists, we have added a sentence to make it clear that we have the discretion to decide whether to use a vocational expert or other specialist.

Physical Exertion Requirements

Additional Changes: In §§ 404.1567 and 416.967, we have revised the first sentence of paragraph (e) to read: "Very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying of objects weighing 50 pounds or more." In the NPRM, we defined very heavy work as involving "lifting objects weighing 100 pounds or more." This was an error on our part. The definitions of physical exertional requirements are standard definitions in the *Dictionary of Occupational Titles*, published by the Department of Labor.

Skill Requirements

Comment: One person stated that §§ 404.1568 and 416.968 should include the additional information in Appendix 2 of Subpart P about transferability of skills when dealing with older workers.

Response: Sections 404.1568 and 416.968 relate to transferable skills in general, while Appendix 2 gives specific guidance for evaluating the work skills of persons who are limited to sedentary or light work. We believe that it is not appropriate to combine these approaches. Further, neither the regulations proper nor the Appendix 2 provisions stand alone but must be used together.

Comment: Another person questioned whether a case-by-case approach is necessary for determining a claimant's work skills and the transferability of these skills to specific occupations.

Response: Transferability of skills is not an issue in most disability claims. In

many cases, we determine on the basis of medical considerations alone whether or not a claimant is disabled. In other cases, the principal disability issue is related to whether the claimant can do her or her usual work or other past relevant jobs. See §§ 404.1520 and 416.920 for the steps we follow in making a disablity determination. Transferability of skills only becomes an issue in the last step after we have determined that the claimant has a severe impairment which prevents him or her from doing past relevant work. Before we can make a decision on this issue, we must first make findings about the claimant's residual functional capacity, age, education, and work experience. To determine whether the claimant's skills are transferable to other jobs, we use reference materials such as the *Dictionary of Occupational Titles*. In some cases, we use the services of vocational experts or work evaluation centers for determining whether skills are transferable.

Additional Changes: We have revised the last sentence in paragraph (d)(3) of §§ 404.1568 and 416.968 to make it clear that we do not consider all jobs in mining, agriculture, and fishing to be so specialized that skills are not transferable.

Listing of Medical-Vocational Guidelines in Appendix 2

Comment: One person commented that we should identify by name and *Dictionary of Occupational Titles* number the separate sedentary and light unskilled occupations we refer to in §§ 404.1569 and 416.969.

Response: These jobs are described in the *Dictionary of Occupational Titles*, which is published by the Department of Labor. One can find the physical demands and skill requirements of jobs in the Supplement to the *Dictionary of Occupational Titles*. Since this information is already available, we see no purpose in publishing another list of these jobs. We state in §§ 404.1566 and 416.966 that we will take administrative notice of the *Dictionary of Occupational Titles* and other job information available from various government and other publications.

Comment: One person stated that it was difficult to understand the 65-word opening sentence in §§ 404.1569 and 416.969. This person believed that a cross-reference to Appendix 2 would be sufficient.

Response: We agree that the sentence is too long, and we have revised the language. However, we believe that a mere cross-reference is not sufficient, since this section is an important link to Appendix 2.

Substantial Gainful Activity

General Information About Work Activity

We received no comments directly on §§ 404.1573 and 416.973. However, we realized, on our own further review that the titles to these sections are misleading, since these sections do not contain evaluation guides. The guides are found in §§ 404.1574 and 404.1575 and §§ 416.974 and 416.975. We therefore changed the titles of these two sections from "Evaluation Guides for Work Activitity" to "General Information About Work Acvitity." In addition, we added a reference in § 416.973 to Subparts K and L of Part 416 to specify where the income and resource provisions may be found. This change was prompted by a comment made by an SSI recipient about the substantial gainful activity earnings guidelines.

Evaluation Guides if You Are an Employee

Comments received following publication of the interim regulations on the 1978 and 1979 SGA amounts have been considered along with the comments received following publication of the NPRM for this recodification.

Comment: A writer from an association of retired people felt that our reference to "a mentally handicapped person" in §§ 404.1574 and 416.974 seems to bring medical factors into the discussion of what constitutes SGA when the work is done under special circumstances.

Response: We did not intend to create that impression. We used that only to be illustrative. We referred to the mentally handicapped since they are the ones most likely to be engaged in doing simple tasks under supervision such as we describe. We have, however, deleted the word "mentally" to avoid any future misunderstandings.

Comment: Several commenters felt that the upper level figures are too low and thus act as disincentives for people to return to work, since in some cases it is possible for a person to receive more money by continuing to draw benefits than by working. A commenter from a State rehabilitation agency feels that a better indicator would be the Federal minimum wage multiplied by the number of hours (generally 35 to 40 hours a week) considered to be full-time employment. A writer from a State department of health and social services suggested raising the upper level SGA amount to correspond more closely with the poverty level. This same writer, when commenting on the interim regulations setting the SGA levels for 1978 and 1979, had suggested that the upper limit guidelines for disabled SSI recipients be made the same as the income exclusions for SSI recipients age 65 or over. Two other writers, a representative from a vocational rehabilitation institute and a representative from a vocational rehabilitation training center, also felt that the income guidelines should be the same as the income exclusions for SSI recipients age 65 or over. A representative of a facility for the mentally retarded wrote that the upper level guidelines applicable to all disabled persons should be made the same as for persons disabled by blindness who are receiving title II disability benefits.

Response: We have not adopted any of these suggestions. We are, however, trying to find ways to eliminate, where possible, the apparent disincentives in the current SGA guides for impaired persons to reenter the work force or to attempt rehabilitation. We have been studying various alternatives to the current guides to find out whether there is a more effective way of evaluating a person's work activity. A number of alternatives are being considered, including keeping the upper limit equal to the Federal minimum wage or to the poverty level. However, the increases in the SGA limit amounts are kept consistent with specific economic indicators, and increases beyond the amounts indicated by those indicators cannot be fiscally justified without statutory authority. Recently enacted legislation provides that extraordinary work expenses will be excluded from a person's earnings when applying the SGA earnings guidelines. We will publish a notice of proposed rulemaking to implement this provision as soon as possible.

In addition, the legislation authorizes experiments and demonstration projects designed to determine the relative advantages and disadvantages of various alternative methods of treating the work activity of disabled beneficiaries under the disability program. Plans are now being developed to set up and carry out experiments under this authority.

Comment: A recipient of supplemental security income disability benefits wrote that she has recently learned that her monthly earnings, although considerably less than the upper SGA amounts, may affect her SSI benefit. She does not understand why her earnings, which are considerably less than the amount normally considered to show that a person has done substantial gainful activity, should affect her SSI benefit.

Response: Under the SSI program, eligibility for benefits and the amount of the benefit payable are dependent in part upon the amount of a person's income. As the amount of a person's countable income rises, his or her benefit payment is reduced. All earnings, therefore, must be evaluated under the income and resources provisions of the law. This evaluation is completely independent of any determination as to whether a person's work activity shows that he or she is doing substantial gainful activity. One evaluation has no affect upon the other. In the commenter's case the earnings, although nowhere near the upper SGA limits, still had to be evaluated for their effect, if any, on her monthly benefit amount.

Comment: A legal services agency interpreted the guides in §§ 404.1574(b)(2) and 416.974(b)(2) to mean that when a person's earnings are less than the amount shown in these sections we presume that person to be disabled; that is, that the person cannot do any substantial gainful activity. He then reasons that work at less than the lower limits ($190 for 1980) constitutes gainful activity as opposed to substantial gainful activity and believes that it is incumbent upon us to prove, when denying a widow/widower claim, that there are jobs which the claimant can perform, which pay less than the lower SGA limits.

Response: These sections do not provide a presumption that a person is disabled. The lower limits in §§ 404.1574 and 416.974 are merely monetary guides to help us determine whether a person is engaging or has engaged in substantial gainful activity. Sections 404.1520 and 416.920 set out the steps we follow in making a disability determination. When a person is working, the first step we follow is to see if the work is substantial gainful activity. We use the earning levels for this purpose. Earnings that exceed the upper level ordinarily demonstrate that the person is able to engage in substantial gainful activity. Earnings below the lower level ordinarily indicate that the person is not engaging in substantial gainful activity. However, the fact that the earnings are below the lower level does not necessarily indicate that the person does not have the ability to engage in substantial gainful activity. We still must proceed to the other steps. Only then can it be determined whether the person cannot do any substantial activity and is disabled.

Unlike the determination of other disability claims, the determination of a widow, widower or surviving divorced wife claim does not involve a decision as to the existence of other jobs that a person could do. Under section 223(d)(2)(B) of the Act, such a claim is decided based on the severity of the impairment(s). A detailed discussion of how the determination is made on such a claim is contained in §§ 404.1577–404.1580.

Comment: In commenting on the sequential evaluation process a writer from an association of retired people expressed concern that these regulations introduce the concept of "actually" or "currently" engaging in substantial gainful activity without consideration of whether a person has the ability to engage in substantial gainful activity.

Response: What a person has done is important to us when determining whether he or she is able to do substantial gainful activity. We consider any work a person has done, along with all the other vocational and medical evidence on file, to determine whether he or she is able to do substantial gainful activity.

Additional Changes: We amended the earnings guidelines in §§ 404.1574(b) (1) and (2) and 416.974(b) (1) and (2) to reflect the earnings limits applicable to earnings after calendar year 1979. In addition, we changed the title sentences of §§ 404.1574(a)(1) and 416.974(a)(1) to make them more consistent with the remaining paragraphs of §§ 404.1574 and 416.974. We changed the reference to "work" in the last sentence of §§ 404.1574(a)(1) and 416.974(a)(1) to "substantial gainful activity" to more clearly show that our concern is with whether a person is able to do substantial gainful activity. We rewrote the last sentence in paragraph (a)(4) of §§ 404.1574 and 416.974 to clearly show that medication and equipment are only examples. The discussion was not intended to be limited to only those two items.

To the discussion on earnings that are neither high enough nor low enough to show whether or not a person has engaged in substantial gainful activity, we have added (to paragraphs (b)(3)(ii) of §§ 404.1574 and 416.974) references to pay scales in a person's community. We did this to reflect what has been our long-standing policy in this area.

Evaluation Guides if You Are Self-Employed

Comment: Several writers pointed out the incorrect reference to "paragraph (b)(1) of this section" in §§ 404.1575 and 416.975.

Response: We have corrected the cross-references to show the correct sections—§§ 404.1574(b)(1) and 416.974(b)(1).

Comment: A person representing a State department of health and social services asked whether the rule in §§ 404.1575(c) and 416.975(c) provides for the deduction of soil bank payments and the value of unpaid help from gross business revenue or from net business income.

Response: Our procedures provide that the reasonable value of any significant amount of unpaid help furnished by a spouse, children, or others is to be deducted from gross income. They also provide that soil bank payments are not to be included in figuring net farm income. Our policy is that only income or earnings resulting from a person's own work activity is to be considered when determining whether a person's work is substantial gainful activity. Portions of income resulting from other factors such as unpaid help, rents, and soil bank payments do not result from a person's work and are not counted in determining the amount of substantial gainful activity. We have, however, made several changes to §§ 404.1575(c) and 416.975(c) to more clearly reflect our policies in these areas.

Additional Changes: We changed the second sentence in §§ 404.1575(a) and 416.975(a) from "We realize that we cannot use income alone . . ." to "We will not consider income alone . . ." We think the revised version more clearly reflects our policy in evaluating the earnings of a self-employed person. In §§ 404.1575 (a) and (b) and 416.975 (a) and (b) we have changed "give" and "giving" to "render" and "rendering" wherever those words were used to make the language in these sections conform to language that is in our operating manuals. To §§ 404.1575(a) and 416.975(a) we added a discussion, inadvertently left out of the NPRM, to show that earnings from work that a person is forced to stop after a short period of time because of his or her impairment will not be used to show that a person is able to do substantial gainful activity. We pointed out more clearly that paragraph (b)(1) applies to any business other than that of farm landlord. In order to be more specific we changed the references in paragraphs (c)(1) and (c)(2) of these sections from "§ 404.1574" to "§ 404.1574(b)(1)" and from "§ 416.974" to "§ 416.974(b)(1)".

Widows, Widowers, and Surviving Divorced Wives.—How We Determine Disability for Widows, Widowers, and Surviving Divorced Wives

Additional Changes: We have revised § 404.1578 to make it clear that we

cannot pay benefits to a disabled widow(er) or surviving divorced wife if he or she is actually doing substantial gainful activity regardless of the severity of the impairment.

Why and When We Will Stop Your Cash Benefits

Additional Changes: We changed the title of this section—§ 404.1579—from "Why and when we will stop your cash benefits" to "Why and when we will find that your disability has ended" to better describe the subject matter of this section. We added new paragraphs (b), (c), and (d) to § 404.1579 to provide that a widow, widower, or surviving divorced wife's disability may also be ended for failure to cooperate, if we are unable to locate him or her and there is a question as to whether he or she is still disabled and to provide the widow(er) a chance to tell us why we should not stop his or her benefits. These provisions, also provided in the regulations relating to disabled workers and persons disabled since childhood, were mistakenly left out of this section when we restructured the regulations.

Blindness

A Period of Disability Based on Blindness

Additional Changes: On the basis of a comment which we received on § 404.1565, we have changed "earnings requirement" to "insured status requirement."

Evaluation of Work Activity of Blind People

Comment: A writer from a State department of social services feels that the higher SGA earnings test for the blind (over that for the nonblind disabled) adversely affects the number of blind people who are vocationally rehabilitated. The writer points out that the Federal funding formula allocates a portion of the vocational rehabilitation funds on the basis of the number of cases that are closed because the beneficiary was able to return to substantial gainful activity. The comment argues that the higher SGA levels result in fewer case closures and, therefore, reduced funding for State agencies serving the blind.

Response: The higher SGA level for the blind was established by the Social Security Amendments of 1977. Our regulations merely reflect the law.

Additional Changes: We have rounded to the next whole dollar the amounts a blind person may earn monthly before being considered able to engage in substantial gainful activity. This aligns the amounts shown in this regulation section (§ 404.1584(d)) to the regulations relating to earnings of persons age 65 or over, which provides for rounding to whole dollars, except where to do so would result in a different grace year.

Why and When We Will Stop Your Cash Benefits

Additional changes: We added new paragraphs (c), (d), and (e) to § 404.1586 to provide that we may also find a blind person no longer disabled if he or she fails to cooperate with us, or if we are unable to locate him or her and there is a question as to whether he or she is still disabled and to provide the beneficiary a chance to tell us why we should not stop his or her benefits. These provisions, also included in the regulations relating to disabled workers and persons disabled since childhood, were mistakenly left out of this section when we rewrote the regulations. To the rules on blindness in Part 416 we added § 416.986 to give the conditions under which we will no longer consider a person disabled by blindness.

Circumstances Under Which We May Suspend Your Benefits Before We Make a Determination

Comment: A legal aid bureau wrote that, since this regulation section (§ 404.1587) has no counterpart in the present regulations, it should be deleted.

Response: Although not previously contained in the regulations the policy described in this section is not new. Since inclusion of our operating policy into the regulations makes it easier for the public to understand how we administer the program, we believe adding this policy to the regulations is consistent with the goals of Operation Common Sense.

Additional changes: We changed the reference (in § 404.1587) to "leaves no doubt" in the first sentence to "clearly shows." We believe the phrase "leaves no doubt" sets up a different level of evidentiary proof than is intended and that the phrase "clearly shows" more accurately describes the intent of this section.

Continuing or Stopping Disability or Blindness

When We Will Investigate Whether Your Disability Continues

Comment: A writer from a legal services agency feels that §§ 404.1590 and 416.990 could be improved by including in these sections information on how often cases are reviewed and how the review, or diary, dates are determined.

Response: Medical reexamination diary dates are set up on those cases where the person's impairment falls within one or more of the categories that are listed in our disability operating manuals. These categories list those impairments that can be reasonably expected to improve. We are now conducting various studies to determine whether this list of categories should be revised. We expect to make some changes. If we publish the categories at this time any changes that we later make as a result of those studies would also have to be made in the regulations. We have, therefore, not adopted this suggestion at this time.

Additional Changes: We added language explaining that we may start an investigation to determine whether a person's disability is continuing if someone in a position to know tells us that the claimant is not disabled or has returned to work.

If Your Medical Recovery Was Expected and You Returned To Work

Comment: A person representing a legal services organization wrote that he feels that these sections, 404.1591 and 416.991, should be rewritten to provide for a trial work period even though the person returned to work with no significant medical limitations. The writer points out that persons returning to work occasionally encounter unforeseen difficulties and that medical prognoses can be wrong.

Response: The cases with which these sections deal are clear-cut cases where medical improvement was reasonably expected, and the person's condition did improve and he or she returned to full-time work with no medical restrictions. Generally such persons no longer consider themselves disabled. Only persons who are disabled are entitled to a trial work period in which to test their ability to work on a sustained basis. Since these sections deal only with persons who have recovered from their disabilities, we have not adopted this suggestion.

The Trial Work Period

Additional Changes: We received no comments on these sections (§§ 404.1592 and 416.992). However, we have made several changes. We changed § 416.992 as a result of a comment on the substantial gainful activity regulations. We now explain that earnings during a trial work period, although not evaluated during the trial work period for the purpose of determining whether disability is continuing, are evaluated under the income and resources provisions of our regulations. Earnings during a trial work period can thus

affect a person's monthly benefit amount. We also made a change (in §§ 404.1592(b) and 416.992(b)) to provide the amount of earnings considered to be "services" for earnings in any calendar year before 1979. In doing so we made the dates and amounts conform to the instructions already in our operating manuals. We also made several changes to more clearly show what we do not consider to be services.

We May Ask You To Help Us Determine Whether You Are Still Disabled

Comment: A person from a legal services agency feels the §§ 404.1593 and 416.993 could be improved by referring to the appropriate paragraphs in §§ 404.1594 and 416.994 regarding cessation of a person's disability benefits if he or she fails to cooperate with us.

Response: We have adopted this suggestion.

Why and When We Will Stop Your Cash Benefits

Comment: A writer from a State department of social services thinks that these sections (§§ 404.1594 (b) and (c) and 416.994 (b) and (c)) do not clearly explain when disability ends in cases where the beneficiary returned to work, and recommends that these sections be revised to clearly differentiate between cessations based on work activity and cessations for medical reasons.

Response: We agree with the writer's recommendations and have made changes to more clearly distinguish between the medical and the work activity cessations. We may find that a person's disability has ended for medical reasons because the evidence of record reasonably supports a finding that the person is able to do substantial gainful activity even though he or she may not be working. We may also find that a person's disability has ended for work activity because the person's work activity shows that he or she is able to do substantial gainful activity. Persons who have not medically recovered are entitle to a 9-month trial work period in which to test their abilities to work. Although a determination is not made until after the trial work period, we may determine that the work a person did during the trial work period shows the ability to do substantial gainful activity, and therefore we may determine that a person's disability ended with the month following the trial work period. In other cases, although not showing ability to do substantial gainful activity during the trial work period, a person may demonstrate this ability sometime after the trial work period. We believe that the changes we have made to §§ 404.1594 and 416.994 more clearly state this policy.

Comment: Three commenters wrote that we should show that a person's medical condition has improved since disability or blindness was initially established before determining that the disability or blindness has ended. A legal services agency expressed the feeling that several recent Federal court decisions have held that we must show improvement before stopping payment of a person's benefits and that these regulations ignore those decisions. A member of another legal aid foundation feels that once a decision that a person is disabled has been made, the decision should be allowed to stand unless it is clear that his or her condition has improved. Still another legal aid society feels that to find that disability has ended without showing medical improvement, if the person has not returned to work, is patently unfair.

Response: Our previous regulations dealing with cessation of disablity (in cases other than widow's and widower's claims) provided that disability should be found to have ended when the impairment is no longer of such severity as to prevent the individual from engaging in any substantial gainful activity (SGA). Those regulations have been interpreted by some to mean that not only must the current evidence show that the individual is unable to engage in SGA but that the evidence must also demonstrate that the impairment forming the basis for the previous allowance (or continuance) has improved. This interpretation can result in the payment of benefits to persons who can engage in substantial gainful activity and who are no longer disabled or blind within the meaning of the law, but for whom actual "improvement" cannot be shown. These recodified regulations make it clear that disability ends when current evidence shows that the individual is able to engage in SGA regardless of whether actual improvement can be demonstrated. We do not agree that this position ignores the position taken by any Federal court. The decision that a person's disability or blindness has ended will not be based on a reexamination of old evidence but will be based on new evidence which will have to reasonably show that the person is able to perform substantial gainful activity. We do not agree that a finding that a person is disabled or blind should be allowed to stand in the face of evidence to the contrary simply because of the lack of evidence clearly showing medical improvement. We do not feel these regulations are unfair and we believe that the requirements of these new regulations provide adequate safeguards for persons who are still disabled or blind.

Additional Changes: We changed the titles of these sections from "Why and When We Will Stop Your Cash Benefits" to "Why and When We Will Find that Your Disability Has Ended" so that the title more closely describes the subject matter of the sections. In § 416.994 we corrected the incorrect reference from Subpart N to Subparts M and N.

When We Determine That You Are Not Now Disabled

Comment: Someone from a legal services agency suggested that § 404.1595 be amended to provide that first priority will be given to the opinion and evidence submitted by a person's treating physician.

Response: We do contact a person's current treating sources first. We secure a consultative examination only when we need it. The nature of a report determines the importance we give to it in the adjudicative process. We would not attach the same weight to a report that contains minimal information or an unsupported statement that a person is disabled as we would to a report that gives detailed and extensive findings upon which a determination of disability can be based. We do not believe, therefore, that we should include a categorical statement in the regulations that a treating physician's report will be given first priority.

Comment: A writer from a legal services foundation asked whether the reasons given to a beneficiary whose benefits are to be terminated are the same as those shown on the Disability Determination Transmittal. The writer expressed the belief that beneficiaries are entitled to detailed analyses of the reasons for the termination of their benefits.

Response: The advance notice that goes to a beneficiary before benefit payments are stopped gives the beneficiary 10 working days to submit additional evidence if he or she disagrees with our decision to terminate benefits. This notice gives a detailed explanation of the evidence in the claims file and tells why we are going to terminate benefits. If the beneficiary submits no new evidence, or if after we review any additional evidence our decision remains unchanged, we prepare a formal termination notice and sent it to the beneficiary. This notice cites the basis in law for our action and tells the beneficiary how to file an appeal should he or she wish to do so. It does not repeat the information already given to

V 45 A G 2 0 8 0 UMI

the beneficiary in the advance notice. The Disability Determination Transmittal (our form SSA–833–U5) is used to document decisions to continue or stop disability benefit payments. It documents the legal basis for the decision and serves as a source document from which statistics on the disability insurance program are extracted. The rationale for stopping a person's benefits is shown on a continuation form (SSA–834–U5) and is usually quite similar to the rationale included in the advance notice. We do not believe the beneficiary would be helped by being given a copy of the Disability Determination Transmittal since it contains no information of any value to the beneficiary that has not already been given in the advance notice or the termination notice. We have, therefore, not adopted this suggestion.

Comment: This same writer also feels a copy of the Disability Determination Transmittal should be given to persons who are denied benefits at the initial or reconsideration level.

Response: As with continuing eligibility claims, the Disability Determination Transmittal documents the decision and the legal basis for that decision, and serves as a source document for statistics. Much of the information is technical or statistical in nature and would be of little help to the claimant in understanding why his or her claim has been denied. Although the Disability Determination Transmittal does show the reasons for the denial, these same reasons are also included in the notice to the person of the disallowance of his or her claim. We have always encouraged people to contact our local offices if they have any questions regarding their claims. We believe that this person-to-person contact is more helpful than a detailed letter. We also believe that furnishing a copy of the Disability Determination Transmittal to denied claimants would not really help their understanding of why they have been denied. We have, therefore, not adopted this suggestion.

Comment: A legal aid bureau commented that, since the procedures described here and in §§ 404.1596 and 404.1597 were not previously found in the regulations, Operation Common Sense is not the forum for making these changes.

Response: The procedures described in these sections, although not described in the present regulations, reflect the practices we use in administering the title II disability program. These sections do not contain any new policies or procedures. Since inclusion of these policies and procedures into the regulations makes it easier for the public to understand how we administer the program, we believe their addition to the regulations is consistent with the goals of Operation Common Sense.

Circumstances Under Which We May Suspend Your Benefits Before We Make a Determination

Comment: Someone from a legal services foundation wrote that § 404.1596(b)(2) should make more clear what we mean by ". . . we are satisfied that you received our request and our records show that you should be able to respond." The same writer asked if illiteracy is an acceptable reason for failure to respond to a written notice.

Response: We may request additional medical or other evidence by mail, telephone, personal contact, or by a combination of these ways. Our policies provide that before we suspend a person's benefits it must be reasonable to infer from information in the file that he or she has received our request. Our file must also show that the beneficiary apparently understands, or is capable of understanding, the request. In addition, the file must show that all reasonable attempts have been made to secure the beneficiary's cooperation. We believe the wording of this section adequately protects the beneficiary, and we have made no changes.

Illiteracy, in itself, is not necessarily an acceptable reason for failure to respond to a written notice. Generally the case folder will indicate whether or not the beneficiary is illiterate. Whether or not the beneficiary has been able to understand previous letters, such as the award notice, is generally reflected in the folder. In addition, there is usually a follow-up contact in person or by telephone.

Additional Changes: We have changed the reference to "leaves no doubt" in the first sentence of § 404.1596(b)(1) to "clearly shows." We believe the phrase "leaves no doubt" sets up a different level of evidentiary proof than we intended and that the phrase "clearly shows" more accurately describes the intent of this section.

If You Become Disabled by Another Impairment

Comment: A legal aid bureau commented that, since these proposed sections (§§ 404.1598 and 416.998) were not in the previous regulations, they should not be included in this recodification.

Response: Although not previously contained in the regulations, the policy described in these sections—which concern persons already receiving benefits who become disabled by subsequent impairments—is not new policy. We believe inclusion of this policy in the regulations is consistent with our efforts to increase public understanding of our administration of the program.

Other Comment

Comment: A writer from a State rehabilitation commission recommended adding a section that would permit a person to continue to receive SSA benefits while participating in a rehabilitation program whether or not he or she has medically recovered. The writer mentions that medical recovery results in termination of a person's benefits and may result in termination of his or her rehabilitation program as well.

Response: Present law dose not permit the payment of benefits after medical recovery. Although a person's benefits have to be terminated upon medical recovery, his or her rehabilitation program may not necessarily end. A State vocational rehabilitation agency may continue the program using section 110 of the Rehabilitation Act of 1973 (29 U.S.C. 730), funds instead of Social Security Trust Fund monies.

The amendments are hereby adopted as revised and set forth below.

(Catalog and Federal Domestic Assistance Program No. 13.802, Disability Insurance; No. 13.807, Supplemental Security Income Program)

Dated: June 4, 1980.

William J. Driver,

Commissioner of Social Security.

Approved: August 7, 1980.

Secretary of Health and Human Services.

PART 404—FEDERAL OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE (1950-)

1. Subpart P of Part 404 of Chapter III of Title 20 of the Code of Federal Regulations is revised to read as follows:

Subpart P—Determining Disability and Blindness

General

Sec.

404.1501 Scope of subpart.
404.1502 General definitions and terms for this subpart.

Determinations

404.1503 Who makes disability and blindness determinations.
404.1504 Determinations by other organizations and agencies.

Definition of Disability

404.1505 Basic definition of disability.
404.1508 What is needed to show an impairment.
404.1509 How long the impairment must last.
404.1510 Meaning of substantial gainful activity.

Evidence

404.1512 Your responsibility to submit evidence.
404.1513 Medical evidence of your impairment.
404.1514 When we will purchase existing evidence.
404.1515 Where and how to submit evidence.
404.1516 If you fail to submit medical and other evidence.
404.1517 Consultative examination at our expense.
404.1518 If you do not appear at a consultative examination.

Evaluation of Disability

404.1520 Evaluation of disability in general.
404.1521 What we mean by an impairment that is not severe.
404.1522 When you have two or more unrelated impairments—initial claims.

Medical Considerations

404.1525 Listing of impairments in Appendix 1.
404.1526 Medical equivalence.
404.1527 Conclusion by physicians concerning your disability.
404.1528 Symptoms, signs and laboratory findings.
404.1529 How we evaluate symptoms including pain.
404.1530 Need to follow prescribed treatment.

Residual Functional Capacity

404.1545 Your residual functional capacity.
404.1546 Responsibility for assessing and determining residual functional capacity.

Vocational Considerations

404.1560 When your vocational background will be considered.
404.1561 Your ability to do work depends upon your residual functional capacity.
404.1562 If you have done only arduous unskilled physical labor.
404.1563 Your age as a vocational factor.
404.1564 Your education as a vocational factor.
404.1565 Your work experience as a vocational factor.
404.1566 Work which exists in the national economy.
404.1567 Physical exertion requirements.
404.1568 Skill requirements.
404.1569 Listing of Medical—Vocational Guidelines in Appendix 2.

Substantial Gainful Activity

404.1571 General.
404.1572 What we mean by substantial gainful activity.
404.1573 General information about work activity.
404.1574 Evaluation guides if you are an employee.
404.1575 Evaluation guides if you are self-employed.

Widows, Widowers, and Surviving Divorced Wives

404.1577 Disability defined for widows, widowers and surviving divorced wives.
404.1578 How we determine disability for widows, widowers and surviving divorced wives.
404.1579 Why and when we will find that your disability has ended.
404.1580 You are not eligible for a trial work period.

Blindness

404.1581 Meaning of blindness as defined in the law.
404.1582 A period of disability based on blindness.
404.1583 How we determine disability for blind persons who are age 55 or older.
404.1584 Evaluation of work activity of blind people.
404.1585 Trial work period for persons age 55 or older who are blind.
404.1586 Why and when we will stop your cash benefits.
404.1587 Circumstances under which we may suspend your benefits before we make a determination.

Continuing or Stopping Disability

404.1588 Your responsibility to tell us of events that may change your disability status.
404.1589 We may investigate to find out whether you continue to be disabled.
404.1590 When we will investigate whether your disability continues.
404.1591 If your medical recovery was expected and you returned to work.
404.1592 The trial work period.
404.1593 We may ask you to help us determine if you are still disabled.
404.1594 Why and when we will find that your disability has ended.
404.1595 When we determine that you are not now disabled.
404.1596 Circumstances under which we may suspend your benefits before we make a determination.
404.1597 After we make a determination that you are not now disabled.
404.1598 If you become disabled by another impairment.

Appendix 1—Listing of Impairments

Appendix 2—Medical-Vocational Guidelines

Authority: Issued under Secs. 202, 205, 216, 221, 222, 223, 225, and 1102 of the Social Security Act, as amended; 49 Stat. 623, as amended, 53 Stat. 1368, as amended, 68 Stat. 1080, as amended, 68 Stat. 1081, as amended, 68 Stat. 1082, as amended, 70 Stat. 815, as amended, 70 Stat. 817, as amended, 49 Stat. 647, as amended; 42 U.S.C. 402, 405, 416, 421, 422, 423, 425, and 1302.

Subpart P—Determining Disability and Blindness

General

§ 404.1501 Scope of subpart.

In order for you to become entitled to any benefits based upon disability or blindness or to have a period of disability established, you must be disabled or blind as defined in title II of the Social Security Act. This Subpart explains how we determine whether you are disabled or blind. We discuss a "period of disability" in subpart D of this Part. We have organized the rules in the following way.

(a) We define general terms, then discuss who makes our disability determinations and state that disability determinations made under other programs are not binding on our determinations.

(b) We explain the term "disability" and note some of the major factors that are considered in determining whether you are disabled in §§ 404.1505–404.1510.

(c) Sections 404.1512–404.1518 contain our rules on evidence. We explain your responsibilities for submitting evidence of your impairment, state what we consider to be acceptable sources of medical evidence, and describe what information should be included in medical reports.

(d) Our general rules on evaluating disability are stated in §§ 404.1520–404.1523. We describe the steps that we go through and the order in which they are considered.

(e) Our rules on medical considerations are found in §§ 404.1525–404.1530. We explain in these rules—

(1) The purpose of the Listing of Impairments found in Appendix 1 of this subpart and how to use it;

(2) What we mean by the term "medical equivalence" and how we determine medical equivalence;

(3) The effect of a conclusion by your physician that you are disabled;

(4) What we mean by symptoms, signs, and laboratory findings;

(5) How we evaluate pain and other symptoms; and

(6) The effect on your benefits if you fail to follow treatment that is expected to restore your ability to work, and how we apply the rule.

(f) In §§ 404.1545–404.1546 we explain what we mean by the term "residual functional capacity," state when an assessment of residual functional capacity is required, and who may make it.

(g) Our rules on vocational considerations are found in §§ 404.1560–404.1569. We explain when vocational factors must be considered along with the medical evidence, discuss the role of residual functional capacity in evaluating your ability to work, discuss the vocational factors of age, education, and work experience, describe what we mean by work which exists in the national economy, discuss the amount of exertion and the type of skill required

V 45 AG 20 80 UMI

for work, and describe and tell how to use the Medical-Vocational Guidelines in Appendix 2 of this subpart.

(h) Our rules on substantial gainful activity are found in §§ 404.1571–404.1574. These explain what we mean by substantial gainful activity and how we evaluate your work activity.

(i) In §§404.1577–404.1580 we explain the special rules covering disability for widows, widowers, and surviving divorced wives, and in §§ 404.1581–404.1587 we discuss disability due to blindness.

(j) Our rules on when disability continues and stops are contained in §§ 404.1588–404.1598. We explain what your responsibilities are in telling us of any events that may cause a change in your disability status, when you may have a trial work period, and when we will investigate to see if you are still disabled.

§ 404.1502 General definitions and terms for this subpart.

As used in this subpart—

"Secretary" means the Secretary of Health and Human Services.

"State agency" means an agency of a State which enters into an agreement with the Secretary to make determinations of disability for the Secretary.

"We" or "us" refers to either the Social Security Administration or the State agency making the disability or blindness determination.

"You" refers to the person who has applied for benefits or for a period of disability or is receiving benefits based on disability or blindness.

Determinations

§ 404.1503 Who makes disability and blindness determinations.

(a) *State agencies.* When there is an agreement between the State and the Secretary, the State agency designated in the agreement makes disability determinations for the Secretary for—

(1) Any person living in that State; and

(2) Any group of people named in the agreement.

(b) *Social Security Administration.* The Social Security Administration will make disability and blindness determinations for the Secretary for—

(1) Any person in any State that has not entered into an agreement with the Secretary;

(2) Any group of people not covered by an agreement with any State; and

(3) Any person living outside the United States.

(c) *What determinations are authorized.* The Secretary has authorized the State agencies and the Social Security Administration to make determinations about—

(1) Whether you are disabled or blind;

(2) The date your disability or blindness began; and

(3) The date your disability stopped.

(d) *Review of State Agency determinations.* On review of a State agency determination we may find that—

(1) You are not disabled or blind, although the State agency found you disabled or blind;

(2) Your disability or blindness began later than the date found by the State agency; and

(3) Your disability or blindness stopped earlier than the date found by the State agency.

§ 404.1504 Determinations by other organizations and agencies.

A decision by any nongovernmental agency or any other governmental agency about whether you are disabled or blind is based on its rules and is not our decision about whether you are disabled or blind. We must make a disability or blindness determination based on social security law. Therefore, a determination made by another agency that you are disabled or blind is not binding on us.

Definition of Disability

§ 404.1505 Basic definition of disability.

(a) The law defines disability as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. To meet this definition, you must have a severe impairment, which makes you unable to do your previous work or any other substantial gainful activity which exists in the national economy. To determine whether you are able to do any other work, we consider your residual functional capacity and your age, education, and work experience. We will use this definition of disability if you are applying for a period of disability, or disability insurance benefits as a disabled worker, or child insurance benefits based on disability before age 22.

(b) There are different rules for determining disability for individuals who are statutorily blind. We discuss these in §§ 404.1581 through 404.1587. There are also different rules for determining disability for widows, widowers, and surviving divorced wives. We discuss these in §§ 404.1577 through 404.1580.

§ 404.1508 What is needed to show an impairment.

If you are not doing substantial gainful activity, we always look first at your physical or mental impairment(s) to determine whether you are disabled or blind. Your impairment must result from anatomical, physiological, or psychological abnormalities which can be shown by medically acceptable clinical and laboratory diagnostic techniques. A physical or mental impairment must be established by medical evidence consisting of signs, symptoms, and laboratory findings, not only by your statement of symptoms. (See § 404.1528 for further information about what we mean by symptoms, signs, and laboratory findings.)

§ 404.1509 How long the impairment must last.

Unless your impairment is expected to result in death, it must have lasted or must be expected to last for a continuous period of at least 12 months. We call this the duration requirement.

§ 404.1510 Meaning of substantial gainful activity.

Substantial gainful activity means work that—

(a) Involves doing significant and productive physical or mental duties; and

(b) Is done (or intended) for pay or profit.

(See § 404.1572 for further details about what we mean by substantial gainful activity.)

Evidence

§ 404.1512 Your responsibility to submit evidence.

(a) *General.* In general, you have to prove to us that you are blind or disabled. Therefore, you must bring to our attention everything which shows that you are blind or disabled. In making a decision we will consider all information we get from you and others about your impairments.

(b) *Kind of evidence.* You must provide medical evidence showing that you have an impairment and how severe it is during the time you say that you are disabled. We will consider only impairments you say you have or about which we receive evidence. We will help you in getting medical reports when you give us permission to request them from your doctors and other medical sources. If we ask, you must also provide evidence about your—

(1) Age;

(2) Education and training;

(3) Work experience;

(4) Daily activities both before and after the date you say that you became disabled;

(5) Efforts to work; and

(6) Any other evidence showing how your impairment(s) affects your ability to work. (In §§ 404.1560 through 404.1569 we discuss in more detail the evidence we need when we consider vocational factors.)

§ 404.1513 Medical evidence of your impairment.

(a) *Acceptable sources.* We need reports about your impairments from acceptable medical sources. Acceptable medical sources are—

(1) Licensed physicians;

(2) Licensed osteopaths;

(3) Licensed or certified psychologists;

(4) Licensed optometrists for the measurement of visual acuity and visual fields (we may need a report from a physician to determine other aspects of eye diseases); and

(5) Persons authorized to send us a copy or summary of the medical records of a hospital, clinic, sanitorium, medical institution, or health care facility. Generally, the copy or summary should be certified as accurate by the custodian or by any authorized employee of the Social Security Administration, Veterans' Administration, or State agency. However, we will not return an uncertified copy or summary for certification unless there is some question about the document.

(b) *Medical reports.* Medical reports should include—

(1) Medical history;

(2) Clinical findings (such as the results of physical or mental status examinations);

(3) Laboratory findings (such as blood pressure, x-rays);

(4) Diagnosis (statement of disease or injury based on its signs and symptoms);

(5) Treatment prescribed with response, and prognosis; and

(6) Medical assessment (except in statutory blindness claims, and disability claims for widows, widowers, and surviving divorced wives).

(c) *Medical assessment.* The medical assessment should describe—

(1) Your ability to do work-related activities such as sitting, standing, moving about, lifting, carrying, handling objects, hearing, speaking, and traveling; and

(2) In cases of mental impairment, your ability to reason or make occupational, personal, or social adjustments.

(d) *Completeness.* The medical evidence, including the clinical and laboratory findings, must be complete and detailed enough to allow us to make a determination about whether you are disabled or blind. It must allow us to determine—

(1) The nature and limiting effects of your impairment(s) for any period in question;

(2) The probable duration of your impairment; and

(3) Your residual functional capacity to do work-related physical and mental activities.

(e) *Information from other sources.* Information from other sources may also help us to understand how your impairment affects your ability to work. Other sources include—

(1) Public and private social welfare agencies;

(2) Observations by non-medical sources; and

(3) Other practitioners (for example, naturopaths, chiropractors, audiologists, etc.).

§ 404.1514 When we will purchase existing evidence.

You are responsible for submitting evidence to support your disability claim. This requires you to secure the medical evidence we will need to make a disability or blindness determination from the medical sources where you were examined or treated. Although we will help you get this information by asking these sources on your behalf, we will not usually pay for this information. However, there are rare situations when we will pay for existing evidence. For example, if the evidence in file shows that you may be disabled, but it does not contain the medical findings needed to make a disability determination, and we must have this additional information. If we find that one (or more) of your medical sources has this information, but that they will not give us the information until they are paid for it, we may pay for the report. Generally, we may pay when a hospital or clinic charges a small fee to cover its copying and mailing costs, and the only other way we can get the information would be to have you take a special examination at our expense.

§ 404.1515 Where and how to submit evidence.

You may give us evidence about your impairment at any of our offices or at the office of any State agency authorized to make disability determinations. You may also give evidence to one of our employees authorized to accept evidence at another place. For more information about this, see Subpart H of this Part.

§ 404.1516 If you fail to submit medical and other evidence.

If you do not give us the medical and other evidence that we need and request, we will have to make a decision based on information available in your case. We will not excuse you from giving us evidence because you have religious or personal reasons against medical examinations, tests, or treatment.

§ 404.1517 Consultative examination at our expense.

(a) *Notice of the examination.* If your medical sources cannot give us sufficient medical evidence about your impairment for us to determine whether you are disabled, we may ask you to take part in physical or mental examinations or tests. We will pay for these examinations. We will give you reasonable notice of the date, time, and place of the examination or test, and the name of the person who will do it. We will also give the examiner any necessary background information about your condition when your own physician will not be doing the examination or test.

(b) *Reasons why we may need evidence.* We may need more medical evidence—

(1) To obtain more detailed medical findings about your impairment(s);

(2) To obtain technical or specialized medical information; or

(3) To resolve conflicts or differences in medical findings or assessments in the evidence we already have.

§ 404.1518 If you do not appear at a consultative examination.

(a) *General.* If you are applying for benefits and do not have a good reason for failing or refusing to take part in a consultative examination or test which we arrange for you to get information we need to determine your disability or blindness, we may find that you are not disabled or blind. If you are already receiving benefits and do not have a good reason for failing or refusing to take part in a consultative examination or test which we arranged for you, we may determine that your disability or blindness has stopped because of your failure or refusal. Therefore, if you have any reason why you cannot go for the scheduled appointment, you should tell us about this as soon as possible before the examination date. If you have a good reason, we will schedule another examination.

(b) *Examples of good reasons for failure to appear.* Some examples of what we consider good reasons for not going to a scheduled examination include—

V 45 A G 2 0 8 0 UMI

(1) Illness on the date of the scheduled examination or test;

(2) Not receiving timely notice of the scheduled examination or test, or receiving no notice at all;

(3) Being furnished incorrect or incomplete information, or being given incorrect information about the physician involved or the time or place of the examination or test, or;

(4) Having had death or serious illness occur in your immediate family.

(c) *Objections by your physician.* If any of your treating physicians tell you that you should not take the examination or test, you should tell us at once. In many cases, we may be able to get the information we need in another way. Your physician may agree to another type of examination for the same purpose.

Evaluation of Disability

§ 404.1520 Evaluation of disability in general.

(a) *Steps in evaluating disability.* We consider all material facts to determine whether you are disabled. If you are doing substantial gainful activity, we will determine that you are not disabled. If you are not doing substantial gainful activity, we will first consider your physical or mental impairment(s). Your impairment must be severe and meet the duration requirement before we can find you to be disabled. We follow a set order to determine whether you are disabled. We review any current work activity, the severity of your impairment(s), your residual functional capacity and your age, education, and work experience. If we can find that you are disabled or not disabled at any point in the review, we do not review further.

(b) *If you are working.* If you are working and the work you are doing is substantial gainful activity, we will find that you are not disabled regardless of your medical condition or your age, education, and work experience.

(c) *You must have a severe impairment.* If you do not have any impairment(s) which significantly limits your physical or mental ability to do basic work activities, we will find that you do not have a severe impairment and are, therefore, not disabled. We will not consider your age, education, and work experience. However, it is possible for you to have a period of disability for a time in the past even though you do not now have a severe impairment.

(d) *When your impairment meets or equals a listed impairment in Appendix 1.* If you have an impairment which meets the duration requirement and is listed in Appendix 1, or we determine that the impairment is equal to one of the listed impairments, we will find you disabled without considering your age, education, and work experience.

(e) *Your impairment must prevent you from doing past relevant work.* If we cannot make a decision based on your current work activity or on medical facts alone, and you have a severe impairment, we then review your residual functional capacity and the physical and mental demands of the work you have done in the past. If you can still do this kind of work, we will find that you are not disabled.

(f) *Your impairment must prevent you from doing any other work.* (1) If you cannot do any work you have done in the past because you have a severe impairment, we will consider your residual functional capacity and your age, education, and past work experience to see if you can do other work. If you cannot, we will find you disabled.

(2) If you have only a marginal education, and long work experience (i.e., 35 years or more) where you only did arduous unskilled physical labor, and you can no longer do this kind of work, we use a different rule (see § 404.1562.)

§ 404.1521 What we mean by an impairment that is not severe.

(a) *Non-severe impairment.* An impairment is not severe if it does not significantly limit your physical or mental abilities to do basic work activities.

(b) *Basic work activities.* When we talk about basic work activities, we mean the abilities and aptitudes necessary to do most jobs. Examples of these include—

(1) Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;

(2) Capacities for seeing, hearing, and speaking;

(3) Understanding, carrying out, and remembering simple instructions;

(4) Use of judgment;

(5) Responding appropriately to supervision, co-workers and usual work situations; and

(6) Dealing with changes in a routine work setting.

§ 404.1522 When you have two or more unrelated impairments—initial claims.

We cannot combine two or more unrelated severe impairments to meet the 12-month duration test. If you have a severe impairment(s) and then develop another unrelated severe impairment(s) but neither one is expected to last for 12 months, we cannot find you disabled, even though the two impairments in combination last for 12 months. However, we can combine unrelated impairments to see if together they are severe enough to keep you from doing substantial gainful activity. We will consider the combined effects of unrelated impairments only if all are severe and expected to last 12 months.

Medical Considerations

§ 404.1525 Listing of impairments in Appendix 1.

(a) *Purpose of the Listing of Impairments.* The Listing of Impairments describes, for each of the major body systems, impairments which are considered severe enough to prevent a person from doing any gainful activity. Most of the listed impairments are permanent or expected to result in death, or a specific statement of duration is made. For all others, the evidence must show that the impairment has lasted or is expected to last for a continuous period of at least 12 months.

(b) *Adult and childhood diseases.* The Listing of Impairments consists of two parts:

(1) *Part A* contains medical criteria that apply to adult persons age 18 and over. The medical criteria in Part A may also be applied in evaluating impairments in persons under age 18 if the disease processes have a similar effect on adults and younger persons.

(2) *Part B* contains additional medical criteria that apply only to the evaluation of impairments of persons under age 18. Certain criteria in Part A do not give appropriate consideration to the particular effects of the disease processes in childhood; i.e., when the disease process is generally found only in children or when the disease process differs in its effect on children than on adults. Additional criteria are included in Part B, and the impairment categories are, to the extent possible, numbered to maintain a relationship with their counterparts in Part A. In evaluating disability for a person under age 18, Part B will be used first. If the medical criteria in Part B do not apply, then the medical criteria in Part A will be used.

(c) *How to use the Listing of Impairments.* Each section of the Listing of Impairments has a general introduction containing definitions of key concepts used in that section. Certain specific medical findings, some of which are required in establishing a diagnosis or in confirming the existence of an impairment for the purpose of this Listing, are also given in the narrative introduction. If the medical findings needed to support a diagnosis are not given in the introduction or elsewhere in the listing, the diagnosis must still be established on the basis of medically acceptable clinical and laboratory diagnostic techniques. Following the introduction in each section, the required level of severity of impairment is shown under "Category of Impairments" by one or more sets of medical findings. The medical findings consist of symptoms, signs, and laboratory findings.

(d) *Diagnosis of impairments.* We will not consider your impairment to be one listed in Appendix 1 solely because it has the diagnosis of a listed impairment. It must also have the findings shown in the Listing of that impairment.

(e) *Addiction to alcohol or drugs.* If you have a condition diagnosed as addiction to alcohol or drugs, this will not, by itself, be a basis for determining whether you are, or are not, disabled. As with any other medical condition, we will decide whether you are disabled based on symptoms, signs, and laboratory findings.

§ 404.1526 Medical equivalence.

(a) *How medical equivalence is determined.* We will decide that your impairment(s) is medically equivalent to a listed impairment in Appendix 1 if the medical findings are at least equal in severity and duration to the listed findings. We will compare the symptoms, signs, and laboratory findings about your impairment(s), as shown in the medical evidence we have about your claim, with the medical criteria shown with the listed impairment. If your impairment is not listed, we will consider the listed impairment most like your impairment to decide whether your impairment is medically equal. If you have more than one impairment, and none of them meets or equals a listed impairment, we will review the symptoms, signs, and laboratory findings about your impairments to determine whether the combination of your impairments is medically equal to any listed impairment.

(b) *Medical equivalence must be based on medical findings.* We will always base our decision about whether your impairment(s) is medically equal to a listed impairment on medical evidence only. Any medical findings in the evidence must be supported by medically acceptable clinical and laboratory diagnostic techniques. We will also consider the medical opinion given by one or more physicians designated by the Secretary in deciding medical equivalence.

(c) *Who is a designated physician.* A physician designated by the Secretary includes any physician employed or engaged to make medical judgments by the Social Security Administration, the Railroad Retirement Board, or a State agency authorized to make disability determinations.

§ 404.1527 Conclusion by physicians concerning your disability.

We are responsible for determining whether you are disabled. Therefore, a statement by your physician that you are "disabled" or "unable to work" does not mean that we will determine that you are disabled. We have to review the medical findings and other evidence that support a physician's statement that you are "disabled."

§ 404.1528 Symptoms, signs, and laboratory findings.

Medical findings consist of symptoms, signs, and laboratory findings:

(a) *Symptoms* are your own description of your physical or mental impairment. Your statements alone are not enough to establish that there is a physical or mental impairment.

(b) *Signs* are anatomical, physiological, or psychological abnormalities which can be observed, apart from your statements (symptoms). Signs must be shown by medically acceptable clinical diagnostic techniques. Pyschiatric signs are medically demonstrable phenomena which indicate specific abnormalities of behavior, affect, thought, memory, orientation and contact with reality. They must also be shown by observable facts that can be medically described and evaluated.

(c) *Laboratory findings* are anatomical, physiological, or psychological phenomena which can be shown by the use of medically acceptable laboratory diagnostic techniques. Some of these diagnostic techniques include chemical tests, electrophysiological studies (electrocardiogram, electroencephalogram, etc.), roentgenological studies (X-rays), and psychological tests.

§ 404.1529 How we evaluate symptoms, including pain.

If you have a physical or mental impairment, you may have symptoms (like pain, shortness of breath, weakness or nervousness). We consider all your symptoms, including pain, and the extent to which signs and laboratory findings confirm these symptoms. The effects of all symptoms, including severe and prolonged pain, must be evaluated on the basis of a medically determinable impairment which can be shown to be the cause of the symptom. We will never find that you are disabled based on your symptoms, including pain, unless medical signs or findings show that there is a medical condition that could be reasonably expected to produce those symptoms.

§404.1530 Need to follow prescribed treatment.

(a) *What treatment you must follow.* In order to get benefits, you must follow treatment prescribed by your physician if this treatment can restore your ability to work.

(b) *When you do not follow prescribed treatment.* If you do not follow the prescribed treatment without a good reason, we will not find you disabled or, if you are already receiving benefits, we will stop paying you benefits.

(c) *Acceptable reasons for failure to follow prescribed treatment.* The following are examples of a good reason for not following treatment:

(1) The specific medical treatment is contrary to the established teaching and tenets of your religion.

(2) The prescribed treatment would be cataract surgery for one eye, when there is an impairment of the other eye resulting in a severe loss of vision and is not subject to improvement through treatment.

(3) Surgery was previously performed with unsuccessful results and the same surgery is again being recommended for the same impairment.

(4) The treatment because of its magnitude (e.g. open heart surgery), unusual nature (e.g., organ transplant), or other reason is very risky for you; or

(5) The treatment involves amputation of an extremity, or a major part of an extremity.

Residual Functional Capacity

§ 404.1545 Your residual functional capacity.

(a) *General.* Your impairments may cause physical and mental limitations that affect what you can do in a work setting. Your residual functional capacity is what you can still do despite your limitations. If you have more than one impairment, we will consider all of your impairments of which we are aware. We consider your capacity for various functions as described in the following paragraphs, (b) physical abilities, (c) mental impairments, and (d) other impairments. Residual functional capacity is a medical assessment. However, it may include descriptions (even your own) of limitations that go beyond the symptoms that are important in the diagnosis and treatment of your medical condition. Observations of your work limitations in addition to those usually made during formal medical examinations[,] may also be used. These descriptions and observations, when

V 45 A G 20 80 UMI

used, must be considered along with the rest of your medical record[,] to enable us to decide to what extent your impairment keeps you from performing particular work activities. This assessment of your remaining capacity for work is not a decision on whether you are disabled, but is used as the basis for determining the particular types of work you may be able to do despite your impairment. Then, using the guidelines in §§ 404.1560 through 404.1569, your vocational background is considered along with your residual functional capacity in arriving at a disability decision.

(b) *Physical abilities.* When we assess your physical abilities (e.g., strength) we assess the severity of your impairment(s) and determine your residual functional capacity for work activity on a regular and continuing basis. We consider your ability to do physical activities such as walking, standing, lifting, carrying, pushing, pulling, reaching, handling and the evaluation of other physical functions. A limited ability to do these things may reduce your ability to do work.

(c) *Mental impairments.* When we assess your impairment because of mental disorders, we consider factors such as your ability to understand, to carry out and remember instructions, and to respond appropriately to supervision, co-workers and work pressures in a work setting.

(d) *Other impairments.* Some medically determinable impairments, such as skin impairments, epilepsy, and impairments of vision, hearing or other senses, postural and manipulative limitations, and environmental restrictions do not limit physical exertion. If you have this type of impairment, in addition to one that affects physical exertion, we consider both in deciding your residual functional capacity.

§ 404.1546 Responsibility for assessing and determining residual functional capacity.

The State agency staff physicians or other physicians designated by the Secretary are responsible for assuring that the agency makes a decision about your residual functional capacity. In cases where the State agency makes the disability determination, a State agency staff physician must assess residual functional capacity where it is required. This assessment is based on all of the medical evidence we have, including any other assessments that may have been provided by treating or examining physicians, consultative physicians, or any other physician designated by the Secretary. (See § 404.1545.) For cases at the hearing or Appeals Council level, the responsibility for deciding your residual functional capacity rests with the administrative law judge or Appeals Council.

Vocational Considerations

§ 404.1560 When your vocational background will be considered.

(a) *General.* We may consider vocational factors when you are applying for a period of disability, or disability insurance benefits as a disabled worker, or child insurance benefits based on disability before age 22.

(b) *Disability determinations in which vocational factors must be considered along with the medical evidence.* When we cannot decide whether you are disabled on medical evidence alone, we must use other evidence.

(1) We will use information from you about your age, education and work experience.

(2) We will consider your doctors' reports and hospital records as well as your statements and other evidence to determine your residual functional capacity and how it affects the work you can do. Sometimes, to do this, we will need to ask you to have special examinations or tests. (See § 404.1517).

(3) If we find that you can no longer do the work you have done in the past, we will determine whether you can do other work (jobs) which exists in significant numbers in the nation's economy.

§ 404.1561 Your ability to do work depends upon your residual functional capacity.

If you can do your previous work (your usual work or other applicable past work), we will determine that you are not disabled. However, if your residual functional capacity is not enough to enable you to do any of your previous work, we must still decide if you can do any other work. To do this, we consider your residual functional capacity, and your age, education, and work experience. Any work (jobs) that you can do must exist in significant numbers in the national economy (either in the region where you live or in several regions of the country). Sections 404.1563–404.1565 explain how we evaluate your age, education, and work experience when we are deciding whether or not you are able to do other work.

§ 404.1562 If you have done only arduous unskilled physical labor.

If you have only a marginal education and work experience of 35 years or more during which you did arduous unskilled physical labor, and you are not working and are no longer able to do this kind of work because of a severe impairment(s), we will consider you unable to do lighter work, and therefore, disabled. However, if you are working or have worked despite your impairment(s) (except where the work is sporadic or is not medically advisable), we will review all the facts in your case, and we may find that you are not disabled. In addition, we will consider that you are not disabled if the evidence shows that you have training or past work experience which enables you to do substantial gainful activity in another occupation with your impairment, either on a full-time or a reasonably regular part-time basis.

Example: B is a 60-year-old miner with a fourth grade education who has a life-long history of arduous physical labor. B says that he is disabled because of arthritis of the spine, hips, and knees, and other impairments. Medical evidence shows a combination of impairments and establishes that these impairments prevent B from performing his usual work or any other type of arduous physical labor. His vocational background does not show that he has skills or capabilities needed to do lighter work which would be readily transferable to another work setting. Under these circumstances, we will find that B is disabled.

§ 404.1563 Your age as a vocational factor.

(a) *General.* "Age" refers to how old you are (your chronological age) and the extent to which your age affects your ability to adapt to a new work situation and to do work in competition with others. However, we do not determine disability on your age alone. We must also consider your residual functional capacity, education, and work experience. If you are unemployed because of your age and you can still do a significant number of jobs which exist in the national economy, we will find that you are not disabled. We explain in detail how we consider your age as a vocational factor in Appendix 2. However, we will not apply these age categories mechanically in a borderline situation.

(b) *Younger person.* If you are under age 50, we generally do not consider that your age will seriously affect your ability to adapt to a new work situation. In some circumstances, however, we consider age 45 a handicap in adapting to a new work setting (see Rule 201.17 in Appendix 2).

(c) *Person approaching advanced age.* If you are closely approaching advanced age (50–54), we will consider that your age, along with a severe impairment and limited work experience, may seriously affect your ability to adjust to a significant number of jobs in the national economy.

(d) *Person of advanced age.* We consider that advanced age (55 or over) is the point where age significantly affects a person's ability to do substantial gainful activity. If you are severely impaired and of advanced age and you cannot do medium work (see § 404.1567(c)), you may not be able to work unless you have skills that can be used in (transferred to) less demanding jobs which exist in significant numbers in the national economy. If you are close to retirement age (60–64) and have a severe impairment, we will not consider you able to adjust to sedentary or light work unless you have skills which are highly marketable.

(e) *Information about your age.* We will usually not ask you to prove your age. However, if we need to know your exact age to determine whether you get disability benefits or if the amount of your benefit will be affected, we will ask you for evidence of your age.

§ 404.1564 Your education as a vocational factor.

(a) *General.* "Education" is primarily used to mean formal schooling or other training which contributes to your ability to meet vocational requirements, for example, reasoning ability, communication skills, and arithmetical ability. However, if you do not have formal schooling, this does not necessarily mean that you are uneducated or lack these abilities. Past work experience and the kinds of responsibilities you had when you were working may show that you have intellectual abilities, although you may have little formal education. Your daily activities, hobbies, or the results of testing may also show that you have significant intellectual ability that can be used to work.

(b) *How we evaluate your education.* The importance of your educational background may depend upon how much time has passed between the completion of your formal education and the beginning of your physical or mental impairment(s) and by what you have done with your education in a work or other setting. Formal education that you completed many years before your impairment began, or unused skills and knowledge that were a part of your formal education, may no longer be useful or meaningful in terms of your ability to work. Therefore, the numerical grade level that you completed in school may not represent your actual educational abilities. These may be higher or lower. However, if there is no other evidence to contradict it, we will use your numerical grade level to determine your educational abilities. The term "education" also includes how well you are able to communicate in English since this ability is often acquired or improved by education. In evaluating your educational level, we use the following categories:

(1) *Illiteracy.* Illiteracy means the inability to read or write. We consider someone illiterate if the person cannot read or write a simple message such as instructions or inventory lists even though the person can sign his or her name. Generally, an illiterate person has had little or no formal schooling.

(2) *Marginal education.* Marginal education means ability in reasoning, arithmetic, and language skills which are needed to do simple, unskilled types of jobs. We generally consider that formal schooling at a 6th grade level or less is a marginal education.

(3) *Limited education.* Limited education means ability in reasoning, arithmetic, and language skills, but not enough to allow a person with these educational qualifications to do most of the more complex job duties needed in semi-skilled or skilled jobs. We generally consider that a 7th grade through the 11th grade level of formal education is a limited education.

(4) *High school education and above.* High school education and above means abilities in reasoning, arithmetic, and language skills acquired through formal schooling at a 12th grade level or above. We generally consider that someone with these educational abilities can do semi-skilled through skilled work.

(5) *Inability to communicate in English.* Since the ability to speak, read and understand English is generally learned or increased at school, we may consider this an educational factor. Because English is the dominant language of the country, it may be difficult for someone who doesn't speak and understand English to do a job, regardless of the amount of education the person may have in another language. Therefore, we consider a person's ability to communicate in English when we evaluate what work, if any, he or she can do. It generally doesn't matter what other language a person may be fluent in.

(6) *Information about your education.* We will ask you how long you attended school and whether you are able to speak, understand, read and write in English and do at least simple calculations in arithmetic. We will also consider other information about how much formal or informal education you may have had through your previous work, community projects, hobbies, and any other activities which might help you to work.

§ 404.1565 Your work experience as a vocational factor.

(a) *General.* "Work experience" means skills and abilities you have acquired through work you have done which show the type of work you may be expected to do. Work you have already been able to do shows the kind of work that you may be expected to do. We consider that your work experience applies when it was done within the last 15 years, lasted long enough for you to learn to do it, and was substantial gainful activity. We do not usually consider that work you did 15 years or more before the time we are deciding whether you are disabled (or when the disability insured status requirement was last met, if earlier) applies. A gradual change occurs in most jobs so that after 15 years it is no longer realistic to expect that skills and abilities acquired in a job done then continue to apply. The 15-year guide is intended to insure that remote work experience is not currently applied. If you have no work experience or worked only "off-and-on" or for brief periods of time during the 15-year period, we generally consider that these do not apply. If you have acquired skills through your past work, we consider you to have these work skills unless you cannot use them in other skilled or semi-skilled work that you can now do. If you cannot use your skills in other skilled or semi-skilled work, we will consider your work background the same as unskilled. However, even if you have no work experience, we may consider that you are able to do unskilled work because it requires little or no judgment and can be learned in a short period of time.

(b) *Information about your work.* Under certain circumstances, we will ask you about the work you have done in the past. If you cannot give us all of the information we need, we will try, with your permission, to get it from your employer or other person who knows about your work, such as a member of your family or a co-worker. When we need to consider your work experience to decide whether you are able to do work that is different from what you have done in the past, we will ask you to tell us about all of the jobs you have had in the last 15 years. You must tell us the dates you worked, all of the duties you did, and any tools, machinery, and equipment you used. We will need to know about the amount of walking, standing, sitting, lifting and carrying you did during the work day, as well as any other physical or mental duties of your job. If all of your work in the past 15 years has been arduous and unskilled, and you have very little education, we

will ask you to tell us about all of your work from the time you first began working. This information could help you to get disability benefits.

§ 404.1566 Work which exists in the national economy.

(a) *General.* We consider that work exists in the national economy when it exists in significant numbers either in the region where you live or in several other regions of the country. It does not matter whether—

(1) Work exists in the immediate area in which you live;

(2) A specific job vacancy exists for you; or

(3) You would be hired if you applied for work.

(b) *How we determine the existence of work.* Work exists in the national economy when there is a significant number of jobs (in one or more occupations) having requirements which you are able to meet with your physical or mental abilities and vocational qualifications. Isolated jobs that exist only in very limited numbers in relatively few locations outside of the region where you live are not considered "work which exists in the national economy". We will not deny you disability benefits on the basis of the existence of these kinds of jobs. If work that you can do does not exist in the national economy, we will determine that you are disabled. However, if work that you can do does exist in the national economy, we will determine that you are not disabled.

(c) *Inability to obtain work.* We will determine that you are not disabled if your residual functional capacity and vocational abilities make it possible for you to do work which exists in the national economy, but you remain unemployed because of—

(1) Your inability to get work;

(2) Lack of work in your local area;

(3) The hiring practices of employers;

(4) Technological changes in the industry in which you have worked;

(5) Cyclical economic conditions;

(6) No job openings for you;

(7) You would not actually be hired to do work you could otherwise do; or

(8) You do not wish to do a particular type of work.

(d) *Administrative notice of job data.* When we determine that unskilled, sedentary, light, and medium jobs exist in the national economy (in significant numbers either in the region where you live or in several regions of the country), we will take administrative notice of reliable job information available from various governmental and other publications. For example, we will take notice of—

(1) *Dictionary of Occupational Titles,* published by the Department of Labor;

(2) *County Business Patterns,* published by the Bureau of the Census;

(3) *Census Reports,* also published by the Bureau of the Census;

(4) *Occupational Analyses,* prepared for the Social Security Administration by various State employment agencies; and

(5) *Occupational Outlook Handbook,* published by the Bureau of Labor Statistics.

(e) *Use of vocational experts and other specialists.* If the issue in determining whether you are disabled is whether your work skills can be used in other work and the specific occupations in which they can be used, or there is a similarly complex issue, we may use the services of a vocational expert or other specialist. We will decide whether to use a vocational expert or other specialist.

§ 404.1567 Physical exertion requirements.

To determine the physical exertion requirements of work in the national economy, we classify jobs as "sedentary," "light," "medium," "heavy," and "very heavy." These terms have the same meaning as they have in the *Dictionary of Occupational Titles,* published by the Department of Labor. In making disability determinations under this subpart, we use the following definitions:

(a) *Sedentary work.* Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met.

(b) *Light work.* Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. To be considered capable of performing a full or wide range of light work, you must have the ability to do substantially all of these activities. If someone can do light work, we determine that he or she can also do sedentary work, unless there are additional limiting factors such as loss of fine dexterity or inability to sit for long periods of time.

(c) *Medium work.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. If someone can do medium work, we determine that he or she can also do sedentary and light work.

(d) *Heavy work.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. If someone can do heavy work, we determine that he or she can also do medium, light, and sedentary work.

(e) *Very heavy work.* Very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying of objects weighing 50 pounds or more. If someone can do very heavy work, we determine that he or she can also do heavy, medium, light and sedentary work.

§ 404.1568 Skill requirements.

In order to evaluate your skills and to help determine the existence in the national economy of work you are able to do, occupations are classified as unskilled, semi-skilled, and skilled. In classifying these occupations, we use materials published by the Department of Labor. When we make disability determinations under this subpart, we use the following definitions:

(a) *Unskilled work.* Unskilled work is work which needs little or no judgment to do simple duties that can be learned on the job in a short period of time. The job may or may not require considerable strength. For example, we consider jobs unskilled if the primary work duties are handling, feeding and offbearing (that is, placing or removing materials from machines which are automatic or operated by others), or machine tending, and a person can usually learn to do the job in 30 days, and little specific vocational preparation and judgment are needed. A person does not gain work skills by doing unskilled jobs.

(b) *Semi-skilled work.* Semi-skilled work is work which needs some skills but does not require doing the more complex work duties. Semi-skilled jobs may require alertness and close attention to watching machine processes; or inspecting, testing or otherwise looking for irregularities; or tending or guarding equipment, property, materials, or persons against loss, damage or injury; or other types of activities which are similarly less complex than skilled work, but more complex than unskilled work. A job may be classified as semi-skilled where coordination and dexterity are necessary, as when hands or feet must be moved quickly to do repetitive tasks.

(c) *Skilled work.* Skilled work requires qualifications in which a person uses judgment to determine the machine and manual operations to be performed in order to obtain the proper form, quality, or quantity of material to be produced. Skilled work may require laying out work, estimating quality, determining the suitability and needed quantities of materials, making precise measurements, reading blueprints or other specifications, or making necessary computations or mechanical adjustments to control or regulate the work. Other skilled jobs may require dealing with people, facts, or figures or abstract ideas at a high level of complexity.

(d) *Skills that can be used in other work (transferability).* (1) *What we mean by transferable skills.* We consider you to have skills that can be used in other jobs, when the skilled or semi-skilled work activities you did in past work can be used to meet the requirements of skilled or semi-skilled work activities of other jobs or kinds of work. This depends largely on the similarity of occupationally significant work activities among different jobs.

(2) *How we determine skills that can be transferred to other jobs.* Transferability is most probable and meaningful among jobs in which—

(i) The same or a lesser degree of skill is required;

(ii) The same or similar tools and machines are used; and

(iii) The same or similar raw materials, products, processes, or services are involved.

(3) *Degrees of transferability.* There are degrees of transferability of skills ranging from very close similarities to remote and incidental similarities among jobs. A complete similarity of all three factors is not necessary for transferability. However, when skills are so specialized or have been acquired in such an isolated vocational setting (like many jobs in mining, agriculture, or fishing) that they are not readily usable in other industries, jobs, and work settings, we consider that they are not transferable.

§ 404.1569 Listing of Medical-Vocational Guidelines in Appendix 2.

The Dictionary of Occupational Titles includes information about jobs (classified by their exertional and skill requirements) that exist in the national economy. Appendix 2 provides rules using this data reflecting major functional and vocational patterns. We apply these rules in cases where a person is not doing substantial gainful activity and is prevented by a severe medically determinable impairment from doing vocationally relevant past work. The rules in Appendix 2 do not cover all possible variations of factors. Also, as we explain in § 200.00 of Appendix 2, we do not apply these rules if one of the findings of fact about the person's vocational factors and residual functional capacity is not the same as the corresponding criterion of a rule. In these instances, we give full consideration to all relevant facts in accordance with the definitions and discussions under vocational considerations. However, if the findings of fact made about all factors are the same as the rule, we use that rule to decide whether a person is disabled.

Substantial Gainful Activity

§ 404.1571 General.

The work that you have done during any period in which you believe you are disabled may show that you are able to do work at the substantial gainful activity level. If you are able to engage in substantial gainful activity, we will find that you are not disabled. (We explain the rules for persons who are statutorily blind in § 404.1584.) Even if the work you have done was not substantial gainful activity, it may show that you are able to do more work than you actually did. We will consider all of the medical and vocational evidence in your file to decide whether or not you have the ability to engage in substantial gainful activity.

§ 404.1572 What we mean by substantial gainful activity.

Substantial gainful activity is work activity that is both substantial and gainful:

(a) *Substantial work activity.* Substantial work activity is work activity that involves doing significant physical or mental activities. Your work may be substantial even if it is done on a part-time basis or if you do less, get paid less, or have less responsibility than when you worked before.

(b) *Gainful work activity.* Gainful work activity is work activity that you do for pay or profit. Work activity is gainful if it is the kind of work usually done for pay or profit, whether or not a profit is realized.

(c) *Some other activities.* Generally, we do not consider activities like taking care of yourself, household tasks, hobbies, therapy, school attendance, club activities, or social programs to be substantial gainful activity.

§ 404.1573 General information about work activity.

(a) *The nature of your work.* If your duties require use of your experience, skills, supervision and responsibilities, or contribute substantially to the operation of a business, this tends to show that you have the ability to work at the substantial gainful activity level.

(b) *How well you perform.* We consider how well you do your work when we determine whether or not you are doing substantial gainful activity. If you do your work satisfactorily, this may show that you are working at the substantial gainful activity level. If you are unable, because of your impairments, to do ordinary or simple tasks satisfactorily without more supervision or assistance than is usually given other people doing similar work, this may show that you are not working at the substantial gainful activity level. If you are doing work that involves minimal duties that make little or no demands on you and that are of little or no use to your employer, or to the operation of a business if you are self-employed, this does not show that you are working at the substantial gainful activity level.

(c) *If your work is done under special conditions.* Even though the work you are doing takes into account your impairment, such as work done in a sheltered workshop or as a patient in a hospital, it may still show that you have the necessary skills and ability to work at the substantial gainful activity level.

(d) *If you are self-employed.* Supervisory, managerial, advisory or other significant personal services that you perform as a self-employed individual may show that you are able to do substantial gainful activity.

(e) *Time spent in work.* While the time you spend in work is important, we will not decide whether or not you are doing substantial gainful activity only on that basis. We will still evaluate the work to decide whether it is substantial and gainful regardless of whether you spend more time or less time at the job than workers who are not impaired and who are doing similar work as a regular means of their livelihood.

§ 404.1574 Evaluation guides if you are an employee.

(a) *General.* We use several guides to decide whether you have done substantial gainful activity.

(1) *Your earnings may show you have done substantial gainful activity.* The amount of your earnings from work you have done may show that you have engaged in substantial gainful activity. Generally, if you worked for substantial earnings, this will show that you are able to do substantial gainful activity. On the other hand, the fact that your earnings are not substantial will not necessarily show that you are not able to do substantial gainful activity.

Earnings from work that you were forced to stop after a short time because of your impairment will not show that you are able to do substantial gainful activity.

(2) *We consider only the amounts you earn.* We do not consider any income not directly related to your productivity when we decide whether you have done substantial gainful activity. If your earnings are being subsidized, the amount of the subsidy is not counted when we determine whether or not your work is substantial gainful activity. Thus, where work is done under special conditions, we only consider the part of your pay which you actually "earn". For example, where a handicapped person does simple tasks under close and continuous supervision, we would not determine that the person worked at the substantial gainful activity level only on the basis of the amount of pay. An employer may set a specific amount as a subsidy after figuring the reasonable value of the employee's services. If your work is subsidized and your employer does not set the amount of the subsidy or does not adequately explain how the subsidy was figured, we will investigate to see how much your work is worth.

(3) *If you are working in a sheltered or special environment.* If you are working in a sheltered workshop, you may or may not be earning the amounts you are being paid. The fact that the sheltered workshop or similar facility is operating at a loss or is receiving some charitable contributions or governmental aid does not establish that you are not earning all you are being paid. Since persons in military service being treated for severe impairments usually continue to receive full pay, we evaluate work activity in a therapy program or while on limited duty by comparing it with similar work in the civilian work force or on the basis of reasonable worth of the work, rather than on the actual amount of the earnings.

(4) *If you have special work-related expenses.* If you have out-of-the-ordinary expenses in connection with your work and because of your impairment (for example, you may require special transportation), we will deduct these from your earnings if they exceeded the normal work-related expenses you would have if you were not impaired. When we decide if your work is substantial gainful activity, however, we do not deduct expenses for those things (e.g., medication or equipment) which you need even when you are not working.

(b) *Earnings guidelines.* If you are an employee, we first consider the criteria in paragraph (a) of this section, and then the guides in paragraphs (b)(1), (2), and (3) of this section.

(1) *Earnings that will ordinarily show that you have engaged in substantial gainful activity.* We will consider that your earnings from your work activities as an employee show that you have engaged in substantial gainful activity if—

(i) Your earnings averaged more than $200 a month in calendar years prior to 1976;

(ii) Your earnings averaged more than $230 a month in calendar year 1976;

(iii) Your earnings averaged more than $240 a month in calendar year 1977;

(iv) Your earnings averaged more than $260 a month in calendar year 1978;

(v) Your earnings averaged more than $280 a month in calendar year 1979; or

(vi) Your earnings averaged more than $300 a month in calendar years after 1979.

(2) *Earnings that will ordinarily show that you have not engaged in substantial gainful activity.* We will generally consider that the earnings from your work as an employee will show that you have not engaged in substantial gainful activity if—

(i) Your earnings averaged less than $130 a month in calendar years before 1976;

(ii) Your earnings averaged less than $150 a month in calendar year 1976;

(iii) Your earnings averaged less than $160 a month in calendar year 1977;

(iv) Your earnings averaged less than $170 a month in calendar year 1978;

(v) Your earnings averaged less than $180 a month in calendar year 1979; or

(vi) Your earnings averaged less than $190 a month in calendar years after 1979.

However, if you are working in a sheltered workshop or a comparable facility especially set up for severely impaired persons, your earnings and activities will ordinarily establish that you have not done substantial gainful activity if your average earnings are not greater than $200 a month in calendar years prior to 1976, $230 a month in calendar year 1976, $240 a month in calendar year 1977, $260 a month in calendar year 1978, $280 a month in calendar year 1979, $300 a month in calendar years after 1979.

However, if there is evidence showing that you may have done substantial gainful activity, we will apply the criteria in paragraph (b)(3) of this section regarding comparability and value of services.

(3) *Earnings that are not high or low enough to show whether you engaged in substantial gainful activity.* If your earnings, on the average, are between the amounts shown in paragraphs (b) (1) and (2) of this section, we will generally consider other information in addition to your earnings, such as whether—

(i) Your work is comparable to that of unimpaired people in your community who are doing the same or similar occupations as their means of livelihood, taking into account the time, energy, skill, and responsibility involved in the work, or

(ii) Your work, although significantly less than that done by unimpaired people, is clearly worth the amounts shown in paragraph (b)(1) of this section, according to pay scales in your community.

§ 404.1575 Evaluation guides if you are self-employed.

(a) *If you are a self-employed person.* We will consider your activities and their value to your business to decide whether you have engaged in substantial gainful activity if you are self-employed. We will not consider your income alone since the amount of income you actually receive may depend upon a number of different factors like capital investment, profit sharing agreements, etc. However, income from activities that you were forced to stop after a short time because of your impairment will not show that you are able to do substantial gainful activity. We will evaluate your work activity on the value to the business of your services regardless of whether you receive an immediate income for your services. We consider that you have engaged in substantial gainful activity if—

(1) Your work activity, in terms of factors such as hours, skills, energy output, efficiency, duties, and responsibilities, is comparable to that of unimpaired individuals in your community who are in the same or similar businesses as their means of livelihood;

(2) Your work activity, although not comparable to that of unimpaired individuals, is clearly worth the amount shown in § 404.1574(b)(1) when considered in terms of its value to the business, or when compared to the salary that an owner would pay to an employee to do the work you are doing; or

(3) You render services that are significant to the operation of the business and receive a substantial income from the business.

(b) *What we mean by significant services.* (1) If you are not a farm landlord and you operate a business entirely by yourself, any services that you render are significant to the business. If your business involves the services of more than one person, we will consider you to be rendering significant services if you contribute more than half the total time required for the management of the business, or you render management services for more than 45 hours a month regardless of the total management time required by the business.

(2) If you are a farm landlord, that is, you rent farm land to another, we will consider you to be rendering significant services if you materially participate in the production or the management of the production of the things raised on the rented farm. (See § 404.1053 of this chapter for an explanation of "material participation".) If you were given social security earnings credits because you materially participated in the activities of the farm and you continue these same activities, we will consider you to be rendering significant services.

(c) *What we mean by substantial income.* We will consider the income you receive from a business, after we deduct from gross income the reasonable value of any significant amount of unpaid help and any soil bank payments that were included as farm income, as well as normal business expenses, to be substantial if—

(1) Your net income from the business averages more than the amounts described in § 404.1574(b)(1); or

(2) Your net income from the business averages less than the amounts described in § 404.1574(b)(1) but the livelihood which you get from the business is either comparable to what it was before you became disabled or is comparable to that of unimpaired self-employed persons in your community who are in the same or similar businesses as their means of livelihood.

Widows, Widowers, and Surviving Divorced Wives

§ 404.1577 Disability defined for widows, widowers, and surviving divorced wives.

If you are a widow, widower, or surviving divorced wife, the law provides that you must have a medically determinable physical or mental impairment which can be expected to result in death or has lasted or can be expected to last for a continuous period of not less than 12 months. The impairments must be of a level of severity to prevent a person from doing any gainful activity. To determine whether you are disabled, we consider only your physical or mental impairment. We do not consider your age, education and work experience.

§ 404.1578 How we determine disability for widows, widowers, and surviving divorced wives.

(a) We will find that you are disabled and pay you benefits as a widow, widower, or surviving divorced wife if—

(1) Your impairment(s) has specific clinical findings that are the same as those for any impairment in the Listing of Impairments in Appendix 1 or are medically equivalent to those for any impairment shown there;

(2) Your impairment(s) meets the duration requirement.

(b) However, even, if you meet the requirements in (a) (1) and (2) of this section, we will not find you disabled if you are doing substantial gainful activity.

§ 404.1579 Why and when we will find that your disability has ended.

(a) *If you are not disabled.* If you are entitled to disability benefits as a disabled widow, widower, or surviving divorced wife, we will find that your disability ended in the earlier of—

(1) The month your impairment, as shown by current medical evidence, is not an impairment listed in Appendix 1 or is not equal to a listed impairment; or

(2) The month you do substantial gainful activity.

(b) *If you do not cooperate with us.* If we ask you to give us medical or other evidence or to go for a physical or mental examination by a certain date, we will find that your disability has ended if you fail (without a good reason) to do what we ask. The month in which your disability will be found to have ended will be the month in which you failed to do what we asked.

(c) *If we are unable to find you.* If there is a question about whether you continue to be disabled and we are unable to find you to resolve the question, we will find that your disability has ended. The month it ends will be the first month in which the question arose and we could not find you.

(d) *Before we stop your benefits.* Before we stop your benefits or a period of disability, we will give you a chance to give us your reasons why we should not stop your benefits or your period of disability. Section 404.1595 describes your rights and the procedures we will follow.

§ 404.1580 You are not eligible for a trial work period.

When you are receiving benefits because you are a disabled widow, widower, or surviving divorced wife, you are not entitled to a trial work period.

Blindness

§ 404.1581 Meaning of blindness as defined in the law.

We will consider you blind under the law for a period of disability and for payment of disability insurance benefits if we determine that you are statutorily blind. Statutory blindness is defined in the law as central visual acuity of 20/200 or less in the better eye with the use of correcting lens. An eye which has a limitation in the field of vision so that the widest diameter of the visual field subtends an angle no greater than 20 degrees is considered to have a central visual acuity of 20/200 or less. Your blindness must meet the duration requirement in § 404.1509.

§ 404.1582 A period of disability based on blindness.

If we find that you are blind and you meet the insured status requirement, we may establish a period of disability for you regardless of whether you can do substantial gainful activity. A period of disability protects your earnings record under Social Security so that the time you are disabled will not count against you in determining whether you will have worked long enough to qualify for benefits and the amount of your benefits. However, you will not necessarily be entitled to receive disability insurance cash benefits even though you are blind. If you are a blind person under age 55, you must be unable to do any substantial gainful activity in order to be paid disability insurance cash benefits.

§ 404.1583 How we determine disability for blind persons who are age 55 or older.

We will find that you are eligible for disability insurance benefits even though you are still engaging in substantial gainful activity, if—

(a) You are blind;

(b) You are age 55 or older; and

(c) You are unable to use the skills or abilities like the ones you used in any substantial gainful activity which you did regularly and for a substantial period of time. (However, you will not be paid any cash benefits for any month in which you are doing substantial gainful activity.)

§ 404.1584 Evaluation of work activity of blind people.

(a) *General.* If you are blind (as explained in § 404.1581), we will consider the earnings from the work you are doing to determine whether or not you should be paid cash benefits.

(b) *Under Age 55.* If you are under age 55, we will evaluate the work you are doing using the guides in paragraph (d) of this section to determine whether or

not your work shows that you are doing substantial gainful activity. If you are

§ 404.1586 Why and when we will stop your cash benefits.

§ 404.1587 Circumstances under which we may suspend your benefits before we make

(4) You tell us that you have recovered

(b) *What we mean by services.* When

§ 404.1593 We may ask you to help us

not your work shows that you are doing substantial gainful activity. If you are not doing substantial gainful activity, we will pay you cash benefits. If you are doing substantial gainful activity, we will not pay you cash benefits. However, you will be given a period of disability as described in Subpart D of this Part.

(c) *Age 55 or older.* If you are age 55 or older, we will evaluate your work using the guides in paragraph (d) of this section to determine whether or not your work shows that you are doing substantial gainful activity. If you have not shown this ability, we will pay you cash benefits. If you have shown an ability to do substantial gainful activity, we will evaluate your work activity to find out how your work compares with the work you did before. If the skills and abilities of your new work are about the same as those you used in the work you did before, we will not pay you cash benefits. However, if your new work requires skills and abilities which are less than or different than those you used in the work you did before, we will pay you cash benefits, but not for any month in which you actually perform substantial gainful activity.

(d) *Evaluation of earnings.* The law provides a different earnings test for substantial gainful activity of people who are blind. We will not consider that you are able to engage in substantial gainful activity on the basis of earnings unless your monthly earnings average more than $334.00 in 1978; $375.00 in 1979; $417.00 in 1980; $459.00 in 1981; and $500.00 in 1982. Thereafter, an increase in the substantial gainful activity amount will depend on increases in the cost of living. For work activity performed in taxable years before 1978, the earnings considered enough to show an ability to do substantial gainful activity are the same for blind people as for others.

§ 404.1585 Trial work period for persons age 55 or older who are blind.

If you become eligible for disability benefits even though you were doing substantial gainful activity because you are blind and age 55 or older, you are entitled to a trial work period if—

(a) You later return to substantial gainful activity that requires skills or abilities comparable to those required in the work you regularly did before you become blind or became 55 years old, whichever is later; or

(b) Your last previous work ended because of an impairment and the current work requires a significant vocational adjustment.

§ 404.1586 Why and when we will stop your cash benefits.

(a) *When you are not entitled to benefits.* If you become entitled to disability cash benefits as a statutorily blind person, we will find that you are no longer entitled to benefits beginning with the earliest of—

(1) The month your vision, as shown by current medical evidence, does not meet the definition of blindness (and any remaining impairments do not make you unable to do substantial gainful activity considering your age, education and work experience);

(2) If you are under age 55, the month in which you demonstrated your ability to engage in substantial gainful activity (following completion of a trial work period); or

(3) If you are age 55 or older, the month (following completion of a trial work period) when your work activity shows you are able to use, in substantial gainful activity, skills and abilities comparable to those of some gainful activity which you did with some regularity and over a substantial period of time. The skills and abilities are compared to the activity you did prior to age 55 or blindness, whichever is earlier.

(b) *If we find that you are not entitled to disability cash benefits.* If we find that you are not entitled to disability cash benefits on the basis of your work activity but your visual impairment is sufficiently severe to meet the definition of blindness, the period of disability that we established for you will continue.

(c) *If you do not cooperate with us.* If we ask you to give us medical or other evidence or to go for a medical examination by a certain date, we will find that your disability has ended if you fail (without a good reason) to do what is asked. The month in which your disability will be found to have ended will be the month in which you failed to do what we asked.

(d) *If we are unable to find you.* If there is a question about whether you continue to be disabled by blindness and we are unable to find you to resolve the question, we will find that your disability, has ended. The month it ends will be the first month in which the question arose and we could not find you.

(e) *Before we stop your benefits.* Before we stop your benefits or period of disability, we will give you a chance to give us your reasons why we should not stop your benefits or your period of disability. Section 404.1595 describes your rights and the procedures we will follow.

§ 404.1587 Circumstances under which we may suspend your benefits before we make a determination.

We will suspend your benefits if all of the information we have clearly shows that you are not disabled and we will be unable to complete a determination soon enough to prevent us from paying you more monthly benefits than you are entitled to. This may occur when you are blind as defined in the law and age 55 or older and you have returned to work similar to work you previously performed.

Continuing or Stopping Disability

§ 404.1588 Your responsibility to tell us of events that may change your disability status.

If you are entitled to cash benefits or to a period of disability because you are disabled, you should promptly tell us if—

(a) Your condition improves;

(b) You return to work;

(c) You increase the amount of your work; or

(d) Your earnings increase.

§ 404.1589 We may investigate to find out whether you continue to be disabled.

After we find that you are disabled, we must determine from time to time if you are still eligible for disability cash benefits. We may begin an investigation for this purpose for any number of reasons, including your failure to follow the provisions of the Social Security Act or these regulations. If our investigation shows that we should suspend payment of your benefits, we will notify you in writing and give you an opportunity to reply. In § 404.1590 we describe those events that may prompt us to investigate whether you continue to be disabled.

§ 404.1590 When we will investigate whether your disability continues.

(a) *General.* We investigate to determine whether or not you continue to meet the disability requirements of the law. Payment of cash benefits or a period of disability ends if the medical or other evidence shows that you are not disabled or if there is not enough evidence to support a finding that disability continues.

(b) *When we will investigate.* An investigation will be started if—

(1) We need a current medical report to see if you are able to do substantial gainful activity;

(2) You return to work and successfully complete a period of trial work;

(3) Substantial earnings are reported to your wage record;

(4) You tell us that you have recovered from your disability or that you have returned to work; or

(5) Your State Vocational Rehabilitation Agency tells us that—

(i) You have completed your training;

(ii) You have returned to work;

(iii) You are able to return to work; or

(6) Some one in a position to know of your physical or mental condition tells us that you are not disabled or that you have returned to work and it appears that the report could be susbtantially correct.

§ 404.1591 If your medical recovery was expected and you returned to work.

If your impairment was expected to improve and you returned to full-time work with no significant medical limitations, we may find that your disability ended in the month you returned to work. Unless there is evidence showing that your disability has not ended, we will use the medical and other evidence already in your file and the fact that you returned to full-time work without significant limitations to determine that you are able to engage in substantial gainful activity. (If your condition is not expected to improve, we will not ordinarily review your claim until the end of the trial work period, as described in § 404.1592).

Example: Evidence obtained during the processing of your claim showed that you had an impairment that was expected to improve about 18 months after your disability began. We, therefore, told you that your claim would be reviewed again at that time. However, before the time arrived for your scheduled medical re-examination, you told us that you had returned to work. We investigated immediately and found that, in the 16th month after your disability began, you returned to full-time work without any significant medical restrictions. Therefore, we would find that your disability ended in the first month you returned to full-time work.

§ 404.1592 The trial work period.

(a) *Definition of the trial work period.* The trial work period is a period during which you may test your ability to work and still be considered disabled. It begins and ends as described in paragraph (e) of this section. During this period, you may perform "services" (see paragraph (b) of this section) in as many as 9 months, but these months do not have to be consecutive. We will not consider those services as showing that your disability has ended until you have performed services in at least 9 months. However, after the trial work period has ended we will consider the work you did during the trial work period in determining whether your disability ended at any time after the trial work period.

(b) *What we mean by services.* When used in this section, "services" means any activity, even though it is not substantial gainful activity, which is done by a person in employment or self-employment for pay or profit, or is the kind normally done for pay or profit. If you are an employee, we will consider your work to be "services" if in any calendar year after 1978 you earn more than $75 a month ($50 a month is the figure for earnings in any calendar year before 1979). If you are self-employed, we will consider your activities "services" if in any calendar year after 1978, your net earnings are more than $75 a month, ($50 a month is the figure for earnings in any calendar year before 1979), or you work more than 15 hours a month in the business. We generally do not consider work to be "services" when it is done without remuneration or merely as therapy or training, or when it is work usually done in a daily routine around the house, or in self-care.

(c) *Limitations on the number of trial work periods.* You may have only one trial work period during a period of entitlement to cash benefits.

(d) *Who is and is not entitled to a trial work period.* (1) Those who are receving disability insurance benefits or child's insurance benefits based on disability generally are entitled to a trial work period.

(2) You are not entitled to a trial work period if—(i) You are receiving benefits because you are a disabled widow, widower, or surviving divorced wife;

(ii) You are entitled to a period of disability but not to disability insurance cash benefits; or

(iii) You are receiving benefits in a second period of disability for which you did not have to complete a waiting period.

(e) *When the trial work period begins and ends.* The trial work period begins with the month in which you become entitled to disability insurance cash benefits or to child's cash benefits based on disability. It cannot begin before the month in which you file your application for benefits. It ends with the close of whichever of the following calendar months is the earlier:

(1) The 9th month (whether or not the months have been consecutive) in which you have performed services; or

(2) The month in which new evidence, other than evidence relating to any work you did during the trial work period, shows that you are not disabled, even though you have not worked a full 9 months. We may find that your disability has ended at any time during the trial work period if the medical or other evidence shows that you are able to do substantial gainful activity.

§ 404.1593 We may ask you to help us determine if you are still disabled.

If you are entitled to cash benefits or if a period of disability has been established for you because you are disabled, you must, upon our request and reasonable notice, undergo consultative examinations and tests to help us find out if you are still disabled. You must also give us reports from your doctor or others who have treated you, as well as any other evidence that will help us make a disability determination. You must have a good reason for not giving us this information (see § 404.1594(c)).

§ 404.1594 Why and when we will find that your disability has ended.

(a) *General.* When the medical or other evidence in your file shows that your disability has ended, we will contact you and tell you that the evidence in your file shows that you are able to do substantial gainful activity and that your eligibility for cash benefits and for a period of disability will end. Before we stop your benefits or a period of disability, we will give you a chance to give us your reasons why we should not stop your benefits or your period of disability. Section 404.1595 describes your rights and the procedures we will follow. We may also stop payment of your benefits if you have not cooperated with us in getting information about your disability or if we cannot find you (see paragraph (c) of this section).

(b) *Disabled workers and persons disabled since childhood.* If you are entitled to disability cash benefits as a disabled worker or to child's insurance benefits, we will find that your disability ended in the earliest of the following months—(1) The month in which your impairment, as shown by current medical or other evidence, is such that you are able to do substantial gainful activity;

(2) The month in which you demonstrated your ability to engage in substantial gainful activity (following completion of a trial work period); or

(3) The month in which you actually do substantial gainful activity (where you are not entitled to a trial work period).

(c) *If you do not cooperate with us.* If we ask you to give us medical or other evidence or to go for a physical or mental examination by a certain date, we will find that your disability has ended if you fail (without a good reason) to do what we ask. The month in which your disability will be found to have ended will be the month in which you failed to do what we asked.

(d) *If we are unable to find you.* If there is a question about whether you

V 45 A G 20 80 UMI

continue to be disabled and we are unable to find you to resolve the question, we will find that your disability has ended. The month it ends will be the first month in which the question arose and we could not find you.

(e) *Before we stop your benefits.* Before we stop your benefits or a period of disability, we will give you a chance to give us your reasons why we should not stop your benefits or your period of disability. Section 404.1595 describes your rights and the procedures we will follow.

§ 404.1595 When we determine that you are not now disabled.

(a) *When we will give you advance notice.* Except in those circumstances described in paragraph (d) of this section, we will give you advance notice when we have determined that you are not now disabled because the information we have conflicts with what you have told us about your disability. If your dependents are receiving benefits on your Social Security number and do not live with you, we will also give them advance notice. To give you advance notice, we will contact you by mail, telephone or in person.

(b) *What the advance notice will tell you.* We will give you a summary of the information we have. We will also tell you why we have determined that you are not now disabled, and will give you a chance to reply. If it is because of—

(1) *Medical reasons.* The advance notice will tell you what the medical information in your file shows;

(2) *Your work activity.* The advance notice will tell you what information we have about the work you are doing or have done, and why this work shows that you are not disabled; or

(3) *Your failure to give us information we need or do what we ask.* The advance notice will tell you what information we need and why we need it or what you have to do and why.

(c) *What you should do if you receive an advance notice.* If you agree with the advance notice, you do not need to take any action. If you desire further information or disagree with what we have told you, you should immediately write or telephone the State agency or the social security office that gave you the advance notice or you may visit any social security office. If you believe you are now disabled, you should tell us why. You may give us any additional or new information, including reports from your doctors, hospitals, employers or others, that you believe we should have. You should send these as soon as possible to the local social security office or to the office that gave you the advance notice. We consider 10 days to be enough time for you to tell us, although we will allow you more time if you need it. You will have to ask for additional time beyond 10 days if you need it.

(d) *When we will not give you advance notice.* We will not give you advance notice when we determine that you are not disabled if—

(1) We recently told you that the information we have shows that you are not now disabled, that we were gathering more information, and that your benefits will stop; or

(2) We are stopping your benefits because you told us you are not now disabled; or

(3) We recently told you that continuing your benefits would probably cause us to overpay you and you asked us to stop your benefits.

§ 404.1596 Circumstances under which we may suspend your benefits before we make a determination.

(a) *General.* Under some circumstances, we may stop your benefits before we make a determination. Generally, we do this when the information we have clearly shows you are not now disabled but we cannot determine when your disability ended. These situations are described in paragraph (b)(1) and other reasons are given in paragraph (b)(2) of this section. We refer to this as a suspension of benefits. Your benefits, as well as those of your dependents (regardless of where they receive their benefits), may be suspended. When we do this we will give you advance notice. (See § 404.1595.) We will contact your spouse and children if they are receiving benefits on your Social Security number, and the benefits are being mailed to an address different from your own.

(b) *When we will suspend your benefits.* (1) *You are not now disabled.* We will suspend your benefits if the information we have clearly shows that you are not disabled and we will be unable to complete a determination soon enough to prevent us from paying you more monthly benefits than you are entitled to. This may occur when—(i) New medical or other information clearly shows that you are able to do substantial gainful activity and your benefits should have stopped more than 2 months ago;

(ii) You completed a 9-month period of trial work more than 2 months ago and you are still working;

(iii) At the time you filed for benefits your condition was expected to improve and you were expected to be able to return to work. You subsequently did return to work more than 2 months ago with no significant medical restrictions; or

(iv) You are not entitled to a trial work period and you are working.

(2) *Other reasons.* We will also suspend your benefits if—(i) You have failed to respond to our request for additional medical or other evidence and we are satisfied that you received our request and our records show that you should be able to respond.

(ii) We are unable to locate you and your checks have been returned by the Post Office as undeliverable; or

(iii) You refuse to accept vocational rehabilitation services without a good reason. Section 404.422 gives you examples of good reasons for refusing to accept vocational rehabilitation services.

(c) *When we will not suspend your cash benefits.* We will not suspend your cash benefits if—(1) the evidence in your file does not clearly show that you are not disabled;

(2) We have asked you to furnish additional information; or

(3) You have become disabled by another impairment.

§ 404.1597 After we make a determination that you are not now disabled.

If we make a determination that you are not now disabled, your benefits will stop. You will receive a formal written notice telling you why you are not disabled and the month your benefits should stop. If your spouse and children are receiving benefits on your Social Security number, we will also stop their benefits and tell them why. The notices will also explain your right to reconsideration if you disagree with our determination.

§ 404.1598 If you become disabled by another impairment.

If a new, severe impairment begins in or before the month in which your last impairment ends, we will find that your disability is continuing. The new impairment need not be expected to last 12 months or to result in death, but it must be severe enough to keep you from doing substantial gainful activity.

Appendix 1.—Listing of Impairments

Part A

Criteria applicable to individuals age 18 and over and to children under age 18 where criteria are appropriate.

Sec.

1.00 Musculoskeletal system.
2.00 Special sense and speech.
3.00 Respiratory system.
4.00 Cardiovascular system.
5.00 Digestive system.
6.00 Genito-urinary system.
7.00 Hemic and lymphatic system.
8.00 Skin.
9.00 Endocrine system.
10.00 Multiple body systems.
11.00 Neurological.
12.00 Mental disorders.
13.00 Neoplastic diseases—malignant.

1.00 Musculoskeletal System

A. *Loss of function* may be due to amputation or deformity. Pain may be an important factor in causing functional loss, but it must be associated with relevant abnormal signs or laboratory findings. Evaluations of musculoskeletal impairments should be supported where applicable by detailed descriptions of the joints, including ranges of motion, condition of the musculature, sensory or reflex changes, circulatory deficits, and X-ray abnormalities.

B. *Disorders of the spine,* associated with vertebrogenic disorders as in 1.05C, result in impairment because of distortion of the bony and ligamentous architecture of the spine or impingement of a herniated nucleus pulposus or bulging annulus on a nerve root. Impairment caused by such abnormalities usually improves with time or responds to treatment. Appropriate abnormal physical findings must be shown to persist on repeated examinations despite therapy for a reasonable presumption to be made that severe impairment will last for a continuous period of 12 months. This may occur in cases with unsuccessful prior surgical treatment.

Evaluation of the impairment caused by disorders of the spine requires that a clinical diagnosis of the entity to be evaluated first must be established on the basis of adequate history, physical examination, and roentgenograms. The specific findings stated in 1.05C represent the requirements for the level of severity of that impairment; these findings, by themselves, are not intended to represent the basis for establishing the clinical diagnosis. Furthermore, while neurological examination findings are required, they are not to be interpreted as a basis for evaluating the severity of any neurological impairment. Neurological impairments are to be evaluated under 11.00–11.19.

The history must include a detailed description of the character, location, and radiation of pain; mechanical factors which incite and relieve pain; prescribed treatment, including type, dose, and frequency of analgesic; and typical daily activities. Care must be taken to ascertain that the reported examination findings are consistent with the individual's daily activities.

There must be a detailed description of the orthopedic and neurologic examination findings. The findings should include a description of gait, limitation of movement of the spine given quantitatively in degrees from the vertical position, motor and sensory abnormalities, muscle spasm, and deep tendon reflexes. Observations of the individual during the examination should be reported; e.g., how he or she gets on and off the examining table. Inability to walk on heels or toes, to squat, or to arise from a squatting position, where appropriate, may be considered evidence of significant motor loss. However, a report of atrophy is not acceptable as evidence of significant motor loss without circumferential measurements of both thighs and lower legs (or upper or lower arms) at a stated point above and below the knee or elbow given in inches or centimeters. A specific description of atrophy of hand muscles is acceptable without measurements of atrophy but should include measurements of grip strength.

These physical examination findings must be determined on the basis of objective observations during the examination and not simply a report of the individual's allegation, e.g., he says his leg is weak, numb, etc. Alternative testing methods should be used to verify the objectivity of the abnormal findings, e.g., a seated straight-leg raising test in addition to a supine straight-leg raising test. Since abnormal findings may be intermittent, their continuous presence over a period of time must be established by a record of ongoing treatment. Neurological abnormalities may not completely subside after surgical or nonsurgical treatment, or with the passage of time. Residual neurological abnormalities, which persist after it has been determined clinically or by direct surgical or other observation that the ongoing or progressive condition is no longer present, cannot be considered to satisfy the required findings in 1.05C.

Where surgical procedures have been performed, documentation should include a copy of the operative note and available pathology reports.

Electrodiagnostic procedures and myelography may be useful in establishing the clinical diagnosis, but do not constitute alternative criteria to the requirements in 1.05C.

C. *After maximum benefit from surgical therapy* has been achieved in situations involving fractures of an upper extremity (see 1.12), or soft tissue injuries of a lower or upper extremity (see 1.13), i.e., there have been no significant changes in physical findings or X-ray findings for any 6-month period after the last definitive surgical procedure, evaluation should be made on the basis of demonstrable residuals.

D. *Major joints* as used herein refer to hip, knee, ankle, shoulder, elbow, or wrist and hand. (Wrist and hand are considered together as one major joint.)

E. *The measurements of joint motion are* based on the techniques described in the "Joint Motion Method of Measuring and Recording," published by the American Academy of Orthopedic Surgeons in 1965, or the "Guides to the Evaluation of Permanent Impairment—The Extremities and Back" (Chapter I); American Medical Association, 1971.

1.01 Category of Impairments, Musculoskeletal

1.02 *Active rheumatoid arthritis and other inflammatory arthritis.* With both A and B:

A. Persistent joint pain, swelling, and tenderness involving multiple joints with signs of joint inflammation (heat, swelling, tenderness) despite therapy for at least 3 months, and activity expected to last over 12 months; and

B. Corroboration of diagnosis at some point in time by either:

1. Postive serologic test for rheumatoid factor; or

2. Antinuclear antibodies; or

3. Elevated sedimentation rate.

1.03 *Arthritis of a major weight-bearing joint (due to any cause)* with limitation of motion and enlargement or effusion in the affected joint, as well as a history of joint pain and stiffness. With:

A. Gross anatomical deformity such as subluxation, contracture, bony or fibrous ankylosis, or instability; or

B. Ankylosis of the hip outside of the position of function (i.e., at less than 20° or more than 30° of flexion measured from the neutral position) and X-ray evidence of either joint space narrowing with osteophytosis or bony destruction (with erosions or cysts); or

C. Reconstructive surgery or surgical arthrodesis of a major weight-bearing joint and return to full weight-bearing status did not occur, or is not expected to occur, within 12 months of onset.

1.04 *Arthritis of one major joint in each of the upper extremities (due to any cause)* with limitation of motion and enlargement or effusion in the affected joints as well as a history of joint pain and stiffness and X-ray evidence of either joint space narrowing with osteophytosis or bony destruction (with erosions or cysts). With:

A. Abduction of both arms at the shoulders, including scapular motion, restricted to less than 90 degrees; or

B. Gross anatomical deformity such as subluxation, contracture, bony or fibrous ankylosis, joint instability, or ulnar deviation.

1.05 *Disorders of the spine:*

A. Arthritis manifested by ankylosis or fixation of the cervical or dorsolumbar spine at 30° or more of flexion measured from the neutral position, with X-ray evidence of:

1. Calcification of the anterior and lateral ligaments; or

2. Bilateral ankylosis of the sacroiliac joints with abnormal apophyseal articulations; or

B. Osteoporosis, generalized (established by X-ray) manifested by pain and limitation of back motion and paravertebral muscle spasm with X-ray evidence of either:

1. Compression fracture of a vertebral body with loss of at least 50 percent of the estimated height of the vertebral body prior to the compression fracture, with no intervening direct traumatic episode; or

2. Multiple fractures of vertebrae with no intervening direct traumatic episode; or

C. Other vertebrogenic disorders (e.g., herniated nucleus pulposus, spinal stenosis) with the following persisting for at least 3 months despite prescribed therapy and expected to last 12 months. With both 1 and 2:

1. Pain, muscle spasm, and significant limitation of motion in the spine; and

2. Appropriate radicular distribution of significant motor loss with muscle weakness and sensory and reflex loss.

1.06 *Osteomyelitis (established by X-ray):*

A. Located in the pelvis, vertebra, femur, tibia, or a major joint of an upper or lower extremity, with persistent activity or occurrence of at least two episodes of acute activity within a 5-month period prior to adjudication, manifested by local inflammatory, and systemic signs and laboratory findings (e.g., heat, redness, swelling, drainage, leucocytosis, or increased sedimentation rate); or

B. Multiple localizations and systemic

visual fields. The contraction may be either

7. *Statutory blindness.* The term "statutory

otolaryngologic examination with a detailed

B. So the widest diameter subtends an

percent or less in the better ear.

B. Multiple localizations and systemic manifestations as in A above.

1.09 *Amputation or anatomical deformity of (i.e., loss of major function due to degenerative changes associated with vascular or neurological deficits, traumatic loss of muscle mass or tendons and X-ray evidence of bony ankylosis at an unfavorable angle, joint subluxation or instability):*

A. Both hands; or

B. Both feet; or

C. One hand and one foot.

1.10 *Amputation of one lower extremity (at or above the tarsal region):*

A. Hemipelvectomy or hip disarticulation; or

B. Amputation at or above the tarsal region due to peripheral vascular disease or diabetes mellitus; or

C. Inability to use a prosthesis effectively, without obligatory assistive devices, due to one of the following:

1. Vascular disease; or

2. Neurological complications (e.g., loss of position sense); or

3. Stump too short or stump complications persistent, or are expected to persist, for at least 12 months from onset; or

4. Disorder of contralateral lower extremity causing mobility restrictions.

1.11 *Fracture of the femur, tibia, tarsal bone, or pelvis* with solid union not evident on X-ray and not clinically solid, when such determination is feasible, and return to full weight-bearing status did not occur or is not expected to occur within 12 months of onset.

1.12 *Fractures of an upper extremity* with non-union of a fracture of the shaft of the humerus, radius, or ulna under continuing surgical management directed toward restoration of functional use of the extremity and such function was not restored or expected to be restored within 12 months after onset.

1.13 *Soft tissue injuries of an upper or lower extremity* requiring a series of staged surgical procedures within 12 months after onset for salvage and/or restoration of major function of the extremity, and such major function was not restored or expected to be restored within 12 months after onset.

2.00 Special Senses and Speech

A. *Ophthalmology*

1. *Causes of impairment.* Diseases or injury of the eyes may produce loss of central or peripheral vision. Loss of central vision results in inability to distinguish detail and prevents reading and fine work. Loss of peripheral vision restricts the ability of an individual to move about freely. The extent of impairment of sight should be determined by visual testing.

2. *Central visual acuity.* A loss of central visual acuity may be caused by impaired distant and/or near vision. However, for an individual to meet the level of severity described in 2.02 and 2.04, only the remaining central visual acuity for distance of the better eye with best correction based on the Snellen test chart measurement may be used. Correction obtained by special visual aids (e.g., contact lenses) will be considered if the individual has the ability to wear such aids.

3. *Field of vision.* Impairment of peripheral vision may result if there is contraction of the visual fields. The contraction may be either symmetrical or irregular. The extent of the remaining peripheral visual field will be determined by usual perimetric methods at a distance of 330 mm. under illumination of not less than 7 foot-candles. Measurements obtained on comparable perimetric devices may be used; this does not include the use of tangent screen measurements. For the phakic eye (the eye with a lens), a 3 mm. white disc target will be used, and for the aphakic eye (the eye without a lens), a 6 mm. white disc target will be used. In neither instance should corrective lenses be worn during the examination but if they have been used, this fact must be stated.

Field measurements must be accompanied by notated field charts, a description of the type and size of the target and the test distance. Tangent screen visual fields are not acceptable as a measurement of peripheral field loss.

Where the loss is predominantly in the lower visual fields, a system such as the weighted grid scale for perimetric fields described by B. Esterman (see Grid for Scoring Visual Fields, II. Perimeter, *Archives of Ophthalmology*, 79:400, 1968) may be used for determining whether the visual field loss is comparable to that described in Table 2.

4. *Muscle function.* Paralysis of the third cranial nerve producing ptosis, paralysis of accommodation, and dilation and immobility of the pupil may cause significant visual impairment. When all the muscles of the eye are paralyzed including the iris and ciliary body (total ophthalmoplegia), the condition is considered a severe impairment provided it is bilateral. A finding of severe impairment based primarily on impaired muscle function must be supported by a report of an actual measurement of ocular motility.

5. *Visual efficiency.* Loss of visual efficiency may be caused by disease or injury resulting in a reduction of central visual acuity or visual field. The visual efficiency of one eye is the product of the percentage of central visual efficiency and the percentage of visual field efficiency. (See Tables No. 1 and 2, following 2.09.)

6. *Special situations.* Aphakia represents a visual handicap in addition to the loss of central visual acuity. The term monocular aphakia would apply to an individual who has had the lens removed from one eye, and who still retains the lens in his other eye, or to an individual who has only one eye which is aphakic. The term binocular aphakia would apply to an individual who has had both lenses removed. In cases of binocular aphakia, the central efficiency of the better eye will be accepted as 75 percent of its value. In cases of monocular aphakia, where the better eye is aphakic, the central visual efficiency will be accepted as 50 percent of its value. (If an individual has binocular aphakia, and the central visual acuity in the poorer eye can be corrected only to 20/200, or less, the central visual efficiency of the better eye will be accepted as 50 percent of its value.)

Ocular symptoms of systemic disease may or may not produce a disabling visual impairment. These manifestations should be evaluated as part of the underlying disease entity by reference to the particular body system involved.

7. *Statutory blindness.* The term "statutory blindness" refers to the degree of visual impairment which defines the term "blindness" in the Social Security Act. Both 2.02 and 2.03 A and B denote statutory blindness.

B. *Otolaryngology*

1. *Hearing impairment.* Hearing ability should be evaluated in terms of the person's ability to hear and distinguish speech.

Loss of hearing can be quantitatively determined by an audiometer which meets the standards of the American National Standards Institute (ANSI) for air and bone conducted stimuli (i.e., ANSI S 3.6–1969 and ANSI S 3.13–1972, or subsequent comparable revisions) and performing all hearing measurements in an environment which meets the ANSI standard for maximal permissible background sound (ANSI S 3.1–1977).

Speech discrimination should be determined using a standardized measure of speech discrimination ability in quiet at a test presentation level sufficient to ascertain maximum discrimination ability. The speech discrimination measure (test) used, and the level at which testing was done, must be reported.

Hearing tests should be preceded by an otolaryngologic examination and should be performed by or under the supervision of an otolaryngologist or audiologist qualified to perform such tests.

In order to establish an independent medical judgment as to the level of severity in a claimant alleging deafness, the following examinations should be reported: Otolaryngologic examination, pure tone air and bone audiometry, speech reception threshold (SRT), and speech discrimination testing. A copy of reports of medical examination and audiologic evaluations must be submitted.

Cases of alleged "deaf mutism" should be documented by a hearing evaluation. Records obtained from a speech and hearing rehabilitation center or a special school for the deaf may be acceptable, but if these reports are not available, or are found to be inadequate, a current hearing evaluation should be submitted as outlined in the preceding paragraph.

2. *Vertigo associated with disturbances of labyrinthine-vestibular function, including Meniere's disease.* These disturbances of balance are characterized by an hallucination of motion or loss of position sense and a sensation of dizziness which may be constant or may occur in paroxysmal attacks. Nausea, vomiting, ataxia, and incapacitation are frequently observed, particularly during the acute attack. It is important to differentiate the report of rotary vertigo from that of "dizziness", which is described as light-headedness, unsteadiness, confusion, or syncope.

Meniere's disease is characterized by paroxysmal attacks of vertigo, tinnitus, and fluctuating hearing loss. Remissions are unpredictable and irregular, but may be longlasting; hence, the severity of impairment is best determined after prolonged observation and serial reexaminations.

The diagnosis of a vestibular disorder requires a comprehensive neuro-otolaryngologic examination with a detailed description of the vertiginous episodes, including notation of frequency, severity, and duration of the attacks. Pure tone and speech audiometry with the appropriate special examinations, such as Bekesy audiometry, are necessary. Vestibular function is assessed by positional and caloric testing, preferably by electronystagmography. When polytograms, contrast radiography, or other special tests have been performed, copies of the reports of these tests should be obtained, in addition to reports of skull and temporal bone X-rays.

3. *Organic loss of speech.* Glossectomy or laryngectomy or cicatricial laryngeal stenosis due to injury or infection results in loss of voice production by normal means. In evaluating organic loss of speech (see 2.09), ability to produce speech by any means includes the use of mechanical or electronic devices. Impairment of speech due to neurologic disorders should be evaluated under 11.00–11.19.

2.01 Category of Impairments, Special Senses and Speech

2.02 *Impairment of central visual acuity.* Remaining vision in the better eye after best correction is 20/200 or less.

2.03 *Contraction of peripheral visual fields in the better eye.*

A. To 10° or less from the point of fixation; or

B. So the widest diameter subtends an angle no greater than 20°; or

C. To 20 percent or less visual field efficiency.

2.04 *Loss of visual efficiency.* Visual efficiency of better eye after best correction 20 percent or less. (The percent of remaining visual efficiency = the product of the percent of remaining central visual efficiency and the percent of remaining visual field efficiency.)

2.05 *Complete homonymous hemianopsia* (with or without macular sparing). Evaluate under 2.04.

2.06 *Total bilateral ophthalmoplegia.*

2.07 *Disturbance of labyrinthine-vestibular function (including Meniere's disease),* characterized by a history of frequent attacks of balance disturbance, tinnitus, and progressive loss of hearing. With both A and B:

A. Disturbed function of vestibular labyrinth demonstrated by caloric or other vestibular tests; and

B. Hearing loss established by audiometry.

2.08 *Hearing impairments* (hearing not restorable by a hearing aid) manifested by:

A. Average hearing threshold sensitivity for air conduction of 90 decibels or greater, and for bone conduction to corresponding maximal levels, in the better ear, determined by the simple average of hearing threshold levels at 500, 1000, and 2000 hz. (see 2.00B1); or

B. Speech discrimination scores of 40 percent or less in the better ear.

2.09 *Organic loss of speech* due to any cause with inability to produce by any means speech which can be heard, understood, and sustained.

Table No. 1.—*Percentage of central visual efficiency corresponding to central visual acuity notations for distance in the phakic and aphakic eye (better eye)*

Snellen		Percent central visual efficiency		
English	Metric	Phakic [1]	Aphakic monocular [2]	Aphakic binocular [3]
20/16	6/5	100	50	75
20/20	6/6	100	50	75
20/25	6/7.5	95	47	71
20/32	6/10	90	45	67
20/40	6/12	85	42	64
20/50	6/15	75	37	56
20/64	6/20	65	32	49
20/80	6/24	60	30	45
20/100	6/30	50	25	37
20/125	6/38	40	20	30

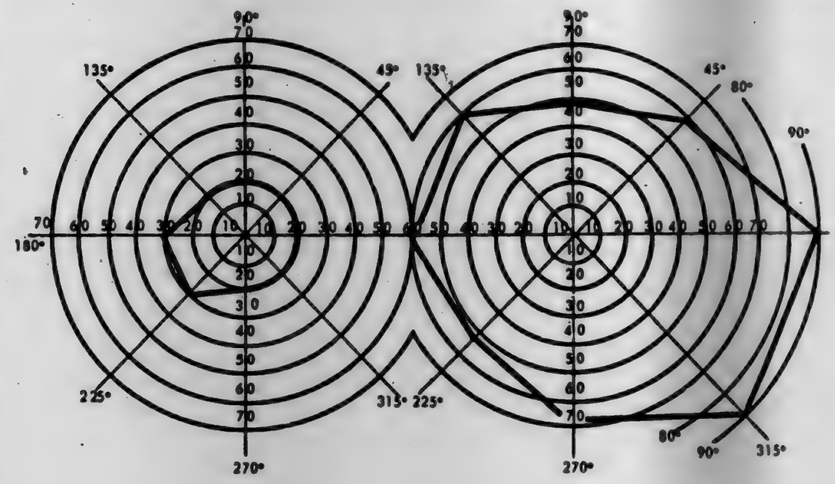
Column and Use

[1] Phakic.—1. A lens is present in both eyes. 2. A lens is present in the better eye and absent in the poorer eye. 3. A lens is present in one eye and the other eye is enucleated.

[2] Monocular.—1. A lens is absent in the better eye and present in the poorer eye. 2. The lenses are absent in both eyes; however, the central visual acuity in the poorer eye after best correction is 20/200 or less. 3. A lens is absent from one eye and the other eye is enucleated.

[3] Binocular.—1. The lenses are absent from both eyes and the central visual acuity in the poorer eye after best correction is greater than 20/200.

Table No. 2.—*Chart of visual field showing extent of normal field and method of computing percent of visual field efficiency*



1. Diagram of right eye illustrates extent of normal visual field as tested on standard perimeter at 3/330 (3 mm. white disc at a distance of 330 mm.) under 7 foot-candles illumination. The sum of the eight principal meridians of this field total 500°.

2. The percent of visual field efficiency is obtained by adding the number of degrees of the eight principal meridians of the contracted field and dividing by 500. Diagram of left eye illustrates visual field contracted to 30° in the temporal and down and out meridians and to 20° in the remaining six meridians. The percent of visual field efficiency of this field is: $6\times20+2\times30=180+500=0.36$ or 36 percent remaining visual field efficiency, or 64 percent loss.

3.00 Respiratory System

A. *Causes of impairment.* The impairment produced by respiratory disease usually results from chronic recurrent infection or from pulmonary insufficiency or a combination of these factors.

B. *Pulmonary tuberculosis will be evaluated* on the basis of the resulting impairment to pulmonary function. Evidence of infectious or active pulmonary tuberculosis such as positive cultures, increasing lesions, or cavitation is not, by itself, a basis for determining that an individual has a severe impairment which is expected to last 12 months. However, if these factors are abnormally persistent, they should not be ignored. For example, in those unusual cases where there is evidence of persistence of pulmonary infection caused by mycobacteria for a period closely approaching 12 consecutive months, the clinical findings, complications, treatment considerations, and prognosis must be carefully assessed to determine whether, despite the absence of impairment of pulmonary function, the individual has a severe impairment that can be expected to last for 12 consecutive months.

C. *When a respiratory impairment is episodic in nature,* as may occur in complications of bronchiectasis and asthmatic bronchitis, the frequency of severe episodes despite prescribed treatment is the criterion for determining the level of impairment. Documentation for episodic asthma should include the hospital or emergency room records indicating the dates of treatment, clinical findings on presentation, what treatment was given and for what period of time, and the clinical response. Severe attacks of episodic asthma, as listed in § 3.03B, are defined as prolonged episodes lasting at least several hours, requiring intensive treatment such as intravenous drug administration or inhalation therapy in a hospital or emergency room.

D. *Documentation of pulmonary insufficiency.* The results of ventilatory function studies for evaluation under Tables I, II, and IV should be expressed in liters or liters per minute. The reported 1 second forced expiratory volume (FEV_1) should represent the largest of at least three attempts. One satisfactory maximum voluntary ventilation (MVV) is sufficient. The MVV should represent the observed value and should not be calculated from FEV_1. These studies should be repeated after administration of a nebulized bronchodilator unless the prebronchodilator values are 80 percent or more of predicted normal values or the use of bronchodilators is contraindicated. The values in Tables I, II, and IV assume that the ventilatory function studies were not performed in the presence of wheezing or other evidence of bronchospasm or, if these were present at the time of the examination, that the studies were repeated after administration of a bronchodilator. Ventilatory function studies performed in the presence of bronchospasm, without use of bronchodilators, cannot be found to meet the requisite level of severity in Tables I, II, and IV.

The appropriately labeled spirometric tracing, showing distance per second on the abscissa and the distance per liter on the ordinate, must be incorporated in the file. The FEV_1 must be recorded at a speed of at least 20 mm. per second. Calculation of the FEV_1 from a flow volume loop is not acceptable. The recording device must provide a volume excursion of at least 10 mm. per liter. The MVV should be represented by the tidal excursions measured over a 10-to-15 second interval. Tracings showing only cumulative volume for the MVV are not acceptable. The height of the individual must be recorded. Studies should not be performed during or soon after an acute respiratory illness. A statement should be made as to the individual's ability to understand the directions, and cooperate in performing the test.

3.01 Category of Impairments, Respiratory

3.02 *Chronic obstructive airway disease (due to any cause)* with spirometric evidence of airway obstruction demonstrated by MVV and FEV_1 both equal to, or less than, the values specified in Table I, corresponding to the person's height.

Table I

Height (inches)	MVV (MBC) equal to or and less than	FEV_1 equal to or less than

73 or more	48	1.4

3.03 *Asthma.* With:

A. Chronic asthmatic bronchitis. Evaluate under the criteria for chronic obstructive airway disease in 3.02; or

B. Episodes of severe attacks (see 3.00C), in spite of prescribed treatment, occurring at least once every 2 months, or on an average of at least 6 times a year and prolonged expiration with wheezing or rhonchi between attacks.

3.04 *Diffuse pulmonary fibrosis (sarcoidosis, Hamman-Rich syndrome, idiopathic interstitial fibrosis, and similar diffuse fibroses substantiated by chest X-ray or tissue diagnosis. This category does not include cases of bronchitis or emphysema with incidental scarring or scattered parenchymal fibrosis on X-ray).* With:

A. Total vital capacity equal to, or less than, values specified in Table II below corresponding to the person's height.

Table II

Height (inches)	V.C. equal to or less than (L.)
69	1.3
70 or more	1.4

3.06 *Pneumoconiosis (demonstrated by X-ray evidence).* With:

A. Nodular or focal fibrosis (non-conglomerative). Evaluate under the criteria for chronic obstructive airway disease in 3.02; or

B. Interstitial or disseminated fibrosis or conglomerative disease. Evaluate under the criteria for pulmonary fibrosis in 3.04; or

C. Where A and B are mixed or cannot be differentiated—evaluate under the criteria in 3.02 or 3.04.

3.07 *Bronchiectasis (demonstrated by radio-opaque material).* With:

A. Episodes of acute bronchitis or pneumonia or hemoptysis (more than blood streaked sputum) occurring at least once every 2 months; or

B. Impairment of pulmonary function due to extensive disease should be evaluated under the criteria for chronic obstructive airway disease in 3.02 or where extensive fibrosis is evident on chest film, under the criteria for pulmonary fibrosis in 3.04.

3.08 *Pulmonary tuberculosis (caused by M. tuberculosis of pathogenic atypical mycobacteria).* Impairment of pulmonary function due to extensive disease should be evaluated under the criteria in 3.02, 3.04, or 3.05.

3.09 *Mycotic infection of lung.* With:

A. Culture of specific organisms from sputa and serial X-ray evidence of increasing or decreasing extent of lesion, both persisting for at least 3 months despite prescribed therapy; or

B. Culture of specific organisms from sputa and current X-ray evidence of a lesion and episodes of hemoptysis occuring at least once every 2 months; or

C. Impairment of pulmonary function due to extensive disease should be evaluated under the criteria in 3.02, 3.04, or 3.05.

3.11 *Cor pulmonale.* Evaluate under the criteria for 4.02D.

3.12 *Pleurocutaneous fistula* with persistent purulent drainage.

4.00 Cardiovascular System

A. *Severe cardiac impairment* results from one or more of three consequences of heart disease: (1) congestive heart failure; (2) ischemia (with or without necrosis) of heart muscle; (3) conduction disturbances and/or arrhythmias resulting in cardiac syncope.

With diseases of arteries and veins, severe impairment may result from disorders of the vasculature in the central nervous system, eyes, kidneys, extremities, and other organs.

The criteria for evaluating impairment resulting from heart disease or diseases of the blood vessels are based on symptoms, physical signs and pertinent laboratory findings.

B. *Congestive heart failure* is considered in the Listing under one category whatever the etiology (i.e., arteriosclerotic, hypertensive, rheumatic, pulmonary, congenital, or other organic heart disease). Congestive heart failure is not considered to have been established for the purpose of 4.02 unless there is evidence of vascular congestion such as hepatomegaly or peripheral or pulmonary edema which is consistent with the clinical diagnosis. (Radiological description of vascular congestion, unless supported by appropriate clinical evidence, should not be construed as pulmonary edema.) The findings of vascular congestion need not be present at the time of adjudication (except for 4.02A), but must be causally related to the current episode of severe impairment. The findings other than vascular congestion must be persistent.

Other congestive, ischemic, or restrictive (obstructive) heart disease such as caused by cardiomyopathy or aortic stenosis may result in severe impairment due to congestive heart failure, rhythm disturbances, or ventricular outflow obstruction in the absence of left ventricular enlargement as described in 4.02B1. However, the ECG criteria as defined in 4.02B2 should be fulfilled. Clinical findings such as symptoms of dyspnea, fatigue, rhythm disturbances, etc. should be documented and the diagnosis confirmed by echocardiography or at cardiac catheterization.

C. *Hypertensive vascular disease* does not result in severe impairment unless it causes severe damage to one or more of four end organs: heart, brain, kidneys, or eyes (retinae). The presence of such damage must be established by appropriate abnormal physical signs and laboratory findings as specified in 4.02 or 4.04, or for the body system involved.

D. *Ischemic heart disease* may result in severe impairment due to chest pain. Description of the pain must contain the clinical characteristics as discussed under 4.00E. In addition, the clinical impression of chest pain of cardiac origin must be supported by objective evidence as described under 4.00 F, G, or H.

E. *Chest pain of cardiac origin* is considered to be pain which is precipitated by effort and promptly relieved by sublingual nitroglycerin or rapid-acting nitrates or rest. The character of the pain is classically described as crushing, squeezing, burning, or oppressive pain located in the chest. Excluded is sharp, sticking or rhythmic pain. Pain occurring on exercise should be described specifically as to usual inciting factors (kind and degree), character, location, radiation, duration, and response to nitroglycerin or rest.

So-called "anginal equivalent" locations manifested by pain in the throat, arms, or hands have the same validity as the chest pain described above. Status anginosus and variant angina of the Prinzmetal type (e.g., rest angina with transitory ST elevation on electrocardiogram) will be considered to have the same validity as classical angina pectoris as described above. Shortness of breath as an isolated finding should not be considered as an anginal equivalent.

Chest pain that appears to be of cardiac origin may be caused by noncoronary conditions. Evidence for the latter should be actively considered in determining whether the chest pain is of cardiac origin. Among the more common conditions which may masquerade as angina are gastrointestinal tract lesions such as biliary tract disease, esophagitis, hiatal hernia, peptic ulcer, and pancreatitis; and musculoskeletal lesions such as costochondritis and cervical arthritis.

F. *Documentation of electrocardiography.*

1. *Electrocardiograms obtained at rest* must be submitted in the original or a legible copy of a 12-lead tracing, appropriately labeled, with the standardization inscribed on the tracing. Alteration in standardization of specific leads (such as to accommodate large QRS amplitudes) must be shown on those leads.

The effect of drugs, electrolyte imbalance, etc., should be considered as possible noncoronary causes of ECG abnormalities, especially those involving the ST segment. If needed and available, pre-drug (especially predigitalis) tracings should be obtained.

The term "ischemic" is used in 4.04 to describe a pathologic ST deviation. Nonspecific repolarization changes should not be confused with ischemic configurations or a current of injury.

Computer interpretations without the original or legible copies of the ECG tracings are not acceptable.

2. *Electrocardiograms obtained in conjunction with exercise tests* must include the original tracings or a legible copy of appropriate leads obtained before, during, and after exercise. Test control tracings, taken before exercise in the upright position, must be obtained. An ECG after 20 seconds of vigorous hyperventilation should be obtained. A tracing should be taken at approximately 5 METs of exercise (treadmill speed of 1.7 miles per hour at a 10 percent grade as in Stage I of the Bruce protocol) and at the time the ECG becomes abnormal according to the criteria in 4.04A. The time of onset of these abnormal changes must be noted, and the ECG tracing taken at that time should be obtained. Exercise histograms without the original tracings or legible copies are not acceptable.

Whenever electrocardiographically documented stress test data are submitted, irrespective of the type, the standardization must be inscribed on the tracings and the strips must be labeled appropriately, indicating the times recorded. The degree of exercise achieved, the blood pressure levels during the test, and any reason for terminating the test should be included in the report.

G. *Exercise testing.*

1. *When to purchase.* Since the results of a treadmill exercise test are the primary basis for adjudicating claims under 4.04, they should be included in the file whenever they have been performed. There are also circumstances under which it will be appropriate to purchase exercise tests. Generally, these are limited to claims involving chest pain which is considered to be of cardiac origin but without corroborating ECG or other evidence of ischemic heart disease.

Exercise tests should not be purchased in the absence of alleged chest pain of cardiac origin. Even in the presence of an allegation of chest pain of cardiac origin, an exercise test should not be purchased where full

V 45 A G 20 80 UMI

development short of such a purchase reveals that the impairment meets or equals any Listing or the claim can be adjudicated on some other basis.

2. *Methodology.* When an exercise test is purchased, it should be a treadmill type using a continuous progressive multistage regimen (as typified by the Bruce protocol). The targeted heart rate should be not less than 85 percent of the maximum predicted heart rate unless it becomes hazardous to exercise to that heart rate or becomes unnecessary because the ECG meets the criteria in 4.04A at a lower heart rate. Beyond these requirements, it is prudent to accept the methodology of a qualified, competent test facility. In any case, a precise description of the protocol that was followed must be provided.

3. *Limitations of exercise testing.* Exercise testing should not be purchased for individuals who have the following: unstable progressive angina pectoris; congestive heart failure; uncontrolled serious arrhythmias (including uncontrolled auricular fibrillation); second or third-degree heart block; Wolff-Parkinson-White syndrome; uncontrolled severe hypertension; severe aortic stenosis; severe pulmonary hypertension; dissecting or ventricular aneurysms; acute illness; limiting neurological or musculoskeletal impairments, or for individuals on medication where performance of stress testing may constitute a significant risk.

The presence of noncoronary or nonischemic factors which may influence the ECG response to exercise include hypokalemia, hyperventilation, vasoregulatory asthenia, significant anemia, left bundle branch block, and other heart disease, particularly valvular.

Digitalis may cause ST segment abnormalities at rest, during, and after exercise. Digitalis-related ST depression, present at rest, may become accentuated and result in false interpretations of the ECG taken during or after exercise test.

4. *Evaluation.* Where the evidence includes the results of a treadmill exercise test, this evidence is the primary basis for adjudicating claims under 4.04. For purposes of the social security disability program, treadmill exercise testing will be evaluated on the basis of the level at which the test becomes positive in accordance with the ECG criteria in § 4.04A. However, the significance of findings of a treadmill exercise test must be considered in light of the clinical course of the disease which may have occurred subsequent to performance of the exercise test. The criteria in 4.04B are not applicable if there is documentation of an acceptable treadmill exercise test. If there is no evidence of a treadmill exercise test or if the test is not acceptable, the criteria in 4.04B should be used. The level of exercise is considered in terms of multiples of METs (metabolic equivalent units). One MET is the basal O_2 requirement of the body in an inactive state, sitting quietly. It is considered by most authorities to be approximately 3.5 ml. O_2/kg./min.

H. *Angiographic evidence.*

1. *Coronary arteriography.* This procedure is not to be purchased by the Social Security Administration. Should the results of such testing be available, the report should be considered as to the quality and kind of data provided and its applicability to the requirements of the Listing of Impairments. A copy of the report of the catheterization and ancillary studies should be obtained. The report should provide information as to the technique used, the method of assessing coronary lumen diameter, and the nature and location of any obstructive lesions.

It is helpful to know the method used, the number of projections, and whether selective engagement of each coronary vessel was satisfactorily accomplished. It is also important to know whether the injected vessel was entirely and uniformly opacified, thus avoiding the artifactual appearance of narrowing or an obstruction.

Coronary artery spasm induced by intracoronary catheterization is not to be considered as evidence of ischemic heart disease.

Estimation of the functional significance of an obstructive lesion may also be aided by description of how well the distal part of the vessel is visualized. Some patients with severe proximal coronary atherosclerosis have well-developed large collateral blood supply to the distal vessels without evidence of myocardial damage or ischemia, even under conditions of severe stress.

2. *Left ventriculography.* The report should describe the local contractility of the myocardium as may be evident from areas of hypokinesia, dyskinesia, or akinesia; and the overall contractility of the myocardium as measured by the ejection fraction.

3. *Proximal coronary arteries* (see 4.04B7) will be considered as the:

a. Right coronary artery proximal to the acute marginal branch;

b. Left anterior descending coronary artery proximal to the first septal perforator; and

c. Left circumflex coronary artery proximal to the first obtuse marginal branch.

I. *Results of other tests.* Information from adequate reports of other tests such as radionuclide studies or echocardiography should be considered where that information is comparable to the requirements in the Listing.

J. *Major surgical procedures.* The amount of function restored and the time required to effect improvement after heart or vascular surgery vary with the nature and extent of the disorder, the type of surgery, and other individual factors. If the criteria described for heart or vascular disease are met, proposed heart or vascular surgery (coronary artery bypass procedure, valve replacement, major arterial grafts, etc.) does not militate against a finding of disability with subsequent assessment of severity postoperatively.

The usual time after surgery for adequate assessment of the results of surgery is considered to be approximately 3 months. Assessment of the severity of the impairment following surgery requires adequate documentation of the pertinent evaluations and tests performed following surgery, such as an interval history and physical examination, with emphasis on those signs and symptoms which might have changed postoperatively, as well as X-rays and electrocardiograms. Where treadmill exercise tests or angiography have been performed following the surgical procedure, the results of these tests should be obtained.

Documentation of the preoperative evaluation and a description of the surgical procedure are also required. The evidence should be documented from hospital records (catheterization reports, coronary arteriographic reports, etc.) and the operative note.

Implantation of a cardiac pacemaker is not considered a major surgical procedure for purposes of this section.

4.01 Category of Impairments, Cardiovascular System

4.02 *Congestive heart failure (manifested by evidence of vascular congestion such as hepatomegaly, peripheral or pulmonary edema).* With:

A. Persistent congestive heart failure on clinical examination despite prescribed therapy; or

B. Persistent left ventricular enlargement and hypertrophy documented by both:

1. Extension of the cardiac shadow (left ventricle) to the vertebral column on a left lateral chest roentgenogram; and

2. ECG showing QRS duration less than 0.12 second with S_{V_1} plus R_{V_5} (or R_{V_6}) of 35 mm. or greater *and* ST segment depressed more than 0.5 mm. *and* low, diphasic or inverted T waves in leads with tall R waves; or

C. Persistent "mitral" type heart involvement documented by left atrial enlargement shown by double shadow on PA chest roentgenogram (or characteristic distortion of barium-filled esophagus) and either:

1. ECG showing QRS duration less than 0.12 second with S_{V_1} plus R_{V_5} (or R_{V_6}) of 35 mm. or greater *and* ST segment depressed more than 0.5 mm. *and* low, diphasic or inverted T waves in leads with tall R waves; or

2. ECG evidence of right ventricular hypertrophy with R wave of 5.0 mm. or greater in lead V_1 *and* progressive decrease in R/S amplitude from lead V_1 to V_5 or V_6; or

D. Cor pulmonale (non-acute) documented by both:

1. Right ventricular enlargement (or prominence of the right out-flow tract) on chest roentgenogram of fluoroscopy; and

2. ECG evidence of right ventricular hypertrophy with R wave of 5.0 mm. or greater in lead V_1 *and* progressive decrease in R/S amplitude from lead V_1 to V_5 or V_6.

4.03 *Hypertensive vascular disease.* Evaluate under 4.02 or 4.04 or under the criteria for the affected body system.

4.04 *Ischemic heart disease with chest pain of cardiac origin as described in 4.00E.* With:

A. Treadmill exercise test (see 4.00F and G) demonstrating one of the following at an exercise level of 5 METs or less:

1. Horizontal or down-sloping ischemic depression of the ST segment to 1.0 mm. or greater, clearly discernible in at least two consecutive complexes which are on a level baseline in any lead; or

2. Premature ventricular systoles which are multiform or bidirectional or are sequentially inscribed (3 or more); or

3. ST segment elevation to 3 mm. or greater; or

4. Development of second or third degree heart block; or

B. In the absence of a report of an acceptable treadmill exercise test (see 4.00G), one of the following:

1. Transmural myocardial infarction exhibiting a QS pattern or a Q wave with amplitude at least 1/3rd of R wave and with a duration of 0.04 second or more. (If these are present in leads III and aVF only, the requisite Q wave findings must be shown, by labelled tracing, to persist on deep inspiration); or

2. Resting ECG findings showing ischemic-type (see § 4.00F1) depression of ST segment to more than 0.5 mm. in either (a) leads I and aVL and V_4 or (b) leads II and III and aVF or (c) leads V_5 through V_6; or

3. Resting ECG findings showing an ischemic configuration or current of injury (see 4.00F1) with ST segment elevation to 2 mm. or more in either (a) leads I and aVL and V_4 or (b) leads II and III and aVF or (c) leads V_5 through V_6; or

4. Resting ECG findings showing symmetrical inversion of T waves to 5.0 mm. or more in any two leads except leads III or aVR or V_1 or V_5; or

5. Inversion of T wave to 1.0 mm. or more in any of leads I, II, aVL, V_5 to V_6 *and* R wave of 5.0 mm. or more in lead aVL *and* R wave greater than S wave in lead aVF; or

6. "Double" Master Two-Step test demonstrating one of the following:

a. Ischemic depression of ST segment to more than 0.5 mm. lasting for at least 0.08 second beyond the J junction and clearly discernible in at least two consecutive complexes which are on a level baseline in any lead; or

b. Development of a second or third degree heart block; or

7. Angiographic evidence (see 4.00H) (obtained independent of social security disability evaluation) showing one of the following:

a. 50 percent or more narrowing of the left main coronary artery; or

b. 70 percent or more narrowing of a *proximal* coronary artery (see 4.00H3) (excluding the left main coronary artery); or

c. 50 percent or more narrowing involving a long (greater than 1 cm.) segment of a proximal coronary artery or multiple proximal coronary arteries; or

C. Resting ECG findings showing left bundle branch block as evidenced by QRS duration of 0.12 second or more in leads I, II, or III *and* R peak duration of 0.06 second or more in leads I, aVL, V_5, or V_6, unless there is a coronary angiogram of record which is negative (see criteria in 4.04B7); or

D. Left ventricular ejection fraction of 30 percent or less measured at cardiac catheterization or by echocardiography.

4.05 *Recurrent arrhythmias* (not due to digitalis toxicity) resulting in uncontrolled repeated episodes of cardiac syncope and documented by resting or ambulatory (Holter) electrocardiography.

4.09 *Myocardiopathies, rheumatic or syphilitic heart disease.* Evaluate under the criteria in 4.02, 4.04, 4.05, or 11.04.

4.11 *Aneurysm of aorta or major branches* (demonstrated by roentgenographic evidence). With:

A. Acute or chronic dissection not controlled by prescribed medical or surgical treatment; or

B. Congestive heart failure as described under the criteria in 4.02; or

C. Renal failure as described under the criteria in 6.02; or

D. Repeated syncopal episodes.

4.12 *Chronic venous insufficiency* of the lower extremity with incompetency or obstruction of the deep venous return, associated with superficial varicosities, extensive brawny edema, stasis dermatitis, and recurrent or persistent ulceration which has not healed following at least 3 months of prescribed medical or surgical therapy.

4.13 *Arteriosclerosis obliterans or thrombo-angiitis.* With:

A. Intermittent claudication with failure to visualize (on arteriogram obtained independent of social security disability evaluation) the common femoral or deep femoral artery in one extremity; or

B. Intermittent claudication and absence of peripheral arterial pulsations in the femoral, popliteal, dorsalis pedis, and posterior tibial arteries by Doppler or plethysmography, in one extremity; or

C. Amputation at or above the tarsal region due to peripheral vascular disease.

5.00 Digestive System

A. *Disorders of the digestive system* which result in severe impairment usually do so because of interference with nutrition, multiple recurrent inflammatory lesions, or complications of disease, such as fistulae, abscesses, or recurrent obstruction. Such complications usually respond to treatment. These complications must be shown to persist on repeated examinations despite therapy for a reasonable presumption to be made that severe impairment will last for a continuous period of at least 12 months.

B. *Malnutrition or weight loss from gastrointestinal disorders.* When the primary disorder of the digestive tract has been established (e.g., enterocolitis, chronic pancreatitis, postgastrointestinal resection, or esophageal stricture, stenosis, or obstruction), the resultant interference with nutrition will be considered under the criteria in 5.08. This will apply whether the weight loss is due to primary or secondary disorders, of malabsorption, malassimilation, or obstruction. However, weight loss not due to diseases of the digestive tract, but associated with psychiatric or primary endocrine or other disorders, should be evaluated under the appropriate criteria for the underlying disorder.

C. *Surgical diversion of the intestinal tract,* including colostomy or ileostomy, are not listed since they do not represent impairments which preclude all work activity if the individual is able to maintain adequate nutrition and function of the stoma. Dumping syndrome which may follow gastric resection rarely represents a severe impairment which would continue for 12 months. Peptic ulcer disease with recurrent ulceration after definitive surgery ordinarily responds to treatment. A recurrent ulcer after definitive surgery must be demonstrated on repeated upper gastrointestinal roentgenograms or gastroscopic examinations despite therapy to be considered a severe impairment which will last for at least 12 months. Definitive surgical procedures are those designed to control the ulcer disease process (i.e., vagotomy and pyloroplasty, subtotal gastrectomy, etc.). Simple closure of a perforated ulcer does not constitute definitive surgical therapy for peptic ulcer disease.

5.01 Category of Impairments, Digestive System

5.02 *Recurrent upper gastrointestinal hemorrhage from undetermined cause* with anemia manifested by hematocrit of 30 percent or less on repeated examinations.

5.03 *Stricture, stenosis, or obstruction of the esophagus (demonstrated by X-ray or endoscopy)* with weight loss as described under § 5.08.

5.04 *Peptic ulcer disease (demonstrated by X-ray or endoscopy).* With:

A. Recurrent ulceration after definitive surgery persistent despite therapy; or

B. Inoperable fistula formation; or

C. Recurrent obstruction demonstrated by X-ray or endoscopy; or

D. Weight loss as described under § 5.08.

5.05 *Chronic liver disease (e.g., portal, postnecrotic, or biliary cirrhosis; chronic active hepatitis; Wilson's disease).* With:

A. Esophageal varices (demonstrated by X-ray or endoscopy) with a documented history of massive hemorrhage attributable to these varices; or

B. Performance of a shunt operation for esophageal varices; or

C. Serum bilirubin of 2.5 mg. per deciliter (100 ml.) or greater persisting on repeated examinations for at least 5 months; or

D. Hepatic encephalopathy. Evaluate under the criteria in 12.02; or

E. Confirmation of chronic liver disease by liver biopsy (obtained independent of social security disability evaluation) and one of the following:

1. Ascites not attributable to other causes, recurrent or persisting for at least 3 months, demonstrated by abdominal paracentesis or associated with persistent hypoalbuminemia of 3.0 gm. per deciliter (100 ml.) or less.

2. Serum bilirubin of 2.5 mg. per deciliter (100 ml.) or greater on repeated examinations.

3. Hepatic cell necrosis or inflammation persisting for at least 3 months, documented by repeated abnormalities of prothrombin time and enzymes indicative of hepatic dysfunction.

5.06 *Chronic ulcerative or granulomatous colitis (demonstrated by endoscopy, barium enema, biopsy, or operative findings).* With:

A. Recurrent bloody stools documented on repeated examinations and anemia manifested by hematocrit of 30 percent or less on repeated examinations; or

B. Persistent or recurrent systemic manifestations, such as arthritis, iritis, fever, or liver dysfunction, not attributable to other causes; or

C. Intermittent obstruction due to intractable abscess, fistula formation, or stenosis; or

D. Recurrences of findings of A, B, or C above after total colectomy; or

E. Weight loss as described under § 5.08.

5.07 *Regional enteritis (demonstrated by operative findings, barium studies, biopsy, or endoscopy).* With:

A. Persistent or recurrent intestinal obstruction evidenced by abdominal pain,

Table III.—*Men*

suppressive agents. A convalescent period of at least 12 months is required before it can be

occlusive or aplastic episodes should be documented by description of severity,

B. Documented recurrent systemic bacterial infections occurring at least 3 times during

8.03 *Pemphigus, erythema multiforme bullosum, bullous pemphigoid, dermatitis*

A. Persistent or recurrent intestinal obstruction evidenced by abdominal pain, distention, nausea, and vomiting and accompanied by stenotic areas of small bowel with proximal intestinal dilation; or

B. Persistent or recurrent systemic manifestations such as arthritis, iritis, fever, or liver dysfunction, not attributable to other causes; or

C. Intermittent obstruction due to intractable abscess or fistula formation; or

D. Weight loss as described under § 5.08.

5.08 *Weight loss (due to any gastrointestinal disorder).* With:

A. Weight equal to or less than the values specified in Table I or II; or

B. Weight equal to or less than the values specified in Table III or IV and one of the following abnormal findings on repeated examinations:

1. Serum albumin of 3.0 gm. per deciliter (100 ml.) or less; or

2. Hematocrit of 30 percent or less; or

3. Serum calcium of 8.0 mg. per deciliter (100 ml.) (4.0 mEq./L) or less; or

4. Uncontrolled diabetes mellitus due to pancreatic dysfunction with repeated hyperglycemia, hypoglycemia, or ketosis; or

5. Fat in stool of 7 gm. or greater per 24-hour stool specimen; or

6. Nitrogen in stool of 3 gm. or greater per 24-hour specimen; or

7. Persistent or recurrent ascites or edema not attributable to other causes.

Tables of weight reflecting malnutrition scaled according to height and sex—To be used only in connection with 5.08.

6.00 Genito-Urinary System

A. *Determination of the presence of chronic renal disease will be based upon* (1) a history, physical examination, and laboratory evidence of renal disease, and (2) indications of its progressive nature or laboratory evidence of deterioration of renal function.

B. *Nephrotic Syndrome.* The medical evidence establishing the clinical diagnosis must include the description of extent of tissue edema, including pretibial, periorbital, or presacral edema. The presence of ascites, pleural effusion, pericardial effusion, and hydroarthrosis should be described if present. Results of pertinent laboratory tests must be provided. If a renal biopsy has been performed, the evidence should include a copy of the report of microscopic examination of the specimen. Complications such as severe orthostatic hypotension, recurrent infections or venous thromboses should be evaluated on the basis of resultant impairment.

C. *Hemodialysis, peritoneal dialysis, and kidney transplantation.* When an individual is undergoing periodic dialysis because of chronic renal disease, severity of impairment is reflected by the renal function prior to the institution of dialysis.

The amount of function restored and the time required to effect improvement in an individual treated by renal transplant depend upon various factors, including adequacy of post-transplant renal function, incidence and severity of renal infection, occurrence of rejection crisis, the presence of systemic complications (anemia, neuropathy, etc.), and side effects of corticosteroids or immunosuppressive agents. A convalescent period of at least 12 months is required before it can be reasonably determined whether the individual has reached a point of stable medical improvement.

D. *Evaluate associated disorders and complications* according to the appropriate body system Listing.

6.01 Category of Impairments, Genito-Urinary System

6.02 *Impairment of renal function, due to any chronic renal disease expected to last 12 months (e.g., hypertensive vascular disease, chronic nephritis, nephrolithiasis, polycystic disease, bilateral hydronephrosis, etc.).* With:

A. Chronic hemodialysis or peritoneal dialysis necessitated by irreversible renal failure; or

B. Kidney transplant. Consider under a disability for 12 months following surgery; thereafter, evaluate the residual impairment (see 6.00C); or

C. Persistent elevation of serum creatinine to 4 mg. per deciliter (100 ml.) or greater or reduction of creatinine clearance to 20 ml. per minute (29 liters/24 hours) or less, over at least 3 months, with one of the following:

1. Renal osteodystrophy manifested by severe bone pain and appropriate radiographic abnormalities (e.g., osteitis fibrosa, severe osteoporosis, pathologic fractures); or

2. A clinical episode of pericarditis; or

3. Persistent motor or sensory neuropathy; or

4. Intractable pruritus; or

5. Persistent fluid overload syndrome resulting in diastolic hypertension (110 mm. or above) or signs of vascular congestion; or

6. Persistent anorexia with recent weight loss and current weight meeting the values in 5.08, Table III or IV; or

7. Persistent hematocrits of 30 percent or less.

6.06 *Nephrotic syndrome, with severe anasarca, persistent for at least 3 months despite prescribed therapy.* With:

A. Serum albumin of 3.0 gm. per deciliter (100 ml.) or less *and* proteinuria of 3.5 gm. per 24 hours or greater; or

B. Proteinuria of 10.0 gm. per 24 hours or greater.

7.00 Hemic and Lymphatic System

A. *Impairment caused by anemia* should be evaluated according to the ability of the individual to adjust to the reduced oxygen-carrying capacity of the blood. A gradual reduction in red cell mass, even to very low values, is often well tolerated in individuals with a healthy cardiovascular system.

B. *Chronicity is indicated by* persistence of the condition for at least 3 months. The laboratory findings cited must reflect the values reported on more than one examination over that 3-month period.

C. *Sickle cell disease* refers to a chronic hemolytic anemia associated with sickle cell hemoglobin, either homozygous or in combination with thalassemia or with another abnormal hemoglobin (such as C or F).

Appropriate hematologic evidence for sickle cell disease, such as hemoglobin electrophoresis, must be included. Vaso-occlusive or aplastic episodes should be documented by description of severity, frequency, and duration.

Major visceral episodes include meningitis, osteomyelitis, pulmonary infections or infarctions, cerebrovascular accidents, congestive heart failure, genito-urinary involvement, etc.

D. *Coagulation defects.* Chronic inherited coagulation disorders must be documented by appropriate laboratory evidence. Prophylactic therapy such as with anti-hemophilic globulin (AHG) concentrate does not in itself imply severity.

E. *Acute leukemia.* Initial diagnosis of acute leukemia must be based upon definitive bone marrow pathologic evidence. Recurrent disease may be documented by peripheral blood, bone marrow, or cerebrospinal fluid examination. The pathology report must be included.

The criteria in 7.11 contain the designated duration of disability implicit in the finding of a listed impairment. Following the designated time period, a documented diagnosis itself is no longer sufficient to establish a severe impairment. The severity of any remaining impairment must be evaluated on the basis of the medical evidence.

7.01 Category of Impairments, Hemic and Lymphatic System

7.02 *Chronic anemia (hematocrit persisting at 30 percent or less due to any cause).*

A. Evaluate the resulting impairment under criteria for the affected body system; or

B. Requiring one or more blood transfusions on an average of at least once every 2 months.

7.05 *Sickle cell disease, or one of its variants.* With:

A. Documented painful (thrombotic) crises occurring at least three times during the 5 months prior to adjudication; or

B. Requiring extended hospitalization (beyond emergency care) at least three times during the 12 months prior to adjudication; or

C. Evaluate the resulting impairment under the criteria for the affected body system.

7.06 *Chronic thrombocytopenia (due to any cause)* with platelet counts repeatedly below 40,000/cubic millimeter. With:

A. At least one spontaneous hemorrhage, requiring transfusion, within 5 months prior to adjudication; or

B. Intracranial bleeding within 12 months prior to adjudication.

7.07 *Hereditary telangiectasia* with hemorrhage requiring transfusion at least three times during the 5 months prior to adjudication.

7.08 *Coagulation defects (nemophilia or a similar disorder)* with spontaneous hemorrhage requiring transfusion at least three times during the 5 months prior to adjudication.

7.09 *Polycythemia vera (with erythrocytosis, splenomegaly, and leukocytosis or thrombocytosis).* Evaluate the resulting impairment under the criteria for the affected body system.

7.10 *Myelofibrosis (myeloproliferative syndrome).* With:

A. Chronic anemia. Evaluate according to the criteria of §7.02; or

B. Documented recurrent systemic bacterial infections occurring at least 3 times during the 5 months prior to adjudication; or

C. Intractable bone pain with radiologic evidence of osteosclerosis.

7.11 *Acute leukemia.* Consider under a disability for 2½ years from the time of initial diagnosis.

7.12 *Chronic leukemia.* Evaluate according to the criteria of 7.02, 7.06, 7.10B, or 13.06A.

7.13 *Lymphomas.* Evaluate under the criteria in 13.06A.

7.14 *Macroglobulinemia or heavy chain disease,* confirmed by serum or urine protein electrophoresis or immunoelectrophoresis. Evaluate impairment under criteria for affected body system or under 7.02, 7.06, or 7.08.

7.15 *Chronic granulocytopenia (due to any cause).* With both A and B:

A. Absolute neutrophil counts repeatedly below 1,000 cells/cubic millimeter; and

B. Documented recurrent systemic bacterial infections occurring at least 3 times during the 5 months prior to adjudication.

7.16 *Myeloma (confirmed by appropriate serum or urine protein electrophoresis and bone marrow findings).* With:

A. Radiologic evidence of bony involvement with intractable bone pain or pathological fracture; or

B. Evidence of renal impairment as described in 6.02; or

C. Hypercalcemia with serum calcium levels persistently greater than 11 mg. per deciliter (100 ml.) for at least one month despite prescribed therapy; or

D. Plasma cells (100 or more cells/cubic millimeter) in the peripheral blood.

8.00 Skin

A. *Skin lesions* may result in severe, long-lasting impairment if they involve extensive body areas or critical areas such as the hands or feet and become resistant to treatment. These lesions must be shown to have persisted for a sufficient period of time despite therapy for a reasonable presumption to be made that severe impairment will last for a continuous period of at least 12 months. The treatment for some of the skin diseases listed in this section may require the use of high dosage of drugs with possible serious side effects; these side effects should be considered in the overall evaluation of impairment.

B. *When skin lesions are associated with systemic disease* and where that is the predominant problem, evaluation should occur according to the criteria in the appropriate section. Disseminated (systemic) lupus erythematosus and scleroderma usually involve more than one body system and should be evaluated under 10.04 and 10.05. Neoplastic skin lesions should be evaluated under 13.00ff. When skin lesions (including burns) are associated with contractures or limitation of joint motion, that impairment should be evaluated under 1.00ff.

8.01 Category of Impairments, Skin

8.02 *Exfoliative dermatitis, ichthyosis, ichthyosiform erythroderma.* With extensive lesions not responding to prescribed treatment.

8.03 *Pemphigus, erythema multiforme bullosum, bullous pemphigoid, dermatitis herpetiformis.* With extensive lesions not responding to prescribed treatment.

8.04 *Deep mycotic infections.* With extensive fungating, ulcerating lesions not responding to prescribed treatment.

8.05 *Psoriasis, atopic dermatitis, dyshidrosis.* With extensive lesions, including involvement of the hands or feet which impose a severe limitation of function and which are not responding to prescribed treatment.

8.06 *Hydradenitis suppurative, acne conglobata.* With extensive lesions involving the axillae or perineum not responding to prescribed medical treatment and not amenable to surgical treatment.

9.00 Endocrine System

Cause of impairment. Impairment is caused by overproduction or underproduction of hormones, resulting in structural or functional changes in the body. Where involvement of other organ systems has occurred as a result of a primary endocrine disorder, these impairments should be evaluated according to the criteria under the appropriate sections.

9.01 Category of Impairments, Endocrine

9.02 *Thyroid Disorders.* With:

A. Progressive exophthalmos as measured by exophthalmometry; or

B. Evaluate the resulting impairment under the criteria for the affected body system.

9.03 *Hyperparathyroidism.* With:

A. Generalized decalcification of bone on X-ray study and elevation of plasma calcium to 11 mg. per deciliter (100 ml.) or greater; or

B. A resulting impairment. Evaluate according to the criteria in the affected body system.

9.04 *Hypoparathyroidism.* With:

A. Severe recurrent tetany; or

B. Recurrent generalized convulsions; or

C. Lenticular cataracts. Evaluate under the criteria in 2.00ff.

9.05 *Neurohypophyseal insufficiency (diabetes insipidus).* With urine specific gravity of 1.005 or below, persistent for at least 3 months and recurrent dehydration.

9.06 *Hyperfunction of the adrenal cortex.* Evaluate the resulting impairment under the criteria for the affected body system.

9.08 *Diabetes mellitus.* With:

A. Neuropathy demonstrated by significant and persistent disorganization of motor function in two extremities resulting in sustained disturbance of gross and dexterous movements, or gait and station (see 11.00C); or

B. Acidosis occurring at least on the average of once every 2 months documented by appropriate blood chemical tests (pH or pCO_2 or bicarbonate levels); or

C. Amputation at, or above, the tarsal region due to diabetic necrosis or peripheral vascular disease; or

D. Retinitis proliferans; evaluate the visual impairment under the criteria in 2.02, 2.03, or 2.04).

10.00 Multiple Body Systems

A. The impairments included in this section usually involve more than a single body system.

B. Long-term obesity will usually be associated with disorders in the musculoskeletal, cardiovascular, peripheral vascular, and pulmonary systems and the advent of such disorders is the major cause of impairment. Extreme obesity results in restrictions imposed by body weight and the additional restrictions imposed by disturbances in other body systems.

10.01 Category of Impairments, Multiple Body Systems

10.02 *Hansen's disease (leprosy).* As active disease or consider as "under a disability" while hospitalized.

10.03 *Polyarteritis or periarteritis nodosa (established by biopsy).* With signs of generalized arterial involvement.

10.04 *Disseminated lupus erythematosus (established by a positive LE preparation or biopsy or positive ANA test).* With frequent exacerbations demonstrating involvement of renal or cardiac or pulmonary or gastrointestinal or central nervous systems.

10.05 *Scleroderma or progessive systemic sclerosis (the diffuse or generalized form).* With:

A. Advanced limitation of use of hands due to sclerodactylia or limitation in other joints; or

B. Significant visceral manifestations of digestive, cardiac, or pulmonary impairment.

10.10 *Obesity.* Weight equal to or greater than the values specified in Table I for males, Table II for females (100 percent above desired level) and one of the following:

A. History of pain and limitation of motion in any weight bearing joint or spine (on physical examination) associated with X-ray evidence of arthritis in a weight bearing joint or spine; or

B. Hypertension with diastolic blood pressure persistently in excess of 100 mm. Hg measured with appropriate size cuff; or

C. History of congestive heart failure manifested by past evidence of vascular congestion such as hepatomegaly, peripheral or pulmonary edema; or

D. Chronic venous insufficiency with superficial varicosities in a lower extremity with pain on weight bearing and persistent edema; or

E. Respiratory disease with total forced vital capacity equal to or less than 2.0 L. or a level of hypoxemia at rest equal to or less than the values of the following table:

11.00 Neurological

A. *Convulsive disorders.* In convulsive disorders, regardless of etiology, severity will be determined according to type, frequency, duration, and sequelae of seizures. At least one detailed description of a typical seizure is required. Such description includes the presence or absence of aura, tongue bites, sphincter control, injuries associated with the attack, and postictal phenomena. The reporting physician should indicate the extent to which description of seizures reflects his own observations and the source of ancillary information. Testimony of persons other than the claimant is essential for description of type and frequency of seizures if professional observation is not available.

Documentation of epilepsy should include at least one electroencephalogram (EEG).

Under 11.02 and 11.03, a severe impairment is considered present only if it persists despite the fact that the individual is following prescribed anticonvulsive treatment. Adherence to prescribed anticonvulsant therapy can ordinarily be determined from objective clinical findings in the report of the physician currently providing treatment for epilepsy. Determination of blood levels of phenytoin sodium or other anticonvulsive drugs may serve to indicate whether the prescribed medication is being taken. Should serum drug levels appear therapeutically inadequate, consideration should be given as to whether this is caused by individual idiosyncrasy in absorption or metabolism of the drug. Where adequate seizure control is obtained only with unusually large doses, the possibility of impairment resulting from the side effects of this medication must also be assessed. Where documentation shows that use of alcohol or drugs affects adherence to prescribed therapy or may play a part in the precipitation of seizures, this must also be considered in the overall assessment of impairment severity.

B. *Brain tumors.* The diagnosis of malignant brain tumor should be established under the criteria described in 13.00B for neoplastic disease.

In histologically malignant tumors, the pathological diagnosis alone will be the decisive criterion for severity and expected duration (see 11.05A). In cases of benign tumors (see 11.05B) the severity and duration of the impairment will be determined on the bases of the symptoms, signs, and pertinent laboratory findings.

C. *Persistent disorganization of motor function* in the form of paresis or paralysis, tremor or other involuntary movements, ataxia and sensory disturbances (any or all of which may be due to cerebral, cerebellar, brain stem, spinal cord, or peripheral nerve dysfunction) which occur singly or in various combinations, frequently provides the sole or partial basis for decision in cases of neurological impairment. The assessment of impairment depends on the degree of interference with locomotion and/or interference with the use of fingers, hands, and arms.

D. *In conditions which are episodic in character,* such as multiple sclerosis or myasthenia gravis, consideration should be given to frequency and duration of exacerbations, length of remissions, and permanent residuals.

11.01 Category of Impairments, Neurological

11.02 *Epilepsy—major motor seizures, (grand mal or psychomotor), documented by EEG and by detailed description of a typical seizure pattern, including all associated phenomena; occurring more frequently than once a month, in spite of at least 3 months of prescribed treatment.* With:

A. Diurnal episodes (loss of consciousness and convulsive seizures); or

B. Nocturnal episodes manifesting residuals which interfere significantly with activity during the day.

11.03 *Epilepsy—minor motor seizures (petit mal, psychomotor, or focal), documented by EEG and by detailed description of a typical seizure pattern, including all associated phenomena; occurring more frequently than once weekly in spite of at least 3 months of prescribed treatment.* With alteration of awareness or loss of consciousness and transient postictal manifestations of unconventional behavior or significant interference with activity during the day.

11.04 *Central nervous system vascular accident.* With one of the following more than 3 months post-vascular accident:

A. Sensory or motor aphasia resulting in ineffective speech or communication; or

B. Significant and persistent disorganization of motor function in two extremities, resulting in sustained disturbance of gross and dexterous movements, or gait and station (see 11.00C).

11.05 *Brain tumors.*

A. Malignant gliomas (astrocytoma—grades III and IV, glioblastoma multiforme), medulloblastoma, ependymoblastoma, or primary sarcoma; or

B. Astrocytoma (grades I and II), meningioma, pituitary tumors, oligodendroglioma, ependymoma, clivus chordoma, and benign tumors. Evaluate under 11.02, 11.03, 11.04 A, or B, or 12.02.

11.06 *Parkinsonian syndrome* with the following signs: Significant rigidity, brady kinesia, or tremor in two extremities, which, singly or in combination, result in sustained disturbance of gross and dexterous movements, or gait and station.

11.07 *Cerebral palsy.* With:

A. IQ of 69 or less; or

B. Abnormal behavior patterns, such as destructiveness or emotional instability; or

C. Significant interference in communication due to speech, hearing, or visual defect; or

D. Disorganization of motor function as described in 11.04B.

11.08 *Spinal cord or nerve root lesions, due to any cause* with disorganization of motor function as described in 11.04B.

11.09 *Multiple sclerosis.* With:

A. Disorganization of motor function as described in 11.04B; or

B. Visual or mental impairment as described under the criteria in 2.02, 2.03, 2.04, or 12.02.

11.10 *Amyotrophic lateral sclerosis.* With:

A. Significant bulbar signs; or

B. Disorganization of motor function as described in 11.04B.

11.11 *Anterior poliomyelitis.* With:

A. Presistent difficulty with swallowing or breathing; or

B. Unintelligible speech; or

C. Disorganization of motor function as described in 11.04B.

11.12 *Myasthenia gravis.* With:

A. Significant difficulty with speaking, swallowing, or breathing while on prescribed therapy; or

B. Significant motor weakness of muscles of extremities on repetitive activity against resistance while on prescribed therapy.

11.13 *Muscular dystrophy* with disorganization of motor function as described in 11.04B.

11.14 *Peripheral neuropathies.* With disorganization of motor function as described in 11.04B, in spite of prescribed treatment.

11.15 *Tabes dorsalis.* With:

A. Tabetic crises occurring more frequently than once monthly; or

B. Unsteady, broad-based or ataxic gait causing significant restriction of mobility substantiated by appropriate posterior column signs.

11.16 *Subacute combined cord degeneration (pernicious anemia)* with disorganization of motor function as described in 11.04B or 11.15B, not significantly improved by prescribed treatment.

11.17 *Degenerative disease not listed elsewhere, such as Huntington's chorea, Friedreich's ataxia, and spino-cerebellar degeneration.* With:

A. Disorganization of motor function as described in 11.04B or 11.15B; or

B. Chronic brain syndrome. Evaluate under 12.02.

11.18 *Cerebral trauma:* Evaluate under the provisions of 11.02, 11.03, 11.04, and 12.02, as applicable.

11.19 *Syringomyelia.* With:

A. Significant bulbar signs; or

B. Disorganization of motor function as described in 11.04B.

12.00 Mental Disorders

A. *Introduction:* The evaluation of disability applications on the basis of mental disorders requires consideration of the nature and clinical manifestations of the medically determinable impairment(s) as well as consideration of the degree of limitation such impairment(s) may impose on the individual's ability to work, as reflected by (1) daily activities both in the occupational and social spheres; (2) range of interest; (3) ability to take care of personal needs; and (4) ability to relate to others. This evaluation must be based on medical evidence consisting of demonstrable clinical signs (medically demonstrable phenomena, apart from the individual's symptoms, which indicate specific abnormalities of behavior, affect, thought, memory, orientation, or contact with reality) and laboratory findings (including psychological tests) relevant to such issues as restriction of daily activities, constriction of interests, deterioration of personal habits (including personal hygiene), and impaired ability to relate to others.

The severity and duration of mental impairment(s) should be evaluated on the basis of reports from psychiatrists, psychologists, and hospitals, in conjunction with adequate descriptions of daily activites from these or other sources. Since confinement in an institution may occur because of legal or social requirements, confinement per se does not establish that impairment is severe. Similarly, release from an institution does not establish improvement. As always, severity and duration of impairment are determined by the medical evidence. A description of the individual's personal appearance and behavior at the time of the examination is also important to the evaluation process.

Diagnosis alone is insufficient as a basis for evaluation of the severity of mental impairment(s). Accordingly, the criteria of severity under mental disorders are arranged in four comprehensive groups; chronic brain syndromes (see 12.02), functional (nonorganic) psychotic disorders (see 12.03), functional nonpsychotic disorders (see 12.04), and mental retardation (see 12.05). Each category consists of a set of clinical findings, one or more of which must be met, and a set of functional restrictions, all of which must be met. The functional restrictions are to be interpreted in the light of the extent to which they are imposed by psychopathology.

The criteria for severity of mental impairment(s) are so constructed that a decision can be reached even if there are disagreements regarding diagnosis. All available clinical and laboratory evidence must be considered since it is not unusual to find, in the same individual, signs and test results associated with several pathological conditions, mental or physical. For example, an individual might show evidence of depression, chronic brain syndrome, cirrhosis of the liver, etc., in various combinations.

In some cases, the results of well-standardized psychological tests, such as the Wechsler Adult Intelligence Scale (WAIS) and the Minnesota Multiphasic Personality Inventory (MMPI), may contribute to the assessment of severity of impairment. To provide full documentation, the psychological report should include key data on which the report was based, such as MMPI profiles, WAIS subtest scores, etc.

B. *Discussion of Mental Disorders:*

1. *Chronic brain syndromes* (organic brain syndromes) result from persistent, more or less irreversible, diffuse impairment of cerebral tissue function. They are usually permanent and may be progressive. They may be accompanied by psychotic or neurotic behavior superimposed on organic brain pathology. The degree of impairment may range from mild to severe. Acute brain syndromes are temporary and reversible conditions with favorable prognosis and no significant residuals. Occasionally, an acute brain syndrome may progress into a chronic brain syndrome.

2. *Functional psychotic disorders* are characterized by demonstrable mental abnormalities without demonstrable structural changes in brain tissue. Mood disorders (involutional psychosis, manic-depressive illness, psychotic depressive reaction) or thought disorders (schizophrenias and paranoid states) are characterized by varying degrees of personality disorganization and accompanied by a corrresponding degree of inability to maintain contact with reality (e.g., hallucinations, delusions).

3. *Functional nonpsychotic disorders* are likewise characterized by demonstrable mental abnormalities without demonstrable structural changes in brain tissue (psychophysiologic, neurotic, personality and certain other nonpsychotic disorders).

a. *Psychophysiologic (autonomic and visceral) disorders* (e.g., cardiovascular, gastrointestinal, genitourinary, musculoskeletal, respiratory). In these conditions, the normal physiological expression of emotions is exaggerated by chronic emotional tensions, eventually leading to a disruption of the autonomic regulatory system and resulting in various visceral disorders. If the condition persists, it may lead to demonstrable structural changes (e.g., peptic ulcer, bronchial asthma, dermatitis).

b. *Neurotic disorders* (e.g., anxiety, depressive, hysterical, obsessive-compulsive, and phobic neuroses). In these conditions there are no gross falsifications of reality such as observed in the psychoses in the form of hallucinations or delusions. Neuroses are characterized by reactions to deep-seated conflicts and are classified by the defense mechanisms the individual employs to stave off the threat of emotional decompensation (e.g., anxiety, depression, conversion, obsessive-compulsive, or phobic mechanisms). Anxiety or depression occurring in connection with overwhelming

external situations (i.e., situational reactions) are self-limited and the symptoms usually recede when the situational stress diminishes.

c. *Other functional nonpsychotic disorders,* including paranoid, cyclothymic, schizoid, explosive, obsessive-compulsive, hysterical, asthenic, antisocial, passive-aggressive, and inadequate personality; sexual deviation; alcohol addiction and drug addiction. These disorders are characterized by deeply ingrained maladaptive patterns of behavior, generally of long duration. Unlike neurotic disorders, conflict in these cases is not primarily within the individual but between the individual and his environment. In many of these conditions, the patient may experience little anxiety and little or no sense of distress, except when anxiety and distress are consequences of maladaptive behavior.

4. *Mental retardation* denotes a lifelong condition characterized by below-average intellectual endowment as measured by well-standardized intelligence (IQ) tests and associated with impairment in one or more of the following areas: learning, maturation, and social adjustment. The degree of impairment should be determined primarily on the basis of intelligence level and the medical report. Care should be taken to ascertain that test results are consistent with daily activities and behavior. A well-standardized, comprehensive intelligence test, such as the Wechsler Adult Intelligence Scale (WAIS), should be administered and interpreted by a psychologist or psychiatrist qualified by training and experience to perform such an evaluation. In special circumstances, nonverbal measures, such as the Raven Progressive Matrices or the Arthur Point Scale, may be substituted.

Unfortunately, identical IQ scores obtained from different tests do not always reflect a similar degree of intellectual function. In this connection, it may be noted that on the WAIS, perhaps currently the most widely used measure of intellectual ability in adults, IQ's of 69 and below are characteristic of approximately the lowest 2 percent of the general population. In instances where other tests are administered, it will be necessary to convert the IQ to the corresponding percentile rank in the general population in order to determine the actual degree of impairment reflected by the IQ scores. Where more than one IQ is customarily derived from the test administered, i.e., where Verbal, Performance, and Full Scale IQ's are provided as on the WAIS, the lowest of these is to be used in conjunction with 12.05.

In cases where the nature of the individual's impairment is such that testing, as described above, is precluded, medical reports specifically describing the level of intellectual, social, and physical function should be obtained. Actual observations by district office or State DDS personnel, reports from educational institutions, and information furnished by public welfare agencies or other reliable, objective sources should be considered as additional evidence.

12.01 Category of Impairments, Mental

12.02 *Chronic brain syndromes* (organic brain syndromes). With both A and B:

A. Demonstrated deterioration in intellectual functioning, manifested by persistence of one or more of the following clincial signs:

1. Marked memory defect for recent events; or

2. Impoverished, slowed, perseverative thinking, with confusion or disorientation; or

3. Labile, shallow, or coarse affect;

B. Resulting persistence of marked restriction of daily activities and constriction of interests and deterioration in personal habits and seriously impaired ability to relate to other people.

12.03 *Functional psychotic disorders* (mood disorders, schizophrenias, paranoid states). With both A and B:

A. Manifested persistence of one or more of the following clinical signs:

1. Depression (or elation); or

2. Agitation; or

3. Psychomotor disturbances; or

4. Hallucinations or delusions; or

5. Autistic or other regressive behavior; or

6. Inappropriateness of affect; or

7. Illogical association of ideas;

B. Resulting persistence of marked restriction of daily activities and constriction of interests and seriously impaired ability to relate to other people.

12.04 *Functional nonpsychotic disorders* (psychophysiologic, neurotic, and personality disorders; addictive dependence on alcohol or drugs). With both A and B:

A. Manifested persistence of one or more of the following clinical signs:

1. Demonstrable and persistent structural changes mediated through psychophysiological channels (e.g., duodenal ulcer); or

2. Recurrent and persistent periods of anxiety, with tension, apprehension, and interference with concentration and memory; or

3. Persistent depressive affect with insomnia, loss of weight, and suicidal preoccupation; or

4. Persistent phobic or obsessive ruminations with inappropriate, bizarre, or disruptive behavior; or

5. Persistent compulsive, ritualistic behavior; or

6. Persistent functional disturbance of vision, speech, hearing, or use of a limb with demonstrable structural or trophic changes; or

7. Persistent, deeply ingrained, maladaptive patterns of behavior manifested by either:

a. Seclusiveness or autistic thinking; or

b. Pathologically inappropriate suspiciousness or hostility;

B. Resulting persistence of marked restriction of daily activities and constriction of interests and deterioration in personal habits and seriously impaired ability to relate to other people.

12.05 *Mental retardation.* As manifested by:

A. Severe mental and social incapacity as evidenced by marked dependence upon others for personal needs (e.g., bathing, washing, dressing, etc.) and inability to understand the spoken word and inability to avoid physical danger (fire, cars, etc.) and inability to follow simple directions and inability to read, write, and perform simple calculations; or

B. IQ of 59 or less (see 12.00B4); or

C. IQ of 60 to 69 inclusive (see 12.00B4) and a physical or other mental impairment imposing additional and significant work-related limitation of function.

13.00 Neoplastic Disease—Malignant

A. *Introduction:* The determination of the level of severity resulting from malignant tumors is made from a consideration of the site of the lesion, the histogenesis of the tumor, the extent of involvement, the apparent adequacy and response to therapy (surgery, irradiation, hormones, chemotherapy, etc.), and the magnitude of the post-therapeutic residuals.

B. *Documentation:* The diagnosis of malignant tumor should be established on the basis of symptoms, signs, and laboratory findings. The site of the primary, recurrent, and metastatic lesion must be specified in all cases of malignant neoplastic diseases. If an operative procedure has been performed, the evidence should include a copy of the operative note and the report of the gross and microscopic examination of the surgical specimen. If these documents are not obtainable, then the summary of hospitalization or a report from the treating physician must include details of the findings at surgery and the results of the pathologist's gross and microscopic examination of the tissues.

For those cases in which a disabling impairment was not established when therapy was begun but progression of the disease is likely, current medical evidence should include a report of a recent examination directed especially at local or regional recurrence, soft part or skeletal metastases, and significant posttherapeutic residuals.

C. *Evaluation:* Usually, when the malignant tumor consists only of a local lesion with metastasis to the regional lymph nodes which apparently has been completely excised, imminent recurrence or metastasis is not anticipated. Exceptions are noted in 13.02E, 13.03, 13.05B, 13.09 B and E, 13.11 A and F, 13.13B, 13.16 B and C, 13.21B, 13.22 A and B, and 13.24A. For adjudicative purposes, "distant metastasis" or "metastasis beyond the regional lymph nodes" refers to metastasis beyond the lines of the usual radical en bloc resection.

Local or regional recurrence after radical surgery or pathological evidence of incomplete excision by radical surgery is to be equated with unresectable lesions (except for carcinoma of the breast, 13.09C) and, for the purposes of our program, may be evaluated as "inoperable." These situations are usually followed by severe impairment within 6 months to 1 year.

Local or regional recurrence after incomplete excision of a localized and still completely resectable tumor is not to be equated with recurrence after radical surgery. In the evaluation of lymphomas, the tissue type and site of involvement are not necessarily indicators of the severity of the impairment.

When a malignant tumor has metastasized beyond the regional lymph nodes, the impairment usually will be considered to be severe. Exceptions are hormone-dependent tumors, isotope-sensitive metastases,

metastases from seminoma of the testicles which are controlled by definitive therapy, or distant metastases which have apparently disappeared and have not been evident for 3 or more years.

D. *Effects of therapy.* Significant posttherapeutic residuals, not specifically included in the category of impairments for malignant neoplasms, should be evaluated according to the affected body system.

Where the impairment is not listed in the Listing of Impairments and is not medically equivalent to a listed impairment, the impact of any residual impairment including that caused by therapy must be considered. The therapeutic regimen and consequent adverse response to therapy may vary widely; therefore, each case must be considered on an individual basis. It is essential to obtain a specific description of the therapeutic regimen, including the drugs given, dosage, frequency of drug administration, and plans for continued drug administration. It is necessary to obtain a description of the complications or any other adverse response to therapy such as nausea, vomiting, diarrhea, weakness, dermatologic disorders, or reactive mental disorders. Since the severity of the adverse effects of anticancer chemotherapy may change during the period of drug administration, the decision regarding the impact of drug therapy should be based on a sufficient period of therapy to permit proper consideration.

E. *Onset.* To establish onset of disability prior to the time a malignancy is first demonstrated to be inoperable or beyond control by other modes of therapy (and prior evidence is nonexistent) requires medical judgment based on medically reported symptoms, the type of the specific malignancy, its location, and extent of involvement when first demonstrated.

13.01 Category of Impairments, Neoplastic Diseases—Malignant

13.02 *Head and neck* (except salivary glands—13.07, thyroid gland—13.08, and mandible, maxilla, orbit, or temporal fossa—13.11):

A. Inoperable; or

B. Not controlled by prescribed therapy; or

C. Recurrent after radical surgery or irradiation; or

D. With distant metastasis; or

E. Epidermoid carcinoma occurring in the pyriform sinus or posterior third of the tongue.

13.03 *Sarcoma of skin:*

A. Angiosarcoma with metastasis to regional lymph nodes or beyond; or

B. Mycosis fungoides with lymph node or visceral involvement.

13.04 *Sarcoma of soft parts:* Not controlled by prescribed therapy.

13.05 *Malignant melanoma:*

A. Recurrent after wide excision; or

B. With metastasis to adjacent skin (satellite lesions) or elsewhere.

13.06 *Lymph nodes:*

A. Hodgkin's disease or non-Hodgkin's lymphoma with progressive disease not controlled by prescribed therapy; or

B. Metastatic carcinoma in a lymph node (except for epidermoid carcinoma in a lymph node in the neck) where the primary site is not determined after adequate search; or

C. Epidermoid carcinoma in a lymph node in the neck not responding to prescribed therapy.

13.07 *Salivary glands*—carcinoma or sarcoma with metastasis beyond the regional lymph nodes.

13.08 *Thyroid gland*—carcinoma with metastasis beyond the regional lymph nodes, not controlled by prescribed therapy.

13.09 *Breast:*

A. Inoperable carcinoma; or

B. Inflammatory carcinoma; or

C. Recurrent carcinoma, except local recurrence controlled by prescribed therapy; or

D. Distant metastasis from breast carcinoma (bilateral breast carcinoma, synchronous or metachronus, is usually primary in each breast); or

E. Sarcoma with metastasis anywhere.

13.10 *Skeletal system* (exclusive of the jaw):

A. Malignant primary tumors with evidence of metastases and not controlled by prescribed therapy; or

B. Metastatic carcinoma to bone where the primary site is not determined after adequate search.

13.11 *Mandible, maxilla, orbit, or temporal fossa:*

A. Sarcoma of any type with metastasis; or

B. Carcinoma of the antrum with extension into the orbit or ethmoid or sphenoid sinus, or with regional or distant metastasis; or

C. Orbital tumors with intracranial extension; or

D. Tumors of the temporal fossa with perforation of skull and meningeal involvement; or

E. Adamantinoma with orbital or intracranial infiltration; or

F. Tumors of Rathke's pouch with infiltration of the base of the skull or metastasis.

13.12 *Brain or spinal cord:*

A. Metastatic carcinoma to brain or spinal cord.

B. Evaluate other tumors under the criteria described in 11.05 and 11.08.

13.13 *Lungs:*

A. Unresectable; or

B. With metastases; or

C. Recurrent after resection; or

D. Incomplete excision; or

E. Oat cell carcinoma.

13.14 *Pleura or mediastinum:*

A. Malignant mesothelioma of pleura; or

B. Malignant tumors, metastatic to pleura; or

C. Malignant primary tumor of the mediastinum not controlled by prescribed therapy.

13.15 *Abdomen:*

A. Generalized carcinomatosis; or

B. Retroperitoneal cellular sarcoma not controlled by prescribed therapy; or

C. Ascites with demonstrated malignant cells.

13.16 *Esophagus or stomach:*

A. Carcinoma or sarcoma of the upper two-thirds of the esophagus; or

B. Carcinoma or sarcoma of the distal one-third of the esophagus with metastasis to the regional lymph nodes or extension to surrounding structures; or

C. Carcinoma of the stomach with metastasis to the regional lymph nodes or extension to surrounding structures; or

D. Sarcoma of stomach not controlled by prescribed therapy; or

E. Inoperable carcinoma; or

F. Recurrence or metastasis after resection.

13.17 *Small intestine:*

A. Carcinoma, sarcoma, or carcinoid tumor with metastasis beyond the regional lymph nodes; or

B. Recurrence of carcinoma, sarcoma, or carcinoid tumor after resection; or

C. Sarcoma, not controlled by prescribed therapy.

13.18 *Large intestine* (from ileocecal valve to and including anal canal)—carcinoma or sarcoma.

A. Unresectable; or

B. Metastasis beyond the regional lymph nodes, or

C. Recurrence or metastasis after resection.

13.19 *Liver or gallbladder:*

A. Primary or metastatic malignant tumors of the liver; or

B. Carcinoma of the gallbladder; or

C. Carcinoma of the bile ducts, unresectable or with metastases.

13.20 *Pancreas:*

A. Carcinoma except islet cell carcinoma; or

B. Islet cell carcinoma which is unresectable and physiologically active.

13.21 *Kidneys, adrenal glands, or ureters*—carcinoma.

A. Unresectable; or

B. With metastasis.

13.22 *Urinary bladder*—carcinoma. With:

A. Infiltration beyond the bladder wall; or

B. Metastasis; or

C. Unresectable; or

D. Recurrence after total cystectomy; or

E. Evaluate urinary diversion after total cystectomy under the criteria in 6.02,

13.23 *Prostate gland*—carcinoma not controlled by prescribed therapy.

13.24 *Testicles:*

A. Choriocarcinoma; or

B. Other malignant primary tumors with progressive disease not controlled by prescribed therapy.

13.25 *Uterus*—carcinoma or sarcoma (corpus or cervix).

A. Inoperable and not controlled by prescribed therapy; or

B. Recurrent after total hysterectomy; or

C. Total pelvic exenteration.

13.26 *Ovaries*—all malignant, primary or recurrent tumors. With:

A. Ascites with demonstrated malignant cells; or

B. Unresectable infiltration; or

C. Unresectable metastasis to omentum or elsewhere in the peritoneal cavity; or

D. Distant metastasis.

13.27 *Leukemia:* Evaluate under the criteria of 7.00ff, Hemic and Lymphatic System.

13.28 *Uterine (Fallopian) tubes*—carcinoma or sarcoma, unresectable or with metastasis.

Part B

Medical criteria for the evaluation of impairments of children under age 16 (where criteria in Part A do not give appropriate

consideration to the particular disease

101.00 Musculoskeletal System

signs or drainage for at least 6 months despite prescribed therapy and consistent

2. Speech discrimination scores at 40 percent or less in the better ear; or

2. Persistent or recurrent abnormal breath sounds; bilateral rales or rhonchi; and

E. Evidence of pulmonary edema, such as rales or orthopnea.

consideration to the particular disease process in childhood).

Sec.
100.00 Growth Impairment.
101.00 Musculoskeletal System.
102.00 Special Senses and Speech.
103.00 Respiratory System.
104.00 Cardiovascular System.
105.00 Digestive System.
106.00 Genito-Urinary System.
107.00 Hemic and Lymphatic System.
109.00 Endocrine System.
110.00 Multiple Body Systems.
111.00 Neurological.
112.00 Mental and Emotional Disorders.
113.00 Neoplastic Diseases—Malignant.

100.00 Growth impairment

A. *Impairment of growth* may be disabling in itself or it may be an indicator of the severity of the impairment due to a specific disease process.

Determinations of growth impairment should be based upon the comparison of current height with at least three previous determinations, including length at birth, if available. Heights (or lengths) should be plotted on a standard growth chart, such as derived from the National Center for Health Statistics: NCHS Growth Charts. Height should be measured without shoes. Body weight corresponding to the ages represented by the heights should be furnished. The adult heights of the child's natural parents and the heights and ages of siblings should also be furnished. This will provide a basis upon which to identify those children whose short stature represents a familial characteristic rather than a result of disease. This is particularly true for adjudication under 100.02B.

B. *Bone age determinations* should include a full descriptive report of roentgenograms specifically obtained to determine bone age and must cite the standardization method used. Where roentgenograms must be obtained currently as a basis for adjudication under 100.03, views of the left hand and wrist should be ordered. In addition, roentgenograms of the knee and ankle should be obtained when cessation of growth is being evaluated in an older child at, or past, puberty.

C. The criteria in this section are applicable until closure of the major epiphyses. The cessation of significant increase in height at that point would prevent the application of these criteria.

100.01 Category of impairments, growth

100.02 *Growth impairment,* considered to be related to an additional specific medically determinable impairment, and one of the following:

A. Fall of greater than 15 percentiles in height which is sustained; or

B. Fall to, or persistence of, height below the third percentile.

100.03 *Growth impairment,* not identified as being related to an additional, specific medically determinable impairment. With:

A. Fall of greater than 25 percentiles in height which is sustained; and

B. Bone age greater than two standard deviations (2 SD) below the mean for chronological age (see 100.00B).

101.00 Musculoskeletal System

A. *Rheumatoid arthritis.* Documentation of the diagnosis of juvenile rheumatoid arthritis should be made according to an established protocol, such as that published by the Arthritis Foundation, *Bulletin on the Rheumatic Diseases.* Vol. 23, 1972–1973 Series, p. 712. Inflammatory signs include persistent pain, tenderness, erythema, swelling, and increased local temperature of a joint.

B. *The measurements of joint motion* are based on the technique for measurements described in the "Joint Method of Measuring and Recording," published by the American Academy of Orthopedic Surgeons in 1965, or "The Extremities and Back" in *Guides to the Evaluation of Permanent Impairment,* Chicago, American Medical Association, 1971 Chapter 1, pp. 1–48.

C. *Degenerative arthritis* may be the end stage of many skeletal diseases and conditions, such as traumatic arthritis, collagen disorders, septic arthritis, congenital dislocation of the hip, aseptic necrosis of the hip, slipped capital femoral epiphyses, skeletal dysplasias, etc.

101.01 Category of impairments, musculoskeletal

101.02 *Juvenile rheumatoid arthritis.* With:

A. Persistence or recurrence of joint inflammation despite six months of medical treatment and one of the following:

1. Limitation of motion of two major joints of 50 percent or greater; or

2. Fixed deformity of two major weight-bearing joints of 30 degrees or more; or

3. Radiographic changes of joint narrowing, erosion, or subluxation; or

4. Persistent or recurrent systemic involvement such as iridocyclitis or pericarditis or

B. Steroid dependence.

101.03 *Deficit of musculoskeletal function* due to deformity or musculoskeletal disease and one of the following:

A. Walking is markedly reduced in speed or distance despite orthotic or prosthetic devices; or

B. Ambulation is possible only with obligatory bilateral upper limb assistance (e.g., with walker, crutches); or

C. Inability to perform age-related personal self-care activities involving feeding, dressing, and personal hygiene

101.05 *Disorders of the spine.*

A. Fracture of vertebra with cord involvement (substantiated by appropriate sensory and motor loss).

B. Scoliosis (congenital idiopathic or neuromyopathic). With:

1. Major spinal curve measuring 60 degrees or greater; or

2. Spinal fusion of six or more levels. Consider under a disability for one year from the time of surgery; thereafter evaluate the residual impairment; or

3. FEV (vital capacity) of 50 percent or less of predicted normal values for the individual's measured (actual) height.

C. Kyphosis or lordosis measuring 90 degrees or greater.

101.06 *Chronic osteomyelitis* with persistence or recurrence of inflammatory signs or drainage for at least 6 months despite prescribed therapy and consistent radiographic findings.

102.00 Special Senses and Speech

A. *Visual impairments in children.* Impairment of central visual acuity should be determined with use of the standard Snellen test chart. Where this cannot be used, as in very young children, a complete description should be provided of the findings using other appropriate methods of examination, including a description of the techniques used for determining the central visual acuity for distance.

The accommodative reflex is generally not present in children under 6 months of age. In premature infants, it may not be present until 6 months plus the number of months the child is premature. Therefore absence of accommodative reflex will be considered as indicating a visual impairment only in children above this age (6 months).

Documentation of an ophthalmologic disorder must include description of the ocular pathology.

B. *Hearing impairments in children.* The criteria for hearing impairments in children take into account that a lesser impairment in hearing which occurs at an early age may result in a severe speech and language disorder.

Improvement by a hearing aid, as predicted by the testing procedure, must be demonstrated to be feasible in that child, since younger children may be unable to use a hearing aid effectively.

The type of audiometric testing performed must be described and a copy of the results must be included. The pure tone air conduction in 102.08 are based on American National Standard Institute Specifications for Audiometers, S3.6–1969 (ANSI–1969). The report should indicate the specifications used to calibrate the audiometer.

The finding of a severe impairment will be based on the average hearing levels at 500, 1000, 2000, and 3000 Hertz (Hz) in the better ear, and on speech discrimination, as specified in § 102.08.

102.01 Category of impairments, special sense organs

102.02 *Impairment of central visual acuity.*

A. Remaining vision in the better eye after best correction is 20/200 or less.

B. For children below 3 years of age at time of adjudication:

1. Absence of accommodative reflex (see 102.00A for exclusion of children under 6 months of age); or

2. Retrolental fibroplasia with macular scarring or neovascularization; or

3. Bilateral congenital cataracts with visualization of retinal red reflex only or when associated with other ocular pathology.

102.08 *Hearing impairments.*

A. For children below 5 years of age at time of adjudication, inability to hear air conduction thresholds at an average of 40 decibels (db) hearing level or greater in the better ear.

B. For children 5 years of age and above at time of adjudication:

1. Inability to hear air conduction thresholds at an average of 70 decibels (db) or greater in the better ear; or

2. Speech discrimination scores at 40 percent or less in the better ear; or

3. Inability to hear air conduction thresholds at an average of 40 decibels (db) or greater in the better ear, and a speech and language disorder which significantly affects the clarity and content of the speech and is attributable to the hearing impairment.

103.00 Respiratory System

A. *Documentation of pulmonary insufficiency.* The reports of spirometric studies for evaluation under Table I must be expressed in liters. The reported FEV_1 should represent the largest of at least three satisfactory attempts, and should be within 10 percent of another FEV_1. The appropriately labeled spirometric tracing of three FEV maneuvers must be submitted with the report, showing distance per second on the abscissa and distance per liter on the ordinate. The unit distance for volume on the tracing should be at least 15 mm. per liter and the paper speed at least 20 mm. per second. The height of the individual without shoes must be recorded.

The ventilatory function studies should not be performed during or soon after an acute episode or exacerbation of a respiratory illness. In the presense of acute bronchospasm, or where the FEV_1 is less than that stated in Table I, the studies should be repeated after the administration of a nebulized bronchodilator. If bronchodilator was not used in such instances, the reason should be stated in the report.

A statement should be made as to the child's ability to understand directions and the cooperate in performance of the test, and should include an evaluation of the child's effort. When tests cannot be performed or completed, the reason (such as a child's young age) should be stated in the report.

B. *Cystic fibrosis.* This section discusses only the pulmonary manifestations of cystic fibrosis. Other manifestations, complications, or associated disease must be evaluated under the appropriate section.

The diagnosis of cystic fibrosis will be based upon appropriate history, physical examination, and pertinent laboratory findings. Confirmation based upon elevated concentration of sodium or chloride in the sweat should be included, with indication of the technique used for collection and analysis.

103.01 Category of impairments, respiratory

103.03 *Bronchial asthma.* With evidence of progression of the disease despite therapy and documented by one of the following:

A. Recent, recurrent intense asthmatic attacks requiring parenteral medication; or

B. Persistent prolonged expiration with wheezing between acute attacks and radiographic findings of peribronchial disease.

103.13 *Pulmonary manifestations of cystic fibrosis.* With:

A. FEV_1 equal to or less than the values specified in Table I (see § 103.00A for requirements of ventilatory function testing); or

B. For children where ventilatory function testing cannot be performed:

1. History of dyspnea on mild exertion or chronic frequent productive cough; and

2. Persistent or recurrent abnormal breath sounds; bilateral rales or rhonchi; and

3. Radiographic findings of extensive disease with hyperaeration and bilateral peribronchial infiltration.

Table I

Height (in centimeters)	FEV_1 equal to or less than (liters)
110 or less	0.6
120	0.7
130	0.9
140	1.1
150	1.3
160	1.5
170 or more	1.6

104.00 Cardiovascular System

A. *General.* Evaluation should be based upon history, physical findings, and appropriate laboratory data. Reported abnormalities should be consistent with the pathologic diagnosis. The actual electrocardiographic tracing, or an adequate marked photocopy, must be included. Reports of other pertinent studies necessary to substantiate the diagnosis or describe the severity of the impairment must also be included.

B. *Evaluation of cardiovascular impairments in children* requires two steps:

1. The delineation of a specific cardiovascular disturbance, either congenital or acquired. This may include arterial or venous disease, rhythm disturbance, or disease involving the valves, septa, myocardium or pericardium; and

2. Documentation of the severity of the impairment, with medically determinable and consistent cardiovascular signs, symptoms, and laboratory data. In cases where impairment characteristics are questionably secondary to the cardiovascular disturbance, additional documentation of the severity of the impairment (e.g., catherization data, if performed) will be necessary.

C. *Chest roentgenogram* (6 ft. PA film) will be considered indicative of cardiomegaly if:

1. The cardiothoracic ratio is over 60 percent at age one year or less, or 55 percent at more than one year of age; or

2. The cardiac size is increased over 15 percent from any prior chest roentgenograms; or

3. Specific chamber or vessel enlargement is documented in accordance with established criteria.

D. *Tables I, II, and III* below are designed for case adjudication and not for diagnostic purposes. The adult criteria may be useful for older children and should be used when applicable.

E. *Rheumatic fever,* as used in this section assumes diagnoses made according to the revised Jones Criteria.

104.01 Category of impairments, cardiovascular

104.02 *Chronic congestive failure.* With two or more of the following signs:

A. Tachycardia (see Table I).

B. Tachypnea (see Table II).

C. Cardiomegaly on chest roentgenogram (see 104.00C).

D. Hepatomegaly (more than 2 cm. below the right costal margin in the right midclavicular line).

E. Evidence of pulmonary edema, such as rales or orthopnea.

F. Dependent edema.

G. Exercise intolerance manifested as labored respiration on mild exertion (e.g., in an infant, feeding).

Table I—Tachycardia at Rest

Age	Apical Heart (beats per minute)
Under 1 yr	150
1 through 3 yr	130
4 through 9 yr	120
10 through 15 yr	110
Over 15 yr	100

Table II.—*Tachypnea at Rest*

Age	Respiratory rate over (per minute)
Under 1 yr	40
1 through 5 yr	35
6 through 9 yr	30
Over 9 yr	25

104.03 *Hypertensive cardiovascular disease.* With persistently elevated blood pressure for age (see Table III) and one of the following:

A. Impaired renal function as described under the criteria in 106.02; or

B. Cerebrovascular damage as described under the criteria in 111.06; or

C. Congestive heart failure as described under the criteria in 104.02.

Table III.—*Elevated Blood Pressure*

Age	S (over) mm.	Diastolic (over) in mm.
Under 6 mo	95	60
6 mo. to 1 yr	110	70
1 through 8 yrs	115	80
9 through 11 yrs	120	80
12 through 15 yrs	130	80
Over 15 yrs	140	80

104.04 Cyanotic congenital heart disease. With one of the following:

A. Surgery is limited to palliative measures; or

B. Characteristics squatting, hemoptysis, syncope, or hypercyanotic spells; or

C. Chronic hematocrit of 55 percent or greater or arterial O_2 saturation of less than 90 percent at rest, or arterial oxygen tension of less than 60 Torr at rest.

104.05 *Cardiac arrhythmia, such as persistent or recurrent heart block or A–V dissociation (with or without therapy).* And one of the following:

A. Cardiac syncope; or

B. Congestive heart failure as described under the criteria in 104.02; or

C. Exercise intolerance with labored respirations on mild exertion (e.g., in infants, feeding).

104.07 *Cardiac syncope* with at least one documented syncopal episode characteristic of specific cardiac disease (e.g., aortic stenosis).

104.08 *Recurrent hemoptysis.* Associated with either pulmonary hypertension or extensive bronchial collaterals due to documented chronic cardiovascular disease.

104.09 *Chronic rheumatic fever or rheumatic heart disease.* With:

A. Persistence of rheumatic fever activity for 6 months or more, with significant murmur(s), cardiomegaly (see 104.00C), and

other abnormal laboratory findings (such as elevated sedimentation rate or electrocardiographic findings); or

B. Congestive heart failure as described under the criteria in 104.02.

105.00 Digestive System

A. *Disorders of the digestive system* which result in disability usually do so because of interference with nutrition and growth, multiple recurrent inflammatory lesions, or other complications of the disease. Such lesions or complications usually respond to treatment. To constitute a listed impairment, these must be shown to have persisted or be expected to persist despite prescribed therapy for a continuous period of at least 12 months.

B. *Documentation of gastrointestinal impairments* should include pertinent operative findings, radiographic studies, endoscopy, and biopsy reports. Where a liver biopsy has been performed in chronic liver disease, documentation should include the report of the biopsy.

C. *Growth retardation and malnutrition.* When the primary disorder of the digestive tract has been documented, evaluate resultant malnutrition under the criteria described in 105.08. Evaluate resultant growth impairment under the criteria described in 100.03. Intestinal disorders, including surgical diversions and potentially correctable congenital lesions, do not represent a severe impairment if the individual is able to maintain adequate nutrition growth, and development.

D. *Multiple congenital anomalies.* See related criteria, and consider as a combination of impairments.

105.01 Category of impairments, digestive

105.03 *Esophageal obstruction, caused by atresia, stricture, or stenosis* with malnutrition as described under the criteria in 105.08.

105.06 *Chronic liver disease.* With one of the following:

A. Inoperable billiary atresia demonstrated by X-ray or surgery; or

B. Intractable ascites not attributable to other causes, with serum albumin of 3.0 gm./100 ml. or less; or

C. Esophageal varices (demonstrated by angiography, barium swallow, or endoscopy or by prior performance of a specific shunt or plication procedure); or

D. Hepatic coma, documentated by findings from hospital records; or

E. Hepatic encephalopathy. Evaluate under the criteria in 112.02; or

F. Chronic active inflammation or necrosis documented by SGOT persistently more than 100 units or serum bilirubin of 2.5 mg. percent or greater.

105.07 *Chronic inflammatory bowel disease (such as ulcerative colitis, regional enteritis), as documented in 105.00.* With one of the following:

A. Intestinal manifestations or complications, such as obstruction, abscess, or fistula formation which has lasted or is expected to last 12 months; or

B. Malnutrition as described under the criteria in 105.08; or

C. Growth impairment as described under the criteria in 100.03.

105.08 *Malnutrition, due to demonstrable gastrointestinal disease causing either a fall of 15 percentiles of weight which persists or the persistence of weight which is less than the third percentile (on standard growth charts).* And one of the following:

A. Stool fat excretion per 24 hours:

1. More than 15 percent in infants less than 6 months.

2. More than 10 percent in infants 6–18 months.

3. More than 6 percent in children more than 18 months; or

B. Persistent hematocrit of 30 percent or less despite prescribed therapy; or

C. Serum carotene of 40 mcg./100 ml. or less; or

D: Serum albumin of 3.0 gm./100 ml. or less.

106.00 Genito-Urinary System

A. *Determination of the presence of chronic renal disease* will be based upon the following factors:

1. History, physical examination, and laboratory evidence of renal disease.

2. Indications of its progressive nature or laboratory evidence of deterioration of renal function.

B. *Renal transplant.* The amount of function restored and the time required to effect improvement depend upon various factors including adequacy of post-transplant renal function, incidence of renal infection, occurrence of rejection crisis, presence of systemic complications (anemia, neuropathy, etc.) and side effects of corticosteroid or immuno-suppressive agents. A period of at least 12 months is required for the individual to reach a point of stable medical improvement.

C. Evaluate associated disorders and complications according to the appropriate body system listing.

106.01 Category of impairments, genito-urinary

106.02 *Chronic renal disease.* With:

A. BUN of 30 mg./100 ml. or greater; or

B. Serum creatinine of 3.0 mg./100 ml. or greater; or

C. Creatinine clearance equal to or less than 42 ml./min./1.73 m^2; or

D. Chronic renal dialysis program for irreversible renal failure; or

E. Renal transplant. Consider under a disability for 12 months following surgery; thereafter, evaluate the residual impairment (see 106.00B).

106.06 Nephrotic syndrome, with edema not controlled by prescribed therapy. And:

A. Serum albumin less than 2 gm./100 ml.; or

B. Proteinuria more than 2.5 gm./1.73m^2/day.

107.00 Hemic and Lymphatic System

A. *Sickle cell disease* refers to a chronic hemolytic anemia associated with sickle cell hemoglobin, either homozygous or in combination with thalassemia or with another abnormal hemoglobin (such as C or F).

Appropriate hematologic evidence for sickle cell disease, such as hemoglobin electrophoresis must be included. Vaso-occlusive, hemolytic, or aplastic episodes should be documented by description of severity, frequency, and duration.

Disability due to sickle cell disease may be solely the result of a severe, persistent anemia or may be due to the combination of chronic progressive or episodic manifestations in the presence of a less severe anemia.

Major visceral episodes causing disability include meningitis, osteomyelitis, pulmonary infections or infarctions, cerebrovascular accidents, congestive heart failure, genitourinary involvement, etc.

B. *Coagulation defects.* Chronic inherited coagulation disorders must be documented by appropriate laboratory evidence such as abnormal thromboplastin generation, coagulation time, or factor assay.

C. *Acute leukemia.* Initial diagnosis of acute leukemia must be based upon definitive bone marrow pathologic evidence. Recurrent disease may be documented by peripheral blood, bone marrow, or cerebrospinal fluid examination. The pathology report must be included.

The designated duration of disability implicit in the finding of a listed impairment is contained in 107.11. Following the designated time period, a documented diagnosis itself is no longer sufficient to establish a severe impairment. The severity of any remaining impairment must be evaluated on the basis of the medical evidence.

107.01 category of impairments, hemic and lymphatic

107.03 *Hemolytic anemia (due to any cause).* Manifested by persistence of hematocrit of 26 percent or less despite prescribed therapy, and reticulocyte count of 4 percent or greater.

107.05 *Sickle cell disease.* With:

A. Recent, recurrent, severe vaso-occlusive crises (musculoskeletal, vertebral, abdominal); or

B. A major visceral complication in the 12 months prior to application; or

C. A hyperhemolytic or aplastic crisis within 12 months prior to application; or

D. Chronic, severe anemia with persistence of hematocrit of 26 percent or less; or

E. Congestive heart failure, cerebrovascular damage, or emotional disorder as described under the criteria in 104.02, 111.00ff, or 112.00ff.

107.06 *Chronic idiopathic thrombocytopenic purpura of childhood* with purpura and thrombocytopenia of 40,000 platelets/cu. mm. or less despite prescribed therapy or recurrent upon withdrawal of treatment.

107.08 *Inherited coagulation disorder.* With:

A. Repeated spontaneous or inappropriate bleeding; or

B. Hemarthrosis with joint deformity.

107.11 *Acute leukemia.* Consider under a disability:

A. For 2½ years from the time of initial diagnosis; or

B. For 2½ years from the time of recurrence of active disease.

109.00 Endocrine System

A. *Cause of disability.* Disability is caused by a disturbance in the regulation of the

secretion or metabolism of one or more hormones which are not adequately controlled by therapy. Such disturbances or abnormalities usually respond to treatment. To constitute a listed impairment these must be shown to have persisted or be expected to persist despite prescribed therapy for a continuous period of at least 12 months.

B. *Growth.* Normal growth is usually a sensitive indicator of health as well as of adequate therapy in children. Impairment of growth may be disabling in itself or may be an indicator of a severe disorder involving the endocrine system or other body systems. Where involvement of other organ systems has occurred as a result of a primary endocrine disorder, these impairments should be evaluated according to the criteria under the appropriate sections.

C. *Documentation.* Description of characteristic history, physical findings, and diagnostic laboratory data must be included. Results of laboratory tests will be considered abnormal if outside the normal range or greater than two standard deviations from the mean of the testing laboratory. Reports in the file should contain the information provided by the testing laboratory as to their normal values for that test.

D. *Hyperfunction of the adrenal cortex.* Evidence of growth retardation must be documented as described 100.00. Elevated blood or urinary free cortisol levels are not acceptable in lieu of urinary 17-hydroxycorticosteroid excretion for the diagnosis of adrenal cortical hyperfunction.

E. *Adrenal cortical insufficiency.* Documentation must include persistent low plasma cortisol or low urinary 17-hydroxycorticosteroids or 17-ketogenic steroids and evidence of unresponsiveness to ACTH stimulation.

109.01 Category of impairments, endrocrine

109.02 *Thyroid Disorders.*

A. *Hyperthyroidism (as documented in 109.00C).* With clinical manifestations despite prescribed therapy, and one of the following:

1. Elevated serum thyroxine (T_4) and either elevated free T^4 or resin T_3 uptake; or

2. Elevated thyroid uptake of radioiodine; or

3. Elevated serum triiodothyronine (T_3).

B. *Hypothyrodism.* With one of the following, despite prescribed therapy:

1. IQ of 69 or less; or

2. Growth impairment as described under the criteria in 100.02 A and B; or

3. Precocious puberty.

109.03 *Hyperparathyroidism (as documented in 109.00C).* With:

A. Repeated elevated total or ionized serum calcium; or

B. Elevated serum parathyroid hormone.

109.04 *Hypoparathyroidism or Pseudo-hypoparathyroidism.* With:

A. Severe recurrent tetany or convulsions which are unresponsive to prescribed therapy; or

B. Growth retardation as described under the criteria in 100.02 A and B.

109.05 *Diabetes insipidus, documented by pathologic hypertonic saline or water deprivation test.* And one of the following:

A. Intracranial space-occupying lesion, before or after surgery; or

B. Unresponsiveness to Pitressin; or

C. Growth retardation as described under the criteria in 100.02 A and B; or

D. Unresponsive hypothalmic thirst center, with chronic or recurrent hypernatremia; or

E. Decreased visual fields attributable to a pituitary lesion.

109.06 *Hyperfunction of the adrenal cortex (Primary or secondary).* With:

A. Elevated urinary 17-hyroxycorticosteroids (or 17-ketogenic steroids) as documented in 109.00 C and D; and

B. Unresponsiveness to low-dose dexamethasone suppression.

109.07 *Adrenal cortical insufficiency (as documented in 109.00 C and E)* with recent, recurrent episodes of circulatory collapse.

109.08 *Juvenile diabetes mellitus (as documented in 109.00C) requiring parenteral insulin.* And one of the following, despite prescribed therapy:

A. Recent, recurrent hospitalizations with acidosis; or

B. Recent, recurrent episodes of hypoglycemia; or

C. Growth retardation as described under the criteria in 100.02 A or B; or

D. Impaired renal function as described under the criteria in 106.00ff.

109.09 *Iatrogenic hypercorticoid state.* With chronic glucocorticoid therapy resulting in one of the following:

A. Osteoporosis; or

B. Growth retardation as described under the criteria in 100.02 A or B; or

C. Diabetes mellitus as described under the criteria in 109.08; or

D. Myopathy as described under the criteria in 111.08; or

E. Emotional disorder as described under the criteria in 112.00ff.

109.10 *Pituitary dwarfism (with documented growth hormone deficiency).* And growth impairment as described under the criteria in 100.2B.

109.11 *Adrenogenital syndrome.* With:

A. Recent, recurrent self-losing episodes despite prescribed therapy; or

B. Inadequate replacement therapy manifested by accelerated bone age and virilization, or

C. Growth impairment as described under the criteria in 100.02 A or B.

109.12 *Hypoglycemia (as documented in 109.00C).* With recent, recurrent hypoglycemic episodes producing convulsion or coma.

109.13 *Gonadal Dysgenesis (Turner's Syndrome), chromosomally proven.* Evaluate the resulting impairment under the criteria for the appropriate body system.

110.00 Multiple Body Systems

A. *Catastrophic congenital abnormalities or disease.* This section refers only to very serious congenital disorders, diagnosed in the newborn or infant child.

B. *Immune deficiency diseases.* Documentation of immune deficiency disease must be submitted, and may include quantitative immunoglobulins, skin tests for delayed hypersensitivity, lymphocyte stimulative tests, and measurements of cellular immunity mediators.

110.01 Category of impairments, mutiple body systems

110.08 *Catastrophic congenital abnormalities or disease.* With:

A. A positive diagnosis (such as anencephaly, trisomy D or E, cyclopia, etc.), generally regarded as being incompatible with extrauterine life; or

B. A positive diagnosis (such as cri du chat, Tay-Sachs Disease) wherein attainment of the growth and development level of 2 years is not expected to occur.

110.09 *Immune deficiency disease.*

A. *Hypogammaglobulinemia or dysgammaglobulinemia.* With:

1. Recent, recurrent severe infections; or

2. A complication such as growth retardation, chronic lung disease, collagen disorder, or tumors.

E. *Thymic dysplastic syndromes* (such as Swiss, diGeorge).

111.00 Neurological

A. *Seizure disorder* must be substantiated by at least one detailed description of a typical seizure. Report of recent documentation should include an electroencephalogram and neurological examination. Sleep EEG is preferable, especially with temporal lobe seizures. Frequency of attacks and any associated phenomena should also be substantiated.

Young children may have convulsions in association with febrile illnesses. Proper use of 111.02 and 111.03 requires that a seizure disorder be established. Although this does not exclude consideration of seizures occurring during febrile illnesses, it does require documentation of seizures during nonfebrile periods.

There is an expected delay in control of seizures when treatment is started, particularly when changes in the treatment regimen are necessary. Therefore, a seizure disorder should not be considered to meet the requirements of 111.02 or 111.03 unless it is shown that seizures have persisted more than three months after prescribed therapy began.

B. *Minor motor seizures.* Classical petit mal seizures must be documented by characteristic EEG pattern, plus information as to age at onset and frequency of clinical seizures. Myoclonic seizures, whether of the typical infantile or Lennox-Gastaut variety after infancy, must also be documented by the characteristic EEG pattern plus information as to age at onset and frequency of seizures.

C. *Motor dysfunction.* As described in 111.06, motor dysfunction may be due to any neurological disorder. It may be due to static or progressive conditions involving any area of the nervous system and producing any type of neurological impairment. This may include weakness, spasticity lack of coordination, ataxia, tremor, athetosis, or sensory loss. Documentation of motor dysfunction must include neurologic findings and description of type of neurologic abnormality (e.g., spasticity, weakness), as well as a description of the child's functional impairment (i.e., what the child is unable to do because of the abnormality). Where a diagnosis has been made, evidence should be included for substantiation of the diagnosis (e.g., blood chemistries and muscle biopsy reports), wherever applicable.

D. *Impairment of communication.* The documentation should include a description

2. IQ of 69 or less; or

C. Four extremity involvement; or

damage resulting in total incapacitation. Such children may meet criteria in either

schedules impart significant additional morbidity to the child during the period of

202.00 Maximum sustained work capability limited to light work as a result of severe

(c) In the application of the rules, the individual's residual functional capacity (i.e.,

D. *Impairment of communication.* The documentation should include a description of a recent comprehensive evaluation, including all areas of affective and effective communication, performed by a qualified professional.

111.01 Category of impairment, neurological

111.02 *Major motor seizure disorder.*

A. *Major motor seizures.* In a child with an established seizure disorder, the occurrence of more than one major motor seizure per month despite at least three months of prescribed treatment. With:

1. Diurnal episodes (loss of consciousness and convulsive seizures); or

2. Nocturnal episodes manifesting residuals which interfere with activity during the day.

B. *Major motor seizures.* In a child with an established seizure disorder, the occurrence of at least one major motor seizure in the year prior to application despite at least three months of prescribed treatment. And one of the following:

1. IQ of 69 or less; or

2. Significant interference with communication due to speech, hearing, or visual defect; or

3. Significant emotional disorder; or

4. Where significant adverse effects of medication interfere with major daily activities.

111.03 *Minor motor seizure disorder.* In a child with an established seizure disorder, the occurrence of more than one minor motor seizure per week, with alteration of awareness or loss of consciousness, despite at least three months of prescribed treatment.

111.05 *Brain tumors.* A. Malignant gliomas (astrocytoma—Grades III and IV, glioblastoma multiforme), medulloblastoma, ependymoblastoma, primary sarcoma, or brain stem gliomas; or

B. Evaluate other brain tumors under the criteria for the resulting neurological impairment.

111.06 *Motor dysfunction (due to any neurological disorder).* Persistent disorganization or deficit of motor function for age involving two extremities, which (despite prescribed therapy) interferes with age-appropriate major daily activities and results in disruption of:

A. Fine and gross movements; of

B. Gait and station.

111.07 *Cerebral palsy.* With: A. Motor dysfunction meeting the requirements of 111.06 or 101.03; or

B. Less severe motor dysfunction (but more than slight) and one of the following:

1. IQ of 69 or less; or

2. Seizure disorder, with at least one major motor seizure in the year prior to application; or

3. Significant interference with communication due to speech, hearing, or visual defect; or

4. Significant emotional disorder.

111.08 *Meningomyelocele (and related disorders).* With one of the following despite prescribed treatment:

A. Motor dysfunction meeting the requirements of § 111.03 or § 111.06; or

B. Less severe motor dysfunction (but more than slight), and:

1. Urinary or fecal incontinence when inappropriate for age; or

2. IQ of 69 or less; or

C. Four extremity involvement; or

D. Noncompensated hydrocephalus producing interference with mental or motor developmental progression.

111.09 *Communication impairment, associated with documented neurological disorder.* And one of the following:

A. Documented speech deficit which significantly affects the clarity and content of the speech; or

B. Documented comprehension deficit resulting in effective verbal communication for age; or

C. Impairment of hearing as described under the criteria in 102.08.

112.00 Mental and Emotional Disorders

A. *Introduction.* This section is intended primarily to describe mental and emotional disorders of young children. The criteria describing medically determinable impairments in adults should be used where they clearly appear to be more appropriate.

B. *Mental retardation. General.* As with any other impairment, the necessary evidence consists of symptoms, signs, and laboratory findings which provide medically demonstrable evidence of impairment severity. Standardized intelligence test results are essential to the adjudication of all cases of mental retardation that are not clearly covered under the provisions of 112.05A. Developmental milestone criteria may be the sole basis for adjudication only in cases where the child's young age and/or condition preclude formal standardized testing by a psychologist or psychiatrist experienced in testing children.

Measures of intellectual functioning. Standardized intelligence tests, such as the Wechsler Preschool and Primary Scale of Intelligence (WPPSI), the Wechsler Intelligence Scale for Children (WISC), the Revised Stanford-Binet Scale, and the McCarthey Scales of Children's Abilities, should be used wherever possible. Key data such as subtest scores should also be included in the report. Tests should be administered by a qualified and experienced psychologist or psychiatrist, and any discrepancies between formal test results and the child's customary behavior and daily activities should be duly noted and resolved.

Developmental milestone criteria. In the event that a child's young age and/or condition preclude formal testing by a psychologist or psychiatrist experienced in testing children, a comprehensive evaluation covering the full range of developmental activities should be performed. This should consist of a detailed account of the child's daily activities together with direct observations by a professional person; the latter should include indices or manifestations of social, intellectual, adaptive, verbal, motor (posture, locomotion, manipulation), language, emotional, and self-care development for age. The above should then be related by the evaluating or treating physician to established developmental norms of the kind found in any widely used standard pediatrics text.

c. *Profound combined mental-neurological-musculoskeletal impairments.* There are children with profound and irreversible brain damage resulting in total incapacitation. Such children may meet criteria in either neurological, musculoskeletal, and/or mental sections; they should be adjudicated under the criteria most completely substantiated by the medical evidence submitted. Frequently, the most appropriate criteria will be found under the mental impairment section.

112.01 Category of impairments, mental and emotional

112.02 *Chronic brain syndrome.* With arrest of developmental progression for at least six months or loss of previously acquired abilities.

112.03 *Psychosis of infancy and childhood.* Documented by psychiatric evaluation and supported, if necessary, by the results of appropriate standardized psychological tests and manifested by marked restriction in the performance of daily age-appropriate activities; constriction of age-appropriate interests; deficiency of age-appropriate self-care skills; and impaired ability to relate to others; together with persistence of one (or more) of the following:

A. Significant withdrawal or detachment; or

B. Impaired sense of reality; or

C. Bizarre behavior patterns; or

D. Strong need for maintenance of sameness, with intense anxiety, fear, or anger when change is introduced; or

E. Panic at threat of separation from parent.

112.04 *Functional nonpsychotic disorders.* Documented by psychiatric evaluation and supported, if necessary, by the results of appropriate standardized psychological tests and manifested by marked restriction in the performance of daily age-appropriate activities; construction of age-appropriate interests; deficiency of age-appropriate self-care skills; and impaired ability to relate to others; together with persistence of one (or more) of the following:

A. Psychophysiological disorder (e.g., diarrhea, asthma); or

B. Anxiety; or

C. Depression; or

D. Phobic, obsessive, or compulsive behavior; or

E. Hypochondriasis; or

F. Hysteria; or

G. Asocial or antisocial behavior.

112.05 *Mental retardation.*—A. Achievement of only those developmental milestones generally acquired by children no more than one-half the child's chronological age; or

B. IQ of 59 or less; or

C. IQ of 60–69, inclusive, and a physical or other mental impairment imposing additional and significant restriction of function or developmental progression.

113.00 Neoplastic Diseases Malignant

A. *Introduction.* Determination of disability in the growing and developing child with a malignant neoplastic disease is based upon the combined effects of:

1. The pathophysiology, histology, and natural history of the tumor; and

2. The effects of the currently employed aggressive multimodal therapeutic regimens.

Combinations of surgery, radiation, and chemotherapy or prolonged therapeutic

schedules impart significant additional morbidity to the child during the period of greatest risk from the tumor itself. This period of highest risk and greatest therapeutically-induced morbidity defines the limits of disability for most of childhood neoplastic disease.

B. *Documentation.* The diagnosis of neoplasm should be established on the basis of symptoms, signs, and laboratory findings. The site of the primary, recurrent, and metastatic lesion must be specified in all cases of malignant neoplastic diseases. If an operative procedure has been performed, the evidence should include a copy of the operative note and the report of the gross and microscopic examination of the surgical specimen, along with all pertinent laboratory and X-ray reports. The evidence should also include a recent report directed especially at describing whether there is evidence of local or regional recurrence, soft part or skeletal metastasis, and significant post-therapeutic residuals.

C. *Malignant solid tumors,* as listed under 113.03, include the histiocytosis syndromes except for solitary eosinophilic granuloma. Thus, 113.03 should not be used for evaluating brain tumors (see 111.05) or thyroid tumors, which must be evaluated on the basis of whether they are controlled by prescribed therapy.

D. *Duration of disability* from malignant neoplastic tumors is included in 113.02 and 113.03. Following the time periods designated in these sections, a documented diagnosis itself is no longer sufficient to establish a severe impairment. The severity of a remaining impairment must be evaluated on the basis of the medical evidence.

113.01 Category of Impairments, Neoplastic Diseases—Malignant

113.02 *Lymphoreticular malignant neoplasms.* Consider under a disability:

A. For 2½ years from the time initial diagnosis, or

B. For 2½ years from the time of recurrence of active disease.

113.03 *Malignant solid tumors.* Consider under a disability:

A. For 2 years from the time of initial diagnosis; or

B. For 2 years from the time of recurrence of active disease.

113.04 *Neuroblastoma.* With one of the following:

A. Extension across the midline; or

B. Distant metastasis; or

C. Recurrence; or

D. Onset at age 1 year or older.

113.05 *Retinoblastoma.* With one of the following:

A. Bilateral involvement; or

B. Metastases; or

C. Extension beyond the orbit; or

D. Recurrence.

APPENDIX 2—MEDICAL—VOCATIONAL GUIDELINES

Sec.

200.00 Introduction.
201.00 Maximum sustained work capability limited to sedentary work as a result of severe medically determinable impairment(s).
202.00 Maximum sustained work capability limited to light work as a result of severe medically determinable impairment(s).
203.00 Maximum sustained work capability limited to medium work as a result of severe medically determinable impairment(s).
204.00 Maximum sustained work capability limited to heavy work (or very heavy work) as a result of severe medically determinable impairment(s).

200.00 *Introduction.* (a) The following rules reflect the major functional and vocational patterns which are encountered in cases which cannot be evaluated on medical considerations alone, where an individual with a severe medically determinable physical or mental impairment(s) is not engaging in substantial gainful activity and the individual's impairment(s) prevents the performance of his or her vocationally relevant past work. They also reflect the analysis of the various vocational factors (i.e., age, education, and work experience) in combination with the individual's residual functional capacity (used to determine his or her maximum sustained work capability for sedentary, light, medium, heavy, or very heavy work) in evaluating the individual's ability to engage in substantial gainful activity in other than his or her vocationally relevant past work. Where the findings of fact made with respect to a particular individual's vocational factors and residual functional capacity coincide with all of the criteria of a particular rule, the rule directs a conclusion as to whether the individual is or is not disabled. However, each of these findings of fact is subject to rebuttal and the individual may present evidence to refute such findings. Where any one of the findings of fact does not coincide with the corresponding criterion of a rule, the rule does not apply in that particular case and, accordingly, does not direct a conclusion of disabled or not disabled. In any instance where a rule does not apply, full consideration must be given to all of the relevant facts of the case in accordance with the definitions and discussions of each factor in the appropriate sections of the regulations.

(b) The existence of jobs in the national economy is reflected in the "Decisions" shown in the rules; i.e., in promulgating the rules, administrative notice has been taken of the numbers of unskilled jobs that exist throughout the national economy at the various functional levels (sedentary, light, medium, heavy, and very heavy) as supported by the "Dictionary of Occupational Titles" and the "Occupational Outlook Handbook," published by the Department of Labor; the "County Business Patterns" and "Census Surveys" published by the Bureau of the Census; and occupational surveys of light and sedentary jobs prepared for the Social Security Administration by various State employment agencies. Thus, when all factors coincide with the criteria of a rule, the existence of such jobs is established. However, the existence of such jobs for individuals whose remaining functional capacity or other factors do not coincide with the criteria of a rule must be further considered in terms of what kinds of jobs or types of work may be either additionally indicated or precluded.

(c) In the application of the rules, the individual's residual functional capacity (i.e., the maximum degree to which the individual retains the capacity for sustained performance of the physical-mental requirements of jobs), age, education, and work experience must first be determined.

(d) The correct disability decision (i.e., on the issue of ability to engage in substantial gainful activity) is found by then locating the individual's specific vocational profile. If an individual's specific profile is not listed within this Appendix 2, a conclusion of disabled or not disabled is not directed. Thus, for example, an individual's ability to engage in substantial gainful work where his or her residual functional capacity falls between the ranges of work indicated in the rules (e.g., the individual who can perform more than light but less than medium work), is decided on the basis of the principles and definitions in the regulations, giving consideration to the rules for specific case situations in this Appendix 2. These rules represent various combinations of exertional capabilities, age, education and work experience and also provide an overall structure for evaluation of those cases in which the judgments as to each factor do not coincide with those of any specific rule. Thus, when the necessary judgments have been made as to each factor and it is found that no specific rule applies, the rules still provide guidance for decisionmaking, such as in cases involving combinations of impairments. For example, if strength limitations resulting from an individual's impairment(s) considered with the judgments made as to the individual's age, education and work experience correspond to (or closely approximate) the factors of a particular rule, the adjudicator then has a frame of reference for considering the jobs or types of work precluded by other, nonexertional impairments in terms of numbers of jobs remaining for a particular individual.

(e) Since the rules are predicated on an individual's having an impairment which manifests itself by limitations in meeting the strength requirements of jobs, they may not be fully applicable where the nature of an individual's impairment does not result in such limitations, e.g., certain mental, sensory, or skin impairments. In addition, some impairments may result solely in postural and manipulative limitations or environmental restrictions. Environmental restrictions are those restrictions which result in inability to tolerate some physical feature(s) of work settings that occur in certain industries or types of work, e.g., an inability to tolerate dust or fumes.

(1) In the evaluation of disability where the individual has solely a nonexertional type of impairment, determination as to whether disability exists shall be based on the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in this Appendix 2. The rules do not direct factual conclusions of disabled or not disabled for individuals with solely nonexertional types of impairments.

(2) However, where an individual has an impairment or combination of impairments resulting in both strength limitations and

V 45 AG 2080 UMI

nonexertional limitations, the rules in this subpart are considered in determining first whether a finding of disabled may be possible based on the strength limitations alone and, if not, the rule(s) reflecting the individual's maximum residual strength capabilities, age, education, and work experience provide a framework for consideration of how much the individual's work capability is further diminished in terms of any types of jobs that would be contraindicated by the nonexertional limitations. Also, in these combinations of nonexertional and exertional limitations which cannot be wholly determined under the rules in this Appendix 2, full consideration must be given to all of the relevant facts in the case in accordance with the definitions and discussions of each factor in the appropriate sections of the regulations, which will provide insight into the adjudicative weight to be accorded each factor.

201.00 *Maximum sustained work capability limited to sedentary work as a result of severe medically determinable impairment(s).* (a) Most sedentary occupations fall within the skilled, semi-skilled, professional, administrative, technical, clerical, and benchwork classifications. Approximately 200 separate unskilled sedentary occupations can be identified, each representing numerous jobs in the national economy. Approximately 85 percent of these jobs are in the machine trades and benchwork occupational categories. These jobs (unskilled sedentary occupations) may be performed after a short demonstration or within 30 days.

(b) These unskilled sedentary occupations are standard within the industries in which they exist. While sedentary work represents a significantly restricted range of work, this range in itself is not so prohibitively restricted as to negate work capability for substantial gainful activity.

(c) Vocational adjustment to sedentary work may be expected where the individual has special skills or experience relevant to sedentary work or where age and basic educational competences provide sufficient occupational mobility to adapt to the major segment of unskilled sedentary work. Inability to engage in substantial gainful activity would be indicated where an individual who is restricted to sedentary work because of a severe medically determinable impairment lacks special skills or experience relevant to sedentary work, lacks educational qualifications relevant to most sedentary work (e.g., has a limited education or less) and the individual's age, though not necessarily advanced, is a factor which significantly limits vocational adaptability.

(d) The adversity of functional restrictions to sedentary work at advanced age (55 and over) for individuals with no relevant past work or who can no longer perform vocationally relevant past work and have no transferable skills, warrants a finding of disabled in the the absence of the rare situation where the individual has recently completed education which provides a basis for direct entry into skilled sedentary work. Advanced age and a history of unskilled work or no work experience would ordinarily offset any vocational advantages that might accrue by reason of any remote past education, whether it is more or less than limited education.

(e) The presence of acquired skills that are readily transferable to a significant range of skilled work within an individual's residual functional capacity would ordinarily warrant a finding of ability to engage in substantial gainful activity regardless of the adversity of age, or whether the individual's formal education is commensurate with his or her demonstrated skill level. The acquisition of work skills demonstrates the ability to perform work at the level of complexity demonstrated by the skill level attained regardless of the individual's formal educational attainments.

(f) In order to find transferability of skills to skilled sedentary work for individuals who are of advanced age (55 and over), there must be very little, if any, vocational adjustment required in terms of tools, work processes, work settings, or the industry.

(g) Individuals approaching advanced age (age 50–54) may be significantly limited in vocational adaptability if they are restricted to sedentary work. When such individuals have no past work experience or can no longer perform vocationally relevant past work and have no transferable skills, a finding of disabled ordinarily obtains. However, recently completed education which provides for direct entry into sedentary work will preclude such a finding. For this age group, even a high school education or more (ordinarily completed in the remote past) would have little impact for effecting a vocational adjustment unless relevant work experience reflects use of such education.

(h) The term "younger individual" is used to denote an individual age 18 through 49. For those within this group who are age 45–49, age is a less positive factor than for those who are age 18–44. Accordingly, for such individuals: (1) who are restricted to sedentary work, (2) who are unskilled or have no transferable skills, (3) who have no relevant past work or who can no longer perform vocationally relevant past work, and (4) who are either illiterate or unable to communicate in the English language, a finding of disabled is warranted. On the other hand, age is a more positive factor for those who are under age 45 and is usually not a significant factor in limiting such an individual's ability to make a vocational adjustment, even an adjustment to unskilled sedentary work, and even where the individual is illiterate or unable to communicate in English. However, a finding of disabled is not precluded for those individuals under age 45 who do not meet all of the criteria of a specific rule and who do not have the ability to perform a full range of sedentary work. The following examples are illustrative: Example 1: An individual under age 45 with a high school education can no longer do past work and is restricted to unskilled sedentary jobs because of a severe medically determinable cardiovascular impairment (which does not meet or equal the listings in Appendix 1). A permanent injury of the right hand limits the individual to sedentary jobs which do not require bilateral manual dexterity. None of the rules in Appendix 2 are applicable to this particular set of facts, because this individual cannot perform the full range of work defined as sedentary. Since the inability to perform jobs requiring bilateral manual dexterity significantly compromises the only range of work for which the individual is otherwise qualified (i.e., sedentary), a finding of disabled would be appropriate. Example 2: An illiterate 41 year old individual with mild mental retardation (IQ of 78) is restricted to unskilled sedentary work and cannot perform vocationally relevant past work, which had consisted of unskilled agricultural field work; his or her particular characteristics do not specifically meet any of the rules in Appendix 2, because this individual cannot perform the full range of work defined as sedentary. In light of the adverse factors which further narrow the range of sedentary work for which this individual is qualified, a finding of disabled is appropriate.

(i) While illiteracy or the inability to communicate in English may significantly limit an individual's vocational scope, the primary work functions in the bulk of unskilled work relate to working with things (rather than with data or people) and in these work functions at the unskilled level, literacy or ability to communicate in English has the least significance. Similarly the lack of relevant work experience would have little significance since the bulk of unskilled jobs require no qualifying work experience. Thus, the functional capability for a full range of sedentary work represents sufficient numbers of jobs to indicate substantial vocational scope for those individuals age 18–44 even if they are illiterate or unable to communicate in English.

Table No. 1.—*Residual functional capacity: Maximum sustained work capability limited to sedentary work as a result of severe medically determinable impairment(s)*

Rule	Age	Education	Previous work experience	Decision
201.01	Advanced age	Limited or less	Unskilled or none	Disabled.
201.02	do	do	Skilled or semiskilled—skills not transferable [1].	Do.
201.03	do	do	Skilled or semiskilled—skills transferable [1].	Not disabled.
201.04	do	High school graduate or more—does not provide for direct entry into skilled work [2].	Unskilled or none	Disabled.
201.05	do	High school graduate or more—provides for direct entry into skilled work [2].	do	Not disabled.
201.06	do	High school graduate or more—does not provide for direct entry into skilled work [2].	Skilled or semiskilled—skills not transferable [1].	Disabled.
201.07	do	do	Skilled or semiskilled—skills transferable [1].	Not disabled.
201.08	do	High school graduate or more—provides for direct entry into skilled work [2].	Skilled or semiskilled—skills not transferable [1].	Do.
201.09	Closely approaching advanced age.	Limited or less	Unskilled or none	Disabled.
201.10	do	do	Skilled or semiskilled—skills not transferable.	Do.
201.11	do	do	Skilled or semiskilled—skills transferable.	Not disabled.
201.12	do	High school graduate or more—does not provide for direct entry into skilled work [2].	Unskilled or none	Disabled.
201.13	do	High school graduate or more—provides for direct entry into skilled work [2].	do	Not disabled.
201.14	do	High school graduate or more—does not provide for direct entry into skilled work [2].	Skilled or semiskilled—skills not transferable.	Disabled.
201.15	do	do	Skilled or semiskilled—skills transferable.	Not disabled.
201.16	do	High school graduate or more—provides for direct entry into skilled work [2].	Skilled or semiskilled—skills not transferable.	Do.
201.17	Younger individual age 45–49.	Illiterate or unable to communicate in English.	Unskilled or none	Disabled.
201.18	do	Limited or less—at least literate and able to communicate in English.	do	Not disabled.
201.19	do	Limited or less	Skilled or semiskilled—skills not transferable.	Do.
201.20	do	do	Skilled or semiskilled—skills transferable.	Do.
201.21	do	High school graduate or more...	Skilled or semiskilled—skills not transferable.	Do.
201.22	do	do	Skilled or semiskilled—skills transferable.	Do.
201.23	Younger individual age 18–44.	Illiterate or unable to communicate in English.	Unskilled or none	Do. [4]
201.24	do	Limited or less—at least literate and able to communicate in English.	do	Do. [4]
201.25	do	Limited or less	Skilled or semiskilled—skills not transferable.	Do. [4]
201.26	do	do	Skilled or semiskilled—skills transferable.	Do. [4]
201.27	do	High school graduate or more...	Unskilled or none	Do. [4]
201.28	do	do	Skilled or semiskilled—skills not transferable.	Do. [4]
201.29	do	do	Skilled or semiskilled—skills transferable.	Do. [4]

[4] See 201.00(h).

202.00 *Maximum sustained work capability limited to light work as a result of severe medically determinable impairment(s).* (a) The functional capacity to perform a full range of light work includes the functional capacity to perform sedentary as well as light work. Approximately 1,600 separate sedentary and light unskilled occupations can be identified in eight broad occupational categories, each occupation representing numerous jobs in the national economy. These jobs can be performed after a short demonstration or within 30 days, and do not require special skills or experience.

(b) The functional capacity to perform a wide or full range of light work represents substantial work capability compatible with making a work adjustment to substantial numbers of unskilled jobs and, thus, generally provides sufficient occupational mobility even for severely impaired individuals who are not of advanced age and have sufficient educational competences for unskilled work.

(c) However, for individuals of advanced age who can no longer perform vocationally relevant past work and who have a history of unskilled work experience, or who have only skills that are not readily transferable to a significant range of semi-skilled or skilled work that is within the individual's functional capacity, or who have no work experience, the limitations in vocational adaptability represented by functional restriction to light work warrant a finding of disabled. Ordinarily, even a high school education or more which was completed in the remote past will have little positive impact on effecting a vocational adjustment unless relevant work experience reflects use of such education.

(d) Where the same factors in paragraph (c) of this section regarding education and work experience are present, but where age, though not advanced, is a factor which significantly limits vocational adaptability (i.e., closely approaching advanced age, 50–54) and an individual's vocational scope is further significantly limited by illiteracy or inability to communicate in English, a finding of disabled is warranted.

(e) The presence of acquired skills that are readily transferable to a significant range of semi-skilled or skilled work within an individual's residual functional capacity would ordinarily warrant a finding of not disabled regardless of the adversity of age, or whether the individual's formal education is commensurate with his or her demonstrated skill level. The acquisition of work skills demonstrates the ability to perform work at the level of complexity demonstrated by the skill level attained regardless of the individual's formal educational attainments.

(f) For a finding of transferability of skills to light work for individuals of advanced age who are closely approaching retirement age (age 60–64), there must be very little, if any, vocational adjustment required in terms of tools, work processes, work settings, or the industry.

(g) While illiteracy or the inability to communicate in English may significantly limit an individual's vocational scope, the primary work functions in the bulk of unskilled work relate to working with things (rather than with data or people) and in these work functions at the unskilled level, literacy or ability to communicate in English has the least significance. Similarly, the lack of relevant work experience would have little significance since the bulk of unskilled jobs require no qualifying work experience. The capability for light work, which includes the ability to do sedentary work, represents the capability for substantial numbers of such jobs. This, in turn, represents substantial vocational scope for younger individuals (age 18–49) even if illiterate or unable to communicate in English.

Table No. 2.—*Residual functional capacity: Maximum sustained work capability limited to light work as a result of severe medically determinable impairment(s)*

Rule	Age	Education	Previous work experience	Decision
202.01	Advanced age	Limited or less	Unskilled or none	Disabled.
202.02	do	do	Skilled or semiskilled—skills not transferable.	Do.
202.03	do	do	Skilled or semiskilled—skills transferable [1].	Not disabled.
202.04	do	High school graduate or more—does not provide for direct entry into skilled work [2].	Unskilled or none	Disabled.
202.05	do	High school graduate or more—provides for direct entry into skilled work [2].	do	Not disabled.
202.06	do	High school graduate or more—does not provide for direct entry into skilled work [2].	Skilled or semiskilled—skills not transferable.	Disabled.

[1] See 202.00(f).
[2] See 202.00(c).

203.00 *Maximum sustained work capability limited to medium work as a result of severe medically determinable impairment(s).* (a) The functional capacity to perform medium work includes the functional capacity to perform sedentary, light, and medium work. Approximately 2,500 separate sedentary, light, and medium occupations can be identified, each occupation representing numerous jobs in the national economy which do not require skills or previous experience and which can be performed after a short demonstration or within 30 days.

(b) The functional capacity to perform medium work represents such substantial work capability at even the unskilled level that a finding of disabled is ordinarily not warranted in cases where a severely impaired individual retains the functional capacity to perform medium work. Even the adversity of advanced age (55 or over) and a work history of unskilled work may be offset by the substantial work capability represented by the functional capacity to perform medium work. However, an individual with a marginal education and long work experience (i.e., 35 years or more) limited to the performance of arduous unskilled labor, who is not working and is no longer able to perform this labor because of a severe impairment(s), may still be found disabled even though the individual is able to do medium work.

(c) However, the absence of any relevant work experience becomes a more significant adversity for individuals of advanced age (55 and over). Accordingly, this factor, in combination with a limited education or less, militates against making a vocational adjustment to even this substantial range of work and a finding of disabled is appropriate. Further, for individuals closely approaching retirement age (60–64) with a work history of unskilled work and with marginal education or less, a finding of disabled is appropriate.

Table No. 3.—*Residual functional capacity: Maximum sustained work capability limited to medium work as a result of severe medically determinable impairment(s)*

Rule	Age	Education	Previous work experience	Decision
203.01	Closely approaching retirement age.	Marginal or none	Unskilled or none	Disabled.
203.02	...do	Limited or less	None	Do.
203.03	...do	Limited	Unskilled	Not disabled.
203.04	...do	Limited or less	Skilled or semiskilled—skills not transferable.	Do.

204.00 *Maximum sustained work capability limited to heavy work (or very heavy work) as a result of severe medically determinable impairment(s).* The residual functional capacity to perform heavy work or very heavy work includes the functional capability for work at the lesser functional levels as well, and represents substantial work capability for jobs in the national economy at all skill and physical demand levels. Individuals who retain the functional capacity to perform heavy work (or very heavy work) ordinarily will not have a severe impairment or will be able to do their past work—either of which would have already provided a basis for a decision of "not disabled". Environmental restrictions ordinarily would not significantly affect the range of work existing in the national economy for individuals with the physical capability for heavy work (or very heavy work). Thus an impairment which does not preclude heavy work (or very heavy work) would not ordinarily be the primary reason for unemployment, and generally is sufficient for a finding of not disabled, even though age, education, and skill level of prior work experience may be considered adverse.

Table No. 3.—*Residual functional capacity: Maximum sustained work capability limited to medium work as a result of severe medically determinable impairment(s)—Continued*

203.31	...do	High school graduate or more—provides for direct entry into skilled work.	Skilled or semiskilled—skills not transferable.	Do.

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND AND DISABLED

2. Subpart I of Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is revised to read as follows:

Subpart I—Determining Disability and Blindness

General

Sec.
416.901 Scope of subpart.
416.902 General definition and terms for this subpart.

Determinations

416.903 Who makes disability and blindness determinations.
416.904 Determinations by other organizations and agencies.

Definition of Disability

416.905 Basic definition of disability.
416.906 Disability for children under age 18.
416.907 Disability under a State plan.
416.908 What is needed to show an impairment.
416.909 How long the impairment must last.
416.910 Meaning of substantial gainful activity.

Evidence

416.912 Your responsibility to submit evidence.
416.913 Medical evidence of your impairment.
416.914 When we will purchase existing evidence.
416.915 Where and how to submit evidence.
416.916 If you fail to submit medical and other evidence.
416.917 Consultative examination at our expense.
416.918 If you do not appear at a consultative examination.

Evaluation of Disability

416.920 Evaluation of disability in general.
416.921 What we mean by an impairment that is not severe.
416.922 When you have two or more unrelated impairments—initial claims.
416.923 How we determine disability for a child under age 18.

Medical Considerations

416.925 Listing of impairments in Appendix 1 of subpart P of Part 404 of this chapter.
416.926 Medical equivalence.
416.927 Conclusion by physicians concerning your disability or blindness.
416.928 Symptoms, signs, and laboratory findings.
416.929 How we evaluate symptoms, including pain.
416.930 Need to follow prescribed treatment.

Presumptive Disability and Blindness

416.931 The meaning of presumptive disability or presumptive blindness.
416.932 When presumptive payments begin and end.
416.933 How we make a finding of presumptive disability or presumptive blindness.
416.934 Impairments which may warrant a finding of presumptive disability or presumptive blindness.

Drug Addiction and Alcoholism

416.935 Medically determined drug addicts and alcoholics.
416.936 Treatment required for medically determined drug addicts and alcoholics.
416.937 What we mean by appropriate treatment.
416.938 What we mean by approved institutions or facilities.
416.939 How we consider whether treatment is available.

Residual Functional Capacity

416.945 Your residual functional capacity.
416.946 Responsibility for assessing and determining residual functional capacity.

Vocational Considerations

416.960 When your vocational background will be considered.
416.961 Your ability to do work depends upon your residual functional capacity.
416.962 If you have done only arduous unskilled physical labor.
416.963 Your age as a vocational factor.
416.964 Your education as a vocational factor.
416.965 Your work experience as a vocational factor.
416.966 Work which exists in the national economy.
416.967 Physical exertion requirements.
416.968 Skill requirements.
416.969 Listing of Medical—Vocational Guidelines in Appendix 2 of subpart P of Part 404 of this chapter.

Substantial Gainful Activity

416.971 General.
416.972 What we mean by substantial gainful activity.
416.973 General information about work activity.
416.974 Evaluation guides if you are an employee.
416.975 Evaluation guides if you are self-

(d) Our general rules on evaluating

agency about whether you are disabled

be shown by medically acceptable

416.975 Evaluation guides if you are self-employed.

Blindness

416.981 Meaning of blindness as defined in the law.
416.982 Blindness under a State plan.
416.983 How we evaluate statutory blindness.
416.984 If you are statutorily blind and still working.
416.985 How we evaluate other visual impairments.
416.986 Why and when we will find that your statutory blindness has ended.

Continuing or Stopping Disability or Blindness

416.988 Your responsibility to tell us of events that may change your disability or blindness status.
416.989 We may investigate to find out whether you continue to be disabled.
416.990 When we will investigate whether your disability continues.
416.991 If your medical recovery was expected and you returned to work.
416.992 The trial work period.
416.993 We may ask you to help us determine if you are still disabled or blind.
416.994 Why and when we will find that your disability has ended.
416.996 If you become disabled by another impairment.

Authority: Issued under Secs. 1102, 1614, and 1631 of the Social Security Act; 49 Stat. 647, as amended, 86 Stat. 1471, as amended by 88 Stat. 52, 86 Stat. 1475; 42 U.S.C. 1302, 1382c, and 1383.

Subpart I—Determining Disability and Blindness

General

§ 416.901 Scope of subpart.

In order for you to become entitled to any benefits based upon disability or blindness you must be disabled or blind as defined in title XVI of the Social Security Act. This Subpart explains how we determine whether you are disabled or blind. We have organized the rules in the following way.

(a) We define general terms, then discuss who makes our disability or blindness determinations and state that disability and blindness determinations made under other programs are not binding on our determinations.

(b) We explain the term "disability" and note some of the major factors that are considered in determining whether you are disabled in §§ 416.905–416.910.

(c) Sections 416.912–416.918 contain our rules on evidence. We explain your responsibilities for submitting evidence of your impairment, state what we consider to be acceptable sources of medical evidence, and describe what information should be included in medical reports.

(d) Our general rules on evaluating disability are stated in §§ 416.920–416.923. We describe the steps that we go through and the order in which they are considered.

(e) Our rules on medical considerations are found in §§ 416.925–416.930. We explain in these rules—

(1) The purpose and use of the Listing of Impairments found in Appendix 1 of subpart P of Part 404 of this chapter;

(2) What we mean by the term "medical equivalence" and how we determine medical equivalence;

(3) The effect of a conclusion by your physician that you are disabled;

(4) What we mean by symptoms, signs, and laboratory findings;

(5) How we evaluate pain and other symptoms; and

(6) The effect on your benefits if you fail to follow treatment that is expected to restore your ability to work, and how we apply the rule.

(f) In §§ 416.931–416.934 we explain that we may make payments on the basis of presumptive disability or presumptive blindness.

(g) In §§ 416.935–416.939 we explain the rules which apply in cases of drug addiction and alcoholism.

(h) In §§ 416.945–416.946 we explain what we mean by the term "residual functional capacity," state when an assessment of residual functional capacity is required, and who may make it.

(i) Our rules on vocational considerations are found in §§ 416.960–416.969. We explain when vocational factors must be considered along with the medical evidence, discuss the role of residual functional capacity in evaluating your ability to work, discuss the vocational factors of age, education, and work experience, describe what we mean by work which exists in the national economy, discuss the amount of exertion and the type of skill required for work, and describe how the Guidelines in Appendix 2 of subpart P of Part 404 of this chapter apply to claims under Part 416.

(j) Our rules on substantial gainful activity are found in §§ 416.971–416.974. These explain what we mean by substantial gainful activity and how we evaluate your work activity.

(k) In §§ 416.981–416.985 we discuss blindness.

(l) Our rules on when disability or blindness continues and stops are contained in §§ 416.988–416.998. We explain what your responsibilities are in telling us of any events that may cause a change in your disability or blindness status, when you may have a trial work period, and when we will investigate to see if you are still disabled.

§ 416.902 General definitions and terms for this subpart.

As used in this subpart—"Secretary" means the Secretary of Health and Human Services.

"State agency" means an agency of a State which enters into an agreement with the Secretary to make determinations of disability or blindness for the Secretary.

"We" or "us" refers to either the Social Security Administration or the State agency making the disability or blindness determination.

"You" refers to the person who has applied for or is receiving benefits based on disability or blindness.

Determinations

§ 416.903 Who makes disability and blindness determinations.

(a) *State agencies.* When there is an agreement between the State and the Secretary, the State agency designated in the agreement makes disability and blindness determinations for the Secretary for—

(1) Any person living in that State; and

(2) Any group of people named in the agreement.

(b) *Social Security Administration.* The Social Security Administration will make disability and blindness determinations for the Secretary for—

(1) Any person in any State that has not entered into an agreement with the Secretary;

(2) Any group of people not covered by an agreement with any State.

(c) *What determinations are authorized.* The Secretary has authorized the State agencies and the Social Security Administration to make determinations about—

(1) Whether you are disabled or blind;

(2) The date your disability or blindness began; and

(3) The date your disability or blindness stopped.

(d) *Review of State Agency determinations.* On review of a State agency determination or redetermination of disability or blindness we may find that—

(1) You are, or are not, disabled or blind, regardless of what the State agency found;

(2) Your disability or blindness began earlier or later than the date found by the State agency; and

(3) Your disability or blindness stopped earlier or later than the date found by the State agency.

§ 416.904 Determinations by other organizations and agencies.

A decision by any nongovernmental agency or any other governmental agency about whether you are disabled or blind is based on its rules and is not our decision about whether you are disabled or blind. We must make a disability or blindness determinations based on social security law. Therefore, a determination made by another agency that you are disabled or blind is not binding on us.

Definition of Disability

§ 416.905 Basic definition of disability.

(a) The law defines disability as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. To meet this definition, you must have a severe impairment, which makes you unable to do your previous work or any other substantial gainful activity which exists in the national economy. To determine whether you are able to do any other work, we consider your residual functional capacity and your age, education, and work experience.

(b) There are different rules for determining disability for individuals who are statutorily blind. We discuss these in §§ 416.981 through 416.985.

§ 416.906 Disability for children under age 18.

If you are under age 18, we will consider you disabled if you are suffering from any medically determinable physical or mental impairment which compares in severity to an impairment that would make an adult (a person over age 18) disabled.

§ 416.907 Disability under a State plan.

You will also be considered disabled for payment of supplemental security income benefits if—

(a) You were found to be permanently and totally disabled as defined under a State plan approved under titles XIV or XVI of the Social Security Act, as in effect for October 1972;

(b) You received aid under the State plan because of your disability for the month of December 1973 and for at least one month before July 1973; and

(c) You continue to be disabled as defined under the State plan.

§ 416.908 What is needed to show an impairment.

If you are not doing substantial gainful activity, we always look first at your physical or mental impairment(s) to determine whether you are disabled or blind. Your impairment must result from anatomical, physiological, or psychological abnormalities which can be shown by medically acceptable clinical and laboratory diagnostic techniques. A physical or mental impairment must be established by medical evidence consisting of signs, symptoms, and laboratory findings, not only by your statement of symptoms. (See § 416.928 for further information about what we mean by symptoms, signs, and laboratory findings.)

§ 416.909 How long the impairment must last.

Unless your impairment is expected to result in death, it must have lasted or must be expected to last for a continuous period of at least 12 months. We call this the duration requirement.

§ 416.910 Meaning of substantial gainful activity.

Substantial gainful activity means work that—(a) Involves doing significant and productive physical or mental duties; and

(b) Is done (or intended) for pay or profit.

(See § 416.972 for further details about what we mean by substantial gainful activity.)

Evidence

§ 416.912 Your responsibility to submit evidence.

(a) *General.* In general, you have to prove to us that you are blind or disabled. Therefore, you must bring to our attention everything which shows that you are blind or disabled. In making a decision we will consider all information we get from you and others about your impairments.

(b) *Kind of evidence.* You must provide medical evidence showing that you have an impairment and how severe it is during the time you say that you are disabled. We will consider only impairments you say you have or about which we receive evidence. We will help you in getting medical reports when you give us permission to request them from your doctors and other medical sources. If we ask, you must also provide evidence about your—

(1) Age;

(2) Education and training;

(3) Work experience;

(4) Daily activities both before and after the date you say that you became disabled;

(5) Efforts to work; and

(6) Any other evidence showing how your impairment(s) affects your ability to work. (In §§ 416.960 through 416.969 we discuss in more detail the evidence we need when we consider vocational factors.)

§ 416.913 Medical evidence of your impairment.

(a) *Acceptable sources.* We need reports about your impairments from acceptable medical sources. Acceptable medical sources are—

(1) Licensed physicians;

(2) Licensed osteopaths;

(3) Licensed or certified psychologists;

(4) Licensed optometrists for the measurement of visual acuity and visual fields (see paragraph (f) of this section for the evidence needed for statutory blindness); and

(5) Persons authorized to send us a copy or summary of the medical records of a hospital, clinic, sanitorium, medical institution, or health care facility. Generally, the copy or summary should be certified as accurate by the custodian or by any authorized employee of the Social Security Administration, Veterans' Administration, or State agency. However, we will not return an uncertified copy or summary for certification unless there is some question about the document.

(b) *Medical reports.* Medical reports should include—

(1) Medical history;

(2) Clinical findings (such as the results of physical or mental status examinations);

(3) Laboratory findings (such as blood pressure, x-rays);

(4) Diagnosis (statement of disease or injury based on its signs and symptoms);

(5) Treatment prescribed with response, and prognosis; and

(6) Medical assessment (except in statutory blindness claims).

(c) *Medical assessment.* The medical assessment should describe—

(1) Your ability to do work-related activities such as sitting, standing, moving about, lifting, carring, handling objects, hearing, speaking, and traveling; and

(2) In cases of mental impairment, your ability to reason or make occupational, personal, or social adjustments.

(d) *Completeness.* The medical evidence, including the clinical and laboratory findings, must be complete and detailed enough to allow us to make a determination about whether you are disabled or blind. It must allow us to determine—

(1) The nature and limiting effects of your impairment(s) for any period in question;

(2) The probable duration of your impairment; and

(3) Your residual functional capacity to do work-related physical and mental activities.

(e) *Information from other sources.* Information from other sources may also

help us to understand how your impairment affects your ability to work. Other sources include—

(1) Public and private social welfare agencies;

(2) Observations by non-medical sources; and

(3) Other practitioners (for example, naturopaths, chiropractors, audiologists, etc.).

(f) *Evidence we need to establish statutory blindness.* If you are applying for benefits on the basis of statutory blindness, we will require an examination by a physician skilled in diseases of the eye or by an optometrist, whichever you may select.

§ 416.914 When we will purchase existing evidence.

We need specific medical evidence to determine whether you are disabled or blind. We will pay for the medical evidence we request, if there is a charge. We will also be responsible for the cost of medical evidence we ask you to get.

§ 416.915 Where and how to submit evidence.

You may give us evidence about your impairment at any of our offices or at the office of any State agency authorized to make disability or blindness determinations. You may also give evidence to one of our employees authorized to accept evidence at another place. For more information about this, see Subpart C of this Part.

§ 416.916 If you fail to submit medical and other evidence.

You must cooperate in furnishing us with available medical evidence about your impairment(s). When you fail to cooperate with us in obtaining evidence, we will have to make a decision based on information available in your case. We will not excuse you from giving us evidence because you have religious or personal reasons against medical examinations, tests, or treatment.

§ 416.917 Consultative examination at our expense.

(a) *Notice of the examination.* If your medical sources cannot give us sufficient medical evidence about your impairment for us to determine whether you are disabled or blind, we may ask you to take part in physical or mental examinations or tests. We will pay for these examinations. However, we will not pay for any medical examination arranged by you or your representative without being asked by us. We will give you reasonable notice of the date, time, and place of the examination or test, and the name of the person who will do it. We will also give the examiner any necessary background information about your condition when your own physician will not be doing the examination or test.

(b) *Reasons why we may need evidence.* We may need more medical evidence—

(1) To obtain more detailed medical findings about your impairment(s);

(2) To obtain technical or specialized medical information;

(3) To resolve conflicts or differences in medical findings or assessments in the evidence we already have.

§ 416.918 If you do not appear at a consultative examination.

(a) *General.* If you are applying for benefits and do not have a good reason for failing or refusing to take part in a consultative examination or test which we arrange for you to get information we need to determine your disability or blindness, we may find that you are not disabled or blind. If you are already receiving benefits and do not have a good reason for failing or refusing to take part in a consultative examination or test which we arranged for you, we may determine that your disability or blindness has stopped because of your failure or refusal. Therefore, if you have any reason why you cannot go for the scheduled appointment, you should tell us about this as soon as possible before the examination date. If you have a good reason, we will schedule another examination.

(b) *Examples of good reasons for failure to appear.* Some examples of what we consider good reasons for not going to a scheduled examination include—

(1) Illness on the date of the scheduled examination or test;

(2) Not receiving timely notice of the scheduled examination or test, or receiving no notice at all;

(3) Being furnished incorrect or incomplete information, or being given incorrect information about the physician involved or the time or place of the examination or test, or;

(4) Having had death or serious illness occur in your immediate family.

(c) *Objections by your physician.* If any of your treating physicians tell you that you should not take the examination or test, you should tell us at once. In many cases, we may be able to get the information we need in another way. Your physician may agree to another type of examination for the same purpose.

Evaluation of Disability

§ 416.920 Evaluation of disability in general.

(a) *Steps in evaluating disability.* We consider all material facts to determine whether you are disabled. If you are doing substantial gainful activity, we will determine that you are not disabled. If you are not doing substantial gainful activity, we will first consider your physical or mental impairment(s). Your impairment must be severe and meet the duration requirement before we can find you to be disabled. We follow a set order to determine whether you are disabled. We review any current work activity, the severity of your impairment(s), your residual functional capacity and your age, education, and work experience. If we can find that you are disabled or not disabled at any point in the review, we do not review further.

(b) *If you are working.* If you are working and the work you are doing is substantial gainful activity, we will find that you are not disabled regardless of your medical condition or your age, education, and work experience.

(c) *You must have a severe impairment.* If you do not have any impairment(s) which significantly limits your physical or mental ability to do basic work activities, we will find that you do not have a severe impairment and are, therefore, not disabled. We will not consider your age, education, and work experience.

(d) *When your impairment meets or equals a listed impairment in Appendix 1.* If you have an impairment which meets the duration requirement and is listed in Appendix 1 of subpart P of Part 404 of this chapter, or is equal to a listed impairment, we will find you disabled without considering your age, education, and work experience.

(e) *Your impairment must prevent you from doing past relevant work.* If we cannot make a decision based on your current work activity or on medical facts alone, and you have a severe impairment, we then review your residual functional capacity and the physical and mental demands of the work you have done in the past. If you can still do this kind of work, we will find that you are not disabled.

(f) *Your impairment must prevent you from doing any other work.* (1) If you cannot do any work you have done in the past because you have a severe impairment, we will consider your residual functional capacity and your age, education, and past work experience to see if you can do other work. If you cannot, we will find you disabled.

(2) If you have only a marginal education, and long work experience (i.e., 35 years or more) where you only did arduous unskilled physical labor, and you can no longer do this kind of work, we use a different rule (see § 416.962).

§ 416.921 What we mean by an impairment that is not severe.

(a) *Non-severe impairment.* An impairment is not severe if it does not significantly limit your physical or mental abilities to do basic work activities.

(b) *Basic work activities.* When we talk about basic work activities, we mean the abilities and aptitude necessary to do most jobs. Examples of these include—

(1) Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;

(2) Capacities for seeing, hearing, and speaking;

(3) Understanding, carrying out, and remembering simple instructions;

(4) Use of judgment;

(5) Responding appropriately to supervision, co-workers and usual work situations; and

(6) Dealing with changes in a routine work setting.

§ 416.922 When you have two or more unrelated impairments—initial claims.

We cannot combine two or more unrelated severe impairments to meet the 12-month duration test. If you have a severe impairment(s) and then develop another unrelated severe impairment(s) but neither one is expected to last for 12 months, we cannot find you disabled, even though the two impairments in combination last for 12 months. However, we can combine unrelated impairments to see if together they are severe enough to keep you from doing substantial gainful activity. We will consider the combined effects of unrelated impairments only if all are severe and expected to last 12 months.

§ 416.923 How we determine disability for a child under age 18.

We will find that a child under age 18 is disabled if he or she—(a) Is not doing any substantial gainful activity; and

(b) Has a medically determinable physical or mental impairment(s) which compares in severity to any impairment(s) which would make an adult (a person age 18 or over) disabled. This requirement will be met when the impairment(s)—

(1) Meets the duration requirement; and

(2) Is listed in Appendix 1 of subpart P of Part 404 of this chapter; or

(3) Is determined by us to be medically equal to an impairment listed in Appendix 1 of subpart P of Part 404 of this chapter.

Medical Considerations

§ 416.925 Listing of Impairments in Appendix 1 of subpart P of Part 404 of this chapter.

(a) *Purpose of the Listing of Impairments.* The Listing of Impairments describes, for each of the major body systems, impairments which are considered severe enough to prevent a person from doing any gainful activity. Most of the listed impairments are permanent or expected to result in death, or a specific statement of duration is made. For all others, the evidence must show that the impairment has lasted or is expected to last for a continuous period of at least 12 months.

(b) *Adult and childhood diseases.* The Listing of Impairments consists of two parts:

(1) *Part A* contains medical criteria that apply to adult persons age 18 and over. The medical criteria in Part A may also be applied in evaluating impairments in persons under age 18 if the disease processes have a similar effect on adults and younger persons.

(2) *Part B* contains additional medical criteria that apply only to the evaluation of impairments of persons under age 18. Certain criteria in Part A do not give appropriate consideration to the particular effects of the disease processes in childhood; i.e., when the disease process is generally found only in children or when the disease process differs in its effect on children than on adults. Additional criteria are included in Part B, and the impairment categories are, to the extent possible, numbered to maintain a relationship with their counterparts in Part A. In evaluating disability for a person under age 18, Part B will be used first. If the medical criteria in Part B do not apply, then the medical criteria in Part A will be used.

(c) *How to use the Listing of Impairments.* Each section of the Listing of Impairments has a general introduction containing definitions of key concepts used in that section. Certain specific medical findings, some of which are required in establishing a diagnosis or in confirming the existence of an impairment for the purpose of this Listing, are also given in the narrative introduction. If the medical findings needed to support a diagnosis are not given in the introduction or elsewhere in the listing, the diagnosis must still be established on the basis of medically acceptable clinical and laboratory diagnostic techniques. Following the introduction in each section, the required level of severity of impairment is shown under "Category of Impairments" by one or more sets of medical findings. The medical findings consist of symptoms, signs, and laboratory findings.

(d) *Diagnoses of impairments.* We will not consider your impairment to be one listed in Appendix 1 of subpart P of Part 404 of this chapter solely because it has the diagnosis of a listed impairment. It must also have the findings shown in the Listing for that impairment.

(e) *Addiction to alcohol or drugs.* If you have a condition diagnosed as addiction to alcohol or drugs, this will not, by itself, be a basis for determining whether you are, or are not, disabled. As with any other medical condition, we will decide whether you are disabled based on symptoms, signs, and laboratory findings.

§ 416.926 Medical equivalence.

(a) *How medical equivalence is determined.* We will decide that your impairment(s) is medically equivalent to a listed impairment in Appendix 1 of subpart P of Part 404 of this chapter if the medical findings are at least equal in severity and duration to the listed findings. We will compare the symptoms, signs, and laboratory findings about your impairment(s), as shown in the medical evidence we have about your claim, with the medical criteria shown with the listed impairment. If your impairment is not listed, we will consider the listed impairment most like your impairment to decide whether your impairment is medically equal. If you have more than one impairment, and none of them meets or equals a listed impairment, we will review the symptoms, signs, and laboratory findings about your impairments to determine whether the combination of your impairments is medically equal to any listed impairment.

(b) *Medical equivalence must be based on medical findings.* We will always base our decision about whether your impairment(s) is medically equal to a listed impairment on medical evidence only. Any medical findings in the evidence must be supported by medically acceptable clinical and laboratory diagnostic techniques. We will also consider the medical opinion given by one or more physicians designated by the Secretary in deciding medical equivalence.

(c) *Who is a designated physician.* A physician designated by the Secretary includes any physician employed or engaged to make medical judgments by the Social Security Administration, the Railroad Retirement board, or a State agency authorized to make disability determinations.

V 45 A G 2 0 8 0 UMI

§ 416.927 Conclusion by physicians concerning your disability or blindness.

We are responsible for determining whether you are disabled or blind. Therefore, a statement by your physician that you are "disabled" or "blind" or "unable to work" does not mean that we will determine that you are disabled or blind. We have to review the medical findings and other evidence that support a physician's statement that you are "disabled" or "blind".

§ 416.928 Symptoms, signs, and laboratory findings.

Medical findings consist of symptoms, signs, and laboratory findings:

(a) *Symptoms* are your own description of your physical or mental impairment. Your statements alone are not enough to establish that there is a physical or mental impairment.

(b) *Signs* are anatomical, physiological, or psychological abnormalities which can be observed, apart from your statements (symptoms). Signs must be shown by medically acceptable clinical diagnostic techniques. Psychiatric signs are medically demonstrable phenomena which indicate specific abnormalities of behavior, affect, thought, memory, orientation and contact with reality. They must also be shown by observable facts that can be medically described and evaluated.

(c) *Laboratory findings* are anatomical, physiological, or psychological phenomena which can be shown by the use of (a) medically acceptable laboratory diagnostic techniques. Some of these diagnostic techniques include chemical tests, electrophysiological studies (electrocardiogram, electroencephalogram, etc.), roentgenological studies (X-rays), and psychological tests.

§ 416.929 How we evaluate symptoms, including pain.

If you have a physical or mental impairment, you may have symptoms (like pain, shortness of breath, weakness or nervousness). We consider all your symptoms, including pain, and the extent to which signs and laboratory findings confirm these symptoms. The effects of all symptoms, including severe and prolonged pain, must be evaluated on the basis of a medically determinable impairment which can be shown to be the cause of the symptom. We will never find that you are disabled based on your symptoms, including pain, unless medical signs or findings show that there is a medical condition that could be reasonably expected to produce these symptoms.

§ 416.930 Need to follow prescribed treatment.

(a) *What treatment you must follow.* In order to get benefits, you must follow treatment prescribed by your physician if this treatment can restore your ability to work.

(b) *When you do not follow prescribed treatment.* If you do not follow the prescribed treatment without a good reason, we will not find you disabled or blind or, if you are already receiving benefits, we will stop paying you benefits.

(c) *Acceptable reasons for failure to follow prescribed treatment.* The following are examples of a good reason for not following treatment:

(1) The specific medical treatment is contrary to the established teaching and tenets of your religion.

(2) The prescribed treatment would be cataract surgery for one eye when there is an impairment of the other eye resulting in a severe loss of vision and is not subject to improvement through treatment.

(3) Surgery was previously performed with unsuccessful results and the same surgery is again being recommended for the same impairment.

(4) The treatment because of its enormity (e.g. open heart surgery), unusual nature (e.g., organ transplant), or other reason is very risky for you; or

(5) The treatment involves amputation of an extremity, or a major part of an extremity.

Presumptive Disability and Blindness

§ 416.931 The meaning of presumptive disability or presumptive blindness.

If you are applying for supplemental security income benefits on the basis of disability or blindness, we may pay you benefits before we make a formal finding of whether or not you are disabled or blind. In order to receive these payments, we must find that you are presumptively disabled or presumptively blind. You must also meet all other eligibility requirements for supplemental security income benefits. We may make these payments to you for a period not longer than 3 months. These payments will not be considered overpayments if we later find that you are not disabled or blind.

§ 416.932 When presumptive payments begin and end.

We may make payments to you on the basis of presumptive disability or presumptive blindness before we make a formal determination about your disability or blindness. The payments can not be made for more than 3 months. They start for a period of not more than 3 months beginning in the month we make the presumptive disability or presumptive blindness finding. The payments end the earliest of—

(a) The month in which we make a formal finding on whether or not you are disabled or blind;

(b) The month in which we make the third monthly payment based on presumptive disability or presumptive blindness to you; or

(c) The month in which you no longer meet one of the other eligibility requirements (e.g., your income exceeds the limits).

§ 416.933 How we make a finding of presumptive disability or presumptive blindness.

We may make a finding of presumptive disability or presumptive blindness if the evidence available at the time of the presumptive disability or presumptive blindness decision, reflects a high degree of probability that you are disabled or blind. In the case of readily observable severe impairments (e.g., amputation of extremities, total blindness), we will find that you are disabled or blind without medical evidence. In all other cases, a finding of disability or blindness must be based on medical evidence or other information which, though not sufficient for a formal determination of disability or blindness, is sufficient for disability evaluators to find that there is a high degree of probability that you are disabled or blind.

§ 416.934 Impairments which may warrant a finding of presumptive disability or presumptive blindness.

We may make findings of presumptive disability and presumptive blindness in 10 specific impairment categories without obtaining any medical evidence. These specific impairment categories are—

(a) Amputation of two limbs;

(b) Amputation of a leg at the hip;

(c) Allegation of total deafness;

(d) Allegation of total blindness;

(e) Allegation of bed confinement or immobility without a wheelchair, walker, or crutches, due to a longstanding condition, excluding recent accident and recent surgery;

(f) Allegation of a stroke (cerebral vascular accident) more than 3 months in the past and continued marked difficulty in walking or using a hand or arm;

(g) Allegation of cerebral palsy, muscular dystrophy or muscle atrophy and marked difficulty in walking (e.g., use of braces), speaking or coordination of the hands or arms.

(h) Allegation of diabetes with amputation of a foot;

(i) Allegation of Down's syndrome (Mongolism); and

(j) Allegation of severe mental deficiency made by another individual filing on behalf of a claimant who is at least 7 years of age. For example, a mother filing for benefits for her child states that the child attends (or attended) a special school, or special classes in school, because of mental deficiency or is unable to attend any type of school (or if beyond school age, was unable to attend), and requires care and supervision of routine daily activities.

Drug Addiction and Alcoholism

§ 416.935 Medically determined drug addicts and alcoholics.

(a) We will find that you are a medically determined drug addict or alcoholic if we determine you are disabled and we find that your drug addiction or alcoholism is a contributing factor material to the finding of your disability.

(b) You will not be medically determined to be a drug addict or alcoholic if—

(1) We find that you are disabled independent of drug addiction or alcoholism; or

(2) We find that you are eligible for benefits because of your age or blindness.

§ 416.936 Treatment required for medically determined drug addicts and alcoholics.

If you are medically determined by us to be a drug addict or alcoholic you must take appropriate treatment for your condition as a drug addict or alcoholic at an approved institution or facility, when this treatment is available. You are not expected to pay for this treatment. You will not be eligible for benefits for any month in which—

(a) You do not comply with the terms, conditions and requirements of the treatment; or

(b) You do not take the treatment when available to you.

§ 416.937 What we mean by appropriate treatment.

By appropriate treatment, we mean recognized medical or other professional procedures for treatment of drug addiction or alcoholism which is carried out at or under the supervision of, an approved institution or facility (or facilities). This treatment may include—

(a) Medical examination and treatment;

(b) Psychiatric, psychological and vocational counselling; or

(c) Other appropriate services for drug addiction or alcoholism.

§ 416.938 What we mean by approved institutions or facilities.

Institutions or facilities that may be approved by the Secretary include—

(a) An institution or facility that furnishes medically recognized treatment for drug addiction or alcoholism in conformity with applicable Federal and State laws and regulations;

(b) An institution or facility accepted by a State for treatment of drug addicts or alcoholics when treatment was a requirement for eligibility for aid under the State plan in effect before the supplemental security income program; or

(c) An institution or facility used by or licensed by an appropriate State agency which is authorized to refer persons for treatment of drug addiction or alcoholism.

§ 416.939 How we consider whether treatment is available.

Our determination about whether treatment is available to you for your drug addiction or your alcoholism will depend upon—

(a) The existence of an obtainable treatment vacancy for you in an approved institution or facility;

(b) The location of the approved institution or facility, or the place where treatment, services or resources will be provided to you;

(c) The availability and cost of transportation for you to the place of treatment;

(d) Your general health, including your ability to travel and capacity to understand and follow the prescribed treatment;

(e) Your particular condition and circumstances; and

(f) The treatment that is required for your drug addiction or alcoholism.

Residual Functional Capacity

§ 416.945 Your residual functional capacity.

(a) *General.* Your impairments may cause physical and mental limitations that affect what you can do in a work setting. Your residual functional capacity is what you can still do despite your limitations. If you have more than one impairment, we will consider all of your impairments of which we are aware. We consider your capacity for various functions as described in the following paragraphs; (b) physical abilities, (c) mental impairments, and (d) other impairments. Residual functional capacity is a medical assessment. However, it may include descriptions (even your own) of limitations that go beyond the symptoms that are important in the diagnosis and treatment of your medical condition. Observations of your work limitations in addition to those usually made during formal medical examinations[,] may also be used. These descriptions and observations, when used, must be considered along with the rest of your medical record[,] to enable us to decide to what extent your impairment keeps you from performing particular work activities. This assessment of your remaining capacity for work is not a decision on whether you are disabled, but is used as the basis for determining the particular types of work you may be able to do despite your impairment. Then, using the guidelines in §§ 416.960 through 416.969, your vocational background is considered along with your residual functional capacity in arriving at a disability decision.

(b) *Physical abilities.* When we assess your physical abilities, (e.g., strength) we assess the severity of your impairment(s) and determine your residual functional capacity for work activity on a regular and continuing basis. We consider your ability to do physical activities such as walking, standing, lifting, carrying, pushing, pulling, reaching, handling and the evaluation of other physical functions. A limited ability to do these things may reduce your ability to do work.

(c) *Mental impairments.* When we assess your impairment because of mental disorders, we consider factors such as your ability to understand, to carry out and remember instructions, and to respond appropriately to supervision, co-workers and work pressures in a work setting.

(d) *Other impairments.* Some medically determinable impairments, such as skin impairments, epilepsy, and impairments of vision, hearing or other senses, postural and manipulative limitations, and environmental restrictions do not limit physical exertion. If you have this type of impairment, in addition to one that affects physical exertion, we consider both in deciding your residual functional capacity.

§ 416.946 Responsibility for assessing and determining residual functional capacity.

The State staff agency physicians or any other physicians designated by the Secretary are responsible for assuring that the agency makes a decision about your residual functional capacity. In cases where the State agency makes the disability determination, a State agency

V 45 A G 20 80 UMI

staff physician must assess residual functional capacity where it is required. This assessment is based on all of the medical evidence we have, including any other assessments that may have been provided by treating or examining physicans, consultative physicians, or any other physician designated by the Secretary. (See § 416.945.) For cases at the hearing or Appeals Council level, the responsibility for deciding your residual functional capacity rests with the administrative law judge or Appeals Council.

Vocational Considerations

§ 416.960 When your vocational background will be considered.

(a) *General.* We may consider vocational factors when you are applying for benefits based upon disability. We will never consider vocational factors in determining whether you are eligible for benefits based upon blindness.

(b) *Disability determinations in which vocational factors must be considered along with the medical evidence.* When we cannot decide whether you are disabled on medical evidence alone, we must use other evidence.

(1) We will use information from you about your age, education and work experience.

(2) We will consider your doctors' reports and hospital records as well as your statements and other evidence to determine your residual functional capacity and how it affects the work you can do. Sometimes, to do this, we will need to ask you to have special examinations or tests. (See § 416.917).

(3) If we find that you can no longer do the work you have done in the past, we will determine whether you can do other work (jobs) which exists in significant numbers in the nation's economy.

§ 416.961 Your ability to do work depends upon your residual functional capacity.

If you can do your previous work (your usual work or other applicable past work), we will determine that you are not disabled. However, if your residual functional capacity is not enough to enable you to do any of your previous work, we must still decide if you can do any other work. To do this, we consider your residual functional capacity, and your age, education, and work experience. Any work (jobs) that you can do must exist in significant numbers in the national economy (either in the region where you live or in several regions of the country). Sections 416.963–416.965 explain how we evaluate your age, education, and work experience when we are deciding whether or not you are able to do other work.

§ 416.962 If you have done only arduous unskilled physical labor.

If you have only a marginal education and work experience of 35 years or more during which you did arduous unskilled physical labor, and you are not working and are no longer able to do this kind of work because of a severe impairment(s), we will consider you unable to do lighter work, and therefore, disabled. However, if you are working or have worked despite your impairment(s) (except where the work is sporadic or is not medically advisable), we will review all the facts in your case, and we may find that you are not disabled. In addition, we will consider that you are not disabled if the evidence shows that you have training or past work experience which enables you to do substantial gainful activity in another occupation with your impairment, either on a full-time or a reasonably regular part-time basis.

Example.—B is a 60-year-old miner with a fourth grade education who has a life-long history of arduous physical labor. B says that he is disabled because of arthritis of the spine, hips, and knees, and other impairments. Medical evidence shows a combination of impairments and establishes that these impairments prevent B from performing his usual work or any other type of arduous physical labor. His vocational background does not show that he has skills or capabilities needed to do lighter work which would be readily transferable to another work setting. Under these circumstances, we will find that B is disabled.

§ 416.963 Your age as a vocational factor.

(a) *General.* "Age" refers to how old you are (your chronological age) and the extent to which your age affects your ability to adapt to a new work situation and to do work in competition with others. However, we do not determine disability on your age alone. We must also consider your residual functional capacity, education, and work experience. If you are unemployed because of your age and you can still do a significant number of jobs which exist in the national economy, we will find that you are not disabled. We explain age as a vocational factor in Appendix 2 of subpart P of Part 404 of this chapter. However, we will not apply these age categories mechanically in a borderline situation.

(b) *Younger person.* If you are under age 50, we generally do not consider that your age will seriously affect your ability to adapt to a new work situation. In some circumstances, however, we consider age 45 a handicap in adapting to a new work setting (see Rule 201.17 in Appendix 2 of subpart P of Part 404 of this chapter).

(c) *Person approaching advanced age.* If you are closely approaching advanced age (50–54), we will consider that your age, along with a severe impairment and limited work experience, may seriously affect your ability to adjust to a significant number of jobs in the national economy.

(d) *Person of advanced age.* We consider that advanced age (55 or over) is the point where age significantly affects a person's ability to do substantial gainful activity. If you are severely impaired and of advanced age and you cannot do medium work (see § 416.967(c)), you may not be able to work unless you have skills that can be used in (transferred to) less demanding jobs which exist in significant numbers in the national economy. If you are close to retirement age (60–64) and have a severe impairment, we will not consider you able to adjust to sedentary or light work unless you have skills which are highly marketable.

(e) *Information about your age.* We will usually not ask you to prove your age. However, if we need to know your exact age to determine whether you get disability benefits, we will ask you for evidence of your age.

§ 416.964 Your education as a vocational factor.

(a) *General.* "Education" is primarily used to mean formal schooling or other training which contributes to your ability to meet vocational requirements, for example, reasoning ability, communication skills, and arithmetical ability. However, if you do not have formal schooling, this does not necessarily mean that you are uneducated or lack these abilities. Past work experience and the kinds of responsibilities you had when you were working may show that you have intellectual abilities, although you may have little formal education. Your daily activities, hobbies, or the results of testing may also show that you have significant intellectual ability that can be used to work.

(b) *How we evaluate your education.* The importance of your educational background may depend upon how much time has passed between the completion of your formal education and the beginning of your physical or mental impairment(s) and by what you have done with your education in a work or other setting. Formal education that you completed many years before your impairment began, or unused skills and knowledge that were a part of your formal education, may no longer be useful or meaningful in terms of your ability to work. Therefore, the numerical grade level that you completed in school may not represent your actual educational abilities. These may be higher or lower. However, if there is no other evidence to contradict it, we will use your numerical grade level to determine your educational abilities. The term "education" also includes how well you are able to communicate in English since this ability is often acquired or improved by education. In evaluating your educational level, we use the following categories:

(1) *Illiteracy.* Illiteracy means the inability to read or write. We consider someone illiterate if the person cannot read or write a simple message such as instructions or inventory lists even though the person can sign his or her name. Generally, an illiterate person has had little or no formal schooling.

(2) *Marginal education.* Marginal education means ability in reasoning, arithmetic, and language skills which are needed to do simple, unskilled types of jobs. We generally consider that formal schooling at a 6th grade level or less is a marginal education.

(3) *Limited education.* Limited education means ability in reasoning, arithmetic, and language skills, but not enough to allow a person with these educational qualifications to do most of the more complex job duties needed in semi-skilled or skilled jobs. We generally consider that a 7th grade through the 11th grade level of formal education is a limited education.

(4) *High school education and above.* High school education and above means abilities in reasoning, arithmetic, and language skills acquired through formal schooling at a 12th grade level or above. We generally consider that someone with these educational abilities can do semi-skilled through skilled work.

(5) *Inability to communicate in English.* Since the ability to speak, read and understand English is generally learned or increased at school, we may consider this an educational factor. Because English is the dominant language of the country, it may be difficult for someone who doesn't speak and understand English to do a job, regardless of the amount of education the person may have in another language. Therefore, we consider a person's ability to communicate in English when we evaluate what work, if any, he or she can do. It generally doesn't matter what other language a person may be fluent in.

(6) *Information about your education.* We will ask you how long you attended school and whether you are able to speak, understand, read and write in English and do at least simple calculations in arithmetic. We will also consider other information about how much formal or informal education you may have had through your previous work, community projects, hobbies, and any other activities which might help you to work.

§ 416.965 Your work experience as a vocational factor.

(a) *General.* "Work experience" means skills and abilities you have acquired through work you have done which show the type of work you may be expected to do. Work you have already been able to do shows the kind of work that you may be expected to do. We consider that your work experience applies when it was done within the last 15 years, lasted long enough for you to learn to do it, and was substantial gainful activity. We do not usually consider that work you did 15 years or more before the time we are deciding whether you are disabled applies. A gradual change occurs in most jobs so that after 15 years it is no longer realistic to expect that skills and abilities acquired in a job done then continue to apply. The 15-year guide is intended to insure that remote work experience is not currently applied. If you have no work experience or worked only "off-and-on" or for brief periods of time during the 15-year period, we generally consider that these do not apply. If you have acquired skills through your past work, we consider you to have these work skills unless you cannot use them in other skilled or semi-skilled work that you can now do. If you cannot use your skills in other skilled or semi-skilled work, we will consider your work background the same as unskilled. However, even if you have no work experience, we may consider that you are able to do unskilled work because it requires little or no judgment and can be learned in a short period of time.

(b) *Information about your work.* Under certain circumstances, we will ask you about the work you have done in the past. If you cannot give us all of the information we need, we will try, with your permission, to get it from your employer or other person who knows about your work, such as a member of your family or a co-worker. When we need to consider your work experience to decide whether you are able to do work that is different from what you have done in the past, we will ask you to tell us about all of the jobs you have had in the last 15 years. You must tell us the dates you worked, all of the duties you did, and any tools, machinery, and equipment you used. We will need to know about the amount of walking, standing, sitting, lifting and carrying you did during the work day, as well as any other physical or mental duties of your job. If all of your work in the past 15 years has been arduous and unskilled, and you have very little education, we will ask you to tell us about all of your work from the time you first began working. This information could help you to get disability benefits.

§ 416.966 Work which exists in the national economy.

(a) *General.* We consider that work exists in the national economy when it exists in significant numbers either in the region where you live or in several other regions of the country. It does not matter whether—

(1) Work exists in the immediate area in which you live;

(2) A specific job vacancy exists for you; or

(3) You would be hired if you applied for work.

(b) *How we determine the existence of work.* Work exists in the national economy when there is a significant number of jobs (in one or more occupations) having requirements which you are able to meet with your physical or mental abilities and vocational qualifications. Isolated jobs that exist only in very limited numbers in relatively few locations outside of the region where you live are not considered "work which exists in the national economy". We will not deny you disability benefits on the basis of the existence of these kinds of jobs. If work that you can do does not exist in the national economy, we will determine that you are disabled. However, if work that you can do does exist in the national economy, we will determine that you are not disabled.

(c) *Inability to obtain work.* We will determine that you are not disabled if your residual functional capacity and vocational abilities make it possible for you to do work which exists in the national economy, but you remain unemployed because of—

(1) Your inability to get work;

(2) Lack of work in your local area;

(3) The hiring practices of employers;

(4) Technological changes in the industry in which you have worked;

(5) Cyclical economic conditions;

(6) No job openings for you;

(7) You would not actually be hired to do work you could otherwise do, or;

(8) You do not wish to do a particular type of work.

(d) *Administrative notice of job data.* When we determine that unskilled, sedentary, light, and medium jobs exist in the national economy (in significant numbers either in the region where you live or in several regions of the country),

we will take administrative notice of reliable job information available from various governmental and other publications. For example, we will take notice of—

(1) *Dictionary of Occupational Titles*, published by the Department of Labor;

(2) *County Business Patterns*, published by the Bureau of the Census;

(3) *Census Reports*, also published by the Bureau of the Census;

(4) *Occupational Analyses* prepared for the Social Security Administration by various State employment agencies; and

(5) *Occupational Outlook Handbook*, published by the Bureau of Labor Statistics.

(e) *Use of vocational experts and other specialists.* If the issue in determining whether you are disabled is whether your work skills can be used in other work and the specific occupations in which they can be used, or there is a similarly complex issue, we may use the services of a vocational expert or other specialist. We will decide whether to use a vocational expert or other specialist.

§ 416.967 Physical exertion requirements.

To determine the physical exertion requirments of work in the national economy, we classify jobs as "sedentary," "light," "medium," "heavy," and "very heavy." These terms have the same meaning as they have in the *Dictionary of Occupational Titles*, published by the Department of Labor. In making disability determinations under this subpart, we use the following definitions:

(a) *Sedentary work.* Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met.

(b) *Light work.* Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. To be considered capable of performing a full or wide range of light work, you must have the ability to do substantially all of these activities. If someone can do light work, we determine that he or she can also do sedentary work, unless there are additional limiting factors such as loss of fine dexterity or inability to sit for long periods of time.

(c) *Medium work.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. If someone can do medium work, we determine that he or she can also do sedentary and light work.

(d) *Heavy work.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. If someone can do heavy work, we determine that he or she can also do medium, light, and sedentary work.

(e) *Very heavy work.* Very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying of objects weighing 50 pounds or more. If someone can do very heavy work, we determine that he or she can also do heavy, medium, light, and sedentary work.

§ 416.968 Skill requirements.

In order to evaluate your skills and to help determine the existence in the national economy of work you are able to do, occupations are classified as unskilled, semi-skilled, and skilled. In classifying these occupations, we use materials published by the Department of Labor. When we make disability determinations under this subpart, we use the following definitions:

(a) *Unskilled work.* Unskilled work is work which needs little or no judgment to do simple duties that can be learned on the job in a short period of time. The job may or may not require considerable strength. For example, we consider jobs unskilled if the primary work duties are handling, feeding and offbearing (that is, placing or removing materials from machines which are automatic or operated by others), or machine tending, and a person can usually learn to do the job in 30 days, and little specific vocational preparation and judgment are needed. A person does not gain work skills by doing unskilled jobs.

(b) *Semi-skilled work.* Semi-skilled work is work which needs some skills but does not require doing the more complex work duties. Semi-skilled jobs may require alertness and close attention to watching machine processes; or inspecting, testing or otherwise looking for irregularities; or tending or guarding equipment, property, materials, or persons against loss, damage or injury; or other types of activities which are similarly less complex than skilled work, but more complex than unskilled work. A job may be classified as semi-skilled where coordination and dexterity are necessary, as when hands or feet must be moved quickly to do repetitive tasks.

(c) *Skilled work.* Skilled work requires qualifications in which a person uses judgment to determine the machine and manual operations to be performed in order to obtain the proper form, quality, or quantity of material to be produced. Skilled work may require laying out work, estimating quality, determining the suitability and needed quantities of materials, making precise measurements, reading blueprints or other specifications, or making necessary computations or mechanical adjustments to control or regulate the work. Other skilled jobs may require dealing with people, facts, or figures or abstract ideas at a high level of complexity.

(d) *Skills that can be used in other work (transferability).* (1) *What we mean by transferable skills.* We consider you to have skills that can be used in other jobs, when the skilled or semi-skilled work activities you did in past work can be used to meet the requirements of skilled or semi-skilled work activities of other jobs or kinds of work. This depends largely on the similarity of occupationally significant work activities among different jobs.

(2) *How we determine skills that can be transferred to other jobs.* Transferability is most probable and meaningful among jobs in which—

(i) The same or a lesser degree of skill is required;

(ii) The same or similar tools and machines are used; and

(iii) The same or similar raw materials, products, processes, or services are involved.

(3) *Degrees of transferability.* There are degrees of transferability of skills ranging from very close similarities to remote and incidental similarities among jobs. A complete similarity of all three factors is not necessary for transferability. However, when skills are so specialized or have been acquired in such an isolated vocational setting (like many jobs in mining, agriculture, or fishing) that they are not readily usable in other industries, jobs, and work settings, we consider that they are not transferable.

§ 416.969 Listing of Medical-Vocational Guidelines in Appendix 2 of Subpart P of Part 404 of this chapter.

The *Dictionary of Occupational Titles* includes information about jobs (classified by their exertional and skill requirements) that exist in the national economy. Appendix 2 provides rules using this data reflecting major functional and vocational patterns. We apply these rules in cases where a person is not doing substantial gainful activity and is prevented by a severe medically determinable impairment from doing vocationally relevant past work. The rules in Appendix 2 do not cover all possible variations of factors. Also, as we explain in § 200.00 of Appendix 2, we do not apply these rules if one of the findings of fact about the person's vocational factors and residual functional capacity is not the same as the corresponding criterion of a rule. In these instances, we give full consideration to all relevant facts in accordance with the definitions and discussions under vocational considerations. However, if the findings of fact made about all factors are the same as the rule, we use that rule to decide whether a person is disabled.

Substantial Gainful Activity

§ 416.971 General.

The work that you have done during any period in which you believe you are disabled may show that you are able to do work at the substantial gainful activity level. If you are able to engage in substantial gainful activity, we will find that you are not disabled. (We explain the rules for persons who are statutorily blind in § 416.984.) Even if the work you have done was not substantial gainful activity, it may show that you are able to do more work than you actually did. We will consider all of the medical and vocational evidence in your file to decide whether or not you have the ability to engage in substantial gainful activity.

§ 416.972 What we mean by substantial gainful activity.

Substantial gainful activity is work activity that is both substantial and gainful:

(a) *Substantial work activity.* Substantial work activity is work activity that involves doing significant physical or mental activities. Your work may be substantial even if it is done on a part-time basis or if you do less, get paid less, or have less responsibility than when you worked before.

(b) *Gainful work activity.* Gainful work activity is work activity that you do for pay or profit. Work activity is gainful if it is the kind of work usually done for pay or profit, whether or not a profit is realized.

(c) *Some other activities.* Generally, we do not consider activities like taking care of yourself, household tasks, hobbies, therapy, school attendance, club activities, or social programs to be substantial gainful activity.

§ 416.973 General information about work activity.

(a) *The nature of your work.* If your duties require use of your experience, skills, supervision and responsibilities, or contribute substantially to the operation of a business, this tends to show that you have the ability to work at the substantial gainful activity level.

(b) *How well you perform.* We consider how well you do your work when we determine whether or not you are doing substantial gainful activity. If you do your work satisfactorily, this may show that you are working at the substantial gainful activity level. If you are unable, because of your impairments, to do ordinary or simple tasks satisfactorily without more supervision or assistance than is usually given other people doing similar work, this may show that you are not working at the substantial gainful activity level. If you are doing work that involves minimal duties that make little or no demands on you and that are of little or no use to your employer, or to the operation of a business if you are self-employed, this does not show that you are working at the substantial gainful activity level.

(c) *If your work is done under special conditions.* Even though the work you are doing takes into account your impairment, such as work done in a sheltered workshop or as a patient in a hospital, it may still show that you have the necessary skills and ability to work at the substantial gainful activity level.

(d) *If you are self-employed.* Supervisory, managerial, advisory or other significant personal services that you perform as a self-employed individual may show that you are able to do substantial gainful activity.

(e) *Time spent in work.* While the time you spend in work is important, we will not decide whether or not you are doing substantial gainful activity only on that basis. We will still evaluate the work to decide whether it is substantial and gainful regardless of whether you spend more time or less time at the job than workers who are not impaired and who are doing similar work as a regular means of their livelihood.

(f) *Possible effect on income and resource levels.* Your earnings, including earnings from work done during a trial work period, will be considered under the income and resource provisions in Subparts K and L of this part to determine whether or not your earnings cause you to exceed the limitations on income or resources under the Supplemental Security Income Program.

§ 416.974 Evaluation guides if you are an employee.

(a) *General.* We use several guides to decide whether you have done substantial gainful activity.

(1) *Your earnings may show you have done substantial gainful activity.* The amount of your earnings from work you have done may show that you have engaged in substantial gainful activity. Generally, if you worked for substantial earnings, this will show that you are able to do substantial gainful activity. On the other hand, the fact that your earnings are not substantial will not necessarily show that you are not able to do substantial gainful activity. Earnings from work that you were forced to stop after a short time because of your impairment will not show that you are able to do substantial gainful activity.

(2) *We consider only the amounts you earn.* We do not consider any income not directly related to your productivity when we decide whether you have done substantial gainful activity. If your earnings are being subsidized, the amount of the subsidy is not counted when we determine whether or not your work is substantial gainful activity. Thus, where work is done under special conditions, we only consider the part of your pay which you actually "earn". For example, where a handicapped person does simple tasks under close and continuous supervision, we would not determine that the person worked at the substantial gainful activity level only on the basis of the amount of pay. An employer may set a specific amount as a subsidy after figuring the reasonable value of the employee's services. If your work is subsidized and your employer does not set the amount of the subsidy or does not adequately explain how the subsidy was figured, we will investigate to see how much your work is worth.

(3) *If you are working in a sheltered or special environment.* If you are working in a sheltered workshop, you may or may not be earning the amounts you are being paid. The fact that the sheltered workshop or similar facility is operating at a loss or is receiving some charitable contributions or governmental aid does not establish that you are not earning all you are being paid. Since persons in military service being treated for severe impairments usually continue to receive full pay, we evaluate work activity in a therapy program or while on limited duty by comparing it with similar work in the civilian work force or on the basis of reasonable worth of the work, rather than on the actual amount of the earnings.

(4) *If you have special work-related expenses.* If you have out-of-the-ordinary expenses in connection with your work and because of your impairment (for example, you may require special transportation), we will deduct these from your earnings if they exceeded the normal work-related expenses you would have if you were not impaired. When we decide if your work is substantial gainful activity, however, we do not deduct expenses for those things (e.g. medication or equipment) which you need even when you are not working.

(b) *Earnings guidelines.* If you are an employee, we first consider the criteria in paragraph (a) of this section, and then the guides in paragraphs (b) (1), (2), and (3) of this section.

(1) *Earnings that will ordinarily show that you have engaged in substantial gainful activity.* We will consider that your earnings from your work activities as an employee show that you have engaged in substantial gainful acitivity if—

(i) Your earnings averaged more than $200 a month in calendar years prior to 1976;

(ii) Your earnings averaged more than $230 a month in calendar year 1976;

(iii) Your earnings averaged more than $240 a month in calendar year 1977;

(iv) Your earnings averaged more than $260 a month in calendar year 1978; or

(v) Your earnings averaged more than $280 a month in calendar year 1979; or

(vi) Your earnings averaged more than $300 a month in calendar years after 1979.

(2) *Earnings that will ordinarily show that you have not engaged in substantial gainful activity.* We will generally consider that the earnings from your work as an employee will show that you have not engaged in substantial gainful activity if—

(i) Your earnings averaged less than $130 a month in calendar years before 1976;

(ii) Your earnings averaged less than $150 a month in calendar year 1976;

(iii) Your earnings averaged less than $160 a month in calendar year 1977;

(iv) Your earnings averaged less than $170 a month in calendar year 1978; or

(v) Your earnings averaged less than $180 a month in calendar year 1979; or

(vi) Your earnings averaged less than $190 a month in calendar years after 1979.

However, if you are working in a sheltered workshop or a comparable facility especially set up for severely impaired persons, your earnings and activities will ordinarily establish that you have not done substantial gainful activity if your average earnings are not greater than $200 a month in calendar years prior to 1976, $230 a month in calendar year 1976, $240 a month in calendar year 1977, $260 a month in calendar year 1978, $280 a month in calendar year 1979, $300 a month in calendar years after 1979.

However, if there is evidence showing that you may have done substantial gainful activity, we will apply the criteria in paragraph (b)(3) of this section regarding comparability and value of services.

(3) *Earnings that are not high or low enough to show whether you engaged in substantial gainful activity.* If your earnings, on the average, are between the amounts shown in paragraphs (b)(1) and (2) of this section, we will generally consider other information in addition to your earnings, such as whether—

(i) Your work is comparable to that of unimpaired people in your community who are doing the same or similar occupations as their means of livelihood; taking into account the time, energy, skill, and responsibility involved in the work, or

(ii) Your work, although significantly less than that done by unimpaired people, is clearly worth the amounts shown in paragraph (b)(1) of this section, according to pay scales in your community.

§ 416.975 Evaluation guides if you are self-employed.

(a) *If you are a self-employed person.* We will consider your activities and their value to your business to decide whether you have engaged in substantial gainful activity if you are self-employed. We will not consider your income alone since the amount of income you actually receive may depend upon a number of different factors like capital investment, profit sharing agreements, etc. However, income from activities that you were forced to stop after a short time because of your impairment will not show that you are able to do substantial gainful activity. We will evaluate your work activity on the value to the business of your services regardless of whether you receive an immediate income for your services. We consider that you have engaged in substantial gainful activity if—

(1) Your work activity, in terms of factors such as hours, skills, energy output, efficiency, duties, and responsibilities, is comparable to that of unimpaired individuals in your community who are in the same or similar businesses as their means of livelihood;

(2) Your work activity, although not comparable to that of unimpaired individuals, is clearly worth the amount shown in § 416.974(b)(1) when considered in terms of its value to the business, or when compared to the salary that an owner would pay to an employee to do the work you are doing; or

(3) You render services that are significant to the operation of the business and receive a substantial income from the business.

(b) *What we mean by significant services.* (1) If you are not a farm landlord and you operate a business entirely by yourself, any services that you render are significant to the business. If your business involves the services of more than one person, we will consider you to be rendering significant services if you contribute more than half the total time required for the management of the business, or you render management services for more than 45 hours a month regardless of the total management time required by the business.

(2) If you are a farm landlord, that is, you rent farm land to another, we will consider you to be rendering significant services if you materially participate in the production or the management of the production of the things raised on the rented farm. (See § 404.1053 of this chapter for an explanation of "material participation".) If you were given social security earnings credits because you materially participated in the activities of the farm and you continue these same activities, we will consider you to be rendering significant services.

(c) *What we mean by substantial income.* We will consider the income you receive from a business, after we deduct from gross income the reasonable value of any significant amount of unpaid help and any soil bank payments that were included as farm income, as well as normal business expenses, to be substantial if—

(1) Your net income from the business averages more than the amounts described in § 416.974(b)(1); or

(2) Your net income from the business averages less than the amounts described in § 416.974(b)(1) but the livelihood which you get from the business is either comparable to what it was before you became disabled or is comparable to that of unimpaired self-employed persons in your community who are in the same or similar businesses as their means of livelihood.

Blindness

§ 416.981 Meaning of blindness as defined in the law.

We will consider you blind under the law for payment of supplemental security income benefits if we determine that you are statutorily blind. Statutory blindness is central visual acuity of 20/200 or less in the better eye with the use of a correcting lens. An eye which has a limitation in the field of vision so that the widest diameter of the visual field subtends an angle no greater than 20 degrees is considered to have a central visual acuity of 20/200 or less.

§ 416.982 Blindness under a State plan.

We shall also consider you blind for the purposes of payment of supplemental security income benefits if—

(a) You were found to be blind as defined under a State plan approved under title X or XVI of the Social Security Act, as in effect for October 1972;

(b) You received aid under the State plan because of your blindness for the month of December 1973; and

(c) You continue to be blind as defined under the State plan.

§ 416.983 How we evaluate statutory blindness.

We will find that you are blind if you are "statutorily blind" within the meaning of § 416.981. For us to find that you are statutorily blind, it is **not** necessary—

(a) That your blindness meet the duration requirement; or

(b) That you be unable to do any substantial gainful activity.

§ 416.984 If you are statutorily blind and still working.
